

Wizard 935

Chapter 935: Branding! Bloodline and the Path to Limit! (3)

Dinos' eyes lit up. He was not joking.

The Blood Knight slammed the table, stood up, and said loudly, "Agreed. Since we've embarked on this path, we must walk it to the end without any hesitation. We must learn from our commander and dare to be the first in the world and open a path for our juniors!"

"I don't know when the commander will come. We can start the research on this Branded Knight matter first!" said the Black Knight.

"What should we call such an exciting plan?" asked the Silver Dragon Knight.

As a novice legendary knight, he was actually able to participate in such a grand plan that could change the world and the structure of the transcendent. It made him feel like he was dreaming!

"Extreme Path Plan...Let us, who have always been shackled by the bloodline, see where the limits of the bloodline path are?" said Dinos.

"That's right, it matches the legendary title of the commander, [Supreme knight].

"The transcendent path of a knight should be:

Bloodline and Maximum Path!"

...

On this day, in the Realm of Ice.

Snow Capital.

At the bottom of the cold pond.

On the desk of the Arctic Wizard, a quill suddenly moved and wrote on the letter.

[The Dark Ancient Tower has appeared. The coordinates points to Withered Valley.]

"If I want to advance to the primordial soul realm within 300 years, I will have to take the risk and go to the Dark Ancient Tower to take a gamble. Otherwise, the chances are slim... But if I leave Snow Capital, the Ice Phoenix might come and cause trouble. My Eye of the Ice Emperor... Forget it, if I don't enter the primordial soul realm, I'll still be an ant. If it's gone, then so be it!"

His expression was firm and he walked out of the wizard tower. He said to his subordinates, "I'll be gone for a while. Look after the Snow Capital and the cold pond."

"Alright, Lord Gerd. Don't worry. With the three of us guarding Snow Capital, there won't be any problems!" said a fourth-circle wizard.

The Arctic Wizard hurriedly left the underground cold pond.

These three brothers were quite famous in this area. They were known as the Hades Three Brothers.

They practiced rare group attack spells. When the three brothers worked together, they could also fight even a fifth-circle wizard.

Secret Room Number 4.

Inside the ice sculpture.

Levi was like an old monk in meditation, but also like a hibernating turtle, motionless.

All of his internal organs, except for his heart, had been frozen. Even his heart was only trembling slightly as if it could be extinguished at any moment.

Under such circumstances, the other wizards would have died long ago.

However, Levi's consciousness was immersed in the mysterious Divine Ring Tower.

In the starry sky within the Divine Tower.

"200 drops of spiritual force dew... If it were any other wizard, they would have already passed the [transition period]. However, I still need 10 points to break through the transition period in less than three years. Even the Children of the Elements can't compare to my speed."

"Also, my spiritual force dew seems to be different from other wizards."

For normal wizards, their spiritual force dew was usually of a single color.

As for Levi, he clearly represented the four colors of Earth, Fire, Wind, and Water.

There were also other colors. He could recognize three of them. They should represent the three mutated elements of frost, lightning, and bronze.

In other words, he had seven colors.

Other than that, there were many other unknown colors.

"This should be related to the Aether breathing technique that I cultivated. Aether includes Earth, Fire, Wind, and Water, and Earth, Fire, Wind, and Water combine to produce lightning, frost, bronze, and so on. These three were the only known mutated elements. Perhaps there are still undiscovered mutated elements."

"In any case, no matter what element it is, it is the same for me. This is the power of the Aether Dominance!"

"That's why, to others, the Children of Chaos are the worst talents, but to me, the Children of Chaos contains infinite possibilities!"

"In fact, in the distant future, if I want to advance to a higher realm, I might even need to possess the talent of a Children of Chaos."

"After all, Chaos is the original form of the universe. Earth, Fire, Wind, Water, and everything in the universe is born from Chaos!"

After Levi finished his daydream, he continued to condense the last ten drops of spiritual force dew.

"I rented it for five years at the start. It's a bit of a waste. When the time comes, I'll have to ask the staff if they can refund a portion of my rent. If it is possible, then I can get back tens of thousands of Aether Stones..."

Days passed.

Snow Capital.

At Emperor Mu's residence.

The sound of fighting could be heard.

Bang!

Emperor Mu suddenly flew out and hit the wall of the training room.

Elsa looked at him helplessly and said, "Stop fighting. You can't beat Harvey."

"I'm a Saint Ape Knight. How can I not be able to defeat an Ice Monkey?" Emperor Mu stood up and rubbed his wounds. He was obviously not convinced.

"Just a little more and my new move will be born. Again, Harvey, don't hold back!" Emperor said to the Iceberg Giant Ape in front of him.

The Iceberg Giant Ape looked at Emperor Mu and then at Elsa.

It was so hard to be a monkey!

"Commander has been in seclusion for three years. I really want to return to the human world." Elsa suddenly said.

"I've also left the human world for more than a hundred years..." Emperor My recalled the years when he was hunted down by the Church of Storm, and his heart was already calm.

At this moment, the alarm in the city suddenly sounded, and the sound of the activation of the array resounded in the sky.

"This is... a dark wizard invasion?" Emperor Mu's expression changed and he immediately reacted.

"Let's go and take a look," said Elsa.

If the situation became serious, they would have to go to the City Lord's mansion and call their commander to evacuate Snow Capital!

At this moment.

In the sky above Snow Capital.

The fourth-circle defensive formation that covered the entire city had been activated, protecting the entire Snow Capital.
