

## World 1711

### Chapter 1711: Primordial Void Dao Child Zhang Pankong

The black-robed cultivator saw the last breath leave the Mu Qin in Ku Zhu's arms and nodded gently.

Before Ku Zhu passed the trial, he had already informed Mu Qin about the matters concerning the blood sacrifice and Tianyuan Dao Fruit.

In the end, he was not wrong; Mu Qin indeed made a sacrifice to prevent Ku Zhu from falling into the Demon Path.

However, this can only prevent it temporarily.

...

Northern Abyss City!

Only three days remained before the start of the grand ceremony.

The representative from Kong Sang Valley finally arrived; it was Yi Chenghan, an acquaintance of Chen Mobai, who appeared slightly haggard.

After presenting the congratulatory gift, Chen Mobai learned from him that the soul lantern of Master Mu Qin had shattered.

Because of this, there was a brief disturbance within Kong Sang Valley; fortunately, Ku Zhu's soul lantern was still intact, otherwise, they might have already split the faction.

The news of Mu Qin's death also made Chen Mobai feel somewhat sentimental.

After all, she was the first Nascent Soul cultivator to interact with their Five Elements Sect, and it was thanks to her that he could go to the Beidou Conference and obtain the Three Lights Divine Water.

“Please accept my condolences!”

Chen Mobai said to Yi Chenghan, and then also indicated that if anything happened on the other side of the East Barbarians in the future, he could go to the Five Elements Sect branch over at Bright Mirror Mountain.

Yi Chenghan was very grateful for this.

Next, Chen Mobai met with the head chef from Sky Meal Building who had come from East Land.

The head chef was named Ren Qiu, a late-stage Gold Core cultivator, who was personally brought to meet Chen Mobai by Shen Shanqing.

During the rise of the Five Elements Sect, Shen Shanqing had been of significant help, so this time Chen Mobai didn't forget to send him an invitation and even entrusted all the catering, except for drinks, of the grand ceremony to Sky Meal Building.

“Greetings, Sect Master Chen. I heard about your grand ceremony, so I personally brought twelve chefs from East Land to assist.”

Ren Qiu was a rotund cultivator with a plump head and ears, smiling as he handed over the gift box he was holding.

“You are too kind, Chief Ren. I didn't expect you to lead the team personally; it seems we'll be in for a treat this time.”

Chen Mobai immediately expressed his gratitude. He truly appreciated the food from Sky Meal Building, as the ingredients were excellent and generously used.

Furthermore, Ren Qiu had received true teachings from two Nascent Soul cultivators at Sky Meal Building, and he earned the head chef position through genuine culinary skill.

“Rest assured, Sect Master Chen. Leave the meals for the grand ceremony to me.”

After talking with Ren Qiu for a while, Chen Mobai mentioned to him about Shen Shanqing’s assistance, causing Ren Qiu to nod repeatedly, expressing that such outstanding talent should be well cultivated.

Shen Shanqing listened with a face full of joy.

He originally thought he would spend his life in the Eastern Wilderness, but unexpectedly, he was able to re-enter the attention of the East Land headquarters through the Five Elements Sect.

This time Ren Qiu also confided to Shen Shanqing that if he could form a core, he would be entrusted with Sky Meal Building across the regions of the East Barbarians, Eastern Wilderness, and Dongwu.

Not just in words, Ren Qiu had already imparted the Food Cultivation Gold Core mantra from Sky Meal Building to Shen Shanqing and given him many rare delicacies to enhance his cultivation level.

Shen Shanqing felt very fortunate to have been dispatched to the Eastern Wilderness; otherwise, it would have been other senior brothers encountering Chen Mobai and rising swiftly. Now he was already contemplating the bright future of meeting the two Nascent Soul Ancestors after forming a core.

In the grand hall, Ren Qiu asked Chen Mobai about various requirements for the dishes, then hurriedly set off with Shen Shanqing to procure ingredients.

Ren Qiu initially thought it would be somewhat troublesome, but unexpectedly found almost everything he needed in Northern Abyss City, with the remaining items being easy to acquire with a single word from the Five Elements Sect, sourced from various places in the Eastern Desolation Nineteen Prefectures.

“Under Sect Master Chen’s governance, this Eastern Wilderness is no less than those immortal cities in East Land.”

Ren Qiu, having personally experienced Northern Abyss City, couldn't help but click his tongue in amazement.

"This Sect Master Chen does not appear to be someone nurtured here in the Eastern Wilderness. I suspect that the information Baiwu Ancestor leaked is true, that the Sect Master is a Taoist Child from the First Origin Dao Palace raised intentionally in the Eastern Wilderness to avoid being killed by the Demon Path."

Shen Shanqing shared his speculation. Sky Meal Building was well-informed, as Baiwu Ancestor sought their help in spreading the news that Chen Mobai was indeed Emperor Chen Qing, through Golden Crow Immortal City's Sky Meal Building.

Shen Shanqing was very surprised when he received the news, but of course, he couldn't ask Chen Mobai about it, especially since it involved his own business, so he had to pretend he knew nothing.

"Once the Five Elements Sect upgrades to a Nascent Soul major faction, the various powers in East Land will pay more attention to this place. As the head chef of Sky Meal Building here, be extra cautious when selling intelligence. Should anyone seek information on the Five Elements Sect, weigh it carefully yourself. As for whether Sect Master Chen is a Taoist Child of First Origin Dao Palace, we refrain from investigating or delving deeply."

Ren Qiu instructed Shen Shanqing, stressing that although Sky Meal Building had two Nascent Soul Ancestors, they must be cautious when dealing with forces at a Holy Land level.

Moreover, even if not Emperor Chen Qing, the two Nascent Souls of the Five Elements Sect were indisputable; Sky Meal Building always preferred to establish good relations and avoid offending such forces.

Precisely for this reason, Shen Shanqing, who had good relations with the Five Elements Sect, received focused cultivation.

The day quickly arrived before the grand ceremony.

After trying on his attire, Chen Mobai was speaking with Qing Nu when he suddenly showed a change in expression.

Soon, the presence of two Nascent Soul level spiritual energy waves arrived above Northern Abyss City.

The two did not hide their auras, instantly catching the attention of all the cultivators within the city.

“Hahaha, Daoist Brother Ye Qing, I thought you weren’t coming.”

Chen Mobai laughed heartily as he flew from the peak of North Abyss Mountain, clapping his hands in greeting towards the arriving Ye Qing, then looked with some curiosity at the young man beside him, who bore a dignified presence and wore a black robe.

Chen Mobai had seen this person before. Back then, during the Star Heaven Dao Sect’s event, he arrived with the Azure Fall Palace Master and had last intervened to seal the void rift.

He had a vague suspicion in his heart, but still, with a curious expression, asked, “I wonder how this Daoist Brother should be addressed?”

“Zhang Pankong!”

The black-robed young man stated his name, and he was indeed the Daoist Child of Taixu MiaoMiao Palace.

“I didn’t expect it to be the Primordial Void Dao Child himself. My Northern Abyss City is truly honored.”

Chen Mobai’s suspicions were confirmed, yet he still expressed his amazement in welcoming them.

Ye Qing: “I told him about the large-scale transmission array you mentioned last time, and since it’s your grand event, I brought him along to have a look.”

Ye Qing was indeed reliable, as he truly followed through on what he promised.

Chen Mobai immediately invited the two of them down and personally brewed tea for these two Saint Land Taoist Children.

Meanwhile, within Northern Abyss City, the crowd who witnessed this scene began to discuss among themselves.

“It can’t be wrong. Sect Master Chen must be Daozi Chen Qingdi of this generation’s First Origin Dao Palace, otherwise why would these two Saint Land Taoist Children travel such a long distance to come to Eastern Wilderness to celebrate with him.”

Some who claimed to have insider information began sharing their insights right away.

The head chef of Sky Meal Building, Ren Qiu, initially thought this unreliable, but began to believe it a bit more now.

After all, Ye Qing was known to be difficult to interact with over in the East Land. Zhang Pankong was also famous for being aloof and solitary.

For them to travel from the East Land all the way to Eastern Wilderness for an event, it couldn’t possibly just be a casual relationship.

On the North Abyss Mountain peak.

“My junior sister said she suddenly gained new insight into the Nine Heavens Profound Scripture and needs to enter seclusion to consolidate it, so she couldn’t come this time. She asked me to apologize to you.”

Under the Rank-4 Everlife Wood, Chen Mobai was brewing tea, and Ye Qing first explained the reason why Yuan Zhen couldn’t come.

“Not at all, cultivation is important.”

Chen Mobai shook his head immediately, indicating that there was no need for an apology.

“A large-scale transmission array costs fifty million Spirit Stones to construct and a million Spirit Stones annually for maintenance.”

At this point, Zhang Pankong spoke very directly.

Hearing this price, Chen Mobai couldn't help but click his tongue, but being able to buy it was already on account of Ye Qing's influence, so he didn't haggle over the price and nodded in agreement, “No problem, but wouldn't one be a bit insufficient?”

Chen Mobai's words made Zhang Pankong frown slightly, somewhat puzzled: “Setting up one in your Eastern Wilderness and I can connect it to the one in Golden Crow Immortal City. This can open up a path between the Eastern Barbarians and Eastern Wilderness, saving costs.”

Chen Mobai listened and showed a peculiar expression: “If the Primordial Void Dao Child can persuade Baiwu Ancestor, I have no objections.”

If connected, when the Five Elements Sect wants to attack the Sun Bathing Sea, they could mobilize all cultivators to Golden Crow Immortal City on the same day.

Only if Baiwu Ancestor were a sane person, he wouldn't agree to such a thing.

Zhang Pankong was puzzled, and Ye Qing immediately explained the cause.

“So you have grievances!”

Zhang Pankong rarely ventured out of the East Land, and had never paid attention to the Dongzhou Frontier, truly unaware of the disputes between the Five Elements Sect and the Sun Bathing Sea.

“If it’s two, I can give you a 5% discount, but the maintenance is under the charge of Dan Miaosu’s junior sister, so no discount there.”

Zhang Pankong definitely would not negotiate with the Sun Bathing Sea about such matters, and since the Five Elements Sect had the capital to afford it, having two was better for him as well.

“Then I’ll trouble the Primordial Void Dao Child. I’ll set one up here in Northern Abyss City, and another at Bright Mirror Mountain over at the Eastern Barbarians.”

While speaking, Chen Mobai immediately took out a map of the Five Elements Sect. According to his request, the sect’s Spirit Vein Division updated it annually, including the Borderland Three Regions and parts of the Ruins and Yun Meng Ze, and through his years of teaching, it was extremely exquisite.

Zhang Pankong and Ye Qing were seeing such a map for the first time.

Each mountain range, river, forest, and county was meticulously depicted.

The peaks had height marks, allowing one to see the terrain’s fluctuations at a glance. Rivers were like winding ribbons, forests depicted in varying shades of green, with clear borders that even differentiated tree species. Counties and Immortal Cities were distributed among them, connected by roads.

“Should the one at Bright Mirror Mountain connect with the Immortal City over in the East Land?”

Zhang Pankong asked another question.

Chen Mobai showed a hesitant expression upon hearing that. He originally intended to establish a large-scale transmission array solely to connect Eastern Wilderness and the Eastern Barbarians, not to connect with East Land.

Chapter 1712: Grand Ceremony

“Connect to our sect’s Jiutianxian City.”

Just as Chen Mobai hesitated, Ye Qing spoke up.

“Thank you, Daoist Brother.”

Since he said so, Chen Mobai would definitely not refuse.

Severing contact with the Eastern Land is beneficial for quietly developing the strength of the Five Elements Sect in the Three Regions of Dongzhou Frontier, but once reaching the Nascent Soul level, most of the needed items can only be bought in the Eastern Land.

For instance, several main herbs for the Infant-Feeding Elixir, or even the herbs required for the Infant-Transforming Elixir and Infant-Accumulating Elixir, etc.

After absorbing the territory of Xuan Xiao Taoist Palace, if the Five Elements Sect wants to advance further, contact with the Eastern Land core is essential.

With a large-scale teleportation array directly to the Seven Great Immortal Cities of the Eastern Land, at least the Five Elements Commerce Association can definitely thrive, and Yue Zutao wouldn't have to spend over a decade on a round trip.

After careful consideration, the benefits outweigh the disadvantages.

Having settled the most crucial content, Zhang Pankong took Chen Mobai's map as he needed to conduct a field inspection of the locations to place the two large-scale teleportation arrays.

Chen Mobai immediately summoned E Yun and Yi Shaoqing from the Formation Division, with the former responsible for hospitality and the latter for professional matters.

According to Chen Mobai's intentions, keep the previous medium transporting formation, and establish a fourth grade Spirit Vein on the outskirts of another side of Northern Abyss City, then place the large-scale teleportation array there.

The Five Elements Sect had already executed the task of using teleportation arrays to stimulate housing prices and various economic activities before, and they were much more adept now.

Originally, this matter should have been kept confidential, but Chen Mobai instructed E Yun to publicize it.

Soon, hearing that a large-scale teleportation array was about to be placed in a newly developed suburb of Northern Abyss City, many cultivator families and loose cultivators rushed to find connections to inquire and sought to reserve a house or shop in advance.

The housing prices in the neighborhood of the medium transporting formation were already at a level where even cultivator families found it painful to purchase, and many of the first batch of loose cultivators who bought them saw their assets appreciate five to six times.

Even if they were to sell this property, it would suffice for them to live a very comfortable and leisurely life in any of the major Fang Markets within the Eastern Desolation Nineteen Prefectures.

However, no one is willing to sell now.

As the influence of the Five Elements Sect grows, the housing prices in Northern Abyss City continue to rise every year.

Soon, using the pre-sale of houses and shops, the Five Elements Sect earned enough Spirit Stones for a four-meridian Spirit Vein and half the cost of a teleportation array.

Sun Huanglong and the cultivators from the forces of the East Barbarians witnessed the whole process from start to finish, all stupefied.

Is it really this easy to earn Spirit Stones?

In their territory, although they also have their self-built immortal city Fang Markets, many cultivators leave once they have accrued assets, preferring to find a Spirit Vein land in a small place for seclusion rather than staying long in the immortal city.

Only when they run out of cultivation resources do they reluctantly visit the immortal city Fang Markets.

Only those slightly powerful cultivator families and sects choose to settle.

Where lies the difference?

Those sent over for the grand ceremony were the talented leaders of their respective families or sects, and after visiting some residents of Northern Abyss City, they quickly realized the problem with their own situation.

They couldn't guarantee the cultivators' safety.

In Northern Abyss City, once you buy a house, if you don't violate the rules set by the Five Elements Sect, the sect will ensure your safety against any threats.

Furthermore, the Five Elements Sect severely cracks down on rogue cultivators, relentlessly pursuing them to the Ends of the Earth, to the death; even if a Five Elements Sect disciple commits such acts, they are directly dealt with, without mercy.

Thinking of this, representatives of various forces fell into deep contemplation.

They understood their own limitations, occasionally colluding with rogue cultivators to commit robberies was certainly present.

After all, the profits from Fang Markets and immortal cities belong to the sect, but loot from robberies is their own. Moreover, even if discovered, as long as they share the stolen benefits with the investigating elders, they can mostly get away with it.

It is precisely for this reason that rogue cultivators are hard to eliminate.

Because many perpetrators are insiders.

The Eastern Earth Holy Land doesn't mind these small matters, hence many cultivators are unscrupulous.

Having seen the positive atmosphere of the Eastern Wilderness, several figured they would return and imitate the Five Elements Sect, attempting to create a small Northern Abyss City.

Finally, the day of the grand ceremony arrived.

At the foot of North Abyss Mountain lies the core of the entire immortal city, a spacious plaza.

Chen Mobai, alongside Qing Nu, descended from the sky on five-colored clouds, wearing a red robe with a golden crown, exuding a charming demeanor; Qing Nu wore a green chiffon dress with a Feng Crown Xiatuo, looking beautiful.

Led by the Fengtian Sect cultivators, the two held incense burners, offering incense to the heavens and earth, expressing their reverence and prayers for blessings.

After the ritual to the heavens and earth, they paid respect to their ancestors; despite both parents' absence, this rite was still indispensable.

Chen Mobai had long prepared tablets of his parents on the mountain, and together with Qing Nu, they performed the ritual towards the mountain.

Lastly, it was the ritual between husband and wife, signifying a shared heart and eternal unity.

After the ceremony, Chen Mobai and Qing Nu held hands and exchanged a smile.

At this moment, melodious music played, dozens of female cultivators with cold temperament and beautiful appearance, led by Xue Ting, performed an elegant dance; they were former disciples of Snow-blowing Palace, sincerely dancing for Chen Mobai. Of course, after performing, each received a considerable amount of Spirit Stones.

Simultaneously, on the walls of Beiyuan Immortal City, numerous dazzling fireworks ignited by Five Elements Sect disciples transformed into colorful bursts of light, immersing the entire city in an atmosphere of celebration and joy.

All the cultivators in the city stepped out of their homes to witness the grand ceremony. Amidst a sky full of colored paper and petals, Chen Mobai and Qing Nu descended, starting to toast one by one.

The first table naturally belonged to Ye Qing and Zhang Pankong, besides them were Ren Qiu, Sun Huanglong, Liu Nan Sheng, and Yi Chenghan.

Considered the most distinguished guests, the seats of Chen Mobai and Qing Nu were also here.

With the sunset over the western mountains, the grand ceremony neared its end.

Chen Mobai and Qing Nu finished toasting the last table, returning to their seats. After drinking the final cup with Ye Qing and others, the Dao Partner Ceremony drew to a perfect conclusion.

Ye Qing and Zhang Pankong were the first to take their leave, and Chen Mobai asked E Yun to see them off on his behalf.

“Everyone, if the hospitality has been lacking, please forgive us.”

After saying this to the crowd, Chen Mobai and Qing Nu returned to the mountain together.

Watching their departing figures, Luo Yixuan and Yin Qingmei sitting together drank another glass, their heads lowered. Liu Wenbo, witnessing this, was somewhat puzzled as he clearly remembered their relationship was not particularly good.

“It’s a pity that Junior Brother is in seclusion for Core Formation, missing this ceremony.”

Putting down his chopsticks, Zhuo Ming spoke regretfully.

Jiang Zongheng was undergoing Core Formation in Loquat Valley, so naturally, it was impossible for everyone to force him to come out for this event.

“With Jiang Shidi’s talent, this Core Formation will surely succeed. Alas, I, as the eldest disciple of Xiao Nanshan Lineage’s second generation, have been surpassed by you junior brothers and sisters...”

Liu Wenbo and Zhuo Ming entered Chen Mobai’s tutelage at the same time. Their bond was even stronger than that of siblings, so Liu Wenbo expressed his inner frustration to Zhuo Ming.

“As long as you follow Master’s instructions, Senior Brother, you will definitely succeed in Core Formation too.”

Zhuo Ming offered comfort. Aside from these second-generation disciples, at their table sat Han Zhiling, Song Huangdae, and Duan Shuyu, three third-generation disciples.

Among them, Han Zhiling had already reached the middle stage of Foundation Establishment, and Song Huangdae was nearly there.

Duan Shuyu had just entered Foundation Establishment not long ago. Because he started cultivation at an older age, despite being the youngest, he had snow-white hair.

“I heard that the Ancestor bestowed the Tianpeng Mountain Sub courtyard upon you?”

Song Huangdae had a good relationship with Han Zhiling. Observing Sect Master Liu Wenbo conversing with Zhuo Ming, he spoke to her.

“No, I’m merely asked to look after the medicine field and spirit plants there.”

Han Zhiling shook her head, denying it. The Fourth Grade Spirit Vein lands were rare in the entire Five Elements Sect. Many Core Formation Cultivators didn't possess them. Given her current Foundation Establishment Realm, how could she be so ostentatious?

"What about you? I heard the Ancestor entrusted an important project to you, previously under the charge of the temporary leader, Uncle E. It seems the Ancestor thinks highly of you."

Han Zhiling's words almost caused Song Huangdae to choke on his drink.

"The position of Sect Leader, I never dared think of it. Don't speak carelessly; if word spreads, it will put me in a difficult position..."

During their conversation, Zhou Ye from the neighboring table suddenly stood up. Green Pearl, beside him, promptly followed with a wine jug.

The two of them walked over to the first table.

After Chen Mobai, Qing Nu, Ye Qing, and Zhang Pankong left, only Ren Qiu, Sun Huanglong, and Liu Nan Sheng remained there.

Yi Chenghan, displeased with Liu Nan Sheng from Sun Bathing Sea, found a place to drink with Nu Jiang and Sheng Zhaoxi.

"Patriarch Sun, I've long admired your name."

After Zhou Ye toasted each person, he sat beside Sun Huanglong with a smile.

"You are..."

Sun Huanglong naturally noticed Zhou Ye's cultivation level was no less than his own and hesitantly asked.

“Zhou Ye of the Five Elements Sect’s Earth Vein.”

“A pleasure, a pleasure!”

Sun Huanglong was aware of the Five Elements Sect’s Five Veins, having heard of Zhou Ye’s reputation, and responded politely.

But he did not know that Zhou Ye was a mortal enemy to his Sun family.

“Patriarch Sun seems to have forgotten.”

Zhou Ye said disappointedly, then put down his wine cup and left with Green Pearl.

Sun Huanglong watched Zhou Ye’s departing figure, slightly frowning, uncertain of the meaning of Zhou Ye’s words.

...

On the mountaintop.

Chen Mobai and Qing Nu arrived at the meticulously arranged bridal chamber. Incense candles shimmered brightly, the bed adorned with a red wedding quilt embroidered with a mandarin ducks frolicking in water pattern, surrounded by various auspicious decorations, creating a warm and harmonious atmosphere.

“My dear wife!”

Chen Mobai followed local customs, calling out, causing Qing Nu’s snow-white cheeks to blush instantly, leading her to shyly lower her head.

Before long, she fell upon the wedding quilt, her snow-white delicate body against the red backdrop seemed to emit a soft jade glow.

The sky was already dotted with stars, and on this special night, the crisp sound of bells continuously rang.

#### Chapter 1713: Foundation Establishment Trithings Listed

After the grand ceremony, Qing Nu officially joined the Five Elements Sect.

In the following days, Chen Mobai spent time with Qing Nu in harmony while also meeting and seeing off visiting guests one by one.

Ye Qing bid farewell the next day. After his Nascent Soul Formation, most of the external affairs of the Jiutian Dangmo Sect had already been entrusted to him, making him very busy.

When Ye Qing left, Chen Mobai had Yue Zutao accompany him back to the East Land, as the large-scale transmission array needed to connect with the Jiutianxian City on that side, so the Five Elements Sect had to send someone for this task.

After years of honing his skills, Chen Mobai believed that Yue Zutao had the ability to handle this matter well.

Primordial Void Dao Child Zhang Pankong stayed behind, as he needed to more thoroughly inspect various aspects of the large teleportation array's setup. The location was chosen to be the previously excavated miniature Lingshi mine, but it required using Earth Vein spells to level and reinforce the ground.

Chen Mobai assigned Yi Shaoqing from the Formation Division to Zhang Pankong to satisfy all layout requests for the teleportation array.

Ren Qiu from Sky Meal Building and Yu Shuji from the Star Heaven Dao Sect also took their leave. It's said that the Star Extreme Great Elder had brought back many delicacies from Central State and overseas, intending to host a lavish feast for several Nascent Soul Superiors from the Eastern Earth Holy Land, inviting Ren Qiu to oversee the cooking.

After seeing off the guests one by one, the bustling and lively Northern Abyss City started to gradually return to its quiet state due to the grand ceremony.

However, with the commencement of work on the Fourth Grade Spirit Vein required for the large teleportation array, the area designated as a new district drew the attention of all idle Immortal Cultivators in the Eastern Wilderness.

The generous benefits offered during past projects developed by the Five Elements Sect attracted many loose cultivators, eager to become part of this project and contribute their labor.

Even the major families of the Eastern Wilderness were trying their connections to secure the lucrative segments in advance.

While Chen Mobai was enjoying his new marriage with Qing Nu, all these matters fell on E Yun's shoulders.

E Yun, having established himself in Northern Abyss City, was well aware of the intricacies involved. He personally managed the development of the new district, ensuring the initially volatile market prices returned to normal levels.

Previously, to rapidly develop the Eastern Desolation Plateau, whether it was the two large rivers, afforestation, desert control, or opening Spirit Fields, in order to attract more human and material resources, high Spirit Stone compensations were given to subcontractors from major Cultivator Families and even loose cultivator labor.

But now, with the development of the Five Elements Sect having entered a stable phase, there's no longer a need to rush progress.

Thus, E Yun felt there was no need to hand such high profits to outsiders anymore.

This naturally offended many, but the Five Elements Sect was unequivocally the dominant power in the Eastern Wilderness now, and if local Cultivator Families on the plateau found the profits too low and

were unwilling to work, the Cultivator Families from over a dozen other counties outside the plateau were eagerly awaiting the opportunity to participate.

Some Cultivator Families were even willing to subsidize the Spirit Stones to work for the Five Elements Sect, just to forge a connection with them.

With intra-sect competition, to secure work, many families used various strategies.

During this time, the temptations E Yun faced were more than he had in his entire earlier life combined.

It was at this time that E Yun realized just how immense the power and the ability to allocate resources the position of the Sect Leader of the Five Elements Sect held.

Without exaggeration, with just a thought, he could help a small family of just over a dozen rise up, or cause a large family of hundreds to decline in a few years.

But E Yun was also well aware that being chosen by Chen Mobai as the temporary leader was not only due to past kindness in his youth but also because his thoughts and actions over the years had aligned with Chen Mobai's.

Facing all sorts of temptations, E Yun rejected them all one by one.

He knew that his current accomplishments were due to Chen Mobai's recognition.

If he ever strayed from Chen Mobai's beliefs and path, it would be time for him to step down.

Among hundreds of powers in the Eastern Wilderness, E Yun assigned his own Spirit Vein Division to undertake the foundation part of the large teleportation array, selecting a few subcontractors with the most suitable pricing for the soil work.

He then consolidated a list of eliminated families and handed it to Zhuo Ming.

Zhuo Ming was planning to open up hundreds of millions of acres of fertile land in the Eastern Desolation Nineteen Prefectures, requiring cooperation from local Cultivator Families, exactly what was missing.

In this process, the Spirit Treasure Pavilion in Northern Abyss City also put new Foundation Establishment spiritual items on the shelves.

The set of elixirs called the Foundation Establishment Trithings initially faced skepticism from quite a few disciples.

However, soon many former true disciples of the Five Elements Sect returned to demonstrate their Foundation Establishment cultivation across their respective branches, proving its effectiveness through their personal experiences.

These individuals, who had condensed the Five Elements Essence under Zhou Wangshen in the Flying Dragon Pool, seized the opportunity and successfully established their foundation.

Previously, to keep the Foundation Establishment Trithings a secret, they had to hide themselves. Now, with the sect's authorization, they could finally return to their main branch and show their Foundation Establishment Realm to family and friends.

The success of this group set a precedent, dispelling any reservations among the disciples of the Five Elements Sect, who eagerly exchanged their accumulated sect contributions for the Foundation Establishment Trithings.

The Spirit Treasure Pavilion priced each component of the Foundation Establishment Trithings at 1000 sect contributions, knowing there was no lack of market, so no discount was offered for the full set.

In just half a month, the thousand sets of Foundation Establishment Trithings prepared over several years by the Alchemy Department under Qing Nu's guidance were completely sold out.

In the following year, every ten days or so, signs of successful foundation establishments began to emerge within the cave dwellings of Northern Abyss City.

The affordability of these Foundation Establishment spiritual items made many Cultivator Families in the Eastern Wilderness restless.

They all requested the Five Elements Sect to open access to the Foundation Establishment Trithings, even at a higher price.

Cultivator Families at least had the means to communicate with the Five Elements Sect and request.

Loose cultivators, however, had no such channels.

But this is their only hope for Foundation Establishment.

After all, a single Foundation Building Pill, even at the lowest base price, costs ten thousand Spirit Stones. They couldn't afford it even if they worked all their lives.

The Foundation Establishment Trithings, even if they can't afford the entire set, buying just one is still beneficial. At least they can get a taste of what Foundation Establishment feels like.

To know that, with the Five Elements Sect suppressing the Eastern Wilderness and rogue cultivators almost disappearing, the lives of loose cultivators are improving. Under the abundance of spirit rice and spiritual energy, the first batch of Northern Abyss City residents with homes have basically achieved the ninth level of Qi Cultivation.

If they are willing to use their homes as collateral, they could take loans to buy one of the Foundation Establishment Trithings without any problem.

Amidst the surging crowd, many loose cultivators even went to the foot of North Abyss Mountain hanging banners, requesting Immortal Venerate Chen to have mercy on the masses and give loose cultivators a chance for Foundation Establishment.

Chen Mobai, who was compiling the Longevity Academy's curriculum with Qing Nu, heard the commotion from the mountain below and couldn't help but chuckle silently.

"What's the matter?"

Qing Nu heard his laughter and put down her paintbrush; she was writing an alchemy textbook, using the Immortal Gate's knowledge system as the skeleton, enriched by the medicinal ingredients and alchemy inheritance here in the Tianhe Realm.

Chen Mobai was also compiling spell, instrument-making, and formation topics.

The educational system of the Immortal Gate is very comprehensive, with the four main subjects—technique, pill, instrument, array—covering almost all the basics. Thus, Chen Mobai planned to initially create these foundational textbooks with Qing Nu.

In the future, the various academies under the Five Elements Sect in the Eastern Wilderness would use these textbooks as models.

This task could only be done by the two of them.

Because the knowledge system must integrate with the locally existing medicinal herbs, terrain, minerals, spells, and so forth to achieve localization.

This is the foundation for eternity.

"Should we allow E Yun to open the Foundation Establishment Trithings to cultivators outside the Five Elements Sect?"

Qing Nu listened to what Chen Mobai said and curiously asked.

If it were in the Immortal Gate, surely public opinion would be heeded and concessions made.

But in the Tianhe Realm here, if the Five Elements Sect were to act ruthlessly, the loose cultivators and rogue cultivators would have no recourse.

It wasn't long before E Yun rushed over.

"I have disturbed the sect leader's tranquility, I am greatly at fault..."

After E Yun ascended the mountain, he immediately apologized.

Chen Mobai used Echoes in the Void to listen again and found that there was no sound below the mountain. With a sweep of divine sense, he saw Yuan Chiye and Qi Rui leading the disciples of the Five Elements Sect, taking away all the Northern Abyss City residents who came with banners.

"It's better to enable than to block; we still have to provide them a channel for advancement."

Chen Mobai spoke a sentence, and E Yun immediately nodded, indicating he would go down the mountain to arrange the opening of the Foundation Establishment Trithings.

"No need for the sect to intervene, I have other arrangements!"

But Chen Mobai shook his head, and E Yun did not ask further upon hearing it.

Not long after, Liu Wenbo and Gu Yan also came over.

"Master, the storefronts for Teacher's wife have all been arranged."

After Liu Wenbo came up, he immediately reported his work to Chen Mobai.

"What storefronts?"

Qing Nu asked with a puzzled expression upon hearing it.

"After you got married, didn't you have ten thousand acres of medicine fields? Those medicinal ingredients won't turn into Spirit Stones just sitting there. My suggestion is to open a shop to sell some elixirs, so I asked Wen Bo to purchase the three best-situated storefronts in Northern Abyss City for you."

Chen Mobai smiled while speaking to Qing Nu, who was drawing medicine patterns. She understood suddenly but furrowed her brows again.

"But if I manage a shop, I will have less time to accompany you."

"Our lives together are still very long, doing something you enjoy is also a way to keep things exciting."

Chen Mobai shared his thoughts and arrangements.

"Just right, the Foundation Establishment Trithings were also cultivated under your guidance. When the shop opens, displaying this will instantly make you the living Bodhisattva in the hearts of cultivators of the Eastern Wilderness, and this must be the number one elixir medicine shop in the Eastern Wilderness."

Qing Nu obediently agreed with Chen Mobai. Hearing what he said, she also felt that managing a shop was quite nice.

"Now all that remains is the shop's name. What would you like to call it?"

Chen Mobai saw Qing Nu nodding and asked again.

"How about Danxia?"

Chapter 1714: Drawing Lots

In the center of Northern Abyss City, a new elixir shop suddenly appeared.

And it's a grand three-storefront shop.

It's worth noting that this is the most expensive area for real estate in Northern Abyss City. Even the Foundation Establishment families have to think twice before considering renting a spot.

Later on, it was discovered that these three storefronts weren't rented but directly bought, which immediately sparked amazement.

This would require at least a million Spirit Stones!

On this day, the signboard of "Danxia Pavilion" was hanging up, and the shop formally announced its opening.

As it was located on the central square, many cultivators were drawn in, and one by one, guests came to give gifts, opening everyone's eyes.

Led by E Yun, prominent figures from the Five Elements Sect attended, with several Golden Core cultivators present in person.

Aside from the Five Elements Sect, leading figures from Sky Meal Building, Starry Sky Commerce Guild, Dongwu Commercial Alliance, and other forces outside Eastern Wilderness were present, offering congratulations.

It was at this moment that the spectators learned who owns this shop.

It's the daoist partner of Immortal Venerate Chen from the Five Elements Sect, Qing Nu True Person.

However, Qing Nu dislikes being in the limelight, so she did not attend.

Since she wasn't coming, Chen Mobai naturally wouldn't come either.

Because Qing Nu certainly wouldn't be staying at the shop for long periods, someone trustworthy was needed as the shopkeeper.

Liu Wenbo was the most suitable, but as he is currently deeply absorbed in cultivation and striving to achieve Core Formation without disgracing the Xiao Nanshan Lineage, Chen Mobai didn't appoint him as manager of Danxia Pavilion.

Chen Mobai asked Luo Yixuan, but this normally obedient disciple stated that she wants to visit the relics of the Fanhai Sect on the East Barbarians side soon, which she might not be able to handle concurrently.

Hearing this, Chen Mobai remembered that Luo Yixuan was also liaising with Starry Sky Commerce Guild and Five Elements Commerce Association, so he decided not to burden her.

After considering trustworthy people around him, Chen Mobai planned to send Gu Yan, who had been by his side for a long time and who handled affairs meticulously at the Daoist couple ceremony alongside Qing Nu, spoken little, and was favored by Qing Nu.

However, precisely because she was so favored, Qing Nu preferred keeping Gu Yan close since the daoist couple both were used to Gu Yan as their maid.

Seeing this, Chen Mobai was about to recommend Xue Ting when Qing Nu chose someone herself.

She selected Wei Qiurong, the Foundation Establishment Practitioner from Five Elements Sect.

Wei Qiurong was originally the steward elder managing Mount Tianpeng Sub courtyard, and during Qing Nu's time there, she was in charge, an outstanding Spirit Plant Master, and could handle interpersonal relations with openness and candor.

Another reason was that after Qing Nu left Mount Tianpeng Sub courtyard, Chen Mobai transferred his third-generation disciple Han Zhiling there to replace Wei Qiurong.

Qing Nu was thus using the shopkeeper position at Danxia Pavilion to compensate Wei Qiurong.

As expected, upon losing her cultivation times at the Fourth Grade Spirit Vein land, Wei Qiurong was thrilled upon learning that Qing Nu offered her such a great opportunity.

Full of preparation and ambition, on the first day of opening Danxia Pavilion, Wei Qiurong stocked ten portions of the Foundation Establishment Trithings.

Among those watching the opening, many wealthy individuals were eager to purchase several portions on the spot.

But shortly thereafter, Wei Qiurong posted a purchase notice.

It outlined the requirements for purchasing the Foundation Establishment Trithings.

First, the buyer must be registered as a resident of Northern Abyss City.

Second, each residency is limited to buying one portion every ten years, only usable by cultivators listed under that residency, and trading is prohibited.

Third, due to the limited production of Foundation Establishment Trithings, purchasing requires a lottery system.

The first two points were clear, but the lottery left everyone puzzled.

Subsequently, Wei Qiurong stepped forward to explain what this lottery was.

The main purpose was to consider the Loose Cultivators, whose financial strength naturally can't match that of Cultivator Families and Sect forces. If purchases were competitive auctions based on Spirit Stones, most of Danxia Pavilion's Foundation Establishment Trithings wouldn't end up in Loose Cultivators' hands.

Therefore, Chen Mobai and Qing Nu deliberated and decided to copy the Immortal Gate's lottery procedure.

Northern Abyss City residents wanting to purchase Foundation Establishment Trithings could pay a Low-grade Spirit Stone fee to receive a talisman from Danxia Pavilion, which would bear a number. Every month, Danxia Pavilion would stock ten portions of Foundation Establishment Trithings, and then a lottery would be drawn the following month's first day.

The ones whose numbers are drawn could purchase the Foundation Establishment Trithings at Danxia Pavilion using their talisman numbers.

This policy shocked and delighted many cultivators.

Especially those Loose Cultivators.

They all sincerely prayed and bowed towards the North Abyss Mountain Peak Direction, also feeling grateful to be part of Northern Abyss City.

One month later, more than ten thousand Northern Abyss City residents participated in the first lottery.

And to increase their chances of winning the lottery, many Cultivator Families purchased a lot of new real estate this month, knowing that once the lottery policy was announced, the real estate in Northern Abyss City would only continue to rise.

On the lottery day, Northern Abyss City was deserted.

Danxia Pavilion was already crowded with people; fortunately, the storefront was located right at the central square where many people could stand outside.

Chen Mobai and Qing Nu stood at the mountain top, looking down at the dense crowd of cultivators below. There were almost more of them than on the day of their Daoist couple's ceremony, which made them sigh with emotion.

Indeed, the only thing that can truly motivate people is when their own interests are at stake.

The Foundation Establishment Trithings, as long as they are purchased, even if they are not needed now, can be passed on to family in the future, it's certainly a worthwhile investment.

Therefore, almost everyone in Northern Abyss City with some financial means participated in this lottery.

"This place is becoming more and more like an Immortal Gate."

Qing Nu looked at the mountain below, and as each number appeared, waves of cheers and disappointment rose, prompting her to speak.

"Only in this way can there be rules, and even form the Fruit of Dao's Rule!"

Chen Mobai made this statement.

Qing Nu showed a puzzled expression; she was unaware of the rules within the Immortal Gate.

For her, Chen Mobai had nothing to hide, telling her everything about the rules and the Fruit of Dao's Rule.

"There's actually a Divinity Transformation path like this, no wonder..."

Qing Nu was astonished after hearing this.

It was also at this moment that she understood the significance of the existence of the Immortal Gate.

"Once things here are settled, I also need to return to the Immortal Gate and visit the Heavenly Book Academy to read the Taoist Laws Sure-book. Maybe this will be my path to Divinity Transformation in the Eastern Wilderness in the future."

As Chen Mobai spoke, he displayed his external incarnation and the Crown of Heaven and Earth.

This was also the first time Qing Nu had seen them.

Before, she thought she had deeply understood every aspect of Chen Mobai over the years, little did she know that after becoming a Daoist couple, she would discover something new every day.

Her man was like an inexhaustible treasure!

Thinking this way, Qing Nu's gaze towards Chen Mobai became even more entranced.

Down the mountain.

The results of the first lottery were out, seven belonged to loose cultivators, and three to the cultivator families.

This result was long anticipated by E Yun and others, after all, they had the data of all the homeowners who participated in the lottery, and could get a rough estimate by calculating with statistical probability.

Although on the surface cultivator families seemed more powerful than loose cultivators, in reality, except for the Five Elements Sect, loose cultivators occupied nearly eighty percent of the household in Northern Abyss City.

After the lottery was over, E Yun and Wei Qiurong came to report.

Four out of the seven loose cultivators lacked financial resources and couldn't pay the full price for the Foundation Establishment Trithings. Danxia Pavilion would reserve their qualifications for three years for them, allowing them to pick up the remaining elixirs as long as they gathered enough spirit stones within three years. If they exceeded three years, these additional Foundation Establishment Trithings would be released for lottery again.

This policy was greatly praised by the loose cultivators.

In the following days, concerned about their Foundation Establishment Trithings, these loose cultivators frequently came to Danxia Pavilion, and for any elixir needs, they basically resorted to spending there.

There were also three loose cultivators who had reached the peak of their years, deciding to mortgage their cave dwelling in Northern Abyss City in exchange for spirit stones to purchase the full set of Foundation Establishment Trithings, seizing the opportunity for Foundation Establishment under a stroke of tremendous luck from above.

After all, every cultivator knew that as long as they succeeded in Foundation Establishment, even working for the Five Elements Sect, they could repay these spirit stones cleanly within a decade or so.

The local people's mentality of wanting to take risks, even Chen Mobai couldn't change.

The only hope was to educate the next generation well.

"Hmm, well done, continue like this in the future."

After listening to the report, Chen Mobai said to E Yun and Wei Qiurong.

"Sect Leader, there is one more thing, I've discovered that there are already cultivator families trying to exploit loopholes."

E Yun then shared the information he had gathered. Since these Foundation Establishment Trithings could not be traded, but could be used by cultivators registered under the household, some financially strong cultivator families were trying to make deals with those successful in the lottery, offering spirit stones to have their own family members with Foundation potential transferred or married into those households.

One of the loose cultivators quickly reported this matter to the Five Elements Sect. As a temporary leader, E Yun felt that this loophole might make those cultivator families grow stronger in the future, so he wondered if it could be closed.

“Let it be, if every regulation is set in stone, it will instead lose vitality.”

But Chen Mobai shook his head and indicated that it didn't need to be managed.

“This... Yes, Sect Leader!”

Despite being trained by Chen Mobai for decades, E Yun still struggled to keep up with his thinking, not understanding the meaning of this sentence, but he nodded obediently.

“What you're worried about is nothing more than the cultivator families growing strong enough to threaten the sect's dominance, or even causing higher-level Golden Core cultivators to emerge from a larger number of Foundation Establishment practitioners. But you must know that the act of merging, as long as society exists, will never cease.”

“What we need to do is maintain our own strength. As long as Brother Zhou and I are here, even if ten or a hundred Golden Core Families appear, it will still be our Five Elements Sect dictating the Eastern Wilderness.”

“Moreover, if the sect holds absolute dominance in the Eastern Wilderness, it will quickly become arrogant and even lose the motivation to progress. A bit of external pressure is actually quite beneficial.”

After Chen Mobai finished speaking, E Yun was suddenly enlightened and looked appreciative.

#### Chapter 1715: Establishment of a Large-scale Transmission Array

In the Eastern Wasteland, under the leadership of the Wuxing Sect, everything has started to develop in a positive direction.

The greatest news is, of course, the successful establishment of the large teleportation circles.

With the personal attention of Zhang Pankong, the Primordial Void Dao Child, Taixu Miaomiao Palace quickly dispatched a group to tirelessly set up the large teleportation circles at the new district of Northern Abyss City and the foot of Mirroring Mountain at Dongyi.

When these two large teleportation circles were completed, Chen Mobai personally descended the mountain.

After thanking Zhang Pankong, he was the first to enter them, experiencing the sensation of instant trans-local movement over tens of thousands of miles.

After several round trips, he suddenly gained some insight into the Void Teleportation.

"Thank you, Primordial Void Dao Child."

Having verified the large teleportation circles, Chen Mobai thanked Zhang Pankong beside him, acknowledging that with this, the final obstacle to the development of the Wuxing Sect no longer existed.

"It's merely a regular transaction, no need for thanks."

Zhang Pankong gently shook his head.

Chen Mobai immediately handed over a large bag of spirit stones that he had prepared in advance. Having already paid a deposit of fifty million spirit stones, this batch was the final payment, along with maintenance costs for the two large teleportation circles for the next ten years.

Fortunately, it was mined from a large spirit stone mine at Dove Mound Mountain for a billion, and coupled with the pre-sale of new district property shop fronts for some cash recovery, otherwise the Wuxing Sect might indeed not have enough spirit stones.

It was at this moment that Chen Mobai realized why among the Three Regions of the Dongzhou Frontier, only the Golden Crow Immortal City had a large teleportation circle.

It's not even considering the Nascent Soul Major Faction; just the spirit stone cost would deter many Nascent Soul Cultivators.

After all, having fifty million to a hundred million spirit stones in one's storage bag, how reassuring it is.

Taking them out to set up a large teleportation circle merely for convenience is less attractive than buying more elixirs to enhance one's cultivation level.

Even without utilizing the large teleportation circles, with the Nascent Soul realm's power, one can safely traverse the ruins to reach the East Land.

"The connection with the Nine Heaven Immortal City teleportation circles will still take some time."

Receiving the final payment, Zhang Pankong nodded slightly. Compared to the newly established large teleportation circles, connecting with old teleportation circles is relatively complex.

Furthermore, the array prohibitions of the Nine Heaven Immortal City were personally set by Huashen Zhenjun, and the connection of teleportation circles requires cooperation from the Jiutian Dangmo Sect.

"I can only trouble Dao Brother."

Chen Mobai spoke kindly.

"Ye Qing has already introduced me, so I'll coordinate this matter after I go over."

Zhang Pankong said, leveraging his status as the Primordial Void Dao Child and Ye Qing's influence, the progress of this matter has been exceptionally swift.

If it were another Nascent Soul Major Faction, it wouldn't even be considered; the Nine Heaven Immortal City certainly wouldn't agree.

Nonetheless, Chen Mobai waited two months before the official connection of the large teleportation circle of Mirroring Mountain with the Eastern Land was achieved.

After the teleportation circle was fully connected, Ye Qing and Zhang Pankong also teleported to Northern Abyss City.

Chen Mobai personally entertained them, expressing gratitude for this matter.

He took out mature Rank-4 Immortal Peach Fruits and spiritual wine brewed from the peach fruits.

These were all natural, and didn't have the impact of dan poison on cultivation level growth, so Ye Qing and Zhang Pankong gladly tasted them.

For Nascent Soul Cultivators, these Rank-4 peaches could save them a year or two of meditation and cultivation of True Qi, making them decent spirit fruits.

Seeing Ye Qing and Zhang Pankong, seemingly unfazed after tasting the immortal peach fruits, Chen Mobai sighed inwardly, acknowledging their status as Taoist Children of the Holy Land, whereas these things were precious only to someone like him from the Eastern Wasteland Village.

Actually, Chen Mobai did possess something that could awe them, such as Enlightenment Tea.

Though he only had Rank-3 Enlightenment Tea on him, it could still allow Nascent Soul Cultivators to enter a Taoist realm for a few minutes.

However, in the Tianhe Realm, he always believed in keeping a low profile with his wealth and acting cautiously.

No matter that in front of these two Taoist Children, over time through communication, he deemed them rare individuals with the Way, he didn't want them to know about the existence of Enlightenment Tea.

Especially since the local people left a poor impression on him, if Ye Qing inadvertently revealed the tea's existence, cultivators from the two Great Holy Lands might come seeking it, putting Chen Mobai in a tough position: to give or not to give.

"Sect Master Chen can visit Nine Heaven Immortal City anytime; when my master returns from seclusion, I can bring you up Tongtian Peak to meet him."

Ye Qing said this upon his departure, causing Chen Mobai's heart to tremble, pretending to be jubilant as he nodded repeatedly.

"Certainly, certainly."

Yet internally, he resolved never to step into Nine Heaven Immortal City.

After the large teleportation circle seamlessly connected the three regions of Eastern Wasteland, Dongyi, and East Land, many cultivators of the Wuxing Sect applied to go to East Land to broaden their horizons, led by Nu Jiang and Sheng Zhaoxi.

Having been sheltered in the Dongzhou Frontier all their lives and growing up hearing stories about the East Land from Ancestor Hunyuan since joining the Wuxing Sect, they have long yearned for it.

It was inconsequential for Sheng Zhaoxi to leave, but Nu Jiang shouldered the significant responsibility of guarding Wind Rain Hamlet, so before departing, he had to apply to Chen Mobai.

However, Nu Jiang did not make things difficult for Chen Mobai. Before coming, he had already discussed with Fu Zongjue, asking the latter to help guard the place for a period of time.

Chen Mobai naturally agreed. To prevent any accidents, he also ordered Ning Leshan from the Metal Vein to go to the Wind Rain Hamlet.

After seeing off Nu Jiang and Sheng Zhaoxi, several of the remaining Golden Core cultivators from the Five Elements Sect wanted to go to the East Land to broaden their horizons.

Chen Mobai directly handed this matter over to E Yun, asking him to arrange the travel order to prevent the Five Elements Sect's cultivators from flocking to the East Land in droves, leaving the internal defense empty.

According to his instructions, no more than two Golden Core cultivators could travel together. Once Nu Jiang and Sheng Zhaoxi returned, two more people could be sent out as replacements.

With his order, E Yun found the arrangement to be smooth and effortless.

Time passed, and in the blink of an eye, half a year had gone by.

Chen Mobai and Qing Nu finally completed the initial draft of the basic curriculum for the Six Great Academies in the arts of Technique, Pill, Instrument, and Array, which would next be verified through teaching.

Jiang Zongheng was in seclusion, Ding Ying went to Golden Light Academy, and now Lian Maozhi was in charge of Longevity Academy.

Initially, Lian Maozhi pursued education simply because he envied Jiang Zongheng for becoming a disciple under Chen Mobai, wanting to imitate him.

But over the decades, he genuinely grew to love teaching and educating, experiencing a unique sense of satisfaction watching students grow under his guidance and join the sect.

After receiving the basic curriculum for the four subjects from Chen Mobai, he immediately realized the value of these documents, becoming extremely excited.

"This is just the initial draft. Later, the other heads of the Five Great Academies will also come, and starting next year, you all will teach according to the contents of these textbooks."

Besides Longevity Academy, the other Five Great Academies had also been completely established under Chen Mobai's guidance, launching small-scale pilots to recruit disciples.

It is said that the slots in the Five Great Academies were extremely precious, and many cultivator families were desperate to have their disciples enrolled.

In response, having passed the phase of blind expansion, the Five Elements Sect began pursuing excellence.

The entrance exam questions were even crafted by Chen Mobai himself.

Apart from the Five Great Academies, several supporting Five Great Immortal Cities were still under construction. The fastest ones were Hunyuan Immortal City of the Earth Vein and Shenmu Immortal City of the Wood Vein. With existing frameworks, Chen Mobai did not make significant changes, only adding substantial city infrastructure on top of the original plan.

The other cities—Fire Truth, Cloud Dream, and Golden Light—would likely take another three or four years to complete.

The main challenges were in upgrading the Spirit Veins and setting up new Large Formations.

The Five Elements Sect's only deficiency now was the lack of Rank-4 Array Masters.

To this, E Yun originally thought of inviting people from Kong Sang Valley for assistance.

However, Chen Mobai rejected this idea.

Formation techniques are a sect's most crucial trump card. If every Rank-4 Large Formation in the Eastern Wilderness had to rely on outsiders for setup, he would be far from reassured.

To address this issue, Chen Mobai had two plans.

One was to vigorously support the sect's Formation Division Foundation Establishment cultivators, such as Yi Shaoqing, prioritizing Golden Elixir Spiritual Medicine allocations once they reached Foundation Establishment Completion.

Secondly, he made efforts himself, striving to master the Devour God Technique diligently, aiming to cultivate within the shortest possible time the next level of the Vermilion Phoenix Facing the Sun Diagram's Response Earth Spirit realm.

This way, he could directly advance to become a top-tier Array Master.

"Sect Leader, I have some confusion regarding this content?"

At this time, Lian Maozhi, having reviewed all the textbooks, raised his questions concerning what he did not understand.

Chen Mobai replied in a gentle tone, offering explanations.

Meanwhile, Ding Ying, Tan Rong, and the other heads of the Five Great Academies arrived in Northern Abyss City through a Transmission Array.

Once they finished reviewing the teaching materials, Chen Mobai, alongside Qing Nu, instructed them for several days.

The heads of the six academies listened very carefully.

Chen Mobai's reputation as a Great Sage and Good Teacher was known throughout the Eastern Wilderness, and they took advantage of this opportunity to ask questions regarding their own cultivation.

Chen Mobai answered each one.

"A year from now, each of you will submit a reflection paper on this new teaching material."

After concluding the lectures, Chen Mobai made this request to the six individuals.

Knowledge needs constant updating and iteration. Even though the main structure of the curriculum compiled by him and Qing Nu far surpassed this world, much of the knowledge content derived from the Tianhe Realm needs several versions for trimming and revision to be perfected.

The reason for not directly copying the Immortal Gate's curriculum was mainly because the knowledge from the Immortal Gate, especially in terms of the basics, far exceeded the levels here. If it circulated to the East Land and was seen by the people from the Holy Land, they would certainly notice the anomalies.

This isn't something that can be fooled with the Longevity Sect, especially since the Longevity Sect's era is even more ancient, meaning their understanding of Foundation Rank-1 knowledge might not even match that of the current Tianhe Realm.

"Yes, Sect Leader!"

After Lian Maozhi and others left, Chen Mobai said something to Qing Nu, then returned to the Immortal Gate.

Chapter 1716: 7 Great Tian Shu

After returning to the Immortal Gate, Chen Mobai first made a phone call with Daoist Yu Yi.

He set up a time with her, planning to view the Dao Law Heavenly Book.

Daoist Yu Yi: "Then I will eagerly await the grand arrival of Elder Pure Yang."

After the call ended, Chen Mobai announced he was "out of seclusion."

The first person he saw was naturally Wanyu, who was very happy to see Chen Mobai. The couple talked for a while, expressing their longing for each other.

Not long after, Hua Zijing, who had received the news first, arrived.

As soon as she arrived, Chen Mobai heard some good news.

Zhuang Jialan had successfully formed her core and was currently consolidating her realm. She would probably be able to start working by the beginning of next year.

"Tell Jialan not to rush, consolidation is very important..."

Chen Mobai was always very concerned about his people, and while speaking, he inadvertently thought of Meng Huang.

With a mere thought, he communicated with the Formless Puppet over at Danxia Mountain.

He found out that Meng Huang was still refining her Liquid Spiritual Power and hadn't taken any elixirs yet.

It was evidently a sign of lacking self-confidence.

Chen Mobai shook his head internally. At this time, Wang Shuye and the others from the Weapon Dancing Sect also arrived.

In the Three Great Halls, there was now a situation of three forces balancing each other.

Patching Heaven, Dance Instruments, and Kunpeng each held the power over one hall, Jumang was reliant on Dance Instruments, and the three parties were very conscious of boundaries in their own fields of action.

It was precisely because of this that Chen Mobai could comfortably "go into seclusion."

Currently, the main focus of the Three Great Halls was on the Portal Management Bureau. In another five years, they could use the portals to send the Immortal Gate's cultivators to the other side.

Nangong Xuanyu was recognized by the Leading Star Ancestor as the leader.

But for the remaining individuals, nothing had been decided yet.

In this regard, it was the point of contention among the three forces.

Going to another world was undoubtedly very dangerous, but according to the rules of the Immortal Gate, they would offer very precious items as compensation.

For example, a Golden Core cultivator would be promised one of the Infant Binding Three Spirits Medicines if they returned safely.

If a Foundation Establishment cultivator went, the condition was a Golden Elixir Spiritual Medicine.

Although these benefits could only be redeemed after returning, only during wartime would such conditions be available.

Even so, there were not many who wished to go.

After all, they were used to peace in the Immortal Gate. Being able to live a stable life was already very satisfying to them.

These conditions were basically prepared for those with further ambitions.

Because the resources of the Immortal Gate were limited, they needed to select from those signing up to participate.

This selection process was currently the negotiation and compromise among the three forces of the Three Great Halls.

Wang Shuye shared the preliminary results of these negotiations with Chen Mobai.

This time, aside from Nangong Xuanyu, there were also ten Golden Core cultivators and thirty Foundation Establishment Completion cultivators.

Among them, the Weapon Dancing Sect had three Golden Cores and eight Foundation Establishments, which was about the average.

Patching Heaven and Kunpeng were the same, Jumang had the least with only one Golden Core and six Foundation Establishments, but Pei Qingshuang was quite satisfied with this, considering their limited strength.

In these quotas, they also needed to symbolically allocate one or two more to the lower institutes and academies.

After hearing Wang Shuye's list, Chen Mobai had no objections and directly nodded in agreement.

It's beneficial to have a lot of talented people under your command; you only need to make the final decision.

"I need to visit the Heavenly Book Academy in a few days. Comprehending the Heavenly Book may take some time, so I'll have to trouble you with matters at Wangwu Cave Heaven."

Hearing that Chen Mobai, who had just come out of seclusion, was going to comprehend the Heavenly Book again, Wang Shuye and the others were secretly impressed. They thought no wonder the Elder achieved so much at a young age; his talent was better and his efforts greater than theirs. For someone like him, success was inevitable.

Fortunately, he was their leader. If he was an opponent, seeing Chen Mobai's relentless pursuit of progress would probably give them a headache.

After seeing off Wang Shuye and the others, Wanyu personally prepared a lavish dinner. When Chen Xiaohei, returning from work, saw the "out-of-seclusion" Chen Mobai, he was also very happy.

The next day.

Chen Mobai took a private jet to the Heavenly Book Academy.

The Heavenly Book Academy was located in Weiyu Cave Heaven, and in the minds of talisman makers in the Immortal Gate, it held a position comparable to the Dance Tool Dao Academy to artifact refiners.

The Tian Shu talisman brush set that Chen Mobai bought from the flagship store of the Heavenly Book Academy had been used for decades, and with proper maintenance, it still retained smooth strokes and rich lines.

It's just a shame that he abandoned his personal interest in talisman making for the sake of the Dance Tool Dao Academy, focusing on elevating his cultivation realm. Otherwise, he would have likely come to the Heavenly Book Academy for advanced study long ago.

When Chen Mobai landed at the Weiyu Cave Heaven Airport, he discovered that the one who came to greet him was an old acquaintance.

His former high school classmate from the Fifth High School of the Immortal Gate, Song Zheng.

"Hahaha, Old Song, I didn't expect it to be you. It's been so long."

Chen Mobai laughed heartily as he approached Song Zheng, patting him on the shoulder. The latter, who initially seemed a bit uneasy, relaxed.

"I've met Elder Chunyang. The principal asked me to pick you up."

Song Zheng said, mentioning that after graduating from high school, he had enrolled in the Heavenly Book Academy, but unfortunately failed the Foundation Establishment.

Later, he married Mo Simin, who exempted herself from military service by staying in Red Sandstone City, while Song Zheng, yearning for Foundation Establishment, enlisted in the military.

He had a decent talent, and after ten years of honing in the military, he finally succeeded in Foundation Establishment the second time around.

After retiring, considering his child's future, he brought Mo Simin and their daughter to the Weiyu Cave Heaven.

Song Zheng is now a teacher at the Heavenly Book Academy. Perhaps because of age, he often boasted in the office about Chen Mobai being his high school classmate and how close their relationship was. So when Chen Mobai came over, the task of picking him up was assigned to him.

Upon first meeting Chen Mobai, Song Zheng was a bit reserved, but after exchanging a few words, he realized that Chen Mobai hadn't changed and still treated him as a friend, making Song feel at ease and confident.

The two naturally discussed those fulfilling yet tense high school days leading up to the college entrance exams.

Chen Mobai asked about Mo Simin, as he had a deep impression of this class monitor who used to tag along as a third wheel when he dined with Yan Bingxuan.

With tenderness on his face, Song Zheng spoke of his beloved, mentioning that Mo Simin now has a clothing store in Weiyu Cave Heaven, fulfilling her childhood dream.

Their daughter Song Sisi has also grown up, inheriting their genes. With good talent, she successfully got into the Heavenly Book Academy, achieved Foundation Establishment during college, and after graduation, worked hard and became a civil servant. Now, she works at the Talisman Masters Association while waiting for a vacancy in the Immortal Gate to be transferred over.

"Time flies!"

Hearing this, Chen Mobai was also filled with emotion.

Back when they graduated from college, they had a gathering in Red Sandstone City. Mo Simin was heavily pregnant then, but now their daughter is already seventy-sixty years old.

As they talked, they had already arrived at the Heavenly Book Academy.

Located in a secluded valley surrounded by dense greenery, the academy's majestic gates were inscribed with the words "Heavenly Book," exuding a solemn aura.

Daoist Yu Yi was actually waiting for Chen Mobai at the entrance, and the latter immediately went over to greet him.

Witnessing two Nascent Soul Cultivators meeting caused quite a few people to raise their phones and start filming.

Chen Mobai noticed many media reporters as well.

Upon inquiry, he realized they were local to Weiyu Cave Heaven and that his visit as the Deputy Hall Master of the Hall of Orthodox Law was undoubtedly a major event that warranted extensive reporting.

Daoist Yu Yi was already accustomed to this; every visit by a Nascent Soul Cultivator to view the Tian Shu was considered huge news here and in the Immortal Gate.

Chen Mobai nodded and followed Daoist Yu Yi toward the Pavilion of Heavenly Books.

This place was also the core of the Heavenly Book Academy. Besides the seven heavenly books at the top, there were many ancient manuscripts and authentic scripts from outstanding talisman makers of the Immortal Gate. Chen Mobai even found the initial manuscript of the Heaven Heart Sword Talisman and stopped to examine it attentively.

Daoist Yu Yi did not disturb him and only asked him questions after he had finished observing.

Upon learning about Chen Mobai's connection to the Heaven Heart Sword Talisman, Daoist Yu Yi's expression turned enlightened.

"Up above is where the Seven Great Heavenly Books are stored."

After exploring the manuscripts and ancient talismans below, they proceeded to the unadorned top floor, where the media and the academy's teachers dared not follow.

Chen Mobai followed Daoist Yu Yi to the highest loft and immediately noticed seven ancient and exquisite heavenly books placed within transparent glass enclosures.

These were the Immortal Gate's most treasured Seven Great Heavenly Books.

The heavenly books varied in colors, forming a complete rainbow when combined.

Under Daoist Yu Yi's guidance, Chen Mobai soon stood before a green jade book.

Evidently, this was the Taoist Laws Sure-book!

Daoist Yu Yi's fingers sketched a talisman in the void, and soon pure True Qi condensed into a brilliant character mark at her fingertips. Chen Mobai carefully sensed it and realized it was a fifth-order talisman.

Tales of the Immortal Gate's Fifth Order Rune Master!

Daoist Yu Yi's fingertip talisman landed on the glass enclosure of the Taoist Laws Sure-book, swiftly lifting an invisible restriction. She then opened the case, took out the book, and handed it to Chen Mobai, who immediately received it with both hands.

"Study it carefully, and remember that the other six heavenly books also have powerful restrictions, so don't touch them unnecessarily."

After saying this, Daoist Yu Yi left.

Chen Mobai escorted her to the doorstep, and once he confirmed her presence had left the Pavilion of Heavenly Books, he didn't immediately delve into the Taoist Laws Sure-book. Instead, he approached the other six heavenly books.

The Seven Great Heavenly Books of the Immortal Gate!

Each one caught his eye.

Universe, Purple Green, Phoenix Seal, Dao Law, Taiyuan, Life and Death, Mahayana!

Chapter 1717: Taoist Laws Sure-book (Additional update for 23,000 monthly votes)

Chen Mobai stood before the Tian Shu, his gaze filled with reverence.

The myriad Daoist skills of the Immortal Gate, many of their sources are these Seven Heavenly Books.

For instance, part of the essence of the Liu Yu Scripture is completed through the Universe, Taiyuan, and Life and Death these three Heavenly Books.

And the Jade Purity Scripture is the result of the Broad Awakening True Monarch of the Heaven-Repairing Lineage gaining insights from the Taiyuan Heavenly Book. Initially without hope for Divine Transformation, he found the most suitable Great Tao from the Tian Shu and had a sudden enlightenment, achieving the Primordial Spirit.

Jumang Academy's Lasting Spring Cultivation is also related to the Purple Green and Life and Death these two Heavenly Books.

Dance Tool Dao Academy's Vermilion Phoenix Facing the Sun Diagram originates from the Phoenix Seal Scripture.

Each of the Immortal Gate's Seven Great Heavenly Books contains incredible Tao, and it's said that anyone who thoroughly understands one of them can Ascend to become Immortals.

Thinking of this, Chen Mobai's eyes fell upon the last Mahayana Book.

This is the only Heavenly Book in thousands of years beneath the Immortal Gate that no one has been able to comprehend.

However, the Five Ancestors of the Immortal Gate left words that only by integrating the other six Heavenly Books can the profound mystery of this Mahayana Book be unlocked.

Who knows if he will ever have this opportunity in his lifetime!

With this thought, Chen Mobai first approached the Phoenix Seal Scripture.

Although he couldn't touch it, through the glass cover, he could see it as a crimson jade book, engraved with a pattern of a phoenix resting on a parasol tree. Every stroke seemed vivid and expressive, as if a living Phoenix True Spirit was dancing upon the book.

Chen Mobai closed his eyes, unfortunately, even Echoes in the Void couldn't breach the restriction on the Tian Shu, unable to hear any resonance.

Next, he came before the Purple Green Book.

This book has already been translated by Qing Shi and Qing Jing, and Chen Mobai has utilized the opportunity of Immortal Spirit Roots Wenda to comprehend it thoroughly.

However, he wondered whether the version unraveled by the two Daoists differed from the original Tao recorded in the Purple Green Book?

After examining these two Heavenly Books related to him, Chen Mobai subsequently observed the remaining four and then walked to the desk by the window corner of the attic.

There is also a chair here, Daoist Yu Yi mentioned it's prepared for those who comprehend the Heavenly Books.

Sitting down, Chen Mobai instantly felt refreshed, his thoughts more animated by three folds.

Upon closer inspection, he discovered that although the chair's material was ordinary, the bottom was inscribed with a talisman conducive to meditation and enlightenment. When one sat upon it, it automatically transformed into the most suitable Pure Spirit Qi based on the cultivator's aura and spiritual power.

This skill alone demonstrated that it was a fifth-order level talisman.

Chen Mobai couldn't help but marvel at the talisman-making level of the Heavenly Book Academy.

This chair placed in the Tianhe Realm would certainly be contested by Nascent Soul Cultivators from the Holy Land.

After adjusting his posture and ensuring the talisman's effectiveness was optimal for him, he gently placed the Tian Shu on the table.

The cover of the Taoist Laws Sure-book was deep cyan with light green lines resembling a highly intricate talisman, yet seeming like chaotic lines. After a few more looks, Chen Mobai felt his Divine Sense faintly dizzy.

He immediately stopped, stabilized his Sea of Knowledge at the Purple Mansion, and opened the first page of the Tian Shu.

The Taoist Laws Sure-book contained no words, only patterns composed of lines, ready to be carefully recorded by Chen Mobai when he noticed a few lines had changed the next instant. Each change subtly altered the inherent truths and mysteries.

Chen Mobai was well aware of his own understanding, so he didn't forcibly delve.

He continued to turn to the second page, another pattern composed of different lines, also changing every moment.

Then the third page, the fourth page...

After reviewing the entire forty-nine pages of the Taoist Laws Sure-book, Chen Mobai closed his eyes, beginning to recall the contents he had seen.

After half a day, he opened his eyes again.

With his level of comprehension, he couldn't definitely understand anything substantial.

Fortunately, he was prepared, brewing a pot of Rank-3 Enlightenment Tea, yet even faced with such infinite variations in the Tian Shu, though he grasped some momentary insights, he couldn't fully comprehend all the truths and patterns within.

However, Chen Mobai didn't lose heart. He initiated his Crown of Heaven and Earth, entering the Realm of the Guidance Book.

Previously, he had already downloaded all theses and book contents related to the Taoist Laws Sure-book from the Immortal Gate National Library.

The Taoist Laws Sure-book relates to rules and is the easiest path to Divine Transformation in the Immortal Gate, so it has the most cultivators who come to the Heavenly Book Academy to study.

Basically, the Three Hall Masters from past generations have been here.

These individuals undoubtedly were the most outstanding geniuses in the history of the Immortal Gate.

They pondered on the Taoist Laws Sure-book, each having unique insights despite failing to fully understand it.

According to the Immortal Gate tradition, they naturally recorded these for future reference.

The major contributive beings were the Taiyuan and Xuan Wu True Monarchs, who refined the existence of rules.

These papers can only be downloaded by Nascent Soul Cultivators, and Chen Mobai rightly qualified.

The other cultivators of the Immortal Gate study the Taoist Laws Sure-book, mainly focusing on the papers of the two Deity-Transcending True Monarchs, as their content essentially encompasses the essence of everyone else.

However, Chen Mobai made no distinctions of superiority or inferiority, downloading every piece related to the Taoist Laws Sure-book and recording them within the Heavenly Calculation Bead.

Under the integration of the Guidance Book, he quickly discovered the profound mystery of the first diagram he saw.

Once again, he opened the first page of the Taoist Laws Sure-book, initiated inner observation, and gradually immersed himself in the study of this heavenly book.

Who knows how much time passed, Chen Mobai finished flipping through all forty-nine pages of the Taoist Laws Sure-book once more.

He closed his eyes, and the Guidance Book was now operating at its peak.

The Immortal Gate's thousands of years of understanding and insights into the Taoist Laws Sure-book transformed into sparks of wisdom in his Sea of Knowledge at the Purple Mansion, sieving the wheat from the chaff.

Gradually, the lines of all the subtle green heavenly books he saw began to overlap, outlining the formation of a deep green Dao Fruit.

This is the Fruit of Dao's Rule!

At the moment when the Dao Fruit emerged, Chen Mobai suddenly comprehended.

The lines on the Taoist Laws Sure-book represent the various laws of a world, but because all beings and things are constantly changing, the lines also change every moment.

Rules are a manifestation of the laws of the Great Tao, transforming the unobservable Taoist Laws into a formula that cultivators can manipulate and comprehend.

It is precisely because of this rules-based formation that those who transform into immortals have deficiencies, reliant on the beings created by these rules to achieve the Dao Fruit.

If any cultivator can directly comprehend the true Taoist Laws instead of refining these imitative rules, then they can cast off this limitation and constraint, possessing the power of divine transformation as long as the world is shrouded in the laws of the Great Tao.

But even if Chen Mobai attained this insight, he could not achieve it.

For comprehending the true laws of the Great Tao is something even Deity-Transcending True Monarchs cannot accomplish.

Chen Mobai slowly opened his eyes, with lines invisible to human sight flickering in his gaze.

These were lines hanging from his Crown of Heaven and Earth.

After finishing the Taoist Laws Sure-book, though he couldn't truly contemplate the laws of the Great Tao, he had become thoroughly familiar with the rules cultivated by the Immortal Gate.

The White Jade Crown atop Chen Mobai's head began to operate at his instruction, with the lines originally coiling around it flipping upward, adhering along the lines outlined by the Guidance Book's illusive Fruit of Dao's Rule.

Ever since the Five Elements Sect unified the Eastern Wilderness, as its sect leader, Chen Mobai had actually been connected to all beings in the Eastern Wilderness, so the number of lines now reached tens of millions.

Yet even with such a multitude of lines, compared to those forming the Fruit of Dao's Rule, they still seemed scant.

This time studying the Taoist Laws Sure-book proved Chen Mobai's conjecture to be feasible.

As long as he persists in governing the Eastern Wilderness, more lines will emerge, creating new rules, establishing a transformative pathway in the Eastern Wilderness.

Using the local terminology of the Tianhe Realm, it would be a Dao Fruit.

Who knows how much time passed, Chen Mobai maneuvered all the lines on the White Jade Crown, covering one-tenth of the illusive Fruit of Dao's Rule.

From a distance, it looked like a dim cyan flawed Treasure Bead was embedded atop the White Jade Crown.

Just as Chen Mobai was preparing to activate this Fruit of Dao's Rule, the flawed Treasure Bead suddenly cracked open, scattering into tens of millions of lines.

Seeing this scene, he couldn't help but fall into contemplation.

Subsequently, he attempted once more to outline the Fruit of Dao's Rule with his lines.

But the result was the same, it could take shape but seemed unstable in foundation, collapsing back into lines upon attempting to move it.

After two consecutive failures, Chen Mobai reopened the combined Taoist Laws Sure-book, re-entering the state of the Guidance Book, where the abilities of the Crown of Heaven and Earth were also working at their extreme.

Who knows how much time passed until he finally found a possible explanation.

Leading Star Ancestor once said that the Fruit of Dao's Rule of the Immortal Gate originated from a Taoist Seed brought by the Five Ancestors, nurtured under the civilization of Di Yuan Star to become rules.

If Chen Mobai's Fruit of Dao's Rule wants to take shape, does it also need a seed?

Then let the civilization of the Eastern Wilderness water and nurture this Taoist Seed, forming new rules completely compatible with that region in the Eastern Wilderness.

Where could one find such a seed?

Chen Mobai pondered for a moment and quickly found the answer from the paper of Taiyuan True Monarch.

The Immortal Gate's rules are already a matured Fruit of Dao's Rule.

Using a secret technique, one can split new Taoist Seeds from this Fruit of Dao's Rule.

The Taoist Seed brought by the Immortal Gate's Five Ancestors back then was split from the Fruit of Dao's Rule of their previous arena.

However, to nurture and cultivate the seed until maturity, the civilization and laws it contains must inherit directly from the Fruit of Dao's Rule at the seed's origin.

Chen Mobai thought about it and felt it was as if heaven was guiding him to cultivate rules in the Eastern Wilderness!

Because he had originally intended to transform the Eastern Wilderness into a Minor Immortal Gate!

Chapter 1718: Thoroughly Reading Tian Shu

After comprehending the Taoist Laws Sure-book, Chen Mobai sat quietly for a while, pondering how to cultivate rules in the Eastern Wilderness.

The rules of the Immortal Gate have always been kept by the Huashen Zhenjun. If Chen Mobai wanted the Taoist Seed, he could only seek out the Leading Star Ancestor at the Five Peaks Immortal Mountains.

But given his cautious nature, he definitely wouldn't do that.

After all, within the Immortal Gate, he is reputed to have the Qualification of Deification, and even Daoist Yu Yi feels that refining rules is a waste of talent for him.

Moreover, he is currently only at the basic Nascent Soul level. Refining rules is a path only taken by those in the Immortal Gate who have been stuck at the Nascent Soul Realm bottleneck for hundreds of years and have no further progress.

According to the Immortal Gate's procedure, Chen Mobai should at least wait until he becomes one of the Three Hall Masters before formally proposing this matter to the Leading Star Ancestor.

For now, focus on nurturing a humane civilization in the Eastern Wilderness. After all, even if he obtains the Taoist Seed, without sufficient cultivation, he still cannot refine the rules.

After clarifying his thoughts, Chen Mobai set down the Taoist Laws Sure-book in his hands.

Not long after, Daoist Yu Yi, who heard the news, arrived. She asked curiously, “Elder Chunyang, have you comprehended it so quickly?”

After hearing this, Chen Mobai nodded slightly, feeling somewhat achieved: “Perhaps it’s because my love for the Immortal Gate, wholeheartedly serving the people, prioritizing the protection of people’s safety and upholding social justice, selflessly devoting myself, aligns perfectly with this Taoist Laws Sure-book, so I quickly grasped it.”

Yu Yi’s delicate pupils widened directly after hearing these words; she didn’t believe such a person existed in the world. But Chen Mobai claiming to have comprehended the Taoist Laws Sure-book made her disbelief shaken.

“You, comprehended it!?”

Chen Mobai modestly nodded. Unfortunately, the comprehension of the Taoist Laws Sure-book did not enhance his cultivation realm, and he couldn’t demonstrate this to Daoist Yu Yi.

“I need to report this matter to the Leading Star Ancestor. He once said that if someone comprehends the Taoist Laws Sure-book, they must be extremely aligned with the rules and very likely to refine the Fruit of Dao’s Rule.”

With these words, Yu Yi spoke, and Chen Mobai instantly became worried.

Having a habit of showcasing his talents in the Immortal Gate, this time he seemed to have excelled a bit too much.

However, since it was the Leading Star Ancestor’s command, he couldn’t stop it.

“Actually, this is a minor matter. I’ve just formed a Nascent Soul for a few years now, so even if I were to refine the rules, it’s still quite premature...”

Chen Mobai expressed his thoughts tactfully, but Daoist Yu Yi had already taken out her phone and sent a text message.

“The ancestor should be playing a game now. He will probably return the call after he finishes.”

Daoist Yu Yi dared not rashly call the Leading Star Ancestor, so she described the matter using text. Seeing this, Chen Mobai said nothing more.

He was already contemplating excuses for when he would meet face-to-face with the Leading Star Ancestor.

“However, the Leading Star Ancestor probably already knows how well you align with the rules; otherwise, he wouldn’t have specifically let you view this Taoist Laws Sure-book.”

While waiting for the Leading Star Ancestor’s response, Daoist Yu Yi spoke, referring to what Chen Mobai mentioned in the Dance Tool Dao Academy, which she had believed.

“Not at all, I’ve merely comprehended some of the mysteries of the rules. By the way, can I now apply to view the other six Heavenly Books?”

After using the Guidance Book to comprehend the Taoist Laws Sure-book, Chen Mobai’s interest in the other six Tian Shu was ignited.

Thinking that if he could also comprehend them, he might achieve the realm of Divinity Transformation directly at the Yuan Ying level.

“It’s not impossible; if you have enough points. Do you still have six hundred million points?”

Daoist Yu Yi asked after hearing him.

“I should still have over a billion.”

Chen Mobai nodded, mentioning a figure that slightly surprised Daoist Yu Yi.

Over the years, all the Good Deed Points Chen Mobai earned were used to actively buy Void Blind Boxes, each providing a hundred million points. Although plenty was spent downloading the Primordial Yang Sword Secret, it's not a problem to view all seven Heavenly Books.

“Do you want to look at all six? Or do you want to take it slowly...”

At this point, Daoist Yu Yi advised, as browsing the heavenly books greatly depletes one's heart and mind, suggesting Chen Mobai could view two books annually instead of rushing.

“Let's start first and see, who knows when the Leading Star Ancestor will finish playing.”

Chen Mobai replied, knowing in the Immortal Gate, the Nascent Soul Superior knew the Leading Star Ancestor could game for years without stopping.

Daoist Yu Yi, having reported the matter, knew they had to wait for him to summon them.

In the meantime, they needed something to occupy themselves with.

“Alright, apply first, and I'll release the restriction on one book at a time.”

Daoist Yu Yi, hearing his words, could only nod in agreement.

The main concern was that unlocking the restrictions on the five-rank talisman cost her a lot of True Qi. She couldn't withstand unlocking all seven Tian Shu's restrictions in a short time.

Chen Mobai applied for the reading privileges of the remaining six Heavenly Books in her presence.

Following his suggestion, Yu Yi first released the restriction on the Purple Green Book.

“Elder Chunyang, you can comprehend slowly. Shout for me when you want to see the next one.”

Daoist Yu Yi spoke, trying to conceal her lack of energy; the True Qi consumed from unlocking the Taoist Laws Sure-book hadn't fully recovered, and now opening the Purple Green Book made her Nascent Soul shrink slightly.

Chen Mobai politely escorted Daoist Yu Yi down, then held the Purple Green Book and walked over to the windowsill, continuing to study it in the posture he used to comprehend the Taoist Laws Sure-book.

The Purple Green Book's cover featured a Tai Chi Diagram, clearly symbolizing the Two-yi Qi.

Chen Mobai nodded gently, then opened the first page, which predictably was another diagram, resembling primordial chaos.

He examined closely for a long time, then wiped the sweat from his forehead.

Why can't I understand it?

Even though he had thoroughly comprehended the Purple Green Demon Refining Heavenly Book translated by Qing Shi and Qing Jing Shangren, this original version should have been comprehensible, at least halfway.

Perhaps the first page was just too difficult.

Thinking this way, Chen Mobai entered the state of Guidance Book, but discovered even this failed to help him understand.

There's no reason for this; even the Taoist Laws Sure-book was comprehended, could it be that the Purple Green Book is of an even higher level?

Chen Mobai calmed his mind, continued to flip to the second page, a diagram of purple and green swirling into a vortex.

He finally understood, this was about condensing Two-yi Qi.

Then the third page, refining Two-yi Qi into Nine Heavens Pure Spirit Purple Brilliance Energy.

He continued through to the sixth page, where once again Chen Mobai failed to understand.

However, by this point, he no longer minded.

Because the parts he understood represented Qing Shi and Qing Jing Shangren's insights, which were certainly correct.

As for the parts he didn't comprehend, it indicated the two Shangren didn't understand either. If even they couldn't decode it, it's understandable Chen Mobai couldn't either.

Thinking this way, Chen Mobai skimmed through the last three pages, committed the diagrams to memory, then brewed a cup of Enlightenment Tea and started again from the beginning.

Obviously, the efficacy of this Rank-3 Enlightenment Tea seemed almost nonexistent for the Heavenly Book.

Maybe using tea brewed from Sixth Rank Great Chun Tree leaves could be useful; given Chen Mobai's current status, the Jumang Academy might grant him this courtesy.

But Enlightenment Tea works best the first time it is consumed; Chen Mobai had already drunk it during Foundation Establishment, leading to a discounted effect the second time.

He didn't regret this, knowing if he hadn't drunk the Enlightenment Tea during Foundation Establishment, he wouldn't have his current achievements.

Subsequently, Chen Mobai entered the Guidance Book state again, surveyed the nine pages of the Purple Green Book, but could only comprehend the pages translated by Qing Shi and Qing Jing Shangren.

He didn't force understanding; after closing the book, he promptly called Daoist Yu Yi, requesting her to unseal the restrictions on the Phoenix Seal Scripture.

When Chen Mobai received the Phoenix Seal Scripture, he didn't notice Daoist Yu Yi's face turn slightly pale; his mind entirely focused on the Phoenix Perched on Chinese Parasol Tree diagram on the cover.

This Phoenix Seal Scripture contained only seven pages.

The cover represented the foundation of the Vermilion Phoenix Facing the Sun Diagram, the Phoenix Perched on Chinese Parasol Tree!

The following pages, one through six, depicted Quality of Food, Drink has ceremony, Heavenly Blessing, Response Earth Spirit, Law of the Five Tones, Nine Virtues Introspection!

Evidently, the scholars of the Dan Ding sect had comprehended 90% of this Heavenly Book, leaving only the last blank page unresolved.

Chen Mobai didn't exhaust himself over this, noting that even sages didn't comprehend it fully, and after a quick pass through the Guidance Book, he frankly set it aside.

Then he called Daoist Yu Yi again.

"Elder Chunyang, I feel my True Qi is severely depleted; might you first examine these three Heavenly Books while I recuperate?"

At this point, Daoist Yu Yi finally couldn't hold back.

If other Nascent Soul cultivators came, she probably would have silently cursed them for wanting to understand what they couldn't comprehend, putting on airs.

Yet Chen Mobai was undoubtedly not like them; his is the Qualification of Deification, having swiftly reviewed both the Purple Green and Phoenix Seal Heavenly Books and certainly they too were comprehended just like the Taoist Laws Sure-book.

At the very least, he must have understood a significant portion.

Thus, Daoist Yu Yi ceased to pretend and directly expressed her difficulties.

Having repeatedly used Fifth-rank Talismans in a short time demonstrated her exceptional talisman crafting skills, but she, after all, was merely at the Nascent Soul Realm, and if asked to unlock another Heavenly Book's restriction, it would likely damage her Elemental Energy.

Once Chen Mobai realized this, he promptly apologized: "My apologies, in that case, I shall review these three on hand again!"

Chen Mobai originally thought he could only study these three Heavenly Books this time.

However, unexpectedly, Leading Star Ancestor took an extraordinarily long time playing games.

He even celebrated New Year's at the Heavenly Book Academy.

Of course, during this time, Daoist Yu Yi also regained her breath, and unlocked each and every Heavenly Book for him.

#### Chapter 1719: Comprehending Void Teleportation

During his half-year at the Heavenly Book Academy, Chen Mobai read through all the mystical texts one by one.

Among these, "Mahayana," "Highest Element," and "Life and Death" were completely incomprehensible to him!

As for "Purple Green" and "Phoenix Seal," he understood most parts.

"Dao Principles" was penetrated regarding the rules, the content of the Fruit of Dao's Rule, understanding how to cultivate divinity through rules.

The last one, "Universe," unexpectedly, he also managed to understand quite a bit.

The Universe Scripture records the Void Dao, and it's said that once fully comprehended, one can master the portal, a Sixth-Order Supreme Treasure.

Chen Mobai guessed it might be due to his long-term companionship with Turtle Treasure, coupled with his external incarnation refining many Void Stones, which had an impact on his own body, making him somewhat a Void Spirit Body.

Upon understanding the fourth page of the Universe Scripture, Chen Mobai suddenly grasped all the mysteries of Void Teleportation.

Was it really that simple?

He stood up in disbelief, and in an instant, his Divine Sense surged, subsequently pinpointing the farthest location he could master. This distance was already more than triple the maximum range of Void Walk.

Nonetheless, Chen Mobai felt that as long as he wills it, he could easily teleport his physical body there.

A strong impulse surged in his heart, fortunately, he remained calm enough to restrain himself.

After all, he knew that without Lasting Spring Cultivation or Fifth Order Body Refining Technique, such a step would practically equate to suicide.

[Alas, still at a lower realm, although I learned it, I dare not use it!]

Reflecting internally, Chen Mobai opened the fifth page of the Universe Scripture and found that he actually understood it as well.

[Could it be that I truly have talent in Void Dao?]

Suspecting this, Chen Mobai immediately focused, entering the realm of the Guidance Book, and began to comprehend.

Half a day later, he joyfully flipped to the sixth page, but by this time, the Great Tao recorded within had become somewhat profound, making it finally difficult to understand.

However, being able to understand up to six pages was already enough to make him extremely happy.

Especially the sixth page, which records a method to prevent the backlash of Power of Void, named "Void Avatar!"

For instance, with Chen Mobai's current realm, if he wanted to perform Void Teleportation, he could only do so after upgrading his Body Refining Technique to the fifth rank, but the page records that he can use another fifth-rank destined item as an avatar to bear the cost of Void Teleportation.

For other Nascent Soul Cultivators of the Immortal Gate, even if they comprehended this page, it would be of no use.

Because they simply do not possess fifth-rank destined items.

But Chen Mobai not only has them, but he also has more than one; under The Union of Differences, his magic artifacts could all be considered destined.

Now he was considering whether to use the Purple Electric Sword or the Heavenly Bead.

This fortunate dilemma, if known to other Nascent Soul Cultivators of the Immortal Gate, would likely make them green with envy.

Quickly, Chen Mobai decided to use the Purple Electric Sword.

Because he would certainly be using Void Teleportation frequently there at the Immortal Gate, whereas the Heavenly Bead, being from the Tianhe Realm, cannot be shown to the public.

The Purple Electric Sword is a top-notch sword artifact of the Immortal Gate with authentic origins, known to all due to the influence of film and television, it just requires an explanation for upgrading to the fifth rank.

However, it's easy to explain since he is an unparalleled sword cultivation genius, who over the decades has harmonized with the Purple Electric Sword, and under the nurturing of Divine Sense and spiritual power, the sword's spirituality greatly increased, reasonably breaking through to the fifth rank.

Furthermore, he graduated as the top student of the Dance Tool Dao Academy, which is known as the Refiner's Ancestral Court, coming with an inherent refining aura.

His magic artifacts leveling up in his hands is a testament to the academy's reputation, demonstrating excellent teaching!

Thinking this way, Chen Mobai became quite impatient.

When the Purple Electric Sword was released, it was somewhat excited, thinking it was about to chop someone again.

"This time there's a different task for you..."

Chen Mobai explained the contents of the Void Avatar, but the Purple Electric Sword didn't quite understand and asked the first question: [Master, how many Spirit Stones do I get for this avatar usage?]

How could this kid become so vulgar!

Chen Mobai thought to himself, but still held up one finger.

[Master, after upgrading, I need more spiritual energy, moving once consumes quite a bit, why not give me two pieces?]

If it were before, Chen Mobai would definitely haggle the price down, but since conquering Xuan Xiao Taoist Palace, the Spirit Stones he possessed were nearly piled into a mountain, so he didn't mind this small gain or loss.

[All right, since you've grown up, you need to consume more Spirit Stones.]

Upon hearing Chen Mobai's words, the Purple Electric Sword wondered whether it asked for too little.

However, it still maintained some basic sense of shame; it was the one who mentioned two pieces first, and it wouldn't be good to go back on its word.

Utilizing The Union of Differences, after making the Purple Electric Sword his joint destiny, Chen Mobai immediately performed the just-comprehended Void Teleportation.

This great transference technique becomes more powerful the farther the distance, increasing the backlash of the Power of Void.

Chen Mobai was trying for the first time, and despite having the Void Replacement Technique, he cautiously experimented inside the pavilion.

After Divine Sense positioning was complete, Chen Mobai held the Purple Electric Sword in his palm.

Then, a silver light flickered, and he had already teleported to the staircase leading upstairs.

This wasn't difficult at all!

Chen Mobai couldn't help but laugh, although he could move faster using Void Walk over this distance, he was sure he had used Void Teleportation because the Purple Electric Sword was still trembling lightly in his hand.

[Master, feels a bit tingly.]

The Purple Electric Sword transmitted its first sensation of bearing the backlash of the Void Power as the substitute.

Chen Mobai immediately started the second attempt, this time the distance was slightly farther.

From the rooftop to downstairs.

The Purple Electric Sword felt about the same.

Then Chen Mobai teleported from the first floor to the gates of the Heavenly Book Academy.

The Purple Electric Sword expressed it felt like a massage and was quite comfortable.

Chen Mobai was about to use Divine Sense to position at the airport in Weiyu Cave Heaven when Daoist Yu Yi, frowning gracefully, stepped out using Void Walking Technique with a silver light flickered out of nowhere.

"Elder Chunyang, why did you summon so much Void Power? Are you trying some Void spells?"

Daoist Yu Yi knew Chen Mobai was comprehending the Universe Scripture and guessed correctly the truth.

"Nothing much, just making an attempt to teleport myself using Void Power, because I don't know my limit, I'm probing step by step."

Chen Mobai spoke truthfully. After all, in the Immortal Gate, he needed to constantly maintain his genius persona.

The waves from having successfully achieved Nascent Soul Formation had subsided over the years, and comprehending Void Teleportation was just the right way to elevate his popularity.

"Hasn't Elder Chunyang already mastered Void Walk? At your realm, traversing the territory of Weiyu Cave Heaven should be no problem."

Daoist Yu Yi thought Chen Mobai was experimenting with Void Walk because according to Immortal Gate's experience, even Nascent Soul cultivators needed the second or third layer of Nascent Soul to fully master it.

Chen Mobai mastered Void Walk during the Golden Core Realm, now at Nascent Soul first layer, perhaps after reading the Universe Scripture, he had perfected this Space Technique.

"Void Walk? Elder misjudged, I was adept at it during my Golden Core Realm, now I'm trying Void Teleportation."

A light remark from Chen Mobai made Daoist Yu Yi's eyes widen once again, almost thinking she heard wrong.

"Void... teleportation! Are you crazy!"

Upon reacting, Daoist Yu Yi stomped in midair.

Even if you are extraordinarily gifted, you shouldn't gamble with your life; who doesn't know Void Teleportation requires Fifth Order Forged Body to withstand it!

If anything happened to Chen Mobai at her Heavenly Book Academy, she dared not imagine how she would be punished by the Immortal Gate's Double Saints!

After all, he is recognized as the future third saint by the Immortal Gate!

"Thanks for your concern, Daoist Yu Yi, but I comprehended a Void Avatar Technique from the Universe Scripture, which can substitute me to endure the spatial backlash of Void Teleportation."

Chen Mobai explained with a smile, and then demonstrated Void Teleportation again before Daoist Yu Yi.

Space fluctuations distinctly different from Void Walk convinced Daoist Yu Yi of Chen Mobai's words.

Seeing Chen Mobai holding the Purple Electric Sword and teleporting ten steps without harm, Daoist Yu Yi finally understood what genius truly meant.

You must know, from childhood cultivation to graduation and then Core Formation, she always led among her peers, and among the Immortal Gate's other Nascent Soul Superiors, she only felt slightly inferior to Qi Yuheng. Others like Lin Daoming, Wang Chengxuan, Ying Guanghua and so on, she felt given the same resources and time, she could eventually surpass.

But today, at over six hundred years old, facing Chen Mobai, she felt for the first time there really was someone who could be called a genius before her.

Compared to him, Qi Yuheng was merely a piece of flawed jade.

"Elder Chunyang truly deserves... the qualification of deification!"

At this moment, Daoist Yu Yi recalled the title she previously scoffed at; she initially thought the qualification of deification was already high enough to regard Chen Mobai highly, but now it seemed it was far from adequate.

This truly was a qualification of becoming an immortal!

Previously, her insight was too shallow.

"Elder's praise is too much, I simply have some special talent regarding Void."

Chen Mobai waved repeatedly, but the smile at the corners of his mouth couldn't be stopped.

The Purple Electric Sword of Elder Chunyang, no thought it was already Rank-5, truly worthy as the chief graduate of the Dance Tool Dao Academy."

Daoist Yu Yi thought of Chen Mobai's previous mention of the Void Avatar Technique, looked at the ancient sword artifact glowing with purple light in his hand, and couldn't help but show envy.

Dance Tool Dao Academy truly got lucky!

If their Heavenly Book Academy had picked up Chen Mobai, he might even become the Immortal Gate's fifth Daoist Academy in the future!

Chapter 1720: Positioning Permissions

After explaining clearly to Daoist Yu Yi, Chen Mobai continued experimenting with his Great Void Transference.

He quickly discovered that even when teleporting to the furthest extent of his divine sense, the Purple Electric Sword easily endured. It truly exemplified the difference between Rank-5 and Rank-4.

However, this was not the limit of the Great Void Transference, but rather the limit of Chen Mobai's divine sense.

Before teleporting using the Great Void Transference, positioning is required, and there are two methods for this: one is within the range covered by one's own divine sense, determined according to one's will.

But in this case, it slightly undermines the reputation of the Great Void Transference, because the range of divine sense for Nascent Soul cultivators is limited, unable to cover the entire Di Yuan Star.

Thus, in the Immortal Gate, there is another method of positioning, which utilizes the Sky Curtain Ground Network Formation.

Qi Yuheng does this; he has the authority to use this large formation to pinpoint any location within the thirty-six Heavens and seventy-two Blessed Lands of Di Yuan Star.

After the Sixth-order Large Formation positions him, he then performs the Great Void Transference to teleport.

However, since Qi Yuheng's cultivation is ultimately not truly at the level of Deification, if the distance exceeds half a planet, in reality, the body forging of someone who has just entered Rank-5 cannot endure it.

But this is merely the difference between a single and a double use of the Great Void Transference.

This knowledge, Chen Mobai only learned after calling Master Chengxuan, because the latter was also able to perform the Great Void Transference and had applied for the same positioning authority as Qi Yuheng.

"How do you apply for this?"

Chen Mobai immediately asked, as he now had the ability to perform the Great Void Transference, he naturally also wanted this authority.

"Simple, just write an application letter to the Sky-Net Management Bureau. The Xianwu Hall won't hinder this matter,"

Master Chengxuan said, as those who can perform the Great Void Transference in the Immortal Gate are truly upper-level cultivators.

And it is merely a positioning authority, which does not consume much of nature's spiritual energy, so for the Sky-Net Management Bureau, it's insignificant.

"Although I knew you were a genius, being able to perform the Great Void Transference at just the first layer of Nascent Soul still leaves this old guy quite astonished."

When Master Chengxuan first received Chen Mobai's call for advice on the Great Void Transference, he thought he had misheard. After hearing about the Void Avatar Technique, and that the Purple Electric Sword had upgraded to Rank-5, he suddenly felt he truly was getting old.

"Not at all, not at all, there are still many things I need to learn from you, Principal."

Chen Mobai has always been humble in front of elders, knowing that his achievements today rely entirely on resources, whereas for the likes of Chengxuan and their generation, ninety-nine percent rely on their own talent.

Those who succeed through their own efforts deserve respect.

"Now that you've mastered the Great Void Transference, whenever you have time, come visit the Daoist Academy more often. Since you've upgraded the Purple Electric Sword to Rank-5, with a little foundational study of artifact refining techniques, you'll definitely be capable of becoming a Rank-5 Artifact Refiner in the future, and I would feel at ease retiring and leaving the academy in your hands."

These remarks from Master Chengxuan greatly tempted Chen Mobai, as he still had a Taiyuan Blue Pearl yet to be refined.

If he could seek guidance from a Rank-5 Artifact Refiner like Master Chengxuan, without a doubt, he could use this Fifth Grade Spirit Material to refine a lifelong Lifespan Artifact for Qing Nu.

"Alright, Principal, I will come to Crimson Mountain to seek your advice after dealing with the matters at hand,"

Chen Mobai agreed.

After the call with Master Chengxuan, Chen Mobai immediately called Yunyang Bing at the Sky-Net Management Bureau, who, after forming his core, has been progressing towards the position of deputy director under the operations of the Dance Tool Dao Academy.

"Void Teleportation positioning authority!? You're really impressive!"

Yunyang Bing, upon hearing what Chen Mobai said, expressed his genuine admiration.

"Not at all, not at all, the mysteries of the Universe Scripture are boundless, even if it weren't me, in the future someone else in the Immortal Gate will comprehend it."

Though Chen Mobai said this, he couldn't hide the smile in his tone.

"I'll find a sample of the application form for you, draft it, and after you review it, if there are no issues, put your signature on it, then have Zijing send it to our Sky-Net Management Bureau office in the name of the Hall of Orthodox Law. I'll handle the subsequent process for you, though it'll ultimately require approval from the Xianwu Hall, and you may need to give Palace Master Ying a heads-up."

Yunyang Bing briefly explained the process of applying for this authority. Given Chen Mobai's current status, even without him, the process would certainly be smooth, albeit slower.

"Thank you for your trouble."

After the call with Yunyang Bing, Chen Mobai also talked about this matter with Hua Zijing, asking her to coordinate on it.

Finally, he called Ying Guanghua.

After Ying Guanghua heard what Chen Mobai said, he remained silent for a long time before sighing and saying: "Vice Hall Master Chen truly deserves to be qualified for Deification!"

"Palace Master Ying flatters me, I merely have a bit of talent in void matters. I regret not having listened to your advice when I was young, for if I had studied at the Heavenly Book Academy back then, I might have been able to perform the Great Void Transference during the Golden Core Realm."

Chen Mobai's words reminded Ying Guanghua of their first meeting, where he intended to use the Seven Great Heavenly Books to slow Chen Mobai's cultivation progress.

Ying Guanghua forced a smile and then stated that he would instruct the matter regarding the Great Void Transference positioning authority, ensuring that the Xianwu Hall would expedite the process for Vice Hall Master Chen.

After hanging up, for the first time, Ying Guanghua began to doubt his own talent.

He too is someone who has perused all seven of the great celestial books, but that was merely due to his job position; as for the "Dao Law," he could only understand the first few pages.

At that time, Ying Guanghua felt pretty capable, because the vast majority of cultivators in the Immortal Gate gain nothing from reading the seven great celestial books.

Being able to understand a little already indicates outstanding perception and comprehension.

To comprehend several pages, like him, signifies a genius.

As for those like Qing Shi and Qing Jing, they are unparalleled prodigies.

With Chen Mobai's foundation, "Purple Green" and "Phoenix Seal," these two celestial books are certainly not difficult for him, and he also comprehended the techniques like Void Teleportation and Void Avatar Technique from the "Universe." No one throughout the history of the Immortal Gate has ever shown such astonishing talent in understanding three celestial books!

Feeling that his Dao heart had suffered a blow, Ying Guanghua called Lan Haitian in and instructed him about Chen Mobai's matters.

Lan Haitian, upon hearing that Chen Mobai was to be granted the authority for Void Teleportation's location permissions, immediately realized the reason and was greatly astounded, not daring to believe.

"In the upcoming war preparations, instruct those below to minimize conflicts with the Weapon Dancing Sect."

Having said this, Ying Guanghua watched as Lan Haitian nodded with a grave expression and withdrew.

Soon, the fact that Elder Chunyang comprehended the Universe Scripture and mastered Void Teleportation spread throughout the whole Immortal Gate.

After all, applying for location permissions requires going through several departmental processes, during which there are bound to be loose-tongued individuals.

Moreover, since Chen Mobai did not intend to hide it, with the tacit consent of the Weapon Dancing Sect, this news quickly became widely known.

Deification Qualification! X

Immortal Qualification! V

Having mastered Void Teleportation at the Nascent Soul Realm, the populace of the Immortal Gate now deemed that Chen Mobai had fulfilled his qualification for deification; this title could no longer fully describe his talent.

Thus, the term "Immortal Qualification," previously only used by a few enthusiastic fans and critics, gained broad acceptance.

This buzzing news naturally reached those around Chen Mobai.

Many people sent messages of congratulations, to which Chen Mobai selectively replied to Shi Wanyu and others, then continued retreating to comprehend the celestial books.

Chen Mobai felt that his talent was highly compatible with the celestial books "Dao Law" and "Universe," and he might comprehend even more from them.

As time passed day by day, although he still couldn't understand more of the diagrams, his understanding of those he had previously grasped grew deeper.

Gradually, he also understood why he could comprehend these two celestial books.

As for the Universe Scripture, without a doubt, it was because of his frequent interactions with the Power of Void; especially after mastering the Echoes in the Void, he could directly hear the void in the universe. Then, through prolonged refining using the ceremonial drinking technique to purify the Power of Void into the domain, this was an ability unique to the Void Spirit Body.

Void Teleportation is a technique for long-distance transmission, almost identical to the principles of the large transmission arrays set up in the Eastern Wilderness. Chen Mobai, who often teleported between realms, was already accustomed to such things. So, when he saw the corresponding content on the Universe Scripture, he understood it instantly.

The Void Avatar Technique, on the other hand, highlighted his talent and perception. For the first time, Chen Mobai suspected he might be a genius on the path of the void.

As for the Dao Law, it was even more evident that it was all due to the Crown of Heaven and Earth.

It was only with this celestial book that his inner observation could function, evidently because in the Eastern Wilderness, he unified the mortal realm, implemented new policies, and set rules, enabling him to cross the threshold of reading this celestial book.

As for whether he could apply the knowledge gained from the Dao Law in the future, it would depend on Chen Mobai's achievements in developing the Minor Immortal Gate in the Eastern Wilderness.

In this regard, Chen Mobai was very confident.

On this day, Daoist Yu Yi hurried over to inform him that the Leading Star Ancestor had finally finished his games and emerged from seclusion.

"The ancestor wants us to go to Gathering-Immortals Peak together."

Upon hearing this, Chen Mobai was a bit surprised, wondering why Daoist Yu Yi also needed to go?

However, since it was the ancestor's command, he could only nod in agreement.

"How is Daoist Yu Yi going?"

Chen Mobai asked.

"I have a direct flight, would you like to..."

Daoist Yu Yi had just spoken halfway when she suddenly remembered that the person in front of her had already mastered Void Teleportation, and couldn't help but stop speaking.

"Then I'll go ahead to make sure the ancestor isn't kept waiting."

Chen Mobai said this, then utilized the permissions he had just obtained to localize himself at the property gates of the Five Peaks Immortal Mountains in Wangwu Cave Heaven.

After completing the localization, he rose to bow to Daoist Yu Yi, thanking her for her care during this time, then transformed into a silver light and disappeared from the Heavenly Book Academy.
