

Wizard 952

Chapter 952: Two Ways for Knights to Advance! Two Potions! (5)

The Fish Dragon in Alice's ring hid at the bottom of the lake, trembling. It did not know that it had just escaped a calamity.

...

Holy Brilliance Calendar Year 1135, Month of Beginning.

The 104th year of the Great Expedition.

Levi held a round table meeting as usual.

He learned that Goddess Knight Elsa had broken through the legendary shackles and stepped into the Bloodthirst Realm.

The pressure came to the Dark Moon Knight and the Silver Dragon Knight. No one wanted to be the last to break into legendary.

The two legendary knights began to train even harder.

All of a sudden, the Dusk Holy Temple's internal politics flourished!

As for Blood Knight and the others, they were still a distance away from the Blood Source.

In fact, Levi had already deduced the formula for the Blood Knight and Black Knight to advance to the Blood Source Realm.

However, they had yet to reach the stage where they needed Advancement Potion.

As long as they could reach the threshold, they could clearly know what they had to do next and what materials they had to find and prepare.

Compared to his Golden Snake Advancement Potion Formula, it was not difficult to collect their formulas.

When their realms were higher and they had more knowledge, they might be able to comprehend the potion formula they needed in the future. They could also create formulas for the ordinary knights of the Dusk Holy Temple.

At night, Levi looked at the newspaper Eve had sent over.

In the Endless Sea, something neither big nor small happened.

The Wizard Tribunal found Thunder Spear Sorrett guilty of colluding with the Abyss.

In the Endless Sea and even other Realms of the Unbelievers, Sorrett was issued with a Hundred-Year Endless Sea Bounty Order for the entire territory.

This kind of wanted order was usually only targeted at those extremely vicious people. It seemed that Sorrett had angered everyone this time, and the faction behind him did not want to protect him.

Within a hundred years, anyone who offered Sorrett's head would be rewarded with a sky-level Truth Oddity or two fifth-circle Wizard Tools. They could also be exchanged for a huge amount of Aether Stones!

This instantly made Sorrett a "celebrity" in the top 100 of the Endless Sea's Savages List. One had to know that the first and second on the Savages List were Black Sun Adam and the Hundred Beast Berserk Witch!

Do you want the Truth Oddity? Do you want a fifth-circle Wizard Tool? Then go and kill Sorrett!

It was said that many Fifth-Circle Wizards from other schools also came to the Endless Sea after hearing this news.

Of course, with Sorrett's strength, no one should be able to catch him if he wanted to hide in the vast Endless Sea.

Most fifth-circle cultivators would hunt him for nothing.

Similarly, the Thunder Dragon Family was also implicated. The entire family was enslaved by the Star Tower and exiled to a dangerous medium-sized plane for exploration. All the gains from the exploration would belong to the Star Tower, and the exploration period was 300 years!

If they performed well in the exploration, the Thunder Dragon Family could return to the Endless Sea after 300 years. However, their original territory and industries had all been taken over by the Star Tower. This family would have to start all over again.

The few primordial soul wizards in the Star Tower were in charge of supervising the Thunder Dragon Family's exploration process.

One of them was the head of the law enforcement department.

Molten Gold Wizard King, Niglio!

This primordial soul expert was swift and decisive. He was upright and would never bend the law for personal gain. He used his power for personal gain and won the "Endless Sea's Rule of Law Vanguard" medal several times in a row!

Therefore, he was also known as the "Golden Scales", the "Punisher of Justice", and the "Nemesis of Darkness of the Sea"!

The catchphrase was, "Any violation of the law will be shattered by lightning!"

Levi's gaze was complicated. He silently put away the newspaper, feeling helpless.

"Tsk tsk, the head of the law enforcement department... No wonder the Endless Sea is so chaotic. No wonder the Thunder Dragon Family is so jumpy. The source is here."

He shook his head and threw away these miscellaneous matters to calm down.

In front of him were various materials.

"Bloodline essence, dragon scales, soul crystal... I have everything. I'll prepare for Advancement."
