

Wizard 940

Chapter 940: Dragon and Whale, Battle Phoenix! (3)

Because he was mostly cultivating as a body-refining wizard, the Furious Whale Staff was mostly used as a melee Wizard Tool.

This staff was forged from the level 5 water elemental metal [Deep Sea Blue Iron]. It was extremely sturdy, and unless it encountered a primordial soul Wizard Tool, it would not be damaged.

It was the most suitable to use it to smash people.

However, this did not mean that he could not use the spell within.

There were a few fifth-circle spells in the staff, and there were even a bunch of fifth-circle spells and below.

It could be considered a top-grade among fifth-circle Wizard Tools.

Levi was also shocked when he saw this.

"This Salman is actually so strong. If I had known that the Tower Master had such a powerful backer, why would I be afraid of Whale Song Island?"

This Salman was Tower Master Herman's teacher!

He was the first-generation white-robed wizard who had left the outer sea region a long time ago to take up a post in the Star Tower!

The Ice Phoenix's expression was grave.

She had thought that they were just a bunch of motley crew, but who would have thought that the tiny Eye of the Ice Emperor would actually have Levi and Salman, the two dangerous wizards?

She even suspected that this was a trap set by the Arctic Wizard.

However, the Arctic Wizard had not come yet, which made her determined to take down those two.

"Although I am of the Frost Element, I can still barely control a water element Wizard Tool. After all, Frost is a mutation of Water and Wind! This Wizard Tool is mine!" She was secretly delighted.

With this fifth-circle Wizard Tool, it would be even more foolproof to deal with that old geezer Arctic!

The Ice Flame Spear was brandished, turning into a sky full of arrows of ice flames, shooting out in unison!

On the other side, Salman was clearly using his staff to cast an even more powerful spell. The Ice Phoenix had to interrupt him.

However, a blood-red figure shuttled through the cold flames, waving a red flame sword and blocking all these attacks.

Not only that, but Levi also shot toward the Ice Phoenix and slashed out with his Destruction Sword Qi!

Boom!

The power of this strike was many times stronger than the one he had used to kill the fourth-circle wizard!

The Ice Phoenix's expression changed slightly. She waved her hand, and the cold flames formed a giant blue bird that protected her!

In the next moment, the sword qi actually tore the giant bird apart. However, the Ice Phoenix's body lit up again. It was obvious that there was more than one layer of protection.

"Interesting. Two fourth-circle wizards combined are much stronger than the Hades Three Brothers."

The Ice Phoenix sneered and blocked Levi's sword qi.

"I'll let you know how big the difference between a fifth-circle and a fourth-circle is!"

Her hands were covered with ice feathers, as if she had transformed into a human-shaped Frost Flame Ice Bird, tearing apart Levi's sword qi river with her bare hands!

The Ice Phoenix went against the flow of the sword qi, and the cold flames formed a huge palm that grabbed Levi.

Levi's Danger Perception flashed wildly as he activated Scarlet Shadow to dodge.

"After I escape this time, I must find someone to appraise that fifth-circle Wizard Tool... Otherwise, I would have no chance of retaliating against a fifth-circle wizard!"

Up until now, only Salman's staff had dealt damage to the woman.

The other attacks were like tickles.

Just as he dodged the Icy Flame Palm, the Ice Phoenix's smug expression appeared in front of Levi.

"Divine Ice Spike!" She spat.

A blue light burst out.

In the blink of an eye, the corpse demon stood in front of Levi and spat out all the black poisonous fire stored in its body without holding back!

Wherever the Divine Ice Spike passed, the black poisonous flames withered and scattered.

The poisonous fire that was once invincible was now so vulnerable!

Psst.

The corpse demon's body was pierced through, and a huge hole appeared.

Immediately after, the Divine Ice Spike pierced through Levi's Metal Voodoo and Golden Scale Defense.

Bang!

Levi exploded into a blood fog.

He quickly fled and gathered in the distance.

His expression was solemn as he put away the corpse demon.

The Ice Phoenix was also surprised to see Levi use such a strange method to take her fatal blow.

In the next moment, her expression changed as a sense of crisis struck her.

When she was fighting Levi, a huge mouth of the Abyss jumped out from the bottom and burst out with a huge force that even she could not resist, swallowing her into its stomach.

It was a huge blue beast that looked like a whale or a dragon. It had a dragon beard and its body was illusory.

Fifth-circle spell, Whale Fall to Ruins!

This was one of the most powerful fifth-circle spells in the Furious Whale Staff.

During the creation of the Furious Whale Staff, the artifact spirit of a fifth-circle transcendent creature, the Ancient Dragon King Whale, was sealed.

When the Artifact Spirit cast the Whale Fall to the Ruins spell, its power was not inferior to that of a fifth-circle wizard.

However, every time it was used, it would consume the power that the artifact spirit had accumulated for a long time, so it could not be used frequently.

"Sir, please retreat. This spell can only trap her for a moment. I hope you can escape successfully. See you in the future!" Salman's voice sounded.

"Bon voyage! I'll definitely visit you another day!" Seeing this, Levi immediately ignited the Scarlet Dragon Seed, and his scarlet cape fluttered in the wind!

In an instant, a blood-red tornado flew into the sky and disappeared in an instant.

"Good move," Salman exclaimed in admiration as he rode on his staff.

He slapped his staff, and it transformed into a slender swordfish. Its streamlined body was obviously good at escaping.

Whoosh!

The swordfish's mouth tore open a crack and disappeared into the void.

Fifth-circle spell, Swordfish Void Travel!

In the blink of an eye, the two fourth-circle wizards used their own abilities and left the place.

The Icy Flame Spear pierced through the belly of the Giant Dragon Whale, and blue light burst out.

With a boom, the Giant Whale exploded and scattered into water element light spots that filled the sky.
