

Wizard 948

Chapter 948: Two Ways for Knights to Advance! Two Potions! (1)

The Ancient Saint plane.

Levi's eyes were filled with surprise.

Behind the two evolution and advancement options, there was dense information.

All of this information was translated into words that Levi could understand.

[Evolution: 2 types of Level 4 transcendent creature bloodline crystals (1) Transcendent elemental attribute focuses on defense. The transcendent elemental attribute is arbitrary. (2) Contains the bloodline factor of creatures above the Legendary level and cannot be replicated with existing bloodline factors. 1 stalk of Bronze Whisker Grass... 100 grams of pure water. Note: All the above-mentioned materials can also be replaced by the fusion of breathing techniques of the same level and dimension.]

[Advancement: Level 4 mixed-blood dragon clan bloodline essence (Water/Earth), 100 grams of dragon scales (Water/Earth), 13 dragon scales (Water/Earth), 1 level 3 mixed-blood dragon clan soul crystal... 1 Dragon Saliva Grass, 100 grams of pure water.]

Apart from the specific ingredients and formulas, there was also the refinement method and some things to take note of.

Levi looked at the information. The excitement in his heart was self-evident.

"Evolution can increase the quality of the breathing technique, but it can't increase its level.

"Advancement means breaking a certain breathing technique's limit and upgrading it. It's just a simple increase in level and doesn't involve an increase in the quality of the breathing technique!"

"Among the materials needed for evolution, the main material is the transcendent creature Bloodline Crystal that contains the bloodline factor of a Legendary or Mythical level creature.

"This is a bloodline material that is even more advanced than bloodline essence. Generally speaking, bloodline essence could be cycled and refined, and to refine bloodline crystal... the price is the life of a transcendent creature!

"The bloodline crystal must be one level higher than my current level. The legendary bloodline factor contained in it cannot be replicated by the Black Snake and Golden Horn Beast that form the Golden Snake.

"Only different types of bloodline factors that focus on defense can fuse with the golden snake and mutate, further perfecting my defense dimension!

"There is actually no fixed standard for the panel's "focus on defense". It was fine as long as the defense attribute was the most outstanding among the six dimensions of this transcendent creature.

"It's very simple to find such a transcendent creature. The six dimensions of the Knight Breathing Technique have already told me the answer. For example, the Elephant Turtle Breathing Technique I learned previously belongs to the defensive dimension. Then, I can just find a transcendent creature that contains the Elephant Turtle Bloodline.

"Turtles, crocodiles, crustaceans, and a portion of the Dragon Clan can be called their elemental attributes.

"Of course, if there is a defensive dimension breathing technique of the same level as level 14, it can evolve without the above conditions. It is equivalent to the mutation of my previous breathing technique. However, this would require a long cultivation process.

"Compared to Evolution, the requirements for Advancement are much lower. I only need the mixed-blood dragon clan bloodline essence and the corresponding materials.

"A level 3 soul crystal is from extracting the soul of a mixed-blood dragon clan and compressing it through special methods to form a substantial crystal.

"I'll leave this mission to Leon. He's a Soul Master."

Levi breathed a sigh of relief when he understood the rules.

"Finally, I don't need to fuse the breathing techniques anymore."

He could still take the path of breaking the breathing technique limit, but it was not the only path.

The panel had already penetrated the essence of the breathing technique and gave Levi the Potion Recipe that could replace the breathing technique.

In the past years, Levi had always wanted to study potions that could help knights to advance.

He had also specially learned a lot of wizard research knowledge in this area.

There were books about how to create a potion, such as Introduction to Potions for Wizard Advancement and the Principles of Breakthroughs and Potions.

Unexpectedly, it was accompanied by the Maximum of the Golden Snake Breathing Technique.

The panel was updated again, which solved Levi's dilemma.

"Perhaps this is the normal way for a knight to advance. Previously, I used the breathing technique as a breakthrough point. Instead, the panel made changes to adapt to my strength at that time... Relying on a large number of low-level breathing techniques and mortal beast-level secret medicine ingredients to stimulate a little bloodline in my body as a catalyst. Then, it strengthened and fused these bloodlines, continuously increasing the level of the bloodline. In other words, breaking through the limit or even directly mutating, giving birth to an even stronger mutant bloodline!"

Levi grew up by snowballing in this way.

But now, his knowledge reserves, horizons, and realm were different from when he was a fledgling.

The subsequent advancement of a knight definitely could not always rely on the breathing technique.

Because of the Dusk Holy Temple, Levi had almost gathered half of the human breathing technique.

Even if some were not collected properly, they would not be much different.

It would be unrealistic if he needed a breathing technique to break through the limit in the future.

Moreover, every time the breathing technique mutated and fused, he needed a breathing technique of the same level. It would be fine if it was at a lower level before, but it would be fine if he spent a few years.

Now, as the level of the breathing technique increased, his Proficiency cultivation became slower and slower. Every time, he would rely on the breathing technique of the same level to mutate. That would be an extremely time-consuming thing.

Therefore, he urgently needed a new method of advancement, which was the Knight Potion system that he had once envisioned!

At that time, Levi's strength and knowledge were insufficient. Now, with the help of the panel, he had already seen the potion formula for the upgrade of the Golden Snake Breathing Technique.
