

## Wizard 955

Chapter 955: Level 15! The Rise of Knights! (3)

He opened a formula. This was the latest knowledge that he had exchanged for in the holy temple with his authority as an official member.

Maya Advancement Potion.

[Main ingredients: 100 grams of level 3 bloodline essence (1. A transcendent creature that requires a wind-element affinity. 2. Feather of a level 3 transcendent creature. 7 feathers of a level 3 transcendent creature. Contains the above-mentioned ingredients: Wind Splitting Green-Winged Eagle, Feather King Vulture, and Cross Sparrow...)]

[Supplementary ingredients: Dark Wind Grass, Misty Ghost Flower ...]

[Potion consumption method and things to take note of...]

"This is our commander. He's so knowledgeable. He's beyond my imagination."

"This kind of knowledge is priceless to knights."

This was equivalent to clearly telling him the path to advancement. He only needed to do it step by step.

The price of exchanging for this knowledge was the bloodline runes that he had translated during this period of time.

To encourage everyone to specialize in bloodline runes and Talent Brands, the commander set up a reward system.

Every time he translated a bloodline rune and passed the test, he would receive 1 point. The points could be exchanged for the materials and resources in the Dusk Holy Temple.

This made these knights, like wizards, engrossed in scientific research.

"When I traveled the seven kingdoms previously, I heard news of a green wind bird in the Constellation Empire. From the description, it's very likely to be a transcendent bird of prey.

Maya was the god of ten thousand eagles in the Multidimensional Plane, the king of the sky and wind.

A large portion of the birds of prey in this world should be descendants of Maya. They more or less contained a little bit of Maya's bloodline factor.

However, with my strength, I might not be a match for the green wind bird... I have to call the Black Knight, the Divine Light Knight, and the others to team up with me to hunt.

"When they advance in the future, I'll help them."

The knights were in decline now, so everyone should help each other.

The Blood Knight immediately began to prepare.

Three days later, the Blood Knight led the team and set off for the continent.

If the Blood Knight could successfully advance to level 3, the other knights could imitate him and improve the overall strength of the Twilight Knights.

At that time, a level 3 knight would become the core strength.

Only those with strength above level 3 were qualified to have a foothold in the increasingly intense recovery of the demon wave.

...

The Ancient Saint plane.

Emperor's Palace.

Levi lived in seclusion, silently digesting the potion of knight advancement.

At the same time.

In a mountain range around the Emperor's Palace.

On a precipice, a Blue Winged Dragon was lying there quietly.

Endless Wind Thunder Power coiled around it, and lightning exploded, turning this mountain range into a forbidden area!

This was Raja.

Because Levi would not leave the human world for a long time.

Therefore, to facilitate the growth of these transcendent creatures, he raised them in the forest within a radius of 5,000 kilometers of the Emperor's Palace.

He sent people to surround this place and built his own "Mountain Sea Garden", which was also called "Emperor's Myriad Beast Garden" by his subordinates.

Levi's goal was to collect more and more transcendent creatures.

It would reproduce the scene of rare birds and beasts running around like the Classic of Mountains and Seas in his previous life.

He wanted the Ancient Saint plane to become his own "dojo".

It was similar to the cultivation sects in novels in his previous life.

These transcendent creatures were used to decorate this place.

This could be considered a little boring and bad taste of his.

Now, after Levi's repeated warnings, Raja, his old employee, worked hard to become stronger and completely exploded. His bloodline condition was already extremely outstanding. Otherwise, Newt wouldn't have specially traveled thousands of miles to visit him on the Yellow Earth Continent.

Now that Raja was motionless, it was about to advance.

Endless Wind Thunder Power tempered Raja's body, and elemental power was also surging in with it as a vortex.

"It looks like the emperor's pet is about to break through. Quickly send someone to protect it so that it won't be disturbed by other ferocious beasts!"

These Lizardmen were worried sick about the emperor.

Before long, several Ancient Serpent-level powerhouses personally guarded a radius of 50 kilometers and waited for Raja to successfully advance!

Time passed quickly.

In the blink of an eye.

Another half a year passed.

Holy Brilliance Calendar Year 1134, Month of Winter.

In the north of the human world, winter had arrived.

Of course, in those places where the blue frost tormented people, winter never left.

On this day, in the blizzard that filled the sky, a huge bird with a wingspan of a hundred meters emitting blue ice flames descended from the sky. She looked at one of the valleys that were as rich in frost elemental power as the Endless Sea Ring Region.

"This place is suspected to be the node of the Dark Wave Revival. The elemental power is not bad, and it's suitable for my cultivation. Damn Arctic Wizard, that old thing caused me to run around for several years from the Ice Realm to the Endless Sea. I'm exhausted every day. Also, that brat took my wine glass and went somewhere. Could he still be in the Realm of Ice?"

The big bird transformed into a blue-robed witch with a pretty face and an ugly look on her face.

It was the Ice Phoenix Ferlin.

"Fortunately, I've profited from a disaster. I actually found a wild sub-dimensional portal node in the Endless Sea that allows me to travel back and forth to the human world. Who would have thought that there would be a sub-dimensional portal vortex at the bottom of the endless magma?"

"The elemental power of this place is passable. It's enough for me to recuperate and regroup. With my strength as a Fifth-Circle Wizard, the saint of the Church of Snow probably won't dare to find trouble with me."

"Hahahaha, I, Ice Phoenix, will definitely have good fortune after surviving a calamity!"

"Taking advantage of this Dark Wave Revival, I want to advance to the primordial soul in the next 300 years!"
