

Wizard 949

Chapter 949: Two Ways for Knights to Advance! Two Potions! (2)

Levi looked at the panel and said in a low voice, "Whether I have the ingredients for these formulas or not, they are all within my knowledge range. In other words, the panel still can't give me knowledge out of thin air. It's a sorting and utilization of the knowledge I already have.

"Therefore, I previously speculated that the panel was constantly evolving with my strength and knowledge reserves. As expected!"

"From now on, I can reverse-engineer the Advancement Potion according to my advancement formula. This way, the ordinary knights of the Dusk Holy Temple can gradually reach the realm of the Original Bloodline represented by the breathing technique through the Advancement Potion!"

In other words, there were two ways for knights to improve their strength. One was vertical, and the other was horizontal.

Longitudinal, consume Advancement Potion, break through the maximum, break through the bloodline shackles, and advance continuously!

Consuming the Evolution Potion would directly fuse and mutate many bloodlines, perfecting the bloodline itself, just like what Levi was doing now. This could not directly increase Levi's level, but it could allow Levi to always be superior to others at the same level. It could even allow Levi to kill a Fourth-Circle Wizard at the Second Transformation of the Blood Source realm.

That was because not only was he in the six dimensions, but the breathing techniques in each dimension had also been optimized twice based on legendary.

This allowed his bloodline factor to surpass the Legendary level, reaching the Mythical or Quasi-Mythical level. It might even surpass the Mythical level!

For example, Levi suspected that the Crimson Emperor Dragon's breathing technique was beyond Mythical level!

Generally speaking, the evolution of a knight had very high requirements. The most important limitation was the conflict of many bloodlines!

Only by solving this problem could they talk about the fusion mutation of bloodlines.

Levi skipped this problem because of the proficiency panel.

For other knights, unless they were bloodline modification geniuses like the Hundred Beast Berserk Witch, ordinary people could only accommodate one or two extraordinary bloodlines at most. It was very difficult for them to evolve.

"However, just the increase in strength brought about by the longitudinal advancement of knights is enough."

"From now on, I can launch the Potion Sequence that will eventually reach the Primordial Ancestor realm for different breathing techniques."

"If this idea can succeed, the Blood Knight, Black Knight, and Emperor Mu, who were born with Legendary Bloodline Factor, in theory, can advance to Level 9! In other words, they would be at the level of a Grand Wizard or demigod!

"However, this should be their upper limit and the end of their Bloodline Path!

"After all, the Primordial Ancestor is probably in this realm. No matter how strong a knight is, as long as they do not evolve, it is impossible for them to surpass the Primordial Ancestor!

"This is the greatest limitation of the Bloodline Path. If you want to change it, you have to be like me and undergo bloodline fusion, take the Evolution Potion, and sublimate the bloodline level. The Legendary Bloodline Factor will transform to the Mythical level. Only then can you advance further!"

At this moment, Levi had a feeling of enlightenment. He had gradually seen the future of the knight path. What came next was continuous practice and refinement!

"To me, if I want to evolve the Golden Snake Breathing Technique, I still lack any two Level 4 bloodline crystals that contain Legendary Bloodline Factors. I have to focus on defense.

"The Level 4 creature I have is the Ground-Drilling Earthworm. It contains the Immortal Banyan Dragon bloodline of the Earth elemental affinity. In terms of defense, it is not outstanding. Instead, it focuses on physique. It is not a problem for it to be used as an Advancement Potion ingredient, but its evolution is not very good.

"The main ingredient for the Advancement Potion is the water-element bloodline essence... As long as I spend time looking for it, I will definitely be able to find a water-element Level 4 mixed-blood dragon

clan on the Ancient Saint plane. As for Level 4 dragon scales and Level 3 soul crystals, it won't be difficult.

"It's definitely not a problem to advance in a short period of time. The problem is that after advancing, the material requirements for evolution will correspondingly increase by a level. At that time, it won't be Level 4, but Level 5!"

Ultimately, Levi decided:

He would advance first before evolving!

If the quality was insufficient, he would make up for it with levels!

On one hand, he urgently needed to increase his strength to deal with the changes in the human world.

On the other hand, according to his transcendent creature knowledge, the higher the level of a transcendent creature, the higher the possibility that it might contain a Legendary bloodline.

Therefore, the difficulty of finding a legendary bloodline among Level 4 transcendent creatures was not much easier than directly finding a Level 5 transcendent creature!

Therefore, it was better to level up first before thinking about evolution.

After figuring this out, Levi immediately activated the Emperor's Messenger to the three kings and the Senior State Assembly.

He wanted to use the power of the Ancient Dragon Empire to search for Ancient Beasts with water element affinity on the Ancient Saint plane!

Especially Lord Cang. He lived in the ocean, so he had a higher chance of encountering Ancient Beasts with water element affinity.

A few days later.

In Lord Cang's Hall, Feather King's Hall, and other places... the three kings and the Senior State Assembly had all received Levi's orders.

"Lord Emperor is going to start a crusade against the Ancient Beasts."

"Hurry up and find traces of the Ancient Beasts!"

For a moment.

The Ancient Beasts that had once made the Lizardmen of the Ancient Dragon Empire pale in fear became prey.

The Feather Clan and Wing Clan experts left the city-state and patrolled the various mountains and lakes of the Ancient Saint Plane.

In the sea, Lord Cang hurriedly mobilized his subordinates and started searching for traces of Ancient Beasts in the sea.
