

## Wizard 957

Chapter 957: Third-Transformation Dragon Scales! Power of the Dharma Idol! (1)

Levi—

Golden Snake Breathing Technique (Third Transformation of the Blood Source): Level 15 (1/700,000).  
Special Effects: Transformation Scales (level 3), Dragon's Intimidation, Golden Snake Playing with Water.  
Bloodline Dharma Idol: Golden Snake Dance. Exclusive weapon: None.

...

The Golden Snake Dance behind the Bloodline Dharma Idol was the name Levi had given the Golden Snake Dharma Idol.

"Other than giving birth to the Bloodline Dharma Idol, the defense of the Golden Snake Scales has also reached level 3. It's equivalent to undergoing three transformations. Its hardness has increased greatly."

"The current me has already stacked five layers of armor: Golden Snake Scales, Earth Dragon Barrier, Dharma Idol—Golden Snake Dance, Heavy Water Barrier, and Metal Voodoo... Who below the primordial soul can insta-kill me?"

"Forget it, this kind of thinking is too dangerous. I'll save this kind of boasting for when I enter the fifth-circle."

Apart from the Heavy Water Barrier, which was a third-circle protective force field, the defense of the others was comparable to a fourth-circle protective force field, and they were all above the average.

The stacked armor always made people much safer.

"Golden Snake level 15. According to the current cultivation speed of the breathing technique, the next one should be the Crimson Emperor Dragon or the Scarlet Dragon.

"The Crimson Emperor Dragon is already excellent enough. It won't evolve for a long time. It just needs to keep evolving.

"As for the Scarlet Dragon, if the conditions are right, it can evolve again."

In fact, Levi's current bloodline of the six dimensions, even if it did not evolve, was theoretically enough for him to reach the Level 10 knight realm.

It was purely because the Crimson Emperor Dragon was too excellent, making the other breathing techniques look inferior.

"If I want to advance, I need to consume bloodline crystals. This thing will take the lives of transcendent creatures... To sustain the Dusk Holy Temple in the future, it's time for my transcendent creature breeding plan to be put on the agenda."

Levi had already collected many transcendent creatures when he was in the Wizard World, but most of them were single.

If he wanted these transcendent creatures to form a population, he still needed to continuously introduce new individuals.

The breeding of transcendent creatures could not be effective in a short period of time.

Especially those transcendent creatures after the third-circle. They were rare to begin with.

Moreover, transcendent creatures still needed a long time to develop.

However, at this stage, the Twilight Knights only had about a hundred people.

The bloodline path of knights made it impossible for the Twilight Knights to develop in quantity like wizards. They definitely had to take the elite path.

Other than the 18 core members of the Twilight Knights, there were not many non-core members of the Dusk Holy Temple.

It would take a long time for these knights to reach the stage where they needed potions to advance.

At that time, the level of the Dark Wave Revival would increase. Transcendent creatures should be enough to cultivate.

Therefore, these knights should not cause the mass extinction of the transcendent creatures in Nora...

After all, wizards had been developing for hundreds of thousands of years, and there were countless knights.

Among them, there were an unimaginable number of transcendent creatures that had been killed or refined by wizards.

However, although many transcendent creatures were rare, they were not completely extinct.

In particular, the breeding ability of low-level transcendent creatures was very strong.

With the size of the Dusk Holy Temple, it was not worth mentioning in front of the wizard civilization.

They were worried that the development of the Knights would cause the extinction of transcendent creatures, just like how developed countries were worried that the rapid development of developing countries would cause ecological damage.

When the number of people in the Dusk Holy Temple increased and the consumption of potions increased...

According to Levi's plan, there were already several exclusive planes similar to the Ancient Saint plane under the holy temple as a specialized transcendent creature Breeding Base.

Moreover, the Multidimensional Planes were endless. What the wizards had already discovered was only the tip of the iceberg.

As the Knights grew stronger, new planes would always be discovered in the future.

Levi was pondering his future plans in the Emperor's Palace.

Caw caw caw caw!

A strange and excited laughter suddenly came from the sky!

This voice was hoarse and unpleasant, like a wild duck flying in the sky.

Levi used Perception and was pleasantly surprised.

"Master Raja, you've finally broken through to the fourth-circle... It's really not easy. When I was at the second-circle back then, it was already at the peak of the third-circle. Now, I've long reached the fourth-circle, and it has just advanced! I've been waiting for so long."

Levi immediately took a huge vat and left the emperor's palace with a smile. He flew into the sky.

Raja had broken through, and he was even more excited than Raja... This meant that his cultivation speed of the Sky Dragon Breathing Technique had increased.

Raja's Wind and Thunder Dragon Clan bloodline could be said to be perfectly compatible with the Sky Dragon Breathing Technique.

This little thing was born to be Levi's secret medicine material!

On the cliff behind Emperor's Palace.

Levi stood with his hands clasped behind his back.

In the sky, a Winged Dragon with a wingspan of 40 to 50 meters circled above his head with Wind Thunder Power wrapped around its body.

"Not bad. As expected of a rare dual attribute wind and lightning. Although Raja is a transcendent creature, his strength might be slightly stronger than ordinary Fourth-Circle Wizards."

Levi was satisfied.

"Come down. Let me examine you."

Upon hearing this, Raja swooped down and finally landed steadily in front of Levi.

"Your performance is not bad. If you can advance to the fifth-circle, I'll find you a female Winged Dragon. How about that?"

Levi started to promise Raja as he drew his blood.

Wind Thunder Winged Dragons were extremely rare. In the vast Endless Sea, it was very difficult to find a second one.
