

## World 1901

### Chapter 1901: Undying Body\_3

“Junior Sister, what’s your opinion?”

Qian Xing naturally had no objections, but he knew Chen Mobai was someone under Yu Baiguang, so before assigning tasks, he still asked for her opinion.

“Senior Brother can arrange as he sees fit!”

Yu Baiguang felt it was an honor and was amazed at how terrifying Chen Mobai’s talent was. Even Formation, which requires the most time and effort, had advanced to the Rank-5 level.

Before long, Chen Mobai, who received Qian Xing’s message, arrived here.

“As you command!”

After reviewing the Sixth Rank Array Diagram designed by Qian Xing, Chen Mobai accepted the orders in front of the Double Saints of the Immortal Gate.

This was also Chen Mobai’s first time seeing the legendary Ancestor Bai Guang!

She was almost identical to the painting in Chen Xiaohei’s boudoir back then; a purple long dress, graceful posture, but unfortunately, her face was covered with a light purple veil, making it hard to see her visage. The exposed brows and eyes were very delicate, evidently a great beauty.

After hesitating for a moment, Chen Mobai saluted to Yu Baiguang, the biggest supporter of his Dance Tool Dao Academy.

“This time, in slaying the Matriarch, your Sutra of Void played a significant role. Is there anything you’d like as a reward?”

The words of Ancestor Bai Guang left Chen Mobai utterly confused.

What does the Sutra of Void have to do with slaying the Matriarch?

How did it even play a significant role!

At the side, Qian Xing seemed to want to speak but hesitated, and ultimately chose to remain silent.

As for Yunhai Master, there was no need to mention; he watched with his eyes, listened with his ears, hoping to hear how exactly Ancestor Bai Guang would organize the rewards for her man.

“I haven’t earned any merit, so I dare not ask for a reward!”

But after some consideration, Chen Mobai felt it would be more appropriate to maintain his reputation with the Immortal Gate, and he shouldn’t let Bai Guang Ancestor attributing merits to him that he hadn’t done, so he righteously declined.

Besides, he never lacked resources. Even on this Dragon God Star, what he valued were this Star Core and the two inner cores of the Matriarch, especially the one with the Fire Attribute, containing Innate Dao Rhythm. He could use it to refine Primordial Yang Treasure Beads.

But such precious things certainly belonged to the Double Saints of the Immortal Gate, and wouldn’t be given to him.

Therefore, after careful thought, he decided to firmly establish himself as a genius in the Immortal Gate who relied purely on talent, not resources!

This response made Yu Baiguang look at him with even greater satisfaction.

“Truly a graduate of my Dance Tool Dao Academy, a forthright and dignified gentleman. But if I say you played a significant role, you did. After the war preparations are over, I’ll make arrangements for you.”

Yu Baiguang, having cultivated to this extent and being a Sword Cultivator, was always straightforward and decisive in her actions.

Most importantly, in the Immortal Gate, she was at the peak of battle power, so unless it was something too outrageous, even Qian Xing wouldn't object.

Having said that, Bai Guang and Qian Xing then left.

Although Chen Mobai was puzzled, he thought that this was Ancestor Bai Guang paving the way for him. He thought that the biggest supporter of their Dance Tool Dao Academy was indeed reliable. Even though they had never met, her support and care were so direct. It seemed advancement really relied on one's connections!

"Take care, Ancestor!"

Thinking of this, Chen Mobai saluted the Double Saints of the Immortal Gate flying towards the Outer Space Lingxiao Treasure Palace. Yunhai Master did the same.

Yunhai Master: "Pure Yang, I'll set up the Heavenly Curtain, and it's a good opportunity to integrate the Divine Domain of the Three Dragon Gods into it."

Chen Mobai nodded directly upon hearing this: "Then I'll take care of the Earth Network Great Formation."

Chapter 1902: Heaven and Earth Placenta

The reason Yunhai Master called upon Chen Mobai for assistance was precisely because of the Divine Domains of the Three Dragon Gods.

These are three alternate dimension spaces similar to the small realms of the Immortal Gate, where the rules and profound mysteries of Dragon God Star can almost all be witnessed.

Several Nascent Soul cultivators from the Immortal Gate have already been able to simply harness the Divine Domains together, only lacking the deciphering of the core secrets of the Divine Kingdom.

"Pure Yang, if you have time, you can also come to see the Divine Domains. The power of void there is dense and easily perceptible to us, you would certainly gain even more."

Upon departure, Yunhai Master extended an invitation to Chen Mobai, who lightly nodded.

In the ensuing period, Nascent Soul cultivators from the Immortal Gate engaged in their respective roles.

The Three Great Dao Palaces led their cultivators in suppressing and annihilating the insect beasts on the Dragon God Star. Although Chen Mobai brought a group to deploy the Earth Network Great Formation, the Vermilion Dao Palace, under the coordination of Wenren Xuewei and Zhongli Tianyu, also played a significant role.

Regardless, within the Four Symbols Dao Palace, the Vermilion Dao Palace is peerless in large-scale destructive capability. Despite the strong resistance of the Gnawing Gold Fire Ants to fire attributes, ninety-nine percent of them turned to ashes under the absolute strength disparity.

Even an occasional Gnawing Gold Fire Ant might evolve under the fire and thunder sweeps of the Vermilion Dao Palace, but they would be encircled and slaughtered by Immortal Sect disciples wielding life detectors.

Nonetheless, despite this, the advancement of the Immortal Gate was not swift.

Following the massive casualties, all the insect beasts hid deep underground. Evidently, although the Matriarch was gone, among the high-ranking insect beasts, there were still some intelligent beings utilizing various methods to delay the Immortal Gate from fully controlling this planet.

Deep underground, while not capable of destroying the planet, the Four Symbols Dao Palace has no way to enter but to organize Immortal Sect disciples to form teams and hunt within.

However, this approach is highly inefficient.

After all, though the Immortal Gate has life-detecting instruments, due to the barrier of earth, efficiency is greatly reduced, and if the underground cave collapses during intense combat, Immortal Gate cultivators might be trapped and unable to escape.

Under such circumstances, Chen Mobai and the Double Saints of the Immortal Gate reported. However, Qian Xing and Bai Guang suggested not to bother them with minor matters, instead handling them autonomously.

The three naturally understood that this was because the two did not want to get entangled in too many affairs.

Nevertheless, without the Double Saints of the Immortal Gate expressing opinions, they dared not make decisions on their own either.

"Let's leave it at that. Apart from those mineral veins and spiritual vein lands, we will not bother with the underground areas. Anyway, once the Sky Curtain Ground Network Formation is laid, the whole Dragon God Star's nature's spiritual energy will be under the Immortal Gate's control. At that time, by severing the spiritual energy, this group of insect beasts can only grow weaker until their final demise."

Chen Mobai, Qi Yuheng, and Narcissus could basically make decisions on behalf of the Three Great Halls, so after some general discussions, they reached this consensus.

Subsequently, the Immortal Gate's army of cultivators ceased entering the underground for extermination but instead dispersed across the various mineral vein bases discovered on the Dragon God Star.

After all, the Immortal Gate's purpose of waging war was to plunder resources from the different worlds to replenish its own.

Regarding this situation, Ying Guanghua also organized groups of technical personnel from the Immortal Gate to arrive en masse on Dragon God Star.

The military department can only engage in battles; developing planets, surveying, and excavating mineral veins require specialists.

Among them, the Array Masters and various Array Plates, Array Flags, and Array Artifacts within the Immortal Gate were transported by the Star Space Battleships under the orders of the Three Great Halls.

Once Dragon God Star was secured, to avoid the depletion caused by the portal, this Supreme Treasure was put under control, only allowing some precious resources to be transported through the portal.

"Pure Yang, take a look at what this is?"

On this day, while Chen Mobai was directing the Immortal Sect Array Masters Association in their work, a sudden silver flash appeared, and Master Chengxuan joyfully appeared before him, handing over a purple-red metal block.

"Oh, could this be... Purple-Gold Fire Copper!"

As a Quasi-Rank-5 Artifact Refiner of the Immortal Gate, Chen Mobai had long integrated all top-ranked materials into his Heavenly Calculation Bead. With the characteristic search combined with the attributes in hand, he quickly found the most suitable type among Fifth Rank Materials.

And this Fifth Rank Material was also the main material of the Douluo Eight Scenic Lantern, capable of being used to refine the lamp base.

Thus, upon recognizing it, Chen Mobai was greatly surprised.

"Indeed, I concur with that judgement; it's material properties entirely coincide with the records left by Ancestor Yun Ya. However, the Purple-Gold Fire Copper within the Immortal Gate has practically all been utilized in manufacturing the Lingxiao Palace and the Vermilion Dao Palace, so I'm only ninety percent certain."

Master Chengxuan was still very cautious, not making any definitive statements.

"Come, let's go to my Vermilion Dao Palace and verify!"

Chen Mobai immediately understood his intention and handed over the tasks here to his good friend Yunyang Bing, asking him to oversee the Immortal Sect's array masters while he and Master Chengxuan vanished from sight with the void walk.

Purple-Gold Fire Copper, as one of the Immortal Gate's rare Fifth Rank Materials, was originally sourced from the mines at Crimson Mountain.

However, during the initial stages of the Immortal Gate, sustainable development was not strongly advocated, coupled with the threats from warfare, leading to the complete excavation of all Fifth Rank Purple-Gold Fire Copper.

Chapter 1903: Heaven and Earth Placenta (Part 2)

In fact, there were originally some samples, but later when making the Vermilion Dao Palace, it was found that no other materials could withstand the high temperatures of the core furnace, so the last of the Purple-Gold Fire Copper had to be used.

After Chen Mobai and the others arrived at the Vermilion Dao Palace, Wenren Xuewei immediately sensed it and flew over.

After explaining the situation, she was also intrigued and followed along.

"Ninety-nine percent of the properties match..."

After checking, Chen Mobai found that this purplish-red metal indeed matched the Purple-Gold Fire Copper of the Immortal Gate, but there was a slight difference.

It seemed like an active material, with a faint breath of life.

"Principal, where was this discovered on Dragon God Star?"

Chen Mobai curiously asked, knowing that this Purple-Gold Fire Copper is a mineral of both gold and fire attributes, which is best suited for the Gnawing Gold Fire Ant to evolve by eating. If this kind of mine existed on Dragon God Star, it would have been consumed by the Matriarch already.

"It was extracted from within those insect beasts."

Master Chengxuan did not hide it and directly explained the origin.

"Can this be extracted from all insect beasts?"

Upon hearing this, Chen Mobai was greatly surprised. If so, wouldn't that mean that those insect beasts are actually treasures?

"Not quite, only from the corpses of Rank-4 insect beasts can this Rank-5 Purple-Gold Fire Copper be extracted."

Master Chengxuan explained, noting this discovery was very accidental.

Because the bodies of Rank-4 insect beasts are extremely sturdy, they make excellent refining materials. Therefore, Master Chengxuan once sent a specimen to the Immortal Gate for the Refining Implement Department of Dance Tool Dao Academy to study.

Hong Mengkui melted one joint and eventually obtained a grain-sized metal piece. After material analysis, it was suspected to be Purple-Gold Fire Copper.

Upon learning this, Master Chengxuan made a trip back to the Immortal Gate, where in the deepest Treasure Trove, utilizing Rank-5 Fire Godlight and the Nine Dragon Cauldron, he melted down an entire Rank-4 insect beast corpse, and this piece was obtained.

"From what you say, these Gnawing Gold Fire Ants are actually good material breeders."

Next to him, Wenren Xuewei, after hearing this, thought of this aspect.

As the number one Spirit Plant university of the Immortal Gate, Jumang Academy is also at the forefront in insect studies. They also breed many special insect beasts. For example, there is a type of Gold Swallowing Insect that can devour metal, then expel the impurities, and digest the purest part. Once the Gold Swallowing Insect turns entirely golden, it forms a cocoon and breaks out as the Exotic Insect Golden Cicada.

After breaking the cocoon six times, the Gold Swallowing Insect becomes one of the Six Ancient Insects, the Six-Winged Golden Cicada.

However, due to a lack of enough high-grade metals, Jumang Academy can only raise the Swallowing Insect to the realm of four wings at most.

Both the Gnawing Gold Fire Ant and the Six-Winged Golden Cicada belong to the Six Ancient Insects, and their characteristics in this regard are very similar.

"I remember Qi Yuheng killed a lot of Rank-4 insect beasts!"

Chen Mobai said. The Purple-Gold Fire Copper, due to its material properties, is the best material both for him and Master Chengxuan.

He could use it to refine the lamp stand of the Douluo Eight Scenic Lantern, and Master Chengxuan could use it to enhance his Co-participation Soulful Mirror.

Besides Qi Yuheng, over at Narcissus, there are also many Rank-4 insect beast corpses.

These are also considered battle trophies.

However, with Chen Mobai's high favor, when he asked, the two gave theirs to him.

"Thank you!"

"In the future, if distributing other battle trophies, I hope Pure Yang Master can speak a good word or two."

As Qi Yuheng and Narcissus handed over the Rank-4 insect beasts to Chen Mobai, they said almost the same thing.

This Dragon God Star war of opening, the Immortal Gate can be said to have achieved a great victory.

Although the most precious star core and Matriarch were taken by the Double Saints of the Immortal Gate, the remaining Heaven and Earth Placenta, the Divine Domain of the three Dragon Gods, and precious materials like Purple-Gold Fire Copper are invaluable to Nascent Soul Cultivators.

Especially for Qi Yuheng and Narcissus, they hope to obtain resources in this opening war that can push them to Divinity Transformation, but many other Nascent Souls are eyeing these things eagerly, so they especially want to gain Chen Mobai's support.

"No problem!"

Chen Mobai naturally nodded in agreement, as he had a good relationship with both of them.

Moreover, so many Rank-4 insect beast corpses are indeed a big favor.

Subsequently, Master Chengxuan returned to the Immortal Gate with these Rank-4 insect beast corpses and, after using the Nine Dragon Cauldron, a town-shaking Magic Artifact, in just three months, he melted enough Purple-Gold Fire Copper for both of them to use.

There were two more Rank-4 insect beast corpses left over, which he kept to study further in the future.

Master Chengxuan used the Ascension Technique to quickly integrate the Purple-Gold Fire Copper into his Soulful Mirror, stabilizing this Co-participation Legal Device, which was barely pushed to Rank-5 due to the Blooming Moment, and even showing faint signs of breaking through to intermediate grade Rank-5.

At this level, the Soulful Mirror can refine the Heaven and Earth Placenta of Dragon God Star. Once successful, it will face no obstacles at least until the peak of Rank-5, and there are even possibilities of reaching Rank-6.

After all, the renowned Zhongli Bagua Mirror only controlled eight types of elemental energy, while the Heaven and Earth Placenta contains the myriad transformations of Dragon God Star.

So-called Heaven and Earth Placenta is the union of the Earth's essence and the heavens, birthing a protective shield to allow the star to run in the Universe, tempered by the light of the sun, moon, and stars over billions of years, containing the essence of the Nine Heavens and the source of the Earth.

Only stars with a Heaven and Earth Placenta can have the possibility of life birthing. Even the Gnawing Gold Fire Ants, if exposed to the harsh environment of the Universe at all times, would die away without the protection of the Matriarch or other strong insect beasts.

The Heaven and Earth Placenta, not only contains all the transformations of Dragon God Star, but also reflects a part of the Universe and Star River, offering insights into the universe's beginning, and the creation of the sun, moon, and stars upon refining and comprehending.

Therefore, the Heaven and Earth Placenta is considered a Sixth Rank resource.

As a result, many Immortal Gate Nascent Souls have their eyes on it.

Qi Yuheng's Six Imperial Scripture might very well take the step towards Divinity Transformation if he could refine the Heaven and Earth Placenta. Moreover, if Yunhai Master obtained it, his Array Dao could achieve great success and might even master the Sixth Rank Great Array in the Nascent Soul Realm.

Consequently, without any word from the Double Saints of the Immortal Gate, the Nascent Souls could only temporarily set the Heaven and Earth Placenta aside.

"If the Double Saints don't take it, I reckon Qi Yuheng is the most likely to acquire it, given that the Heaven and Earth Placenta contains all the changes of this world, the cultivator of the Six Imperial Scripture could take that major step to Divinity Transformation if refined. If Yunhai Master were to

refine it, his Array Dao would also directly achieve great success, possibly mastering a Sixth Rank Great Array with Nascent Soul Realm."

After completing the enhancement of the Soulful Mirror, Master Chengxuan only had eyes for the Heaven and Earth Placenta. When he had nothing better to do, Chen Mobai pulled him along to help refine the Douluo Eight Scenic Lantern.

"Qing Hall Master, as the leading Nascent Soul in the Immortal Gate, is the most likely person to achieve Divinity Transformation. If the Double Saints of the Immortal Gate decide to leave after this opening war, he is the one to support for Divinity Transformation," said Chen Mobai while talking with Master Chengxuan when the former's phone suddenly rang.

"The core divine kingdom in the Divine Domain of the three Dragon Gods is a 'Divine Crystallization' similar to the Fruit of Dao's Rule. If it can be refined, it could possibly result in three new Fruits of Dao's Rule..."

After answering the call, Master Chengxuan explained what Yuan Xu said to Chen Mobai, who was slightly taken aback.

This star really has quite a number of good things!

.....

#### Chapter 1904: Spiritual Venerable

Previously, while Qi Yuheng, Narcissus, and the others were occupied with warfare, the Nascent Soul principals like Yuan Xu, Cheng Xuan, Yunhai, and Mei Hua from various top schools, were scouring the planet for resources.

The divine realms of the three Dragon Gods were discovered and opened by their joint efforts.

Thus, after Yuan Xu Master deciphered one of the divine kingdoms, he also shared the results with Cheng Xuan, his former travel companion.

However, this information evidently will soon spread among all the Nascent Souls in the Immortal Gate.

Not long after, Narcissus called Chen Mobai.

The gist of her words was clear; she wanted to obtain the divine crystallization of the Sea Dragon God.

If it's truly similar to the Fruit of Dao's Rule, then Narcissus would be able to leverage it to attempt the Spirit Transformation.

Chen Mobai had received considerable care from her in the Hall of Orthodox Law, and having recently acquired numerous Rank-4 insect beast corpses from her, he naturally agreed without hesitation, indicating that the Weapon Dancing Sect would fully support her.

After all, their Nascent Souls within the Weapon Dancing Sect were not compatible with the attributes of the divine crystallizations of the three Dragon Gods.

"According to our previous speculation, the divine nature of the Celestial Dragon God should be related to Wind Thunder, the Earth Dragon God with Earth attributes, and the Sea Dragon God with Water attributes. If Narcissus wants to compete for the Sea Dragon God's divine crystallization, the real challenge lies within the Kunpeng Lineage itself."

After the conversation between Chen Mobai and Narcissus, Master Chengxuan expressed his view.

"With the Spiritual Venerable backing Narcissus, would Beiming Master really be willing to compete with her?"

After hearing this, Chen Mobai asked in doubt.

The upper levels of Xianmen were aware that the Spiritual Venerable had long wanted to leave the Earth Element Star, merely waiting for a new Spirit Transformation in the Sea Territory. With such a promising opportunity now, he certainly would fully support Narcissus.

And Kunpeng Daoist Institute had maintained its leading position among the four greats, largely because of the backing of the Spiritual Venerable. Given these circumstances, Chen Mobai didn't think Beiming Master and the others would act unwisely.

"Both Narcissus and Beiming are disciples of the Spiritual Venerable. As long as Beiming is willing to achieve Spirit Transformation and oversee the Sea Territory, the Spiritual Venerable will likely consider it. But when all is said and done, Narcissus has a higher likelihood, especially with our support, which essentially guarantees her success."

"Another reason is that Qi Yuheng is most likely to obtain the Heaven and Earth Placenta. If he is given the largest share, the Kunpeng Lineage certainly cannot claim anything else."

"Although Narcissus is also considered part of the Kunpeng Lineage, compared to Beiming Master, our other three lineages would definitely prefer for her to obtain it."

While speaking, Master Chengxuan handed over the completed Eight Scenic Lantern base to Chen Mobai, who immediately expressed his gratitude.

"Given this, there are still two pieces of divine crystallization. Principal, what do you think should be done?"

Although Chen Mobai already had a rough idea, he still wanted to hear the opinion of his elder.

"If they are indeed as we speculate, then within Xianmen, the Celestial Dragon God's divine crystallization is most suitable for Yunhai, and the Earth Dragon God fits Yuan Xu, Gongye Zhixu, and Ying Guanghua. However, the spiritual energy within Xianmen is limited; if Qi Yuheng and Narcissus achieve their desired outcomes, then the remaining divine crystallizations are likely to be sealed."

"Moreover, despite their resemblance to the Fruit of Dao's Rule, whether these divine crystallizations can actually enable a cultivator to transform remains unknown."

"After all, even with the Fruit of Dao's Rule, those who managed to cultivate their Primordial Spirit within Xianmen over thousands of years can be counted on one's fingers."

“We need not worry about this matter; we can simply await developments. In any case, now that the White Light Ancestor has exited seclusion, we’re guaranteed to have our share!”

Master Chengxuan spoke with confidence, and Chen Mobai’s thoughts were quite similar. However, he remembered another matter.

“Previously, I heard the Hall Master of Narcissus say she came to the land because the Spiritual Venerable indicated there was an opportunity for her Spirit Transformation here. And now, she indeed obtained the Sea Dragon God’s divine nature. Do you think this is a coincidence, or has the Spiritual Venerable long foreseen this Dragon God Star?”

The portal showed anomalies more than a hundred years ago, and Narcissus had enrolled in Kunpeng Daoist Institute even earlier. Calculating this, the power of the Spiritual Venerable is truly formidable.

“There’s a rumor saying that the Spiritual Venerable could practice Cultivating Void long ago, but restricted its true body due to insufficient spiritual energy on Earth Element Star. If it were to practice Cultivating Void, it would drain all nature’s spiritual energy, so its actual power is the foremost within Xianmen.”

Master Chengxuan disclosed a secret, and upon hearing it, Chen Mobai couldn’t help but feel a sense of enlightenment.

However, upon further contemplation, the Spiritual Venerable had witnessed the founding of Xianmen, living for over six thousand years; with such a lengthy period, it’s about time for breakthroughs.

“What is the origin of the Spiritual Venerable, that it could persist for so long?”

Chen Mobai wondered aloud, noting that the Spiritual Venerable accompanied the Five Ancestors of Xianmen to Earth Element Star; at that time, it was already at Spirit Transformation Stage, making it at least seven or eight thousand years old.

“That I do not know, but White Light Ancestor surely knows. If you have the chance, ask her, she’d certainly tell you.”

Master Chengxuan shook his head, then suggested a method to Chen Mobai, clearly indicating his curiosity about the Spiritual Venerable's origin.

"You jest, Principal; you surely have more influence with the Ancestor than I do."

Hearing Chen Mobai's words, Master Chengxuan smiled but said nothing further.

Chapter 1905: Spiritual Venerable (Part 2)

The two of them then discussed the blueprint of the Douluo Eight Scenic Lantern further.

This magic artifact consisted of four parts: the lamp holder, the lamp base, the lamp cover, and the lamp wick.

Among them, the lamp holder required a material called the Nine Yang True Fire Stone, the base was made of Purple-Gold Fire Copper, the cover was a spiritual object known as Blazing Heaven Crystal, and the wick was extracted and woven from a fire attribute spiritual wood.

According to the original blueprint, these were all Rank-5 materials, but Rank-6 would be better.

However, even Chen Mobai, with resources from two realms at his disposal, couldn't gather Rank-6 materials, so the blueprint of this magic artifact had always been set aside.

Ancestor Qian Xing also helped him improve it, allowing a simplified version to be refined using Rank-4 materials.

But Chen Mobai already had too many magic artifacts, so he wasn't interested in collecting materials for even a mere Rank-4 Douluo Eight Scenic Lantern.

Of the four parts of the Douluo Eight Scenic Lantern, the lamp base made of Purple-Gold Fire Copper had already been refined, and the wick could be extracted and condensed from the wood filaments of the Fifth Rank Vermillion Fruit Tree.

However, the wick was a consumable, and even with Chen Mobai's status in the Immortal Sect, he could probably only gather enough material from one Fifth Rank Vermillion Fruit Tree to refine a single wick.

He still needed to find a way in the Tianhe Realm, as the Sun God Tree in Golden Crow Immortal City was quite promising.

But the remaining Fifth Rank Nine Yang True Fire Stone and Blazing Heaven Crystal were things the Immortal Sect did not possess.

The Nine Yang True Fire Stone was formed from the supreme yang forces between heaven and earth. The spiritual energy on the Immortal Sect's side had long been controlled, and the solar essence of the supreme yang forces was completely intercepted by the heavenly curtain, making it impossible for the Nine Yang True Fire Stone to form naturally.

However, there were still a few Rank-4 pieces on display in the museum on the Immortal Sect's side, and Chen Mobai could use one if he ever reached Divinity Transformation.

The Blazing Heaven Crystal was a naturally formed crystal capable of amplifying the power of flames several times over, with Rank-5 even reaching ten times. The highest level discovered by the Immortal Sect was Rank-3.

"If you want to use a Fifth Rank Vermillion Fruit Tree, you'll need the approval of the Three Great Halls or the two elders. I'll write an application to Ancestor Bai Guang regarding this matter; after the elder agrees, I'll help you make the lamp wick."

Master Cheng Xuan's words filled Chen Mobai with gratitude and he felt fortunate to be part of the Weapon Dancing Sect; otherwise, this matter surely wouldn't have been so easy.

Time flew by quickly.

Three years passed in the blink of an eye.

Under the absolute power of the Immortal Sect, although the Master of Divine Control relied on the mysteriousness of forbidden techniques to become the leader of the underground insect beasts, he still could not withstand the overwhelming force.

But now the only purpose of the Ascension Sect was to stall.

They intended to delay for as long as possible.

Their true forms had long since departed, and what remained were merely incarnations that had seized bodies.

The only true form remaining was Lin Daoming.

In fact, originally Yan Xinji also persuaded him to leave, but Lin Daoming considered that the Dragon God Star might be his only opportunity for Divinity Transformation, coupled with his confidence in his Spiritual Pivot of All Phenomena, decided to stay until the Earth Network Great Formation completely covered the Dragon God Star, to condense the Fetal Transformation Essence as much as possible.

The Spiritual Pivot of All Phenomena did not fail him, for it was a heavenly divine skill gained from his enlightenment path core formation, and after occupying an underground spiritual cave, it seemed to be born from nature, completely unnoticed by the Immortal Sect's array masters.

On this day.

Chen Mobai took a rare leave and returned to the Immortal Sect because his daughter was going to form her core.

These years, he had been leading tens of thousands of array masters in the Immortal Sect, tirelessly constructing the Earth Network Great Formation, without daring to rest for a moment.

After all, the two elders were watching over them from the Lingxiao Palace above, so the Nascent Soul cultivators from the Immortal Sect on the Dragon God Star, even if there was nothing to do, had to find things to do to prove they weren't idle.

In the void of outer space, Lingxiao Palace.

Yu Baiguang calculated the time, awakened from seclusion, and with a snap of his sword finger, sliced open a stretch of void.

In this void, Qian Xing was conducting research on a piece of the Matriarch's corpse, and upon seeing Yu Baiguang enter directly, he was surprised: "Junior Sister, have you comprehended it so quickly?"

Yu Baiguang, having made advanced progress with her cultivation since emerging from her reducing seeking emptiness seclusion, was already at the Perfection of Spirit Transmutation, ready to step into Cultivating Void anytime.

After slaying the Matriarch this time, her mastery of her sword dao had also improved markedly.

So Qian Xing assumed she was going to attempt Cultivating Void.

"Still a little more to go, but it won't be long."

Yu Baiguang shook her head. Though her line of comprehension was unprecedentedly sparse, she still lacked a spark to reach Cultivating Void.

"I have to return to the Immortal Sect for something, I'll leave this to you," Yu Baiguang explained the reason for her awakening today.

Qian Xing looked puzzled but soon realized the reason and pretended not to know, expressing that with him there, she could go as long as she needed.

On the Dragon God Star, Elder Qing Ping, working with Yuan Xu and the others on researching the Secret of Immortality in the Tri-God Domain, suddenly received a call.

It was from Yu Huiping.

He immediately guessed the reason, greeted Yuan Xu, found a secluded place, and answered the call: "True Person Yu, what is it?"

Yu Huiping: "Venerable Elder, it's like this, my younger relative who practices Five Elements Cultivation is planning to form a core after exchanging for a Golden Liquid Jade Pill today. Your expertise in Five Elements Cultivation is unparalleled in the Immortal Sect; I would like to know if you could come over and give a lecture before she commences her core formation?"

Although Yu Huiping's tone was very polite, Elder Qing Ping agreed without the slightest hesitation.

Chapter 1906: Spiritual Venerable\_3

Because he knows who to teach!

The daughter of White Light Ancestor and Pure Yang Master!

Probably even if Ancestor Qian Xing received the invitation, he wouldn't dare to refuse.

[I'll arrange my matters, please ask Miss Chen to wait for me a moment.]

Elder Qingping finished speaking and returned to the Divine Domain to request leave from Yuan Xu.

"Leave? It's not about stopping you, it's just that the more you invest now, the stronger your position will be when applying for Divinity Transformation resources before the two Ancestors in the future. Resting shouldn't be necessary in these years..."

Yuan Xu didn't quite understand, having witnessed Elder Qingping's realm breakthrough a few years ago, where Ancestor Qian Xing assessed his alignment with the Rules, discovering it to be exceedingly high, exceeding 50%!

This signifies that Elder Qingping has been a law-abiding good citizen since childhood, never violating any of the rules of the Immortal Gate.

In the future, if Qian Xing leaves, Patching Heaven Lineage might need him to refine the Fruit of Dao's Rule to hold the fort.

However, because Elder Qingping had been slacking off for several centuries, his merits within the Immortal Gate were almost non-existent. Thus, Yuan Xu intended to give him more credit during the upcoming war, whether through filtering elemental crystals, searching for the Divine Domain, or even the current research of the Secret of Immortality, all involving him.

And in such a circumstance, Elder Qingping actually requested leave, leaving Yuan Xu feeling somewhat displeased with him.

"I'm rather helpless with this matter, as it involves White Light Ancestor..."

Elder Qingping had no choice but to reveal Chen Xiaohei's upcoming Core Formation event, which Yuan Xu, Mei Hua, Nangong Xuanyu, and others immediately understood his predicament upon hearing.

"Since it's the Ancestor's daughter, you better go quickly, don't delay—a wait is what the Ancestor loathes most."

Yuan Xu's tone softened, personally writing a note for Elder Qingping.

...

Five Peaks Immortal Mountains, Wangxian Peak!

Chen Xiaohei chose this place as her Jiedan Spirit Land after receiving the Golden Liquid Jade Pill.

Initially, Chen Mobai felt it might be inappropriate to go after White Light Ancestor emerged from seclusion, but Yu Huiping proactively invited them, saying the Ancestor was very fond of Xiao Hei.

Chen Mobai thought, since the Ancestor even gave the Mystic Finger Sword, using her treasured ground for a Core Formation shouldn't be an issue.

However, even so, he took leave and specially booked a suite at the Welcoming Immortals Hotel in the Five Peaks Immortal Mountains, staying there with Shi Wanyu, waiting at the mountain's base for their daughter to form her core.

"Will our daughter succeed? She surely will..."

Shi Wanyu was concerned and stressed, watching daily from the window toward the Gathering-Immortals Peak, observing the congregation of nature's spiritual energy during the core formation, with clouds and mist colorfully swirling, making her restless.

"Don't worry, she's cultivating the most balanced Five Elements Cultivation, her foundation has been firm, and with the Golden Liquid Jade Pill, failure is impossible."

Chen Mobai was filled with confidence in their daughter, believing the Core Formation stage would present at most three tribulations.

And within the Immortal Gate, there were neither Heavenly nor Mortal Tribulations; as long as Chen Xiaohei's foundation was solid, with the Magic Artifact guarding her Sea of Knowledge at the Purple Mansion and suppressing her Heart Demon, he couldn't foresee any situation causing her failure.

"That's good, that's good..."

Shi Wanyu slightly relaxed upon hearing this, sitting quietly for a while, yet her gaze persistently fixed on the Gathering-Immortals Peak.

On Gathering-Immortals Peak.

Elder Qingping and Yu Huiping stood together in front of the wooden house where Chen Xiaohei was forming her core. The former applied unprecedented diligence to controlling the flow of Five Element Spiritual Energy atop the mountain, sensing the core formation within.

Upon arrival, although Yu Huiping said nothing, Elder Qingping sensed the profound, ocean-like Sword Intent within the grand hall.

He immediately realized White Light Ancestor had personally returned as well.

Instantly, he became extraordinarily attentive, recalling his process of forming the core with Five Elements Cultivation ten times, using his centuries of teaching experience to break down and impart the knowledge to Chen Xiaohei.

Chen Xiaohei, though confident, wasn't arrogant, gratefully absorbing Elder Qingping's guidance with diligent study.

Once any doubts regarding the Five Elements Core Formation process were cleared, Chen Xiaohei consumed the Golden Liquid Jade Pill.

However, Elder Qingping remained on guard, fearing this young miss might fail in her Core Formation; needless to say, all the blame would certainly fall on him. Thus, from the start of Chen Xiaohei's Core Formation, he stayed outside, constantly monitoring the flow and aggregation of the Five Element Spiritual Energy to intervene if any unexpected situation arose.

Evidently, his actions pleased the hidden White Light Ancestor in the grand hall; the former watchful gaze softened as the signs of Core Formation grew stronger.

Chen Xiaohei's foundation was incredibly robust; within just three months, she smoothly succeeded in forming her core.

"Yu Zhenren, the next step is to stabilize the realm; I've already shared my insights with Miss Chen. I have some matters on Dragon God Star, so I'll take my leave now."

Once the Five Element Spiritual Energy calmed on Gathering-Immortals Peak, confirming Chen Xiaohei's perfect core formation, Elder Qingping wiped the sweat off his forehead and bid farewell to Yu Huiping.

"Elder, you've worked hard; this is just a small token of appreciation from me."

Yu Huiping offered a wooden box to Elder Qingping, who dared not accept it and resolutely declined, directly leaving down the mountain.

"This younger generation is quite good, very obedient."

Chapter 1907: Spiritual Venerable\_4

After Elder Qingping left, Yu Baiguang came out and spoke to Yu Huiping.

"Indeed, the Lingxiao Jade Pendant on Xiao Hei is still from their Primordial Elemental Academy. Without this treasure, it would have been hard for her to endure adulthood."

Yu Huiping also had a very good impression of Elder Qingping, praising him endlessly.

"Oh, to be able to lend the Lifespan Artifact of Taiyuan True Monarch to my daughter, this person is truly generous."

Yu Baiguang, after hearing this, admired him even more. She recalled a scene in the memories of her reincarnated body, where Elder Qingping was invited over for a meal; back then, he was courteous even to her, who was just at Qi Cultivation stage.

"I told him that Xiao Hei is the daughter of your reincarnated body, so he agreed to lend it..."

Yu Huiping said truthfully, a bit embarrassed. Upon hearing this, Yu Baiguang's face turned red, looking in the direction where Elder Qingping disappeared, barely suppressing her urge to draw her sword.

"Why didn't you tell me earlier?"

Yu Baiguang gritted her teeth and shouted at Yu Huiping. She was very relieved she hadn't shown up; otherwise, she would have been too ashamed to lift her head.

"Didn't I say before that a few upper echelons of the Immortal Gate know about it?" Yu Huiping looked aggrieved.

"You only mentioned the title of the Three Extremes!" Yu Baiguang began to argue semantics.

As a disciple, Yu Huiping had no choice but to lower her head, acknowledging it was her mistake.

"Besides these two, does anyone else know?" Yu Baiguang continued to ask.

"No, just those two. One is to help nurse Xiao Hei's body, and the other to teach her Five Elements Cultivation to lay the foundation; more than that, there's only Qian Xing Ancestor left, and I'm not sure if he would tell the Patching Heaven people." In order to heal Xiao Hei, Yu Huiping only sought help from the Three Extremes and the two Nascent Soul Superiors, Qingping.

"That's good. Senior Brother Qian Xing is not one to gossip. I just worry about his disciple keeping his mouth shut..." Yu Baiguang sighed with relief but soon thought of Chen Chun, squinting her eyes, teleporting to the neighboring Gathering-Immortals Peak.

"Greetings, White Light Ancestor!"

Seeing Yu Baiguang suddenly appear before her, Chen Chun immediately gave a grand salute.

"Have you told anyone else about my matters?"

Yu Baiguang spoke coldly, with a piercing gaze.

"I can swear, I have not mentioned the matter of the Ancestor's reincarnated body to anyone."

Chen Chun knew this was a matter of life and death and did not dare to have any different thoughts, immediately preparing to swear to prove her innocence.

But White Light had no desire to get involved further and stopped her directly.

“Hmph, considering you are my brother’s disciple, I’ll let this matter go. But if I find out you leaked this, not even my brother can save you.”

After saying this, Yu Baiguang was very relieved to know that the people who knew about it were countable on one hand.

She imagined these few people wouldn’t dare to spread her private matters.

Thinking of this, she left Gathering-Immortals Peak at ease.

Chen Chun watched her disappear and felt wronged, thinking she only followed Yu Baiguang’s reincarnated body’s advice, without her own thoughts involved.

But Chen Chun knew that if she dared to argue like this, she would be met with a sword strike!

[Back when the Heavenly Guidance led me to meet, was it White Light Ancestor, or Pure Yang Superior?]

At this moment, Chen Chun began to doubt her Dao Heart.

At first, the one she met was Chen Mobai, thinking it was due to her incomplete cultivation.

Now, it seems he might have been the destined one, yet she carried her preconceived ideas, insisting it was White Light Ancestor’s reincarnated body, leading to the series of events that followed.

Because of this, Chen Chun’s cultivation had regressed instead of progressing over the years, even developing a Heart Demon.

...

The news of Chen Xiaohei successfully forming her core was shared by Yu Huiping that evening with Chen Mobai and Shi Wanyu at the Welcoming Immortals Hotel.

“Thank you, Yu True Person!”

Guided by Yu Huiping, Chen Mobai and Shi Wanyu ascended Wangxian Peak, sensing the aura of Xiao Hei’s successful Core Formation from within the room, expressing immense gratitude to Yu Huiping.

“It’s all because Xiao Hei is outstanding herself.”

Yu Huiping said with a happy smile, inviting the couple to stay for dinner.

“I heard there are still many things to handle at Dragon God Star. As one of the Main Generals on the front line, Pure Yang Master must be very busy, why not let Lady Chen stay here, so when Xiao Hei exits seclusion, she will be very happy.”

Stabilizing the realm after Core Formation required considerable time, so Yu Huiping suggested this idea.

“I worry about disturbing the Ancestor’s place of cultivation.”

Chen Mobai bowed with clasped hands towards White Light Ancestor’s hall not far away, but Yu Huiping shook her head repeatedly, indicating the Ancestor wouldn’t mind, even if she were present.

“Then I will trouble you with our daughter!”

Before Chen Mobai left, he spoke to Shi Wanyu, who nodded gently, assuring she would take good care of their daughter.

Watching such a happy scene, Yu Baiguang, hidden within the hall, felt a slight pang of emotion, thinking to herself that she was fortunate to find such a strong yet gentle husband, probably the only one in the whole Immortal Gate, feeling exceptionally lucky.

After Chen Mobai left, he quickly returned to Dragon God Star through the Portal, diligently setting up the Earth Network Great Formation.

Meanwhile, Yu Baiguang arrived at Lingxiao Palace shortly after.

However, this time, she sensed an overwhelming aura akin to the Nine Heavens Gang Wind.

A tall, golden-haired, golden-eyed female cultivator in a golden long dress stood in front of Lingxiao Palace, accompanied respectfully by Qian Xing.

“Greetings, Spiritual Venerable!”

Yu Baiguang naturally recognized this golden-haired female cultivator as one of the Primordial Spirits of Spiritual Venerable and immediately stepped forward to salute.

“It’s been years, Little Baiguang hasn’t disappointed me indeed, her cultivation is no less than mine now.”

Spiritual Venerable gave a gentle smile upon seeing her. Always held in high esteem, Yu Baiguang nodded modestly, a rare moment of humility.

“I’m approaching the threshold of Cultivating Void, but compared to Senior, I’m still far behind.”

Through the ages, the Immortal Gate knew that besides having an Undying Body at its peak, Spiritual Venerable had cultivated both Huge Kun and Heavenly Peng Primordial Spirits, the undisputed strongest in the Immortal Gate.

"In a decade or so, Dragon God Star will be nearly depleted. When the planet extinguishes, the Power of Void released can activate the Portal for a single Starry Sky Great Shift. I intend to use this opportunity to depart, would you two like to join?"

Spiritual Venerable explained the reason for her visit, which Qian Xing already knew.

Yu Baiguang displayed a hesitant expression upon hearing this.

The Starry Sky Great Shift through the Portal allows cultivators to traverse the vast starry sky in an instant. The Five Ancestors of Xianmen initially arrived here by harnessing the limitless Power of Void unleashed when their arena was annihilated.

Although Dragon God Star can't compare to an arena's destruction, it is substantial enough to allow them to cross a hundred distances akin to the Tianyang Star System through the Portal.

This could significantly save time and possibly lead to a more spiritually enriched arena, stepping into Cultivating Void.

Yu Baiguang: "This is a once-in-a-lifetime opportunity; I certainly won't miss it."

Ultimately, the pursuit of higher realms overwhelmed everything else.

Chapter 1908: Dividing the Spoils

"When the time comes for the three of us to leave together, let's first clear out those people from the Antiquity Daoist System. Although they are just some despicable vermin, if anyone manages to break through to Divinity Transformation, it won't be good for the Immortal Gate."

After making the decision, Yu Baiguang also started arranging matters before leaving.

"There's no hurry for that. After all, there's still more than a decade left. As long as another two manage Divinity Transformation, the grand scheme of the Immortal Gate remains stable. Besides, I haven't decided whether to go with you or not."

The speaker was Qian Xing, whose cultivation level hadn't yet reached the Perfection of Spirit Transmutation. Using The Divine Machine Mansion's secret techniques to calculate destiny, he found that leaving Earth Element Star in pursuit of a higher realm had less than a ten percent chance of success.

Whereas staying in the Immortal Gate gave a two to three percent chance of success.

Although Qian Xing didn't understand why, it didn't stop him from pondering it deeply.

After all, no historical Divinity Transformation who left the Immortal Gate of Earth Element Star succeeded.

Though this time they possessed Starry Sky Great Shift and a Spiritual Venerable escort, with a high probability of finding an arena abundant with spiritual energy deep in the Star River, Qian Xing had always relied on thorough planning before taking action to cultivate to his current realm.

The Guidance Book, The Divine Machine Mansion's heritage, and the countless knowledge of the Immortal Gate had brought him this far. So, when past success experiences conflicted with the best opportunity to leave, Qian Xing was somewhat torn.

"Alright, consider it carefully. However, if I and the Spiritual Venerable leave, the Immortal Gate must begin cultivating new Divinity Transformations!"

Yu Baiguang, hearing Qian Xing's indecision, actually hoped he could stay. After all, if he held the fort, the Immortal Gate would remain stable, providing a better environment and time for her reincarnated body's husband and daughter to grow.

"There are basically only a few candidates, but a formal process is necessary."

Qian Xing spoke indifferently. Among the next generation of the Immortal Gate, Qi Yuheng was exceptionally gifted. Although he followed the path of using the body as a realm, if he could refine the Heaven and Earth Placenta, reaching Divinity Transformation or even the Law Domain was possible.

As for the rest, with the Spiritual Venerable leaving, as the guardian deity that protected the Immortal Gate for thousands of years, it was certain it would appoint a new Divinity Transformation for the Sea Territory. From the perspective of balance, Narcissus was the most suitable.

"How does Senior Brother intend to handle the Matriarch's two inner cores?"

However, Yu Baiguang wasn't interested in the new Divinity Transformation. She only wanted to leave enough money for her reincarnated body's husband and daughter before departing, so she asked about the most useful thing to Chen Mobai from this development war.

"I'll use the inner core with Metal Attribute as raw material, along with the Sixth Rank Star Gold refined from the Matriarch's flesh, to make a Sixth Rank Heavenly Calculation Bead."

Qian Xing, though he often accommodated Yu Baiguang, was unyielding regarding his path and directly reserved the materials.

"You know, I have a successor in the Dance Tool Dao Academy with Qualification of Deification, practicing the Pure Yang Scroll. That Fire Attribute inner core suits him perfectly. I won't take anything else. I'll take this war trophy on his behalf. What do you think?"

Since the Spiritual Venerable was present, Yu Baiguang tactfully used a junior as an excuse, but she was sure Qian Xing understood her hint.

"Since Junior Sister has said it, I have no objection!"

At the Immortal Gate, a Divinity Transformation ancestor is an absolute supreme. If the Spiritual Venerable hadn't secured an Earth and Heaven Placenta from a Different World in some past development war, such Sixth Rank resources wouldn't have gone to Qi Yuheng.

With the Spiritual Venerable not competing, the Dragon God Star's spoils were decided by Baiguang and Qian Xing.

"And what about the Star Core? We need it to replenish spiritual energy on the journey, but you'd be at a disadvantage if you don't come with us. What are your thoughts?"

This time, the Spiritual Venerable spoke to Qian Xing.

The Star Core contains the source spiritual energy of a world. Though its attribute doesn't suit her or Baiguang, it could be transformed and placed on magic artifacts traversing the stars, reducing their spiritual energy consumption.

For this reason, if the Spiritual Venerable departs this time, the Star Core will certainly be taken.

"Then give me the Matriarch's corpse."

Qian Xing made only this request, as nothing on Dragon God Star or even Earth Element Star much moved him.

"Agreed!"

Both Yu Baiguang and the Spiritual Venerable had no objection, though if Qian Xing accompanied them, the Matriarch's corpse might remain, leaving the Immortal Gate to study the secrets of the Undying Body.

Perhaps centuries or millennia later, someone brilliant in the Immortal Gate would glean a new path to divine and demon immortality from it.

"Besides the Sea Dragon God, there are two other Divine Crystallizations. I have examined them; they are indeed similar to the Fruit of Dao's Rule. But without the Star Core origin of Dragon God Star, they won't recover, meaning they are for one-time refining use only."

Qian Xing spoke of three other spoils from this different world.

The Divine Crystallizations of the three Sea Dragon Gods were born relying on this world's source of heaven and earth.

If the Dragon God Star vanished or was destroyed, even meticulously preserved, they would be like rootless trees, water without a source.

"These gains are already excellent; let future generations find their own ways with what's left."

Chapter 1909: Treasure Division (Part 2)

Yu Baiguang said this: she owes her achievements today entirely to her own diligent cultivation, so she doesn't think much of those who need to rely on external objects to achieve Divinity Transformation.

"I wonder if the Spiritual Venerable favors the Narcissus Hall Master or the Beiming Master?"

Qian Xing turned his head and asked the Spiritual Venerable this question.

"You all can decide on this matter. I only need a new Divinity Transformation to replace me in guarding the Sea Territory!"

The Spiritual Venerable shook his head. It has always disliked interfering in such matters and did not get involved in this war either; it is not appropriate to participate in the allocation.

The three of them then made another trip to the Star Core of the Dragon God Star.

"The mission that has continued for thousands of years is still ongoing. Who knows when it will end!"

The Spiritual Venerable's gaze seemed to see through the surface of the Star Core, seeing the Demonic Qi hidden deep within. It thought of the words once spoken to it by Long Wei the Ancestor and couldn't help but sigh.

The Immortal Dao of gods and demons beyond the Immortal True Spirit realm, with a Realm equivalent to Pure Yang, is named "Star Sacrificing God"!

This Realm requires the True Spirit consciousness to divide into billions, resting upon billions of stars. After eons of cultivation, all stars entrusted with the True Spirit consciousness are condensed into one.

At this stage, the entire Star River becomes its expression, breathing and exhaling can trigger annihilating catastrophes; with a single thought, one can perceive all phenomena of the world, infinite truths, or even reshape the Universe!

And the great catastrophe in the Central Dojo of the Purple Cloud Star River back then was caused by the birth of a Demon Lord of the Star Sacrificing God Realm!

The Five Ancestors of Xianmen were ordered to come to the Earth Element Star because of this.

The Earth Element Star is one of the billions of stars upon which the Demon Lord's True Spirit consciousness is entrusted. Their arena was destroyed because of this Demon Lord. Upon learning the truth, they chose to come here to purify the Demon Lord's Demonic Thought.

And the most useful method of purification is to sow Dao Law.

Although the situation at the Central Dojo of the Purple Cloud Star River is unknown, seeing how Xianmen has been able to purify the Demonic Thought with Dao Law for thousands of years without hindrance, it shows that the Demon Lord surely cannot divert any effort elsewhere.

Besides purifying and suppressing the Demonic Thought of the Earth Element Star, the Five Ancestors of Xianmen have another mission, which is to use the Demonic Thought in the Star Core as a reference and utilize the Magic Artifact obtained from the Central Dojo to continuously draw in more stars entrusted by the Demon Lord, gathering them one by one toward Xianmen.

This is the origin of the war!

Both the Three Eyed Tribe and Ming Wang Star are Different Worlds completely corrupted by Demonic Thought, and the battles between Xianmen and these worlds grow increasingly fierce.

The Demonic Thought deep in the Star Core is mutually attracting, attempting to reorganize!

And the Five Ancestors of Xianmen were tasked by the Central Dojo to stop all of this.

Of course, this isn't unpaid labor; there is compensation. Each time a star entrusted by Demonic Thought is purified and destroyed, one can collect a Dao Merit at the Central Dojo.

Dao Merits can be exchanged for Exotic Treasures from across the Purple Cloud Galaxy, even the supreme secret manuals recording the mysteries of Cultivating Void and Harmonization. Each of the Seven Great Heavenly Books brought by the Five Ancestors of Xianmen is worth one Dao Merit.

For thousands of years, the reason Xianmen's Divinity Transformations have left the Earth Element Star is to return to the Central Dojo of the Purple Cloud Galaxy, report this mission, and gain their own Dao Merits.

This is also something passed down orally by each generation of Divinity Transformations in Xianmen.

If there is an interruption in Divinity Transformation, it is the Spiritual Venerable's responsibility to educate the newcomers.

However, the Spiritual Venerable is also aging and knows if it doesn't return soon, in a few thousand years, it will turn into a skeleton. So, when it sensed the unusual movement of the Demonic Thought in the Earth Element Star Core, it decided to take this opportunity, through the opening of the war, to leave here and return to its homeland.

It hopes that this millennia-long mission can be brought to an end in its hands.

After viewing the Star Core of the Dragon God Star, the Spiritual Venerable returned to Xianmen to awaken its slumbering True Body, which will take some time.

And Qian Xing and Bai Guang didn't enter seclusion again but directly issued a decree, summoning all the Nascent Souls to the Lingxiao Palace.

Not just those from the Dragon God Star, even those guarding the Earth Element Star received the decree.

Chen Mobai, along with Master Chengxuan and Wenren Xuewei, arrived at the Lingxiao Palace first.

They found out they were the fastest.

The Dual Sages of the Immortal Gate were already seated in front of the Lingxiao Palace, a large round table placed in front of them, Qian Xing and Bai Guang each sitting at one end.

After Chen Mobai saluted the two, he naturally sat on Bai Guang's side.

"Principal, you are the senior, you should sit in the first position..."

Arriving before Bai Guang, Chen Mobai pointed to a row of seats on her left, suggesting Master Chengxuan sit in the first position. The latter immediately declined repeatedly, stating it's the young people's world now, and he, being old, should retire to the second position.

Chen Mobai has always respected the elderly and loved the young, so while the two were stepping back and forth, Yu Baiguang, who had changed to a pure white veil, became impatient and pointed to her left and right.

"You two sit here!"

At her words, both Chen Mobai and Chengxuan promptly complied, sitting to Bai Guang's left and right.

Wenren Xuewei hesitated, then considering her lowest seniority, sat in the fourth position.

Not long after, a few Nascent Souls from the Patching Heaven Lineage arrived; it seemed they were waiting for Ying Guanghua and thus delayed a bit.

## Chapter 1910: Treasure Distribution (Part 3)

After Ying Guanghua arrived, he first brought people over to greet Yu Baiguang and did not forget to nod in greeting to Chen Mobai and the others.

Chen Mobai noticed that White Light Ancestor seemed to glance at Elder Qingping a bit longer, causing the latter to feel somewhat uneasy.

It was only after sitting down near Ancestor Qian Xing that Elder Qingping's complexion returned to normal.

Soon after, the Kunpeng Lineage, led by Qi Yuheng, shimmered into appearance before everyone.

After paying respects to Yu Baiguang and Qian Xing in succession, they took their seats at the central position of the conference table.

Thereafter, Three Extremes Sage, Peach Blossom Sage, and Yuxiao Sage arrived together, naturally sitting beside Bai Guang's group.

Three Extremes Sage and Peach Blossom Sage sat between Chen Mobai and Wenren Xuewei. It was uncertain if it was an illusion, but Chen Mobai felt that the White Light Ancestor also glanced at Three Extremes Sage a few times, making the latter appear somewhat uneasy.

"We're still missing Yu Yi..."

At this moment, Wenren Xuewei realized someone was missing and thought of a possibility. She immediately reminded Chen Mobai.

Back when refining the Rank-5 Water Spirit Talisman, the three of them had formed a bond of friendship, so it was naturally time to help out.

"Ancestor, did your talisman summons not reach Yu Yi?"

After checking the messages on his phone under the table, Chen Mobai had no choice but to brace himself and ask the White Light Ancestor beside them.

“She’s not one of ours, so I didn’t call her, but the senior brother should have reached out.”

Yu Baiguang addressed the situation candidly, which left Chen Mobai with a wry smile.

Yu Yi was over on Dragon God Star, yet hadn’t arrived, clearly implying she had not received word of the Divinity Transformation summons.

“Ancestor, shall I notify her?”

Chen Mobai dared not suggest Yu Baiguang was wrong, so he went over to Ancestor Qian Xing to confirm he hadn’t called Yu Yi, then returned and politely asked.

“Go ahead, call her.”

Yu Baiguang nodded directly, allowing Chen Mobai to breathe a sigh of relief and immediately make a call to Yu Yi.

As soon as Yu Yi received the call and heard the situation, she hurriedly used Void Walking to teleport herself towards Lingxiao Palace.

Upon arrival, she appeared slightly pale, showing signs of True Qi and Divine Sense being excessively depleted.

Teleporting from Dragon God Star to the outer space void at full speed, even for a Nascent Soul cultivator like her, was exhausting.

“My apologies, elders, for arriving late...”

After arriving, Yu Yi dared not mention she hadn't received a leadership notice, only managing a smile as she apologized to the Double Saints of the Immortal Gate.

Qian Xing and Bai Guang nodded, whereupon Yu Yi glanced at the seating and immediately settled across from Wenren Xuewei, giving Chen Mobai a grateful look.

This scene, however, made Yu Baiguang's brows furrow slightly.

A perceptive Wenren Xuewei saw this and thought of reminding Yu Yi when there's an opportunity.

As everyone was present, Ying Guanghua stood up and announced the commencement of the high-level meeting of the Three Great Halls of the Immortal Gate.

As the Head of Immortal Affairs, Ying Guanghua was the host of this meeting.

He began by discussing the outcomes and losses of the recent campaign, establishing that the war, under the wise and courageous leadership of the Double Saints of the Immortal Gate, resulted in a grand victory.

"Alright, let's get to the point quickly, no more small talk!"

Having made Lan Haitian write a ten-page script, of which only three praised the two leaders, Yu Baiguang couldn't hold back anymore and interrupted.

"Yes, yes, I'll be brief..."

Ying Guanghua immediately smiled apologetically at Yu Baiguang and turned directly to the last page of the script, which listed the most precious spoils of the campaign.

Under a small magic artifact, various virtual items appeared on the long conference table.

There were inner cores from two matriarchs with metal and fire attributes, the matriarchs' corpses, Rank-5 Purple-Gold Fire Copper, Rank-6 Star Gold, crystalized divine natures of the three Dragon Gods, top-tier Earth Water Attribute elemental crystals, etc.

Items that couldn't be visualized were replaced with text descriptions, like the Heaven and Earth Placenta...

Seeing these items, even someone as wealthy as Chen Mobai, who owned the entire Eastern Wilderness, couldn't help but breathe a little faster.

"Given the hard work of the two ancestors, I propose that each should receive one inner core with fire and metal attributes."

After putting down the script, Ying Guanghua began casting the first stone, suggesting the initial distribution.

Although the distribution of these items required voting in this meeting, in reality, Qian Xing had already hinted at the allocations beforehand.

"I second!"

After Ying Guanghua spoke and sat down, Chen Mobai was the first to raise his hand in agreement.

The two, representing the will of the Double Saints of the Immortal Gate in everyone's eyes, prompted the other Nascent Souls to understand that this was the ancestors' intention.

Unanimous approval and raised hands followed, with no objection.

"In that case, I'll first list the allocation of these two items."

Seeing this, Ying Guanghua smiled, stood up, and operated the small magic artifact, writing the names of the Double Saints of the Immortal Gate above the two inner cores.

“You got it wrong, switch them!”

However, just after completing this, Yu Baiguang spoke with evident dissatisfaction.

“Huh?”

The crowd wore surprised expressions because everyone knew Yu Baiguang possessed a Heavenly Gold Spirit Root, which led Ying Guanghua to label her on the metal-attributed monster beast inner core and Qian Xing on the fire-attributed one.
