

Wizard 951

Chapter 951: Two Ways for Knights to Advance! Two Potions! (4)

After this Cold Pond was built, be it the liquefaction spiritual force or cultivating the Ice Body Tempering Technique, they were all very useful.

"Master, Lord Cang requests an audience!"

The Emperor's Messenger came to report.

Levi's eyes flickered.

He came to the Inferno Throne and revealed his Flame Dragon's true form. He looked at Lord Cang with a dignified expression.

"What is it?"

"Lord, we've already determined the location of an Ancient Beast. It's in the Eastern Sea. It's suspected to be a terrifying Ancient Beast that has been extinct for a long time, the Green Armored Fish Dragon."

"Take me there!"

Levi sat up from his throne with a bang.

Then, a scarlet cloak appeared behind him and grabbed Lord Cang.

"Lead the way."

Lord Cang's flying speed was too slow.

He had no time to waste.

With his speed, he could reach the Eastern Sea by night.

...

Eastern Sea.

A huge green Fish Dragon with mottled green scales was confronting a few Ancient Saints in the sea.

These few Sea Crawler Ancient Saints had solemn expressions.

This Ancient Beast was so powerful that even Lord Cang couldn't take it down.

It was probably about to reach the ceiling of the Ancient Saint's strength.

However, they had already locked onto the location of the Ancient Beast. Naturally, they could not let it escape.

They stayed here to guard the Ancient Beast and wait for Lord Cang to ask Lord Emperor to personally subdue them!

The Green Armored Fish Dragon's eyes were arrogant. It was not afraid at all when facing the few Ancient Saints.

Ever since it was in its prime, it had dominated the sea region of the Ancient Saint Plane for hundreds of years and had never had a match. However, it had always been in the Deep Sea area, so very few people had discovered its traces.

Now, Levi had used the force of the entire country to search for traces of Ancient Beasts before it was found.

Suddenly, a red glow came from the horizon.

A tall and sturdy figure whistled over with a long tail of flames behind him!

"What a huge beast. Its strength should be at the peak of Level 4. Even a Fourth-Circle Wizard might not be its match, let alone these Ancient Saints."

Levi's heart fluttered.

This Green Armored Fish Dragon was 50 meters long, like a Giant Whale.

Its entire body was covered in invulnerable scales that flickered with phosphorescence. Its scales were different from ordinary Ancient Beasts. They looked rather thick, like a green turtle shell.

At this moment, when the giant beast saw Levi, it felt instinctively afraid.

He immediately stopped showing off and turned to run.

After being surrounded by these Ancient Saints for so long, it was not afraid at all.

However, against Levi, the suppression from its bloodline made it realize that it could not defeat him!

The first talent, Fire Dragon Tribulation!

Levi willed.

A Flame Divine Dragon that bared its fangs and brandished its claws shot out!

The surface of the sea exploded, and the Fish Dragon beast felt its back burn.

In the next moment, Levi swung the Crimson Dragon Slash!

The sword qi tore through the sea and cut a shallow wound on the back of the Fish Dragon Beast.

Fresh blood flowed, dyeing the surface of the sea red.

"If you run again ... you'll be cut in half," Levi said.

His heart skipped a beat. "This Ancient Beast seems to be the one I need to focus on defense. It can actually withstand the power of my sword aura."

As if it understood Levi's words, the Green Armored Fish Dragon gradually stopped and did not dare to run anymore.

Although it was a Level 4 transcendent creature, it did not have any powerful spell-like abilities. Just like the Ancient Saint, it was more biased.

This was a common problem with the transcendent system of this plane. Therefore, the fourth level of the Ancient Saint Plane was weaker than the fourth level of the Wizard World.

Under Levi's overwhelming strength, it submitted.

To the current Levi, there was no longer any sense of accomplishment in subduing a Level 4 mixed-blood dragon clan.

In the end, under the "miracle" of the emperor, such a huge creature disappeared from the sea and appeared in the lake in Alice's ring.

"Let's call you Fish Dragon... I'm too lazy to name you." Levi looked at the huge beast and muttered to himself.

He was considering whether he should kill this guy and refine the bloodline crystal.

After finding another Level 4 Bloodline Crystal and collecting all the other materials, he could evolve.

The Fish Dragon entered the sea, and Leviathan and Gustav came to watch.

Because Levi had released many low-level transcendent creatures, Alice's ring had been relatively deserted recently.

Now that a new Level 4 creature had joined, these old employees of the third-circle felt pressured.

"Raja, when will you break through to the fourth-circle?"

Levi's Sky Dragon Breathing Technique was supported by Raja.

If it could break through to the fourth-circle, its cultivation speed would definitely rise to another level.

Raja flew away resentfully.

He tested the bloodline of the Fish Dragon and found that it was indeed water-element, and it was Sea Dragon Huang's.

The current situation was...

The essence of the Fish Dragon's bloodline could be used as an advancement material. Levi was confident that he would be able to prepare it soon.

Its bloodline crystal could also be used as an evolution material, but it was still lacking one.

He was deep in thought in the hall.

The entire Ancient Saint plane was a testing ground for Sauron.

Therefore, the Ancient Beasts here all originated from the four Ancient Dragon brothers.

In other words, there were only four Legendary Bloodline Factors in this dimension.

Among the four ancient dragons, the fire-element Gloomy Lamp Dragon focused on strength, the earth-element Immortal Banyan Dragon focused on physique, the wind-element Jade Dragon focused on speed, and the water-element Sea Dragon Huang focused on defense.

This was also why the defensive attributes of the Fish Dragons were more outstanding.

"Other than the Ancient Beasts that contain the Sea Dragon Huang Bloodline Factor, it should be very difficult to find a second type of defensive Ancient Beast on the Ancient Saint plane... Since that's the case, I won't dwell on it anymore. I'll not kill them and proceed with Advancement!"
