

World 1891

Chapter 1891: Opening the War

The sword intent of Zhang Daosun is surprisingly powerful!

Chen Mobai was somewhat surprised and paused his joint cultivation with the Mystic Finger Sword. The Longevity Sword Intent of the Heavenly Sovereign's Heavenly Cutting Line was also extinguished during the interception process by this Daomie Sword.

This was mainly because Chen Mobai's cultivation level was too low, and the Heavenly Sovereign's Longevity Sword Intent had just begun.

Nevertheless, in doing so, he had already intercepted most of the essence of the Daomie Sword, deeply imprinting it in his heart and mind.

Chen Mobai immediately sat down with eyes closed, carefully comprehending the harvest from this sword intent interception.

He was shocked to discover during this comprehension that his Longevity Sword Intent had also weakened considerably. Could this Daomie Sword actually affect his current self through the passage of time?

If it were someone else, they would probably be heartbroken, not knowing how much more time it would take to compensate for it.

In comparison, the role of the Longevity Sword Intent of the Heavenly Cutting Line is undoubtedly greater than the Daomie Sword.

Fortunately, Chen Mobai's Longevity Sword Intent was not obtained through his own bitter cultivation, so although a part was cut, as long as he returned to the Great Dao Tree for empowerment, it could be replenished back to the fourth rank peak.

Thinking of this, Chen Mobai directly put the Longevity Sword Intent at the back of his mind.

Then he began to carefully comprehend the Daomie Sword he had just intercepted.

Because the complete Daomie Sword Intent of Zhang Daosun was too powerful and terrifying, Chen Mobai could not intercept it completely, but even so, it greatly advanced his Sword Dao realm.

Chen Mobai, in reference to the Daomie, summoned his Primordial Yang Sword Evil, imitating its scene of condensing ten thousand swords into one, annihilating all things and phenomena.

However, he was after all of a lower cultivation level, and his talent in the Sword Dao was somewhat ordinary, so he merely managed to imitate a superficial layer.

In the cultivation room, Chen Mobai slowly opened his eyes, looking at the Primordial Yang Sword Evil in his palm, which had condensed into a bright sword thread, and sighed softly.

This Daomie Sword is the ultimate achievement of Zhang Daosun's cultivation in the Immortal Sect Sword Art. A single sword strike, even the Evergreen Ancestor back then might not have been able to resist it.

It's a pity that all Chen Mobai could learn was to condense the sword into threads!

"Dad, did you just break through?!"

But only Chen Mobai knew about this matter. Seeing him release the Mystic Finger Sword, then open his eyes and condense the Primordial Yang Sword Evil into bright sword threads, Xiao Hei was extremely excited, believing that his father had made another breakthrough in Sword Dao during the process just now.

"Yes, after joint cultivation with the Mystic Finger Sword, I realized the residue of Zhang Daosun Ancestor's Daomie Sword Intent on its blade, and after slight reference, I've attained the realm of condensing the sword into threads."

Chen Mobai truthfully said, and the Mystic Finger Sword Spirit was extremely shocked after hearing him.

If one were to say that after joint cultivation just now, Chen Mobai had an epiphany with the Purple Electric Sword and demonstrated his comprehension of the Soul Accompanying Sword, thus gaining the Mystic Finger Sword Spirit's recognition of his talent, then this time Chen Mobai comprehending the Daomie Sword Intent from it was beyond belief.

Could there truly be such a monstrous Sword Dao genius in this world!

Compared to him, even the master seemed a little mediocre!

For Yu Baiguang, who had held the Mystic Finger Sword for over a thousand years, had just barely understood the Daomie Sword Intent under its undivided guidance.

Chen Mobai, however, understood it by himself without needing its guidance!

In comparison, Baiguang was a bit lacking.

[Why didn't the master send me to the male master earlier!]

The Mystic Finger Sword Spirit's thoughts at this time were already worlds apart from the beginning.

When Baiguang had sent it away initially, it was a thousand times unwilling.

What level, without reaching the Spirit Transformation Stage, they dare possess this first sword of the Immortal Sect!

Oh, it was the master's daughter, ah, then reluctantly let her have it for a while.

And it was at this moment that the Mystic Finger Sword Spirit realized the master's painstaking intention, not to ask it to guide and protect the young lady's Sword Dao cultivation, but rather to send it to the side of this male master who was an even more stunning unparalleled Sword Dao genius.

[Compared to the master, the male master is more suited to me!]

After Chen Mobai demonstrated the insight of the Soul Accompanying Sword and independently comprehended the Daomie Sword Intent from it, the Mystic Finger Sword Spirit instantly changed its views.

"Previously, I was arrogant and have offended. I ask the upper man to understand!"

The Mystic Finger Sword Spirit stood up from the dark blade, clasped its hands in a bow, and solemnly apologized to Chen Mobai.

"Oh, not at all, you just cared for my young daughter."

Having gained great benefits from the Mystic Finger Sword Spirit, Chen Mobai naturally wouldn't hold a grudge, courteously returning the salute.

The Daomie Sword he intercepted now was still incomplete, and in the future, there would be many occasions where he would need the Mystic Finger Sword. Moreover, besides Zhang Daosun's sword intent, there was still Baiguang Ancestor's.

To him, the Mystic Finger Sword had already become a great treasure trove for progressing his own Sword Dao realm.

"Does the young lady need me to correct the foundations of her Sword Dao?"

The Mystic Finger Sword Spirit pointed to Xiao Hei, beginning to discuss the proper matter.

Yu Baiguang had instructed it with one sentence when sending it over: to properly guide her daughter.

The Mystic Finger Sword Spirit was eager to complete this small task and then throw itself into the arms of this unparalleled Sword Dao genius in front of it.

In its view, this Pure Yang Master in front had a greater possibility of reaching the Cultivating Void Realm than the master.

"Then it'd be much obliged."

Chen Mobai was aware that his level in Sword Dao was surely inferior to the Mystic Finger Sword Spirit, so when he heard it offer to teach, he immediately let them have this cultivation room.

Chapter 1892: Pioneering War (Part 2)

He thought about auditing, but he was deeply afraid that his persona as a swordsmanship genius would be exposed, so he gave up.

Moreover, he had already reached the pinnacle of the Nascent Soul Realm in swordsmanship's two great realms.

One Sword Births All Laws, long ago, was already the "Clear Heart of Sword" realm! Initially, this realm was considered average, but it grew stronger as the Sword Intent strengthened. Now, using the Clear Heart of Sword to wield the Purple Electric Sword, coupled with the Purple Brilliance Sword Intent, basically, if the opponent doesn't have a Rank-5 defense, they can't withstand it, it's one sword one kill.

And One Sword Breaks All Laws, today it also achieved the "Condensing Sword into Thread"! This is an invincible means of the Nascent Soul, and if Chen Mobai didn't have the Purple Electric Sword, Condensing Sword into Thread would be his strongest offensive method.

Next, whichever path he breaks through, it equates to the swordsmanship realm of Deity Transformation.

After returning to his room, Chen Mobai found that Shi Wanyu hadn't gone to sleep yet.

Shi Wanyu was evidently pleasantly surprised by his return.

Chen Mobai talked about letting his daughter train swordsmanship in the Cultivation Room, and then the couple went to bed to rest together.

The next morning.

After having breakfast, the father and daughter each went to work.

The Mystic Finger Sword didn't want to enter Chen Xiaohei's domain, so it stayed at home.

"Master, the male master you've chosen, his swordsmanship talent even surpasses yours!"

Yu Baiguang logged on, and the Mystic Finger Sword Spirit floated out, recounting last night's events truthfully. After listening, she couldn't help but be slightly shocked.

Even though she long knew that the man chosen by her reincarnated body was said to have the potential to become an Immortal and was the most talented individual in the history of the Immortal Gate, Yu Baiguang didn't believe his swordsmanship talent could surpass hers.

But after hearing about last night's scenario, she fell into silence.

[Seems like, he is indeed a bit stronger than me!]

Realizing this, the always competitive Yu Baiguang was instinctively a bit unsatisfied, but thinking that this was her own man, an indescribable pride filled her heart.

"Teach my daughter well. My man has such talent in swordsmanship, it shouldn't be wasted. When the war ends, I'll draft a list and have him comprehend the complete collection of the Immortal Sect Sword Art! When the time comes, you accompany him; though with his talent, he could grasp it thoroughly without you, saving some time is always good!"

As soon as Yu Baiguang's words fell, the Mystic Finger Sword Spirit nodded respectfully, then hesitated before asking.

“Master, can I follow the male master when the time comes?”

“What do you mean by that?”

“Miss’s swordsmanship talent is somewhat average, I’ll soon finish teaching her. I feel wasted here! I think I can reach my maximum potential in the hands of the male master or you. Perhaps, with my assistance, the male master could even use the Sword Dao to cultivate void.”

“My man and I are among the top geniuses in the Immortal Gate’s Sword Dao; with or without you, we can reach the swordsmanship’s peak. But my daughter is different, it’s unfortunate this reincarnated body’s talent is slightly lacking, dragging her down, thus needing your help. You’re an extra feather in our cap, but for my daughter, you’re a lifeline. Rest assured, if you can guide my daughter to the Sword Dao Divinity Transformation, my man and I will find a way to upgrade you to the Sixth Rank.”

Yu Baiguang’s words were both soft and hard, yet the Mystic Finger Sword Spirit was still slightly reluctant.

It held its head high, only recognizing geniuses throughout its life.

But the temptation of achieving the Sixth Rank, coupled with the fact that Chen Xiaohei’s parents were the masters it wanted to grovel for, seeing the situation, it reluctantly agreed.

“Let’s be clear, I can’t guarantee success in teaching. The further one progresses in the Sword Dao, the more it depends on talent, as you know, Master.”

“Mm-hmm, you just go ahead and teach...”

Yu Baiguang agreed wholeheartedly, having already assessed her daughter’s talent. Though her swordsmanship was dragged down by her reincarnated body’s talent, her Pure Yin Body was genuine.

With her and Chen Mobai’s protection, the hope of reaching Divinity Transformation was very high.

Once her daughter reached Divinity Transformation, the Fifth Rank artifacts of the Immortal Gate would be hers to choose from, even tailored to her needs, regardless of the Mystic Finger Sword's attitude.

Chen Mobai naturally had no idea that his home now housed a transcendent elder ancestor.

After going to work, he found an excuse to visit Tianhe Realm.

From the closed cultivation room of Yellow Dragon Cave Mansion, Qing Nu sensed his presence immediately.

"Congratulations on your breakthrough!"

Seeing his stronger Daoist partner approach him, Chen Mobai was also very pleased.

"This Deity Transformation Technique has many aspects that require personal exploration, hence the slower cultivation speed."

Qing Nu smiled and spoke. She had formed her Core thirty-nine years ago; had she been cultivating an ordinary Water Attribute technique, she might have broken through over a decade ago.

However, the Black Emperor Abyssal Scripture was vast and profound. Combined with the lack of predecessors' experiences, and her dislike of using elixirs for advancement, it wasn't until five years ago that she broke through to the Core Formation Middle Stage.

"In the Primordial Immortal City, there's an Altar of State left by Yi Yuan True Monarch. If you have time, you can go and take a look."

Hearing her mention the Black Emperor Abyssal Scripture, Chen Mobai remembered this matter. He took out the large Jade Pendant of Five Elements Unite from his domain, leaving two traces of Primordial True Qi within.

After explaining the method to access the Yi Yuan Secret Realm to Qing Nu, Chen Mobai proceeded to the Divine Tree Secret Realm.

Chapter 1893: Pioneering War_3

After using the Great Dao Tree to replenish the Longevity Sword Intent of Heaven Cutting, he once again employed the Devour God Technique.

However, now his Divine Consciousness Realm is not much different from that of the Great Dao Tree, so the effect of the Devour God Technique is becoming increasingly limited.

Once the war opening phase is over, he'll have to find a way to look for Rank-5 spirit plants.

He still has another spiritual object that can enhance divine sense, which is the Azure Fall Cold Water from the Yellow Dragon Cave Mansion.

But this item is more useful to Qing Nu.

If she refines it during her Perfect Core Formation, she can advance her divine sense to the Yuan Ying level ahead of time. With the Innate Water Element Essence Qi and the Infant-Feeding Elixir, Nascent Soul Formation would be almost guaranteed.

Therefore, Chen Mobai left it for Qing Nu.

Returning to the Immortal Gate, Chen Mobai began dispatching troops!

After all, the order for launching a full-scale attack in the war opening phase has already been confirmed by the Double Saints of the Immortal Gate, and he needed to advance to the front lines.

The chance of victory in this battle is almost ninety-nine percent, so Chen Mobai brought most of the people around him to amass merit.

On the Immortal Gate side, Wang Shuye and other elder generations with exhausted potential were left to guard.

The new generation of Core Formation cultivators from Dance Tool Dao Academy, like Hua Zijing, Zhuang Jialan, Zhongli Tianyu, and Zhou Tiangong, were all included in the list.

On the Jumang Academy side, Wenren Xuwei also took Pei Qingshuang Zong Zi and others to join the Vermilion Dao Palace.

...

Dragon God Star.

Having arranged all the Array Flags, Lin Daoming sat cross-legged within a cave on this star, displaying his Spiritual Pivot of All Phenomena ability, as if transforming into the core of heaven and earth, beginning to slowly absorb the latent energy of this star.

Beside him, Yan Xinji silently observed this scene.

He and Lin Daoming wanted to take this opportunity to attempt a breakthrough to the Spirit Transformation Stage.

Once the Spiritual Pivot of All Phenomena is activated, it can direct the vast and majestic spiritual energy from the earth's veins to temper their Nascent Soul. Theoretically, if there's no external interference, Lin Daoming could consolidate all the earth's spiritual energy from the entire star into one, combining it with his Nascent Soul, and transform it into a Primordial Spirit.

During this process, if there is Fetal Transformation Essence, it can greatly shorten the time.

Because Fetal Transformation Essence itself is the planet's essence, containing the creation and mystery.

Lin Daoming, now embodying the spiritual pivot, needs first to refine the boundless terrestrial spiritual energy within the planet, purify it into Fetal Transformation Essence, before attempting Nascent Soul to Deity Transformation.

Fortunately, on this Dragon God Star, the earth attribute's terrestrial energy is in its original state, because it is not favored by the Gnawing Gold Fire Ants, allowing them to set up the Large Formation and condense Fetal Transformation Essence.

Over the years, Lin Daoming has been close to completely condensing one unit of Fetal Transformation Essence.

Yan Xinji also received half, refining a portion of it, indeed feeling his bottleneck, which had trapped him for centuries, showing signs of loosening.

For this reason, he hoped that the Matriarch deep within the earth core could support for a longer time.

If the Immortal Gate successfully captures this star, with their abilities, they will certainly deploy the Sky Curtain Ground Network to exhaust all the star's energy.

To acquire more Fetal Transformation Essence, Yan Xinji also instructed the Sovereign God Yu and others to disrupt the situation as much as possible, maintaining the power balance between the Immortal Gate and the insect beasts.

The top cultivators of the Ascension Sect, including their cultivation techniques, are virtually interconnected.

Although the Devour God Technique was mastered most by the Sovereign God Yu, both the Sect Hierarch and Yan Xinji, the Dragon and Tiger Ancestor, had significant achievements.

They commanded various insect beasts in the war, continually growing. Despite the Gnawing Gold Fire Ants having cultivation methods entirely different from humans, these evil path magnates quickly found a way to speed up the process.

Like humans, refining nature's spiritual energy is certainly possible; it just requires creating cultivation techniques. However, it's too slow, and they discovered that the essence of gold and fire on this star is extremely scarce, probably mostly consumed by the Matriarch.

Being a prodigy, after conducting anatomical research on these Gnawing Gold Fire Ants, Yan Xinji quickly realized that consuming large quantities of spirit materials containing gold and fire essence is the fastest way for them to evolve.

Even though most of the gold and fire spirit materials on this Dragon God Star were transported for the Matriarch to consume by the insect beasts, the Gnawing Gold Fire Ants themselves contain gold and fire essence.

For this reason, when a Gnawing Gold Fire Ant dies, its corpse is invariably devoured by its kind, as it's their best evolutionary food.

After discovering this, the group from the Ascension Sect didn't hesitate and immediately started cannibalism.

They even personally acted, capturing more powerful insect beasts for their insect beast clones to consume.

Recently, after the Sovereign God Yu determined the location of a Nascent Soul Insect Beast, Yan Xinji also ventured out, and together the three of them captured it.

They then commanded their insect beast clones to consume it alive and refine it.

Over the years, they have found that the Matriarch, aside from laying eggs, is completely uninvolved.

Although Nascent Soul Insect Beasts are not numerous, in the situation where the Immortal Gate is pressing heavily, if one disappears, they simply assume it's been captured or killed by the Immortal Gate.

After devouring the Nascent Soul Insect Beast, their insect beast clones received the key to advancing to Rank-4.

Next, they just need to keep consuming their kind, growing their gold and fire essence, to continue evolving.

Chapter 1894: Opening the Warfront 4

After realizing this, the members of the Ascension Sect became even greedier.

They were already thinking that if they could devour the Matriarch, they would at least secure a Rank-5 path in the future.

Although they were Rank-5 insect beasts, as a heretical cult, they simply did not care about anything other than advancing.

Thus, the Ascension Sect's main plan was, on one hand, to assist Lin Daoming in extracting the earth's essence of the Dragon God Star and condense the Fetal Transformation Essence, while, on the other hand, cultivating their own insect beast clones. In case the Matriarch fell in the future, they hoped to bite off a piece of the Matriarch's flesh.

"With the foundation of the Immortal Gate, this Matriarch—no matter how close to Deity Transformation Peak—cannot withstand its power."

In a dark cavern beneath the Dragon God Star, the Ascension Hierarch, Shen Yuxuan, and Yan Xinji's insect beast clones stood in human form, conversing.

"Let's try to delay as much as possible. If we truly can't hold out, then we'll see and act accordingly."

Shen Yuxuan voiced his thoughts, having mastered the Devour God Technique to extraordinary levels. Previously, when he was killed by Chen Mobai's Purple Electric Sword, it was only the best furnace he had cultivated.

Though he felt saddened by the loss, it was worth it to avert a disaster.

"If it comes to the final moment, assisting the Dual Sages of the Immortal Gate in subduing the Matriarch is not impossible. After all, a being like the Matriarch at Fifth Rank Peak would definitely be well preserved and thoroughly researched by the Immortal Gate. As long as the entity remains with the Immortal Gate, during the long ages, we'll surely find an opportunity to steal a piece of flesh."

Yan Xinji suggested another method but the other two remained silent.

The Ascension Hierarch and Shen Yuxuan both had limited lifespans, and despite studying techniques for seizing lifespan to replenish themselves, endless advancement was impossible.

Because of this, they held high regard for their proximity to the Dragon God Star.

They even considered following the Dragon God Star away from the Tianyang Star System for one last effort.

Rumble!

At this moment, a violent tremor shook the ground.

The underground cavern where they were began to crack; if not for the high grade of their insect beast clones, they might have been buried alive.

"Is the Xuanwu Dao Palace descending again?"

They were three thousand meters underground, and even Nascent Soul cultivators couldn't cause such commotion through the thick earth.

Previously, only when the Narcissus maneuvered the Xuanwu Dao Palace down for a sweep did such a scene occur.

"No, not merely the Xuanwu Dao Palace!"

Shen Yuxuan, with the most insect beast clones, quickly saw through a surface clone the image of the Azure Dragon and Vermilion Dao Palaces, amidst fleets of star space battleships and guards from the Two Heavenly Gates, evolving into the Void Domain of Nine Heavens Immortal Mansion, descending on the Dragon God Star.

"It seems Bai Guang has emerged, and the Immortal Gate is launching an all-out assault!"

After the Ascension Hierarch spoke, a thought came to mind.

"What if we impart the Purple Cloud Dao Scripture to the Matriarch—could it break through?"

Her words stunned the other two.

"This... I think caution is warranted."

After hesitating, Yan Xinji gently advised against it.

The Purple Cloud Dao Scripture was an incomparable scripture compiled by their antiquity Daoist ancestor, who gathered the True Word Dao Patterns obtained within the Purple Cloud Palace. Essentially, it encompassed all original Forbidden Techniques from the antiquity Daoist system.

Its value rivaled even the Immortal Gate's Seven Great Heavenly Books.

If the Matriarch truly managed to comprehend and break through, the Immortal Gate would undoubtedly use the Lingxiao Palace to reduce the Dragon God Star to ashes.

That would be too wasteful!

"I merely thought of it suddenly; let's observe the situation further."

After speaking, the three separated.

However, the Ascension Hierarch's words stirred a storm in Shen Yuxuan's heart.

Human lifespans are short, whereas demonic beasts last long due to humans cultivating their souls through Qi Cultivation and their efficiency in understanding the Great Tao being several times, even dozens of times greater than demonic beasts.

Because of this, the Matriarch, as a Gnawing Gold Fire Ant, although possessing powerful talent and the energy of the Dragon God Star's core, remained stuck before the threshold of Cultivating Void, unable to step forward.

If he could seize the Matriarch's body and combine it with the supreme Great Tao recorded in the Purple Cloud Dao Scripture, could he ascend in one leap?

Suppressing his inner excitement, Shen Yuxuan knew very well that a creature of the Matriarch's realm possessed a level of spirituality far beyond his ability to seize.

Yet, after seizing so many insect beasts over the years, he discovered a secret.

Perhaps he could use it to take that crucial step.

If so, then he might just have to aid the Immortal Gate.

...

The movements of the Ascension Sect naturally didn't escape the notice of Qian Xing Patriarch, but he wanted to see the extent to which Lin Daoming's Spiritual Pivot of All Phenomena could reach.

Additionally, there were things the Immortal Gate wasn't suited to do, but required someone from the Ascension Sect's side, without limitations.

Yet, all these were merely pastimes to pass the time; with Bai Guang's emergence, the war to open up the Dragon God Star was about to conclude.

Above the Dragon God Star, Chen Mobai maneuvered the Vermilion Dao Palace, guarding the southern skies.

As if forged from fiery red jade, the Southern Heavenly Gate hovered outside the Dao Palace, blazing flames transforming into countless Fire Ravens, covering the sky.

Each Fire Raven was equivalent to Rank-3 Divine Thunder, and when they touched the ground, towering flames erupted, turning the sandy earth within sight into a boundless sea of fire.

Amidst the blazing heat, hordes of insect beasts burst from the depths of the earth, only to be turned into charred corpses by the flames.

After a sweep of ten thousand ravens, only a fraction of the insect beasts remained on the Vermilion Dao Palace-guarded ground.

But to Chen Mobai's surprise, some surviving insect beasts evolved, benefiting from the Fire Ravens' wash.

"Indeed, these Gnawing Gold Fire Ants have impressive resistance to flames; halt the Fire Raven formation."

Chen Mobai turned to Hua Zijing, who nodded and prepared to inform Zhongli Tianyu directing at the Southern Heavenly Gate, only to find the Fire Ravens reverting into fire element yuan qi, forming layers of Fire Crystal Shields.

Several powerful insect beasts shot golden fire energy balls at the Vermilion Dao Palace, creating ripples upon the Fire Crystal Shields, and even some fire spiritual power was absorbed instead.

"Little Zhong Li's command is quite commendable."

Wenren Xuewei couldn't help but praise upon seeing this.

With Bai Guang Patriarch's emergence, the Three Great Halls of the Immortal Gate instantly transformed into war machines. Chen Mobai also led his people, evolved the Nine Heavens Fire Mansion from the Vermilion Dao Palace, becoming one of Lingxiao Palace's energy sources.

From outer space, the Azure Dragon, Vermilion Bird, and Xuanwu Dao Palaces transformed three Dominion Domains, harnessing the power of tens of thousands of cultivators to occupy three positions on the Dragon God Star, continually extracting the planet's nature's spiritual energy and transforming it into three bright beams of light injected into the Outer Space Void—a golden, glorious palace.

This palace was the Immortal Gate's strongest war artifact, the Lingxiao Palace!

Yu Baiguang stood before the Lingxiao Palace, slowly raising the sword in hand!

Chapter 1895:

“This is the final masterpiece left by the Grandmaster!”

At the Vermilion Dao Palace, next to Chen Mobai, Ming Yuhua gazed at the Lingxiao Palace in the outer space void, her tone full of emotion and eyes brimming with excitement.

As the supreme war artifact of the Immortal Gate, the chief designer of the Lingxiao Palace was Ancestor Yun Ya from the Dance Tool Dao Academy.

During the first world-opening war, when the Immortal Gate encountered the Three Eyed Tribe, even with the Five Ancestors guarding, they suffered heavy losses. Ancestor Yun Ya, feeling the power of the opponents, collaborated with the Earth Element Star situation and used his Sect's secret war artifact as a blueprint to design the Lingxiao Palace.

Before passing away, Ancestor Yun Ya was still painstakingly perfecting the Lingxiao Palace.

It was precisely because of this that he, who originally had much time to live, prematurely exhausted his energy and died during the core forging of the Lingxiao Palace.

After Yun Ya's passing, the Artifact Refiners of both the Dance Tool Dao Academy and the entire Immortal Sect inherited his will, gritting their teeth and investing Earth Element Star's most precious resources, finally completing the Lingxiao Palace before the second world-level war.

During that world-opening war, the Immortal Gate also faced strong opponents, and ultimately relied on the Lingxiao Palace to turn them to dust, avoiding immense casualties.

Over thousands of years, the talents of the Immortal Gate relied on the design blueprints left by Ancestor Yun Ya to transform into the Four Symbols Dao Palace, Six Great Heavenly Gates, and others.

Therefore, even the Artifact Refiners of the other three Great Dao Academies regard Ancestor Yun Ya as the industry's Grandmaster.

Given Chen Mobai's current position, he naturally has the privilege to view the blueprints of the Lingxiao Palace.

Even as a half-step Fifth Rank Artifact Refiner, he finds it incredibly challenging to understand.

This involves not just Sixth Rank Magic Artifacts but also Sixth Rank formations, thunder methods, talismans, and more.

If Ancestor Yun Ya hadn't completed the Sixth Rank core before his death, even the Immortal Gate, after spending thousands of years, might not have been able to complete this Lingxiao Palace.

Due to this, the Immortal Gate has only been able to produce the Four Symbols Dao Palace and not replicate another Lingxiao Palace over the years.

The ability to replicate the Four Symbols Dao Palace was thanks to the brilliant Zhongli Patriarch.

In a sense, the combined achievements of the Four Symbols Dao Palace, the Six Great Heavenly Gates, and the Twenty-Eight Constellation Armors are not inferior to the Lingxiao Palace.

Chen Mobai now stands at the core of the entire Vermilion Dao Palace, feeling the continuous flow of fire spiritual energy between Dragon God Star's heaven and earth being refined into the Nine Heavens Fire Mansion by this Dao Palace, with 90% transforming into the Heaven Pillar Spiritual Light, injected into the Lingxiao Palace of the outer space void, and 10% remained in the Dao Palace's energy core Thunderfire Pool.

One half of this 10% is used to maintain the Vermilion Dao Palace's Fifth Rank Great Formation, controlled by Zhongli Tianyu. The remaining half is driven by Chen Mobai, who resides in the core of the Nine Heavens Fire Mansion.

Though most of the fire spiritual energy on Dragon God Star has been devoured and refined by the Matriarch, for Chen Mobai, a Nascent Soul Cultivator, it remains vast as a deep ocean when placed upon the entire world.

With the continuous supply of fire spiritual energy from the Nine Heavens Fire Mansion, the bottleneck that had troubled him for a long time shattered abruptly.

Chen Mobai's Pure Yang Scroll advanced to the Nascent Soul Fourth Layer.

His breakthrough momentum, naturally, could not be hidden from those around him.

Everyone marveled at his extraordinary talent, achieving a breakthrough amidst imminent warfare, indeed deserving his reputation as a "Battle Law Victory" man.

Wenren Xuewei calculated, finding that since Chen Mobai's Nascent Soul Formation, it had been thirty-three years, reaching the Nascent Soul Fourth Layer, unprecedented in the history of the Immortal Sect.

Following the breakthrough to the Nascent Soul Fourth Layer, Chen Mobai's momentum showed no signs of stopping.

He donned a crimson battle armor, the Vermilion Bird Immortal Armor, also the core of the Nine Heavens Fire Mansion.

The Four Symbols Dao Palace set by the Zhongli Patriarch each refined a domain that could transform into four Nine Heavens Immortal Mansions, drawing the metal, wood, water, and fire spiritual energy of heaven and earth, transforming them into the Four Directions World Heaven, uniting with the Lingxiao Palace. This constitutes the five elements of heaven and earth, capable of infinite changes.

The Chaos Primal Energy Cannon is precisely the Light of Destruction induced by the fusion of the five elements.

In fact, according to Ancestor Yun Ya's original draft, the force of the Lingxiao Palace alone could transform the Five Directions World Heaven and condense the Chaos Primal Energy Cannon.

Unfortunately, that workload is too great, and the Immortal Gate still lacks the capabilities and resources for it at the moment.

Moreover, doing so would require five Deity Transformation True Monarchs to fully unleash the power of the Lingxiao Palace.

The Four Symbols Dao Palace evolved from the Lingxiao Palace by the Zhongli Patriarch, each reaching its pinnacle can unleash the power of the Spirit Transformation Stage.

However, this requires the cultivator hosting the Four Symbols Dao Palace to be at the Nascent Soul Peak. Although Chen Mobai has just broken through to the Nascent Soul Fourth Layer, he's still insufficient, thus needing to utilize the Vermilion Bird Immortal Armor.

After donning the armor, Chen Mobai felt the continuous influx of power from the Nine Heavens Fire Mansion into the Immortal Armor, which in return augmented him, causing his spiritual energy to surge, Nascent Soul Fifth Layer, Sixth Layer, Seventh Layer...

This Immortal Armor, in synergy with the Nine Heavens Immortal Mansion, can temporarily elevate the core cultivator to the utmost current realm, ensuring that when the Vermilion Dao Palace ignites its core energy, it can evolve into the Soul Dharma Aspect!

Although the enhancement is temporary, Chen Mobai still finds himself indulged in the power of his Pure Yang Scroll reaching the Nascent Soul Ninth Layer!

Chapter 1896:

"Is this the perfection of the Nascent Soul stage!"

Amidst the core of the Nine Heavens Fire Mansion, Chen Mobai felt that his mere breath could affect the winds and clouds over tens of thousands of miles of the Dragon God Star, triggering boundless drought and scorching air currents, even causing the sea to evaporate and drop, which made his heart palpitate slightly.

At the peak of the Nascent Soul, it was already this terrifying. If a God-Transcending Cultivator were to act with full force, wouldn't it be a world-ending catastrophe!

"The two ancestors are about to make their move!"

At this moment, Wenren Xuwei received the latest instructions from the Lingxiao Palace and informed Chen Mobai.

As the most steadfast ally of his own, Chen Mobai gave Wenren Xuwei enough respect, appointing her as the deputy. If he were not around, the Vermilion Dao Palace would center around her.

Upon hearing this, Chen Mobai immediately looked up towards the Outer Space Void!

Below the ninth layer of the Nascent Soul, his Void Spirit Eye was enhanced to an unprecedented realm.

He clearly saw through the Nine Heavens Gust, the Heaven and Earth Placenta, and saw the woman standing in front of the Lingxiao Palace, clad in pure white battle armor that covered her entirely.

Chen Mobai naturally knew that Bai Guang Ancestor was wearing the Lingxiao Immortal Armor, the only sixth-rank battle armor of the Immortal Gate.

Beside Bai Guang Ancestor, a silver-gray longsword floated. Chen Mobai sensed from deep within the Lingxiao Palace a terrifying energy source, seemingly as powerful as tens of thousands of Nascent Soul Cultivators combined, pouring out at this moment and being absorbed by the Lingxiao Immortal Armor.

In an instant, Bai Guang Ancestor's aura surged to the point where even the void could not bear it.

At that moment, Chen Mobai's Echoes in the Void sensed the Dragon God Star's world rules quivering as if awakening, but because this world's rules had long been trampled and shattered by the Matriarch, even if they sensed the breath of destruction, they could only wail in vain.

The entire Dragon God Star began to erupt with unprecedentedly rich spiritual energy, seemingly wanting to spawn more powerful creatures to survive this calamity.

Meanwhile, the remaining insect beasts on the Dragon God Star began to revel in wild evolution.

Of course, the Three Great Dao Palaces that had already evolved into the three World Heavens also absorbed more of nature's spiritual energy at this time. A massive Azure Dragon stretching for miles, a Turtle Snake Xuanwu retreating to hover over the sea, covering the open ocean, and a Vermilion Bird Divine Bird soaring in the southern sky gradually coalesced into phantoms, erupting with near-divine power fluctuations.

This was the Nine Heavens Immortal Mansion evolved to its extreme. However, to turn these three Soul Dharma Aspects from virtual to real, and even to maneuver them, the energy core within this Dao Palace needed to be ignited and erupted.

At this point, it also meant that the Nine Heavens Immortal Mansion of the Lingxiao Palace was ready to act.

"Why do I only see Bai Guang Ancestor?"

Seeing the graceful figure in front of the Lingxiao Palace, Chen Mobai couldn't help but feel surprised. Didn't Wenren Xuewei say that both ancestors would make their move?

"Have you forgotten how Qian Xing Ancestor got their title?"

Wenren Xuewei, upon hearing this, pointed to the silver-gray longsword suspended beside Bai Guang Ancestor.

At that moment, Bai Guang Ancestor formed her fingers into a sword, performing the Sword of Dao Annihilation's opening move, which Chen Mobai was very familiar with.

The Star-Drawing Sword, formed by a world, gently rose alongside the Sword of Dao Annihilation from Bai Guang's side, and through its passage, pitch-black rifts were torn open, continuously spreading!

Under the terrifying energy infusion of the Lingxiao Palace, Bai Guang Ancestor's cultivation level reached a terrifying realm that Chen Mobai dared not pry into or perceive.

Under her casting at this realm, the Star-Drawing Sword almost entirely realized the Sword of Dao Annihilation!

"Slash!"

Accompanied by the word "slash," the Star-Drawing Sword burst forth with dazzling silver radiance. From its center, gigantic black fissures sliced through the cosmic void, as if it had pierced a giant spider web over the entire Dragon God Star!

This was the power of this sword, so overpowering it was beyond this universe's World Heaven to bear!

The silver radiance was like stars, as it instantly pierced through the Heaven and Earth Placenta, Nine Heavens Gust, resembling a silver pillar of light descending from the sky, carrying with it the vitality to destroy all, plunging straight into the abyssal passage leading to the core of the Dragon God Star!

Mighty insect beasts poured forth, trying to block this sword!

But unfortunately, before the Dao Annihilation, they were all turned into the Dao!

The Star-Drawing Sword was unstoppable, slicing through the earth's crust, evaporating underground water, and melting mineral veins.

In what seemed like the blink of an eye, it pierced into the white cocoon, then penetrated the Star Core, and sliced out from the other side of the Dragon God Star's earth's crust!

Bai Guang Ancestor, in front of the Lingxiao Palace, lifted her sword fingers, and the tens of thousands of miles of silver radiance pierced through the entire planet, slicing upwards, as if wielding a Star-Slashing Sword, cleaving a gash down the middle of the Dragon God Star!

Under this sword, countless insect beasts turned to ash!

Chen Mobai also heard the pained wailing of the heavens and earth of the Dragon God Star!

Amidst the thunderous booms!

The endless sea on the other side of the planet began pouring into the planet's depths along the rift left by the Star-Drawing Sword, triggering endless tsunamis to drown those insect beasts, further stirred by eruptions of lava, and fierce storms raging...

It was as if an apocalyptic, limitless natural disaster was unfolding upon this Dragon God Star.

This was the first time Chen Mobai witnessed a God-Transcending Cultivator of the Immortal Gate making a move!

He could only tell himself to maintain a humble heart, not to become arrogant just because he possessed the Qualification of Deification and was the number one talent in the history of the Immortal Gate.

Chapter 1897:

As long as he hasn't reached this realm, no matter how powerful the Nascent Soul, even if it takes him only one sword to kill many Nascent Souls now, in front of a Divinity Transformation, it is merely a matter of his opponent casually wielding a sword!

Deep within the Earth's core, having likewise observed as a clone the One Sword to Sever Stars performed jointly by the Double Saints of the Immortal Gate, the three great experts of the Ascension Sect all fell into silence.

Soon after, a sense of despair welled up in their hearts.

Without becoming a Divinity Transformation, in the face of this one sword, they, like those insect beasts turned to ashes, were nothing but ants.

"Did the Matriarch die too?"

Yan Xinji asked, somewhat in disbelief.

They knew, based on their calculations, that the Matriarch, who had devoured this planet's origin and was a formidable gnawing gold fire ant from a primordial aberrant insect species, should at least be able to resist, even if unable to win against the Double Saints of the Immortal Gate.

Who knew that with the Immortal Gate's foundational forces in motion, they could cleave apart the entire Dragon God Star with one sword!

"No, it seems like it has awakened!"

Divine Master Yuxuan, who had seized control over the most insect beasts, also had a considerable number of clones before the Matriarch's cocoon. Although most turned to ash under the One Sword to Sever Stars, there were a few lucky ones that hid beneath the sword's path, remaining unaffected.

"Act according to circumstances then..."

After leaving this remark, the Hierarch of the Ascension Sect, with a gleam flashing in his eyes, employed the Shadow Escape Technique and vanished from the spot.

"After the Immortal Gate eradicates the Matriarch, they will surely seek to exploit the remaining resources of this planet. Before they set up the Sky Curtain Ground Network, let Lin Daoming condense more Fetal Transformation Essence..."

As Yan Xinji left, this thought flashed through his mind.

Having witnessed the One Sword to Sever Stars by the Double Saints of the Immortal Gate, he no longer clung to any hope for the Matriarch.

Not to mention it hadn't even begun Cultivating Void; even if the Purple Cloud Dao Scripture was granted to it now to learn how to cultivate the void, it would still have no chance or time for cultivation with the Double Saints of the Immortal Gate and the Lingxiao Palace hovering in the cosmic void.

With nothing to be done, he aimed to gain as much benefit as possible.

This war of exploration proved Lin Daoming's Spiritual Pivot of All Phenomena and Fetal Transformation Essence's utility against Divinity Transformations.

Although Qing Nu had been hidden by the Pure Yang brat, and Yang Jing was seized by the Hierarch of the Ascension Sect, there was still Kong Feichen, who was one of the three Immortal Sprouts merged with Fetal Transformation Essence.

Just so happened that a Black Dragon clone was lost this time, perhaps he could be used to compensate for that.

Thinking this, Yan Xinji made his way toward where Lin Daoming was.

While the Divine Master Yuxuan, watching the two leave, had colorful light flickering in his eyes, he ultimately turned his gaze to the white giant cocoon deep within the Earth, which was roaring louder and louder, and made a firm decision!

After the One Sword to Sever Stars cleaved open the Dragon God Star, the insect beasts hidden underground were also exposed to the beings of the Immortal Gate.

Among them, what most caught the attention of Chen Mobai and the others was the gigantic white cocoon embedded within the Star Core.

The previously closed cocoon had also been sliced by the Star-Drawing Sword, revealing the true appearance of the sleeping creature inside.

It was a being half-dragon, half-human, and half-insect!

It had a feminine, humanoid face framed by short jet-black hair, with six differently colored dragon horns atop its head. One could faintly hear the roar of the skies, the vastness of the earth, and the tumultuous waves of the ocean.

Its upper body was like a woman's torso, slender and resilient, with skin as golden as jade marked by bright blood-red stripes akin to ant trails, exuding a sense of searing heat upon sight.

Six elongated, ant-like limbs extended from its back, tearing open the white giant cocoon and roaring toward the Lingxiao Palace in the cosmic void!

Its lower body was a sinuous dragon tail covered in scales gleaming with golden-red radiance, emitting dazzling spiritual light. However, where its upper and lower body connected, a fist-sized blood hole had already been pierced, with the wound seemingly nurturing a terrifying rending force that spread across its halves like a web, from which gold-red blood seeped, staining and burning the white cocoon red.

This was evidently the injury caused by the One Sword to Sever Stars.

This is the Matriarch!

Seeing this strange being, Chen Mobai felt once more relieved that the Immortal Gate had waited until after the Patriarch Bai Guang emerged before launching a full-scale war.

Otherwise, relying solely on Patriarch Qian Xing might not have been enough to secure the victory.

"Three Great Dao Palaces, join us in slaying the Matriarch!"

Qian Xing's voice rang out, entering the ears of Chen Mobai and the other three.

"As you command!"

In an instant, the ethereal shadow of the Primordial Spirit Dharma Aspect above the Three Great Dao Palaces, fueled by the boundless energies of the Nine Heavens Immortal Mansion, condensed into strands of terrifying and extreme thunder light!

Rumble!

Chen Mobai commandeered the Vermilion Bird Dharma Aspect, projecting scarlet thunder beams toward the Matriarch emerging from the Earth's core.

However, in the face of these thunder flames, one of the Matriarch's back hands opened, revealing a mouth in its palm, which devoured most of the thunder and flames in the violent explosion.

Chen Mobai even noticed that the gloss of the Matriarch's scale armor had brightened a little.

Seeing this scene, he immediately halted the Vermilion Bird Dao Palace, allowing his colleagues to have the stage.

The Azure Dragon Dao Palace naturally manifested the Illusory Thunder!

This thunder method was both the thunder of vitality and destruction, striking upon the Matriarch and instantly dimming the fiery patterns on her scale armor and skin a bit.

Chapter 1898:

But as it opened its mouth to spit, a stream of golden-red lava descended, with the terrifying high temperature of mixed gold and iron flames, perfectly countering the Illusory Thunder.

After Qi Yuheng clicked his tongue, he also stopped the Azure Dragon Dao Palace.

The final move was naturally by the Xuanwu Dao Palace, which they held in high regard!

Narcissus did not disappoint them!

Streaks of deep blue-black lightning, carrying the chill that freezes all things, fell upon the Matriarch, causing the seawater originally pouring back into the planet's fissure to freeze instantly.

Even the Matriarch was no exception!

Flying towards the Cosmic Starry Sky, heading to the Lingxiao Palace, it transformed into a gigantic iceberg in an instant!

Then, Narcissus condensed the Power of the Heavenly Serpent into a thousand-meter-long sword, horizontally cutting the iceberg floating mid-air into two halves!

However, with the sound of cracking!

The cleaved iceberg, under an impact of golden-red energy, shattered into pieces, even melting into flowing water, falling onto the vast yellow sand below.

The unscathed Matriarch tore through the iceberg, appearing before them.

Although by using the Four Symbols Dao Palace they could employ Rank-5 techniques, facing a true Deity Transformation Peak Insect Beast, these techniques seemed insufficient.

Buzz buzz buzz!

After the three Great Dao Palaces made their moves one after another, they naturally attracted the Matriarch's attention, its cold pupils glanced around, the six dragon horns on its head paired up, three massive energy spheres of different colors gathered in the sky, instantly launching towards the direction of the three Great Dao Palaces.

The three great Heavenly Gates of the southeast burst forth unprecedented brilliance, continuously extracting the core energy of the Dao Palace, forming a massive defensive shield made of thousands of tetragonal crystalline shields, blocking the energy beams being shot over by the Matriarch outside the Dao Palace.

Rumble!

Accompanied by a violent rumble, Chen Mobai, almost feeling it with the Vermilion Dao Palace, sensed Nine Heavens Fire Mansion shaking violently.

Although the Matriarch hadn't mastered cultivation, such basic and crude means of condensing the energy between heaven and earth to bombard, was most suitable for it.

"This should be the power originally endowed to the three Dragon Gods of Dragon God Star by this realm, to condense the forces of sky, earth, and ocean, and bring down divine retribution."

"The Matriarch must have devoured the three Dragon Gods, and also consumed the origin of this planet, so it evolved these abilities."

"The way to crack it is also simple..."

At this time, Yunhai Master's voice rang out in the communication channel, then three black holes suddenly appeared atop the Matriarch's head, swallowing back all the continuously absorbed force of the three elements.

“This is the Divine Domain of the three Dragon Gods which we found through searching for dragons over the years, where the power of the Dragon Gods’ dominion still exists and can suppress this ability of the Matriarch!”

As Yunhai Master spoke, the Matriarch clearly noticed it, extended its three arms, directly plunging into the three black holes.

With a muffled sound from Yunhai Master, the three originally opened Divine Domains were immediately closed!

With another agonizing roar, the three arms of the Matriarch that delved into the three Divine Domains seemed to be severed by the Power of the Void, and golden-red blood dripped, forming fiery mountains on the ground.

And at this moment, streaks of silver light flashed in the void, and Nascent Soul Superiors from the Immortal Gate landed into the Lingxiao Palace, standing behind Old Ancestor Bai Guang.

“It’s about time!”

After Yu Baiguang said this, Qian Xing, who had transformed into a sword beside her, also nodded slightly, then the fully recharged Lingxiao Palace once again infused streams of terrifying energy into the Lingxiao Immortal Armor.

Roar!

At this moment, the Matriarch seemed to have completely lost its sanity, roaring and transforming into a breathtaking long rainbow, bursting through the Heaven and Earth Placenta of Dragon God Star, entering the cosmos.

Yu Baiguang’s icy gaze transformed into a streak of silver light, stepping out of the Lingxiao Palace!

Qian Xing’s Star-Drawing Sword broke through the void, already falling before the Matriarch!

Using his body to transform into a sword, Qian Xing moved almost instantaneously.

He, starting later but arriving earlier, fell behind the Matriarch, thrusting a sword employing the technique of Blade of the Void into the bleeding chest hole previously stabbed by the Star-Drawing Sword.

However, it seemed that each palm on the back of the Matriarch had eyes in their center. Although three of the hands had been severed by the Divine Domains of the three Dragon Gods, there were still three left.

One stretched out to collide with the Star-Drawing Sword.

Accompanied by a piercing sound, Qian Xing was surprisingly struck flying.

Yet, the palm of the Matriarch bore no injury at all.

“How could it be, I actually couldn’t break through the defense?”

Seeing this scene, Qian Xing found it hard to accept, knowing he just pierced through the Matriarch and even carved a fissure through the entire planet with his sword.

Though with that sword, he merely provided the sword, the wielder was Bai Guang, and the source of power was Lingxiao Palace.

But this scene now made Qian Xing realize how formidable the Matriarch’s external defense truly was.

Without Yu Baiguang, the sword cultivator, taking action, relying solely on himself, he would really only be able to depend on the Lingxiao Palace.

And at this moment, Yu Baiguang had already drawn her Heartless Sword, lavishly exhibiting her own pinnacle Sword Dao of the Immortal Gate!

Together with Qian Xing, through the power of the Lingxiao Immortal Armor, she could effortlessly slay this Matriarch!

However, with the overall situation already determined, she wanted to use this powerful Insect Beast to temper her Peak Mastery Sword Dao.

After all, in this exercise of Reducing Seeking Emptiness, although she remained at the Great Achievement Realm of Divinity Transformation, the causal lines and ties were cleared, and the sword, without these constraints, could finally be wielded with abandon.

This was a feeling Yu Baiguang had never experienced before, her previous swords had been fast and sharp.

But every swing felt like it couldn't fully harness her strength.

And now, each casual swing was her previous peak!

Sword of Dao Annihilation!

Bloomed upon her Heartless Sword, even without the assistance of Qian Xing, she still cleaved through the Matriarch's tough outer shell with this strike.

With golden-red blood splattering, the face of the Matriarch once again displayed a look of agony.

However, Yu Baiguang showed no hint of mercy.

With a flick of her sword fingers, Qian Xing involuntarily became driven by her, forming two paths with the Heartless Sword.

Chapter 1899: Undying Body

In the void, the Matriarch, whose head was severed by Yu Baiguang, had meaty tendrils and fresh blood constantly wriggling at the wound. Her hand reached out from her back, grasping her head, trying to reattach it.

However, at the wound, a strange silver-gray light flickered, preventing it from healing.

Not only was it the wound on her neck, but the scar on the Matriarch's waist and abdomen, cut out by the Star-Slaying Sword earlier, also shimmered with the same luster.

Besides these two wounds, the injury inflicted by Yu Baiguang with the Heartless Sword had completely healed under the Matriarch's formidable fleshly might.

The Star-Drawing Sword's silver light shimmered, having already transformed into Qian Xing's form. Watching the scene before him, he couldn't help but marvel, "Truly an undying body; fortunately hasn't achieved the realm of Blood Rebirth, otherwise I'd have to turn the entire Dragon God Star, along with the Matriarch, into ashes."

The path of cultivation is divided into nature and life!

That is, body and mind!

The body is the demonic path of the undying and indestructible flesh, while the mind is the Mysterious Gate Great Tao of the immortal Primordial Spirit's creation!

The Immortal Gate inherits the Mysterious Gate Great Tao of cultivating the Primordial Spirit. What is called the Primordial Spirit is transforming from Nascent Soul to Deity, and stepping into this phase is considered entering the hall.

As for strange insect-type demons like the Gnawing Gold Fire Ant, they basically do not cultivate the Primordial Spirit but hone their bloodline, evolving step by step toward the Innate Demonic Body.

The undying body of the demonic path corresponds to the Rank-5 Divinity Transformation Realm.

At this realm, no matter how severe the injuries to the body are, they can recover extremely quickly. However, each recovery consumes essence blood, and if the essence blood is exhausted, they will die. And if vital areas like the heart and brain are damaged, more essence blood will be consumed for recovery.

To advance from the undying body is to achieve Blood Rebirth! This is equivalent to the Mysterious Gate's Sixth Rank Void Refining Realm.

As the name implies, as long as there is a droplet of essence blood, a bit of thought can escape and rebuild the undying body. If the Matriarch achieved this realm, the Immortal Gate would have to completely obliterate Dragon God Star to be at ease.

Above Blood Rebirth is "Immortal True Spirit," equivalent to the Seventh Rank Harmonization Realm.

The mystery and divine skills of this step are not within the transmission of the Immortal Gate, only knowing that even in the Central Dojo of the Purple Cloud Galaxy, such an existence is a Great Ability, revered as an Ancestral Mysterious Gate True Immortal.

The dojo of the Five Ancestors of Xianmen was opened by a Great Ability in Harmonization.

Beyond Harmonization, there is a realm named Pure Yang!

This realm's divine skills are endless, mana boundless, able to reverse the universe and star sea with a thought. It's already the ultimate in cultivation, nothing in the universe can transcend it. Whether or not there is such an existence in the entire Purple Cloud Galaxy remains unknown.

The Immortal Gate knows about this realm because of the Pure Yang Scroll.

This content has been orally passed down by the Immortal Gate's successive Divinity Transformations.

It is not to keep it secret, but to prevent those below from losing the drive to advance upon learning it.

After all, in the Immortal Gate, Nascent Soul to Deity Transformation is already so difficult, and above Divinity Transformation are these realms, easily making the Immortal Gate's cultivators give up in despair when lamenting the endless path of cultivation.

Knowing about these at the time of Divinity Transformation is just right.

Because after forming the Primordial Spirit, even in the dojo of the Purple Cloud Galaxy, one counts as a true Mysterious Gate Abundant Dao person.

"I wish to study the Demonic Path using this Matriarch's body; I ask for your help once more, Junior Sister!"

Seeing the Matriarch still struggling, trying to eradicate the silver-gray light and restore her body, Qian Xing's expression became serious as he spoke to the Yu Baiguang beside him.

"No problem!"

Yu Baiguang nodded lightly, and after speaking, Qian Xing turned back into a sword. With a swift motion, he severed the Matriarch's body into several pieces.

Amid the Matriarch's cries of agony, streaks of silver-gray light partitioned her body.

This was a special Secret Technique developed by Qian Xing after long observation, targeting the Matriarch's undying body.

When his Star-Drawing Sword struck, it would automatically leave a small void at the wound.

The main function of this small void was to partition the wound. Although the Matriarch's wound appeared to be merely thin, the barrier of the silver-gray light made her undying body feel as though the wound was as vast as a world.

However, this could only treat the symptoms, not the root cause. Unless the Matriarch is annihilated completely, as time passes, she will gradually heal, or exhaust her essence blood and turn to dust.

Thus, Qian Xing performed another newly-developed spell, taking out a series of beads. Each bead targeted a segment of the Matriarch's body, emitting silver radiance to absorb and devour them separately.

Witnessing this scene, the Nascent Soul cultivators of the Immortal Gate, like Yuan Xu and Yunhai, who stood behind, couldn't help but twitch their faces slightly.

They all recognized that the beads Qian Xing used were condensed from Void Stones, and each bead contained a small void. The method aside, using so many Void Stones was truly extravagant.

The Matriarch's body was effectively sent into over a dozen different domains, rendering her undying body completely ineffective.

Before long, only the Matriarch's head and the two segments of her upper body remained in midair.

The Matriarch glared angrily, yet Qian Xing smirked as he took out a Talisman, pasting it on her forehead to thoroughly suppress her.

Chapter 1900: Undying Body (Part 2)

"As expected of Elder Brother, to be able to think of such a spell against the Matriarch in such a short time."

Yu Baiguang watched Qian Xing's actions and couldn't help but praise.

Whether it was the silvery-grey brilliance or the Small Void Domain, these were spells from the Immortal Gate that she had never seen before, clearly newly created by Qian Xing.

“Though I pride myself on my extraordinary talent, these two void-related spells were only created by analogy after seeing Pure Yang’s Sutra of Void...”

Qian Xing shook his head, saying words that made Yuan Xu and others suddenly understand.

“Pure Yang... this kid indeed has good talent, but his cultivation breakthroughs have been a bit too smooth. I fear there will be obstacles when it comes to Divinity Transformation in the future!”

Upon hearing this, Yu Baiguang felt a faint joy in his heart, but still pretended to ponder for a while, feigning some concern as he spoke.

“Junior Sister, you’re overthinking. With this kid’s talent, he won’t be trapped before Divinity Transformation. I even think he might become the first to successfully cultivate void in the Immortal Gate!”

Compared to Yu Baiguang, who just exited seclusion, Qian Xing had witnessed Chen Mobai’s growth, and was full of confidence in his exceptional talent.

He felt that even if he reincarnated and cultivated again, under the Immortal Gate system, his time to form a Nascent Soul would only be this quick.

“Elder Brother flatters me, cultivating void is not that easy, and moreover, he practices too hastily. His foundation must be somewhat weak. After the cosmic battle ends, I will thoroughly teach him...”

Though Yu Baiguang said this, the slight lift of her chin let Qian Xing and the others behind her know she was inwardly quite pleased.

“All of you go down to assist the Three Great Dao Palaces in sweeping this Dragon God Star. Junior Sister and I will activate the Lingxiao Palace to stabilize it together...”

Qian Xing instructed Yuan Xu and the others behind him. These Nascent Soul cultivators from the Immortal Gate received their orders and flew towards the Azure Dragon, Vermilion Bird, and Black Tortoise Dao Palaces according to their respective camps.

Without the Matriarch, this swarm of Gnawing Gold Fire Ants, although numerous, were just a disorganized mob.

If the Immortal Gate didn't intend to meticulously develop this planet, the Three Great Dao Palaces could gather a Rank-5 Thunder method and strike into the planetary breach created by the sword, exterminating a large portion of these insect beasts.

In the void beyond the heavens, the Lingxiao Palace was activated by two Divinity Transformations, sending out silver chains that fell from the breach in the planet, settling on the central Star Core.

Once the Star Core was locked, the original trajectory of this Dragon God Star was naturally dragged to a halt.

However, the operation of a planet is a cosmic law, so the Lingxiao Palace required the continuous consumption of massive spiritual energy to resist this law. Fortunately, most of this spiritual energy was drawn from the Dragon God Star itself, otherwise even Qian Xing and Baiguang would be distressed by the spiritual energy consumption.

After dealing with the Matriarch, Qian Xing and Baiguang arrived before the Star Core.

This Star Core contained most of the energy of this planet, which was also the key to the Matriarch evolving to such a scale.

The white giant cocoon embedded in the Star Core had long been torn open, and the insect eggs below it had all hatched when the Matriarch was beheaded.

According to the bloodline instincts of the Gnawing Gold Fire Ants clan, they would choose a new Matriarch next.

But without the Star Core's energy, the Matriarch at most could only evolve to Rank-4, so Qian Xing and Baiguang didn't pay this any mind, leaving it to the Nascent Soul cultivators of the Immortal Gate to handle.

They looked towards the Star Core, which had a breach sliced by the sword, with pure planetary essence pouring forth from it.

Qian Xing, feeling somewhat distressed, performed a sealing technique to close the wound he had made.

Then he cast another spell; a beam of white light fell upon the Star Core, causing the originally silver-white Star Core to suddenly become transparent, revealing sword marks and, faintly, a dense and intense black Qi deeper within.

“As expected, there is that demonic Qi at the depths of this planet’s Star Core!”

Seeing this scene, Qian Xing sighed and then deepened the transparency technique, attempting to trace the source of the black Qi.

Yet, no matter how he urged his spell, he could never pierce through the dense black demonic Qi.

“Once the resources of this planet have been mostly developed, let’s take this Star Core away!”

Baiguang spoke upon witnessing this scene.

The Star Core is the heart of a planet; once removed, the planet will gradually crumble during its cosmic journey, ultimately becoming space dust.

Qian Xing nodded, took out an Array Plate and seventy-two Array Flags, and set the core of the Earth Network Great Formation at that location.

This formation not only protected the Star Core but also provided coordinates for the other Immortal Gate cultivators, allowing them to gradually set up the Sky Curtain Ground Network based on this point.

Soon, Yunhai Master arrived, a Fifth Rank Formation Master of the Immortal Gate, fully capable of implementing Qian Xing's formation intentions.

“Reporting to the Patriarch, if I work alone, it may delay major affairs of the Immortal Gate. Pure Yang's attainment in formations is no less than mine, and he's not much needed on the battlefield at the moment. How about letting him assist me?”

After hearing Qian Xing's situation briefing regarding the Dragon God Star and the specially designed Different World version of the Sky Curtain Ground Network Formation, Yunhai Master made a bitter face, hoping to gather more hands.
