

Wizard 950

Chapter 950: Two Ways for Knights to Advance! Two Potions! (3)

Levi, on the other hand, was busy with his own matters in the Emperor's Palace.

Other than the Golden Snake Breathing Technique, his other breathing techniques still needed some time to reach the maximum.

As for the Nightmare Dragon breathing technique, Levi had already given up on it. The efficiency was too low, so he simply stopped cultivating to save time to cultivate other techniques.

He planned to go to the Nightmare World when he was stronger.

Apart from the path of knights, after advancing to the fourth-circle, he also needed to carefully consider the future development of wizards.

First was the third-circle Sun Flame Explosion and Thunder Snake Technique. Levi had already obtained the advanced spell models for these two spells from the dark wizards.

They were Sun Splitting Strike and Thunder Dog.

He must learn such a systematic spell.

Levi needed these spells to compensate for his attacks.

Moreover, there was already a complete advancement path for these spells. If he did not learn them in the future, his previous Proficiency would be wasted.

As a systematic spell, more people cultivated it. It would definitely be easy for them to obtain spell models in the future.

Most importantly, if Levi had the chance to advance to legendary, he could learn the two famous legendary spells that he had been chanting for a long time.

Edmund's Eternal Blazing Sun and Thunder God.

These spells could be said to be the prerequisites for learning legendary spells.

Emon's Eternal Blazing Sun was the famous ultimate skill of the current Grand Council Chairman, the Blazing Sun God Wizard Edmund.

One shot was equivalent to throwing out a small sun. Just thinking about it was exciting.

Then, he had to continue researching his fourth innate spell.

Thunder Afterimage was only the foundation of thunder element innate spells. After he mastered the models of those thunder element escape spells and movement spells, it would be a real innate spell.

He had already thought of the name of his fourth innate spell: Thunder Dragon Flash.

This was a spell that was mainly used for life-saving escape. It was used to complement the Scarlet Escape.

Finally, it was the cultivation of the Tree Spirit Body Tempering Technique and the Ice Body Tempering Technique.

He wanted to see what realm his Metal Voodoo Body could reach if he kept fusing body tempering techniques into it.

It was said that in the entire Wizard World, there was not a single body-refining wizard who had deduced the body-tempering technique to the Ninth-Circle Realm. This was also why body-refining wizards were unorthodox. Levi wanted to try being the first.

After confirming his future direction, Levi began to cultivate step by step while waiting for the Golden Snake Breathing Technique to advance.

...

Time passed quickly, and half a year passed.

In the Emperor's Palace.

In Levi's secret room, a raging fire burned continuously.

In the flames, a corpse floated up and down. It was the Poison Fire Corpse Demon.

"It's finally fixed... I was stabbed in the heart by that old woman and almost got scrapped."

In that battle with the Ice Phoenix, the other party's spell had pierced through the Poison Fire Corpse Demon.

Although corpse demons did not have life, it was difficult for them to operate completely without organs.

Therefore, during this period of time, Levi transplanted the heart of the Fourth-Circle Wizard under the Ice Phoenix to the Poison Fire Corpse Demon.

After refining it with his Crimson Emperor Dragon Flames, it was finally fixed.

In the Book of Corpse Demons, there was a way to repair and even advance corpse demons.

That's right, the Poison Fire Corpse Demon could also advance.

However, it required specific materials and better corpses to carry out.

"Thank you, Master."

The Mind Flayer re-entered the corpse demon's body and said gratefully.

Levi's heart skipped a beat as he watched the corpse demon leave.

"I can bring one person into the Dark Ancient Tower, but I don't know who I'll bring with me... At the very least, I have to be at the peak of the fourth-circle or even the fifth-circle. I have to be able to use it. Otherwise, it would be a waste to bring someone in."

In the Dark Ancient Tower, there was a key and a pit. Only one person could enter, and it was impossible to sneak in through the spatial ring.

Levi thought about the people he knew. There didn't seem to be anyone suitable.

"Why don't I find an opportunity to sell it... I don't know how many large organizations are fighting for this thing. Forget it, there's still another thirty years before the Dark Ancient Tower opens. I'm not in a hurry. However, I have to go in myself. I have to start preparing for this trip. It's better to be prepared!"

"Succubus, Mind Flayer, Strange Worm Leon, and my transcendent creatures... I can't bring them in.

"Tyrant III is an alchemical creature, so there is definitely no problem. However, before entering, I have to cultivate my Weapon Refinement skill to the fourth-circle. This way, I can upgrade Tyrant III and create Tyrant IV Skywalker. It is another true fourth-circle combat power.

"The body of the Poison Fire Corpse Demon is also an inanimate object, so I can bring it in. When the time comes, I can use the Metal Voodoo to control the corpse demon. The Toxic Swarm is not strictly a separate life form. It is a part of me, so I should be able to bring it in.

"Owens is also a Level 4 combatant. If nothing goes wrong, I should be able to summon him. He can descend from the Ashen World to Nora as an incarnation by burning the Coin of Life. It shouldn't be a problem for him to descend to the Dark Ancient Tower.

"Before entering, I have to prepare more Wizard Tools, spells, arrays, potions, and so on for emergencies.

"Also, every time the Dark Ancient Tower opens, it will take a long time. I have to prepare more knight secret medicine in case there are no secret medicine ingredients I need in the Dark Ancient Tower."

Three days later.

Levi was preparing to build the Cold Pond array.
