

## **Wizard 965**

Chapter 965: Gargamel, Fourth Talent! (3)

As for the Black Knight, he had also attained Perfection and embarked on a long journey to find the potion.

Now, all the passages between the Realm of the Unbelievers and the human world have been opened.

Under Levi's guidance, the Black Knight went to the [Earth Realm] ruled by the Earth School of Thought.

There, it would be easier to find the transcendent creatures he needed that had an affinity with the earth element.

The Black Knight himself was also an apprentice wizard. This time, he also wanted to take the opportunity to become an official wizard.

This way, his spiritual force would be strong enough, and his Bloodline Dharma Body would be able to advance further.

...

The year 1136 of the Holy Brilliance Calendar, the Month of Germinal.

The 105th year of the Great Expedition.

In the Emperor's Palace.

Levi looked at the letter Eve had brought back.

"Celia has prepared all the potion materials I need. Let's go back to the Wizard World."

During this period, he had been trying to gain experience with arrays. However, it was not possible to achieve fourth-circle in a day.

The research on the fourth innate spell, Thunder Dragon Flash, was also proceeding in an orderly manner. After this spell was born, Levi's ability to survive would become even stronger.

In the Dark Tower, danger was unpredictable, and survival was always the top priority. He could afford not to snatch the treasure, but he had to keep his life!

Levi called Raja, Phoenix, and his level 4 subordinates over and left the Emperor's Palace.

Several days later.

He had returned to the Endless Sea.

Although the teleportation portal between the human world and the Endless Sea had been opened, for safety reasons, Levi still chose the wild spatial node that only he knew about.

On Levi's shoulder, Phoenix was revisiting its old haunt, feeling conflicted.

"I shouldn't have left this place... I'm so annoyed!"

In its heart, there was nothing but regret.

On the way to the Star Sea, Levi especially went to the inner sea region's Area 7.

This place used to be the territory of the Thunder Dragon Family. After the Thunder Dragon Family was exiled, their property was confiscated by the Star Tower, and the territory was divided up by some small wizard organizations.

"The scourge of the Thunder Dragon Family won't cause me any trouble at least for awhile."

A month later.

Star Sea.

Nether Capital.

In the Witch's Family's medicinal herb store.

Levi saw Celia.

"Sir Levi, these are the materials I collected according to your request. Excluding the deposit you paid previously, it will cost a total of 600,000 Aether Stones."

"Thank you, Celia."

Levi took a look. These potion materials should be enough for him to cultivate until the Dark Ancient Tower opens.

Before the ancient tower opened, he would collect some more in case the ancient tower did not have the materials he needed.

Now, he only had 2.5 million Aether Stones left!

"Pills, cultivating array experience, Weapon Refinement... There were too many places that required the consumption of Aether Stones! Ordinary fourth-circle wizards from large organizations can't afford to train like me."

After giving Celia some money for her hard work, Levi chanted a spell and entered the base camp, arriving at the witch shop.

"Excuse me, is there any water element metal here?" Levi asked.

After Phoenix's refinement, the raw Tremor Metal Ore was refined into a Tremor Metal the size of a human head.

With such a large amount of Tremor Metal, it would definitely not be a problem to forge a long sword or a cloak.

However, the Golden Snake Breathing Technique was a defensive technique.

A more compatible divine weapon was either a shield or armor.

In short, these two divine weapons consumed a lot of elemental metals. Therefore, he needed another piece of water elemental metal of similar size.

The two combined to create a divine weapon with both water and earth elements.

As his own elder-level breathing technique, how could Levi ignore the Golden Snake?

"Last year, our shop did sell a large piece of [Blue Wave Ore]. It was a level 4 water elemental metal, but it was bought... However, a primordial soul witch from our Witch's Family has put up a level 6 water elemental metal called [Black Sea Meteorite Iron] for sale. However, they don't sell it for money. They only need fire elemental metal of the same level," said the shopkeeper.

"Alright then."

Levi felt helpless.

How could he have a level 6 fire element metal... Moreover, even if they gave him the level 6 Black Sea Meteoric Iron for free, he would not be able to refine it with his cultivation.

Only the [Primordial Soul Fire] of a primordial soul wizard or other level 6 flames could melt it bit by bit.

Rare elemental metals have always been in high demand.

There were three main sources of elemental metals. The first was born in the Wizard World, the second was obtained by other wizards during their travels in the Multidimensional Planes, and the third was from the Land of Darkness that fell into Nora. In short, they were extremely rare.

"Do you have any other elemental metals? Any type is fine, but it's best if the quality is at least level four. If it's too low, forget it." Levi asked.

"No, we only sell elemental metals below level three all year round. Those above level four are sold out as soon as they are put on sale..." The shopkeeper smiled bitterly.

"Are there any large-scale auctions in the Star Sea region recently?"

Other than the Golden Snake, his Sky Dragon, Death Amber, and Nightmare Dragon also needed the corresponding rare materials to forge suitable divine weapons.

The Sky Dragon was of the wind and lightning attribute, so it also required elemental metals of two attributes.

As for Death Ember, fire element metal would suffice. As for Nightmare Dragon, Levi had not decided yet.

Judging from the Special Effect of the Heavenly Wind Heart, the Nightmare Dragon should contain the wind element, so there should be no problem with the wind elemental metal.

However, Levi had seen another type of metal in his notes in the Dreamland Steeple, and they called it [Nightmare Metal].

It was said that the Wizard Tools of the School of Dreams, which were made of Nightmare Metal, were more powerful than ordinary elemental metals.
