

## **World 1911**

Chapter 1911: Treasure Distribution (Part 4)

Now she says she wrote it backward!

So does she want the Fire Attribute?

Why!

Doesn't that conflict with her Spiritual Root?

Everyone was puzzled, then suddenly thought of something and turned their gaze uniformly to Chen Mobai beside her.

This Fire Attribute inner core is useless for impacting Divinity Transformation, but it can be used to refine the Primordial Yang Treasure Beads, as it possesses Innate Dao Rhythm and is of Rank-5 essence, and can eventually ascend to become a Second Primordial Spirit along with the rise of its master!

Moreover, if in the future Chen Mobai is stuck in the Nascent Soul Complete realm, he could possibly use this to acquire an incarnation of Divinity Transformation!

Realizing this, everyone suddenly understood.

Turns out it's meant for the Pure Yang Master!

No wonder she said she wrote it backward!

After realizing this, Ying Guanghua immediately apologized, expressing that he had made assumptions, and then quickly switched the names on the two inner cores.

[They must have thought I wanted to use this inner core to keep as the foundation for Dance Tool Dao Academy...]

Yu Baiguang thought to himself, then prepared to allocate two taels of Star Gold to Master Chengxuan. This Sixth Rank material was extracted from the Matriarch's Undying Body; although most was taken by Qian Xing, she did keep some for sword training, but there was still extra left.

This Star Gold can be refined into the Soulful Mirror.

After Yu Baiguang emerged from seclusion, he heard about Chengxuan retreating before the Divinity Transformation; although he despised such cowardly behavior, Chengxuan, as Nascent Soul of the Weapon Dancing Sect, had handled mundane affairs for centuries, allowing her to cultivate peacefully. Though he had no major accomplishments, he certainly worked hard, so she gave him this.

"Many thanks to the two Ancestors! And thanks to my colleagues for their recognition!"

Though he couldn't obtain the Heaven and Earth Placenta, which was a pity, the two taels of Star Gold was still enough to please Master Chengxuan. He stood up to thank everyone.

Chen Mobai was envious of this.

If he had the Sixth Rank Star Gold, he believed he could further enhance the Purple Electric Sword, possibly introducing another Fifth Rank Superior Grade supreme Flying Sword to the Immortal Gate!

However, considering that Master Chengxuan was more qualified than him and was also at the half-step Divinity Transformation realm, supported by the White Light Ancestor, he accepted this with humility.

Subsequently, the Matriarch's corpse, Three Extremes Sage divided a small portion of it, intending to research flesh regeneration. Yuan Xu and Beiming also took a piece, planning to place it in their Daoist Academy for their talented prodigies to study.

Chen Mobai seeing that the other three got theirs, his Dance Tool Dao Academy shouldn't miss out either, especially since it's excellent material for Artifact Refining, so he actively requested, and again it passed unanimously.

They received a chunk of flesh, a piece of Scale Armor, and a section of Dragon Horn.

The remaining parts were all taken by Qian Xing.

After allocation, the leftover Fifth Rank Purple-Gold Fire Copper, along with Supreme Grade Spirit Stone equivalent Elemental Crystals and other materials from the Sea Territory underground, didn't interest many.

But having something is better than none.

In terms of merit distribution, those who stayed behind at the Immortal Gate got less.

Nangong Xuanyu chose a piece of Fifth Rank Purple-Gold Fire Copper, as a Sword Cultivator, he would surely prioritize enhancing his Lifebound Flying Sword.

Meanwhile, Yunhai Master, Meihua Master, Yu Yi, and others chose Supreme Elemental Crystals, plus some Fifth Rank materials discovered from the Sea Territory underground.

Besides these, Ying Guanghua announced that the Immortal Gate Finance Department would distribute war compensation of one hundred Superior Grade Spirit Stones to each Nascent Soul Superior, and if desired, they could be exchanged for Supreme Grade Spirit Stones.

This brought joy to Yuxiao, Tao Hua, Ye Yune, as it would take them centuries to accumulate such vast wealth.

Indeed, war is lucrative!

Chen Mobai also felt quite happy about this.

With this, at least his future dealings for Spirit Stones at the Immortal Gate wouldn't require him to restrain himself.

Yet he must be cautious, lest spending too much leads to Spirit Stone inflation at the Immortal Gate.

"Now lastly, let's discuss the Heaven and Earth Placenta and the three Divine Crystals!"

Ying Guanghua knew this was the true focus of today's meeting, concluded his speech, glanced at the Heaven and Earth Placenta and Earth Dragon God's Divine Crystals, then sat down.

"Since becoming the Kaiyuan Hall Master, Hall Master Qi has dedicated each day with immense zeal and resilience to work. He never backs down from challenges and hardships, consistently demonstrating a spirit of dedication and service, seeing the preservation of Immortal Gate peace as his duty, safeguarding his post tirelessly through day and night, season after season... Therefore, I believe the Heaven and Earth Placenta rightfully belongs to Hall Master Qi!"

Ye Yune first spoke on behalf of Qi Yuheng, such matters often require someone to speak on behalf.

"If we are to speak this way, Hall Master Ying is no less deserving, I find him very fitting for this too!"

Gongye Zhixu simply said this one sentence to articulate his standpoint.

"That couldn't be more wrong; Ying Guanghua's wartime efforts go no further than sitting at the backline sipping tea and managing resources. His achievements and hardships fall far short of the frontliner who personally slew insect beasts—Hall Master Qi—it's my belief he's not deserving!"

The one who said this was Beiming Master, known among Nascent Soul Superiors for his sharp tongue and fearlessness; in the Immortal Gate, there were few people he found agreeable, and he loved nothing more than roasting others!

"What do you know, those skilled in war achieve victories without loud accolades. Without Hall Master Ying stabilizing the backlines and mobilizing the Immortal Gate's resources, you wouldn't even be able to activate the Four Symbols Dao Palace..."

Ying Guanghua's advocate spoke out, though Yuan Xu didn't enjoy it, but among those present, only he had the equal status to debate with Beiming Master.

Now it was purely about positions!

Seeing this, Chen Mobai was not willing to be left behind, expressing that Master Chengxuan had for years diligently cultivated the field of Artifact Refining, producing numerous outstanding Artifact Refiners for the Immortal Gate, and the Magic Artifacts on the battlefield relied on Artifact Refiners for maintenance to function, thus he nominated Master Chengxuan!

This was solely for joining in the commotion, however, as he sat beside the White Light Ancestor, Beiming Master reined in his impulse to roast him and decided instead to ignore him, choosing to target Yuan Xu and the Patching Heaven Lineage first.

"The best use of the Heaven and Earth Placenta is to enable our Immortal Gate to gain another Divinity Transformation; both of you are at Nascent Soul Complete and possess the possibility for Divinity Transformation. Nonetheless, determining superiority between cultivators is very straightforward."

Finally, it was Yu Baiguang who couldn't stand the bickering any longer, interrupted directly, stepping into the final decision.

That was to fight a duel!

Whoever wins will be the owner of the Heaven and Earth Placenta!

Though Ying Guanghua knew he couldn't match Qi Yuheng, in the face of such an opportunity, he had to try, but ultimately he was defeated.

Master Chengxuan simply smiled and chose to concede!

He acknowledged Qi Yuheng's combat prowess.

Upon hearing that a Magic Duel would decide the outcome, Chen Mobai felt tempted, but given his good relations with Qi Yuheng and owing him for the numerous corpses of Rank-4 insect beasts he'd gained from him, he decided not to intervene!

Finally, it came to the last item—three Dragon God’s Divine Crystals!

Although he didn’t directly participate on the battlefield this time, he ensured logistics support.

Originally, the Five Ancestors of Xianmen took on the task here to earn Dao Merits besides avenging, so without utilizing the local demonic thoughts, they baited external demonic thoughts from other planets for Destruction or Purification,

Chapter 1912: Bai Guang’s Explanation

Qian Xing spoke first, mentioning the Divine Natures of the three Dragon Gods, which unlike the Fruit of Dao’s Rule, could not be reused repeatedly.

“In addition to this, these Divine Crystallizations will also shackle cultivators, at most allowing them to cultivate into a Primordial Spirit.”

Upon hearing this, Chen Mobai instantly lost interest.

However, aside from him, the Nascent Soul cultivators of the Immortal Gate, whose attributes matched, wore serious expressions.

Regardless, this was a path to Divinity Transformation!

Within the Immortal Gate, besides the Fruit of Dao’s Rule, only the Shocking God Sonata can assist in transformation.

And these two are very hard to come by.

The Divine Crystallizations of the three Dragon Gods, no matter what, are at least among the heavenly rare treasures that can aid in transformation. Moreover, if successful, the lifespan at the Spirit

Transformation Stage would be enough for them to last until the next opening war, and perhaps, in the long years ahead, find a way to resolve it.

“I propose Hall Master Narcissus, who in the past decades, has led us in the Hall of Orthodox Law with wisdom and an attitude of following the nature of things, doing nothing rash. Although it seems she has done nothing on the surface, she has actually created a relaxed and orderly work environment, fully stimulating our enthusiasm and creativity, allowing various affairs to progress smoothly and naturally...”

Chen Mobai spoke first in support of his superior.

Although it was uncertain if Narcissus could transform through refining the Divine Crystallization, Chen Mobai understood that if she ascended further, it would all be beneficial to him.

Firstly, he would repay years of kindness, and secondly, once she transforms, she would surely step down, and the position of Orthodox Law Hall Master would be his.

Moreover, once Narcissus transforms, she would govern the vast sea territory, and if certain resources needed to be explained away, he could attribute it to her.

Chen Mobai even hoped that Kunpeng Daoist Institute would object, so that Narcissus would develop a rift with them, preventing the Kunpeng Lineage from monopolizing everything in the future.

“I think Meihua Sage is also a good choice...”

The speaker was Yuan Xu, who, although knowing the odds were slim, at least wanted to speak for someone from his own lineage.

Peach Blossom Sage immediately signaled to Wenren Xuwei beside him, and the latter could only toughen up and raise her hand, recommending Peach Blossom Sage.

However, unexpectedly, the Kunpeng Lineage remained silent.

Clearly, they had reached a consensus internally, giving up on this Sea Dragon God's Divine Crystallization.

This left three candidates, and everyone turned toward Qian Xing and Bai Guang.

Among them, Meihua Sage was Qian Xing's disciple, so everyone thought he might speak for his disciple.

"What do you think, junior sister?"

However, Qian Xing addressed Yu Baiguang across from him. Since he had gained more from the spoils, he wished to let Bai Guang decide in these matters.

"Let's go with Narcissus then!"

Yu Baiguang did not fuss and directly chose Narcissus, as she believed matters of the sea territory should be managed by the beings of the sea territory.

Additionally, Narcissus was Chen Mobai's recommendation.

Upon hearing this, Meihua Sage's expression remained calm, as he was inferior to Narcissus both in cultivation and seniority.

The only one present who could compete with Narcissus was Beiming Master.

"Thank you both ancestors for your trust..."

Narcissus breathed a huge sigh of relief upon hearing the result, immediately rose to thank the Double Saints of the Immortal Gate, and when she sat down, she was very thankful for having fostered good relations with Chen Mobai over the years, otherwise today's events might not have gone so smoothly.

“The Immortal Gate’s capacity for Spiritual Qi cannot accommodate too many God-Transcending cultivators, so until Qi Yuheng and Narcissus produce results, these two Divine Crystallizations shall remain sealed for now.”

Qian Xing spoke, because he had not yet decided whether he would leave, so he temporarily allocated two positions for Spirit Transformation.

If he were to leave later, he could arrange for Ying Guanghua or Yuan Xu to receive the Earth Dragon God’s Divine Crystallization.

Upon hearing this, Nascent Soul cultivators whose attributes matched the remaining two Divine Crystallizations all showed expressions of regret.

However, in the Immortal Gate, it was the God-Transcending ancestors who had the final say, so they could only nod in agreement.

After the meeting, Qian Xing and Bai Guang stood up first.

“Departing ancestors, we salute you!”

Everyone immediately stood up, but Qian Xing and Bai Guang gestured to the Nascent Soul cultivators of their respective lineage, indicating they had something to say in private.

The remaining Kunpeng and Jumang Nascent Souls each made some small talk and then disappeared from the Lingxiao Palace.

The Heaven and Earth Placenta was still outside the Dragon God Star, and now Qi Yuheng had gone through the procedures and completed the process, ready to begin refining.

The people of the Kunpeng Lineage were now most concerned about protecting Qi Yuheng’s transformation.

And Narcissus felt similarly, eager to head toward the Sea Dragon God's Divine Domain.

All the Divine Domains over the years had already been jointly deciphered by the Nascent Soul cultivators of the Immortal Gate, their most core divine kingdom, and the Divine Crystallization at its foundation was within reach.

However, halfway through, Narcissus thought of another matter, immediately diverted to the portal, needing to consult the Spiritual Venerable about refining the Divine Crystallization.

Chen Mobai and the others followed Yu Baiguang to a side hall within the Lingxiao Palace, where a tea table and several stools awaited.

"Have a seat, I'll brief you on matters before I depart."

#### Chapter 1913: Bai Guang's Explanation (Part 2)

Yu Baiguang sat down first, and only then did Chen Mobai and the other two dare to follow suit and sit, then sat upright, waiting for her instructions.

"When the Dragon God Star is extinguished, I will leave with the Spiritual Venerable through the Portal, but Senior Brother Qian Xing has not decided whether to leave."

Yu Baiguang's actions have always been swift and decisive, and her way of speaking was the same; her first sentence caused the three Nascent Souls of the Dance Tool Dao Academy to show slight surprise.

It was at this moment they understood why this time there would be an opportunity for Qi Yuheng and Narcissus to achieve Spirit Transformation.

They originally thought that after plundering the Dragon God Star, the Spiritual Qi of Xianmen would increase. Unexpectedly, it was because they were losing two Spirit Transformations.

“The Central Dojo is far away, and the Spiritual Venerable is determined to leave this time, planning to use the extinction of the Dragon God Star to initiate the Starry Sky Great Shift.”

Just when Chen Mobai and Master Chengxuan were silent, unsure of how to respond, Master Yuxiao suddenly spoke.

Chen Mobai and Chengxuan were instantly astonished by her words.

Is it the Central Dojo of the Purple Cloud Galaxy?

What is the Starry Sky Great Shift?

“Exactly, so this is the most likely chance to go to the Central Dojo. I am already at the Perfection of Spirit Transmutation, so I must strive to achieve the Void Refining Realm.”

Yu Baiguang, knowing the identity of Master Yuxiao, remained calm in response.

“Your talent, indeed, has been wasted on this small Earth Element Star. If the White Crane Dao Arena still existed, you might have been accepted as a direct disciple by the Daoist Monarch of the Immortal Sword Sect if you went there.”

Master Yuxiao sighed as she spoke, and Chen Mobai and Master Chengxuan exchanged a look, listening to their conversation.

“Would you like to come with me? Perhaps you could return to the White Crane Dao Arena?”

Yu Baiguang asked Master Yuxiao, who looked surprised.

“I’m just at the Nascent Soul Realm, I probably can’t withstand the power of the Starry Sky Great Shift.”

“You can enter the Law Domain of the Spiritual Venerable.”

Yu Baiguang's words made Master Yuxiao hesitate, and after a long time, she sighed lightly and shook her head.

"Forget it, the White Crane Dao Arena was long ago destroyed by the Demon Lord, the Dan Ding Sect has also perished with it, even if I went back, there would be no acquaintances."

Hearing her say this, Yu Baiguang did not insist.

"This is Ancestor Yun Ya's notes, Pure Yang has not read them yet, so I'll leave them to you."

Yu Baiguang spoke and took out a booklet from her Domain, handing it to Chen Mobai, who received it respectfully.

Master Chengxuan had previously read them, knowing that Master Yuxiao had great backing, perhaps holding knowledge even surpassing what the notes contained.

Chen Mobai was very curious, but considering the current setting, it was inappropriate to read, so he placed it at his side, first listening to the teachings of the old ancestor.

"Next, I will speak of what only those in Spirit Transformation in all generations know, but since both of you have the qualification for Spirit Transformation, you may listen...,"

Yu Baiguang began to speak of the real reason why the Five Ancestors of Xianmen came to the Earth Element Star, which was the first time Chen Mobai heard about the division beyond Spirit Transformation.

And when he heard about the "Star Sacrificing God" Realm, he was even more shocked.

To cultivate to the end, to possess such might!

“The demonic thoughts within the Earth Element Star Core, after thousands of years of purification, only a little is left. However, since the Portal is set to attract other demonic thought star worlds to come closer, if there comes a time in Xianmen where Spirit Transformation ends, you both should decisively purify even this remaining bit of demonic thought.”

Because Xianmen is now in a peak period, whether it's the Spirit Transformation or the War Artifacts, once fully activated, even if the Ming Wang Star of the Three Eyed Tribe approaches again, Xianmen can still fight. Therefore, the demonic thought remains, following the will of the Five Ancestors of Xianmen.

However, everything eventually declines from its peak. If there comes a time when Xianmen doesn't even have the strength for self-preservation, decisively purifying the demonic thought to avoid opening a war is the proper reasoning.

“Yes, Ancestor!”

Chen Mobai naturally agreed after hearing this point.

In his view, opening a war is too dangerous. Luckily, this encounter with the Dragon God Star, after the calamity of the Matriarch, all living beings had already perished. After they killed the Matriarch, they easily won a great victory.

If there were still the indigenous living beings of the Dragon God Star, upon entering, the will of Heaven and Earth would surely resist and support these beings to confront Xianmen, this group of “extraterrestrial demons.”

If not for the Matriarch, Xianmen would likely be facing three Spirit Transformation Peak Dragon Gods, or even their Dragon King guardian within their divine kingdom, which had accumulated longevity for millennia.

In comparison, he thought once he controlled Xianmen, he could set his sights on the Tianhe Realm.

With his leadership, Xianmen could stealthily siphon the resources of the Tianhe Realm through the Five Elements Sect to supplement itself.

Leaving the Earth Element Star at the Void Refining Realm to head to the Central Dojo of the Purple Cloud Galaxy is very difficult; Chen Mobai could totally wait to refine to Void Realm with the resources of the Tianhe Realm before going.

If it doesn't work out, he could go to the Spiritual Void Immortal Realm, ultimately going wherever it's safest.

After all, in the Tianhe Realm, even the reputed Heavenly Sovereigns, Mother of Water, Ghost Mother, and Taixu True King, are more than merely beings of the Void Refining Realm.

According to Yu Baiguang's words, even in the Central Dojo of the Purple Cloud Galaxy, the Merging Dao Realm is considered a Great Ability, reputed as True Immortal.

This means that in the Spiritual Void Immortal Realm, there are at least cultivation techniques and resources that could let Chen Mobai cultivate to the Merging Dao Realm.

Chapter 1914: Bai Guang's Explanation\_3

"This is the inner core of the Matriarch. It's not useful to me, so you take it!"

At this moment, Yu Baiguang suddenly took out a fist-sized, crimson inner core and placed it in front of Chen Mobai.

"This..."

Chen Mobai's eyes widened in shock, and he stood frozen on the spot.

When distributing the spoils earlier, although he was puzzled as to why Yu Baiguang would choose a Fire Attribute inner core, he never dared to think it would be given to him!

After all, even though he was part of the Weapon Dancing Sect, he had only met this ancestor once. Even if greatly favored by predecessors, directly receiving a Fifth Rank Peak inner core was something he would not dare dream about.

"This item is too precious for me to accept."

Chen Mobai thought for a moment and decided it wasn't right for him to take it, so he politely declined.

"After I leave, our sect will have no Divinity Transformation to oversee it. You have the best chance. With this, you can refine a Primordial Yang Treasure Bead. To you, it's a rare artifact, but to me, it's merely a nice decoration. Take it."

Yu Baiguang spoke lightly, but she had thought long about these words to give the item to Chen Mobai without arousing suspicion from others.

"The headmaster is already half-step Divinity Transformation. This is a Fire Attribute. Wouldn't it be better to give it to him..."

"This is of no use to me, at best, it would supplement some Elemental Energy and enhance my Body Forging. My Great Tao lies in 'The Union of Differences.' The ancestor has already secured Star Gold for me. Pure Yang, do not decline." Master Chengxuan immediately interrupted Chen Mobai.

He was very clear that in the entire Immortal Gate, only Chen Mobai could take this inner core.

Standing beside, Master Yuxiao seemed puzzled. Like Master Yu Yi, she didn't know the inside story and thought Yu Baiguang was too kind to the younger generation.

But she presumed it was Yu Baiguang's desire to leave hope for Divinity Transformation in the Weapon Dancing Sect before she left.

"In that case, I will humbly accept!"

Of course, Chen Mobai wanted it very much. Declining twice had shown his noble character, and he immediately took the crimson inner core with both hands and placed it into his Domain.

Yu Baiguang relaxed slightly upon seeing him accept it.

"Here is a note I wrote. After the Dragon God Star matter is resolved, go and look at the complete volume of the Immortal Sect Sword Art. Remember to bring the Mystic Finger Sword, and if there's anything you don't understand after reading, feel free to ask me while I'm still here."

Yu Baiguang handed over a prepared note, and Chen Mobai, thinking his reputation as an unparalleled sword genius had reached her ears, gratefully accepted it.

He had the Longevity Sword Intent of Heaven Cutting. By intercepting a piece of Sword Intent from the Mystic Finger Sword, he would likely comprehend the Immortal Sect Sword Art thoroughly, so he wasn't afraid of his talent being exposed.

Finally, Master Chengxuan mentioned the matter of the lamp wick of the Douluo Eight Scenic Lantern, which Yu Baiguang also signed without hesitation.

"I remember on Crimson Mountain, there's a Rank-5 Fire Yang Evil..."

Yu Baiguang thought Chen Mobai was cultivating the Primordial Yang Sword Evil, and since he was already Fourth Rank Peak, Condensing Sword into Thread, he could try to refine the Rank-5 Fire Yang Evil and comprehend One Sword Breaks All Laws.

"Shouldn't this be mentioned to Old Ancestor Qian Xing!"

Master Chengxuan hesitated and asked, as there was indeed a complete Rank-5 Fire Yang Evil within the Fifth Rank Spirit Vein of Crimson Mountain, but only one.

Using it, even with the help of the Treasure Trove's Formation, might require a thousand years to nurture another.

"Wait!"

With these two words, Yu Baiguang disappeared on the spot.

A minute later, she returned with a signed document from Qian Xing, then took a pen and signed it herself.

"Here!"

Yu Baiguang handed the document directly to Master Chengxuan, who, upon careful reading, found it stated that Vice Hall Master of the Hall of Orthodox Law, Pure Yang Master Chen Mobai, had rendered meritorious service in the recent war, and was awarded one Rank-5 Fire Yang Evil. The Guardian of the Red City Mountain Spirit Vein, Master Chengxuan, should facilitate this.

Chapter 1915: Dan Ding Sect, Purple Cloud Palace

After the treasure division at Lingxiao Palace ended, the Nascent Soul cultivators of the Immortal Gate began to digest their gains from this pioneering war.

Though Chen Mobai had acquired quite a few items, he didn't take this moment to slack off. Instead, he continued to stay stationed on Dragon God Star, directing the Immortal Gate's Array Masters in setting up the Earth Network Great Formation.

This was also a rare opportunity. After all, he would eventually have to set up the Sky Curtain Ground Network in Eastern Wilderness and even the entire East Continent. Although Qian Xing had already taught him these contents, without practice, he certainly couldn't fully comprehend them.

With the Double Saints of the Immortal Gate overseeing him, Chen Mobai rarely slacked off, working diligently.

For the setup of the Sky Curtain Ground Network Formation this time, the most elite team of over ten thousand Array Masters from the Immortal Gate was dispatched to the Dragon God Star. Yunhai Master withdrew a majority of the elite from his Array Masters Association, while Chen Mobai mobilized most of the personnel from the Sky Curtain Ground Network Management Bureau here.

Among them, Chen Mobai didn't allow the few leaders of the Sky Curtain Ground Network Management Bureau to come over; instead, they were left at the Immortal Gate to guard the house.

It was precisely for this reason that Yunyang Bing, who had relatively shallow experience, could oversee and direct everyone below.

For this, Yunyang Bing was very grateful to Chen Mobai.

After all, within the Immortal Gate, not everyone could access the Sky Curtain Ground Network Formation. As the ultimate realm of the Immortal Sect Formation, besides Qian Xing, only Yunhai Master and Chen Mobai, the two Fifth Rank Formation Masters, and the director of the Sky Curtain Ground Network Management Bureau could get a full view.

This time, Chen Mobai letting Yunyang Bing take charge of the Earth Network Formation evidently showed his intention to groom him as the future director of the Sky Curtain Ground Network Management Bureau.

However, Yunyang Bing didn't care much about this; his pursuit of formations transcended above power and influence.

But the position of the director of the Sky Curtain Ground Network Management Bureau is the only one within the Immortal Gate that allows an official to comprehend the complete Sixth Rank Great Array. He was very eager for this.

Therefore, in this Earth Network Formation project, Yunyang Bing exhausted himself diligently, relying on his energy-rich state after reaching Core Formation, working tirelessly.

Besides Yunyang Bing, Chen Mobai also led by example, escorting a group of elite Immortal Gate Array Masters, traversing various places on the Dragon God Star over the years.

In the blink of an eye, five years passed.

After slaying the Matriarch, nearly ten years later, Chen Mobai finally implanted the corresponding Array Plates needed for the Earth Network Formation into all the Spirit Pivots of the ley lines on Dragon God Star.

As the formation connected, beams of crystalline light shot to the sky, then under his control, crisscrossed the earth, slowly weaving into a net covering the entire Dragon God Star.

The moment when the Earth Network Formation took shape, Lin Daoming, who had transformed into the Spiritual Pivot, opened his eyes and sighed deeply.

His Spiritual Pivot of All Phenomena might be able to merge with the earth's Spirit Veins, undetectable even by Immortal Gate's technology, but there was no way to hide from the Earth Network Formation.

Once the Earth Network Formation is completed, the entire earth's Spirit Vein would be interconnected, and then combined with the Sky Curtain, transforming into one entity.

And only Qian Xing, the sole Sixth Rank Formation Master of the Immortal Gate, could manage this process.

Lin Daoming fully understood that though he might fool Chen Mobai and Yunhai Master, there was absolutely no way he could deceive Qian Xing.

So at this point, even though he was unwilling, he had no choice but to give up.

Fortunately, over the past few years, probably due to proficiency, he condensed Fetal Transformation Essence more swiftly, having nearly a complete strand left despite giving some to the Ascension Sect.

However, since one can never have too much of this essence, he continued condensing on Dragon God Star as much as possible.

But now, he had to leave!

With this thought in mind, Lin Daoming finalized the last wisp of Fetal Transformation Essence, packed up the surrounding Array Flags and Plates, took one last affectionate look at the cave he had overseen for nearly ten years, and turned to leave.

Three days after he left, the light web of the Earth Network Formation extended to this location.

Half a month later, Chen Mobai had fully interconnected the Earth Network Formation. He stood on top of Vermilion Dao Palace, surrounded by Yunyang Bing and thousands of other Immortal Gate Array Masters, all gazing proudly at the crisscrossing formation covering the entire planet.

Besides the earth, in the sky, there were also countless rays of varying colors, representing the now-completed Sky-covering Formation. Within the void, the three Divine Domains of the Dragon God were connected by these rays, resembling three rounds of the sun emitting multi-colored rays in the Nine Heavens, illuminating the entire Dragon God Star in green, yellow, and blue hues.

Yunhai Master piloted a Star Space Battleship, carrying the elite of the Immortal Gate Array Masters Association, traversing the Nine Heavens, constantly checking the final tasks before the Sky Curtain and Earth Network merged.

Chen Mobai did not let his guard down; after the Earth Network Formation interconnected, he used the Array Plate to debug the various Spiritual Pivots.

During the trial operation, several issues were discovered.

However, due to the connection of the formation, all these issues surfaced on the Array Plate. After detecting the positions, Chen Mobai dispatched Yunyang Bing and others to carry out repairs.

Another half month passed, and the Sky Curtain and Earth Network began to function normally. After Chen Mobai and Yunhai Master re-verified each other's work, they went together to Lingxiao Palace to request Qian Xing Ancestor to merge the two formations.

Chapter 1916: Dan Ding Sect, Purple Cloud Palace (2)

Soon after, Qian Xing flew out from the Lingxiao Palace, one finger pointing to the sky, the other to the earth.

The sky and the earth coalesced between his hands, merging above and below.

Finally, the convergence of heaven and earth released infinite light from a resplendent bead, which fell into the spiritual pivots throughout the land.

Qian Xing seemed to have discovered something but did not speak, instead clasping his hands together.

In an instant, Chen Mobai felt as if the Dragon God Star was covered by a new layer of heaven and earth placenta, enveloping all creatures on the planet.

After merging the Sky Curtain with the Earth Network, Qian Xing beckoned to Chen Mobai and Yunhai Master, and the two immediately approached him.

“Here is the distribution point of energy in the underground sea of the entire planet’s mineral veins. Have Ying Guanghua arrange for the Immortal Gate’s personnel to excavate all of these completely in the shortest time possible.”

While speaking, Qian Xing conjured a model of the planet. On it were bright spots of light, and with a point of his finger, the distribution and quantity of minerals appeared.

“Yes!”

Since Chen Mobai is part of the Three Great Halls, he took over the planetary model.

“The Spiritual Venerable will take the Star Core when the time comes, but the spirit veins within the Dragon God Star’s land and sea regions can still be extracted and infused into the Immortal Gate. After subtracting the loss, this will allow the Immortal Gate to have enough spiritual energy for an additional Deity Transformation!”

Qian Xing again instructed Yunhai Master, who immediately nodded in agreement. His next task was to use the Sky Curtain Ground Network Formation to extract and transport the Dragon God Star's spirit veins to the Immortal Gate.

Once all the mineral deposits and spirit veins have been removed, the planet will reach its annihilation.

At that time, the Spiritual Venerable will personally take the Star Core.

After giving these instructions, Qian Xing handed the golden bead in his hand to Yunhai Master, who respectfully accepted it. This is the core of the Dragon God Star's Sky Curtain Ground Network, essential for manipulating the formation to extract the planet's spirit veins.

After giving both instructions, Qian Xing vanished before the two.

Chen Mobai and Yunhai Master discussed for a moment, but both mining and extracting and transporting spirit veins required more manpower, and relying solely on the Array Masters was insufficient, so they decided to convene a small Nascent Soul meeting.

However, as many Nascent Soul cultivators had already returned to the Immortal Gate, they also returned once through the portal.

In the Xianwu Hall, only half of the Nascent Soul cultivators attended.

After all, Qi Yuheng and Narcissus were attempting Deity Transformation, Beiming Master was protecting the former, while Yuxiao and Yu Yi were uninterested, and Tao Hua and the Three Extremes made excuses to be absent.

Aside from the Nascent Souls of the Three Great Halls, the Patching Heaven group had the most presence.

"Nangong is relatively knowledgeable about the Dragon God Star over there, and I plan to hand over the mining matters to him. What does Pure Yang Master think?"

Ying Guanghua expressed his thoughts with courtesy, asking Chen Mobai for his opinion, as he knew of the enmity between Chen Mobai and Nangong Xuanyu.

“Since this matter has been entrusted to Master Ying by Ancestor Qian Xing, let Master Ying take full responsibility; I have no objections.” Chen Mobai also knew that Nangong Xuanyu was the most suitable candidate. Their grievances had been resolved when Ancestor Qian Xing assigned him to the Dragon God Star, so he nodded.

“The Sky Curtain Ground Network Formation has been set up; insect beasts are no longer a menace. To save costs, I plan to withdraw the Azure Dragon and Vermilion Bird Dao Palaces and their corresponding war artifacts. What do you all think?”

Ying Guanghua proposed another matter. After slaying the Matriarch, a considerable number of insect beasts remained underground. To protect the Immortal Gate cultivators mining and gathering resources, the Three Dao Palaces continued to suppress three regions of the Dragon God Star. Even though they were not in action, the daily spiritual energy and Spirit Stone expenditures were astronomical, causing Ying Guanghua, who managed logistics, considerable distress.

Now that the formation is complete, the insect beasts could no longer absorb any spiritual energy, and would even be gradually suppressed and exterminated by the Earth Network Formation, so he immediately put forward this proposal.

As a result, it was approved unanimously.

Although they were not responsible for managing finances, they understood well that resources were limited, and saving was necessary.

After retracting the war artifacts, it was time for Ying Guanghua to flex his muscles and for Chen Mobai to take this opportunity to return to the Immortal Gate for some rest.

Since the opening of the portal, because a Deity Transformation cultivator of the Immortal Gate personally ensured order, he had been treading on thin ice, personally attending to everything with unprecedented diligence, and unknowingly, eighteen years had passed.

Chen Mobai could swear this had been the toughest period he had worked in.

Now that he had completed the Earth Network Formation, he could finally take a breather and tend to his personal affairs.

The first was to spend time with his family.

Since Chen Xiaohei formed his core, Chen Mobai had not seen her.

Back in his own courtyard, his family shared moments of warmth and happiness.

While enjoying familial bliss, Chen Mobai also took out Ancestor Yun Ya's notes to peruse.

The notes recorded many matters regarding the Dan Ding Sect, stating it was a major sect at the White Crane Dao Arena, and its founding ancestor the Dan Ding Taoist originated from the Central Dojo of the Purple Cloud Galaxy.

The Dan Ding Taoist once had the fortune of attending the lectures of Purple Sky Daoist Venerable and obtained the Pure Yang Scroll, "The Union of Differences," and the two scrolls of Purple Green and Phoenix Seal, reaching the peak of Void Refining, and was but a step away from Harmonization.

Countless thousands of years ago, the Purple Sky Daoist Venerable, in his profound understanding of creation, suppressed the Demon Lord of the Star Sacrificing God, and transcended to the other shore.

After the Purple Sky Daoist Venerable's transcendence, his disciples branched off, even engaging in fierce battles for the method to reach the other shore, leaving the Central Dojo in ruins.

The Dan Ding Taoist, lacking cultivation strength, left the Central Dojo under such circumstances, and sought Harmonization at the White Crane Dao Arena of his friend, Wangji Daojun.

But alas, due to insufficient foundation, he ultimately failed at Harmonization.

However, because of the conflict at the Central Dojo, the Dan Ding Taoist never returned, instead staying at the White Crane Dao Arena to enjoy his years, founding the Dan Ding lineage.

In a certain sense, the Dan Ding Sect could be considered a legacy of the Daoist Venerable.

Chen Mobai could see that Ancestor Yun Ya was very proud when writing these lines.

Since it was a legacy of the Daoist Venerable, why was there no method of the Daoist Venerable?

Chen Mobai muttered to himself and continued to read.

Besides explaining the origins of the Dan Ding Sect, this volume of Ancestor Yun Ya's notes delved into his understanding of the great method "The Union of Differences."

Having committed all this to memory, Chen Mobai flipped to the last page.

Surprisingly, it contained information about the Purple Cloud Palace.

It turns out the Purple Cloud Palace was where the Purple Sky Daoist Venerable taught across the heavens.

The Dan Ding Taoist initially was an ordinary Qi Practitioner on a distant planet, and by a stroke of fate, entered the Purple Cloud Palace, sat on a straw mat, listened to the Daoist Venerable preach, and ascended to Nascent Soul, even to Void Refining.

The Purple Cloud Palace would appear in any place in the universe where living beings were born. The Purple Sky Daoist Venerable broadly disseminated the cultivation arts and longevity methods, opening the door to transcendence for all beings.

After the Daoist Venerable transcended to the other shore, the Purple Cloud Palace continued to follow this rule, circulating within the universe.

However, without the Daoist Venerable, even if one could enter the Purple Cloud Palace, at most, they could only gain some insights into cultivation.

There are even rumors that since the Purple Cloud Palace was where the Daoist Venerable sat for the longest time, it might contain the Daoist Venerable's method to transcend to the other shore.

The reason the Five Ancestors of Xianmen agreed to come to the Earth Element Star was that they knew this planet would see the Purple Cloud Palace revolve around and descend every twelve hundred years.

Purple Cloud Palace!

Chen Mobai silently murmured the term, recalling that during its last descent, the True Yang leader perfected his Primordial Spirit, more than 1100 years ago.

This means in just another 100 years, he will be able to witness the true descent of the Purple Cloud Palace.

This is yet another opportunity.

It might even be the chance for Deity Transformation.

With this in mind, Chen Mobai closed Ancestor Yun Ya's notes and made a mental note of this occurrence.

But during the last descent of the Purple Cloud Palace, did the Dual Sages of the Immortal Gate enter it?

Chen Mobai considered this further.

Perhaps in the future, he should ask White Light Ancestor about this. With this thought in mind, he took out the slip for comprehending the Immortal Sect Sword Art.

But before that, he needed to further refine his sword dao.

#### Chapter 1917: Dan Cauldron Jade Tree, Primordial Yang Treasure Beads

Chen Mobai had just arrived at the Dance Tool Dao Academy when Master Chengxuan immediately sensed his presence.

"You're here, everything is prepared for you!"

Master Chengxuan said with a smile, and then the two of them headed deep into the Treasure Trove.

Chen Mobai came for the Rank-5 Fire Yang Evil; although even if the Primordial Yang Sword Evil advanced to Rank-5, it's still far from the prowess of 'One Sword Breaks All Laws'. However, once mastered, it might bring more insights when he comprehends the Primordial Yang Sword or even the Immortal Sect Sword Art in the future.

With the war for development ending, the Little Red Sky, a virtual platform consuming a vast amount of spiritual energy, was soon to be closed by Ying Guanghua.

At that time, even though the Primordial Yang Sword needed to be returned to the Pure Yang Academy, with Chen Mobai's status, borrowing it for a period of comprehension would certainly pose no problem.

"This Rank-5 Fire Yang Evil is inside the Nine Dragon Cauldron."

While speaking, Master Chengxuan performed the Treasure Command mantra, and a bronze cauldron rose from the magma, landing in front of them.

The two were standing on a black island where the Fifth Rank Vermilion Fruit Tree was located, with Qin Beichen standing guard nearby.

On the Nine Dragon Cauldron were nine True Dragon patterns, only one Fire Dragon was glowing. With a virtual grasp of his right hand, Master Chengxuan lifted a crimson crystal ray from the cauldron.

Chen Mobai immediately took out a specially prepared Spirit Sealing Tube and absorbed the Rank-5 Fire Yang Evil into it.

"Do you want to retreat here, or return to Wangwu Cave Heaven?"

As Master Chengxuan returned the Nine Dragon Cauldron, he asked Chen Mobai.

"I haven't explored the little realms of the Dao Academy yet; may I take a stroll inside?"

Chen Mobai remembered this; all Four Great Daoist Sects have their own small realms, which are the domains of the Divinity Transformation ancestors. They contain the academy's foundation, where most precious herbs and Rank-5 spiritual energy are stored.

"Just as well, there are some things inside the small realm that I need to pass on to you..."

As Master Chengxuan spoke, he taught Chen Mobai the method to enter and exit the Yuping Small Realm, and then demonstrated it in front of him, opening the Void Gate.

Chen Mobai nodded continuously, recording everything in the Guidance Book.

"Let me take you for a walk inside."

As the host, Master Chengxuan pointed to the Void Gate, and Chen Mobai immediately followed him into it.

As soon as they entered, Turtle Treasure started incessantly popping up with notifications.

Chen Mobai temporarily ignored it.

Interestingly, despite multiple visits to the Dragon God Star discovered in the war for development, Turtle Treasure showed no reaction.

He guessed Turtle Treasure only reacted to different realms, and since planets within the same universe are considered within the same domain, it ignores them.

This is evident from Chen Mobai's previous visits to various small realms and even major secret realms within the Tianhe Realm.

However, after this experiment with the Dragon God Star, Chen Mobai confirmed this theory.

Yet, this leads to another question.

This conclusion implies that the Tianhe Realm and Earth Element Star are not in the same realm?

Considering the legends about the Tianhe Realm, it's said to be opened by the Mother of Water, possibly another great ability's domain. Because of the Mother of Water's immense power, it encompasses vast lands and celestial bodies, mountains, rivers, suns, moons, and stars, even endless resources.

Could it be that only by ascending to the Spiritual Void Immortal Realm would one be in the same realm as the Earth Element Star?

But all this is just Chen Mobai's wild speculation.

To truly verify it, unless he ascends from the Tianhe Realm.

As soon as Chen Mobai stepped into the Yuping Small Realm, he felt a warm climate like spring.

The entrance was at a mountaintop, and looking down, there were patches of mist, within which were acres of thriving herbs. Above, an artificial sun emitted soft light, nourishing the spirit plant crops below.

"Junior Brother, these herbs are the essence accumulated by the academy over the millennia..."

Master Chengxuan pointed to the small realm's boundless and flourishing medicine field, his tone subtly filled with pride.

Following him, Chen Mobai flew towards the center of the small realm, and from the sky, the lush emerald medicine fields appeared like embedded jade stones on the earth, filled with various rare flowers and treasured herbs over a millennium old.

Some already-blooming nine-leaf Lingzhi appeared as if they had become spirits, lazily revealing half their bodies from the earth, basking in sunlight, with a warm glow. Listening with Echoes in the Void, Chen Mobai sensed their rich medicinal power that alone is a primary ingredient for the Infant-Accumulating Elixir.

There were also sprawling Polygonum vines twining like dragons, absorbing earthly essence; and a nameless pure white flower blossoming within cliffs, its petals as pure as fresh snow, emitting an intoxicating fragrance...

Even for someone like Chen Mobai, who has seen the world, he couldn't help but marvel at these Rank-5 herbs.

Before long, they reached the center of the Yuping Small Realm.

Here, the spiritual energy had reached Rank-5 levels, and Chen Mobai saw a Jade Tree laden with various spirit fruits, beside which was a deep pit.

"This is a Dan Cauldron Jade Tree brought by Ancestor Yun Ya from the White Crane Dao Arena, also the supreme treasure of the Dan Ding Sect, left by the Dan Ding Taoist after his transformation into Dao Fruit. Some spirit fruits are Artifact Spirits, others are Alchemy Recipes. After refining them, cultivators can fully master the refining methods of that particular magic artifact or alchemy recipe..."

Master Chengxuan pointed to the man-high Jade Tree, introducing it to Chen Mobai.

Chapter 1918: Dan Cauldron Jade Tree, Primordial Yang Treasure Beads (Part 2)

"Our lineage, does it truly possess such profound depths?"

Chen Mobai was taken by surprise upon hearing this.

He counted carefully and found that the jade tree bore a total of thirty-six fruits, each varying in color. Yet under his Echoes in the Void spell, he vaguely discerned the howling of the Artifact Spirits.

According to Ancestor Yun Ya's notes, the Dan Ding Taoist mastered the Stat Fire, making him a grand maestro in both alchemy and artifact refining. His title of 'Dan Ding' originated from this mastery.

He even once collaborated with others in the Central Dojo to refine a furnace of seventh-rank elixirs.

Nevertheless, later on, because "The Union of Differences" proved to be too advantageous, the Dan Ding Sect focused more on artifact refining, gradually allowing alchemy to decline.

"The Yuxiao Master is the Artifact Spirit of one of the fruits on the jade tree. Back in the day, Ancestor Yun Ya took it and refined it into a Yuxiao, which was then gifted to his Daoist couple..."

Master Chengxuan revealed another secret, causing Chen Mobai to have a sudden realization.

"Doesn't this mean that all the Artifact Spirits on this jade tree can assume human form and serve as Nascent Soul Seeds?"

"Not exactly. The Yuxiao Master was able to become Jiang Xuanzhu, probably not solely because of being an Artifact Spirit, but perhaps due to Ancestor Yun Ya or even his Daoist couple's influence. Over the millennia, many cultivators in our lineage have picked fruits from this jade tree, but only she has become spiritual and taken a human form."

Master Chengxuan's words made Chen Mobai nod lightly. Then, he pointed to a deep pit nearby.

"Ahem, this is where I experimented with Blooming Moment and transplanted that Fire Spirit Tree. I hurried out back then and forgot to tidy up..."

Master Chengxuan spoke with some embarrassment, then gently waved his sleeve, filling the pit.

"This is the area with the densest spiritual energy within the small realm. It's unfortunate that the fruit related to the sword was taken by Ancestor Yun Ya long ago, but the fruit for refining treasure bead artifacts is still here. If you wish to refine Primordial Yang Treasure Beads, you can take this one!"

Master Chengxuan pointed to a green fruit, and Chen Mobai nodded lightly, recognizing its significant worth to him.

Subsequently, Master Chengxuan instructed how to collect the jade tree fruits, even demonstrating once. However, as it was his first time, his actions were a bit clumsy; it took three tries before he finally picked a white fruit from the jade tree.

These thirty-six fruits on the jade tree were the most proud achievements of the Dan Ding Taoist in his lifetime.

Eighteen different artifact refining insights had even become spiritual, allowing even a cultivator with no artifact refining foundation to refine them and directly advance to a fifth-rank Artifact Refiner.

However, it would be a great waste to do so. According to the rules of the Dan Ding Sect, one must elevate oneself to a fifth-rank Artifact Refiner before selecting a fruit for refining. This way, the artifact attainment represented by the fruit could be elevated to the sixth rank.

Therefore, only fifth-rank Artifact Refiners of the Dance Tool Dao Academy throughout generations can obtain the fruits from the jade tree.

Yet, as the attainment of a sixth-rank Artifact Refiner within the Immortal Gate served practically no purpose, Master Chengxuan, despite being qualified for refinement, had not chosen any fruit until now.

With the opening war and after obtaining Star Gold, seeing his Lifespan Artifact having the potential to upgrade to the sixth rank, he went ahead and took the fruit shaped like a mirror artifact.

"Oh yes, I almost forgot about this..."

As Master Chengxuan was about to leave, he suddenly recalled something and handed the pre-crafted fifth-rank Vermilion Fruit Tree Lampwick to Chen Mobai.

"Thank you, Principal!"

Chen Mobai expressed his gratitude once more.

Before long, Chen Mobai was the only one left in the Yuping Small Realm.

Chen Mobai took out Turtle Treasure, set a location here, and named it.

He felt it was a bit redundant.

Given his current status, he could come and go in the Yuping Small Realm as he pleased, without requiring Turtle Treasure.

Yet after using Turtle Treasure to set the location, things became much calmer.

After doing this, Chen Mobai approached the jade tree. While his memory was still fresh, he followed Master Chengxuan's method and picked the fruit representing the treasure bead.

Once the fruit was picked, another identical fruit appeared in its original place.

However, this fruit was illusory and transparent.

Indicating that its essence had been taken.

If anyone in the Dan Ding Sect could cultivate to the realm of the Dan Ding Taoist, they could regenerate the essence of the picked fruit.

Sadly, the Dan Ding Sect has persisted until now, and no one has been able to achieve this.

Chen Mobai gave a bow to the jade tree, then sat down beneath it, gazing at the fruit in his palm carved as if from jade, eyes gently closing.

The top of his head suddenly became transparent, followed by a crystalline, jade-like small figure flying out, which was precisely Chen Mobai's Nascent Soul.

Without the realm of Divinity Transformation, refining the fruit of the jade tree requires the use of the Nascent Soul.

Upon the emergence of the Nascent Soul, Chen Mobai immediately felt a harmonious connection with the fifth-rank spiritual energy within the Yuping Small Realm, and a dense surge of spiritual energy rushed towards him with every movement.

Utilizing a spell with the Nascent Soul increases its power manifold, proving this theory.

However, the emergence of the Nascent Soul is considered a desperate measure in both the Tianhe Realm and the Earth Element Star. Moreover, before achieving Divinity Transformation, the Nascent Soul is exceedingly fragile, and prolonged manipulation of nature's spiritual energy may even lead to the Nascent Soul's dispersal or the depletion of one's essence.

Chapter 1919: Dan Cauldron Jade Tree, Primordial Yang Treasure Beads (Part 3)

So, after Chen Mobai's Nascent Soul left his body, he immediately absorbed the fruit into his palm, and then opened his small mouth and began to eat it bite by bite.

After finishing the green fruit, the Nascent Soul immediately disappeared into the Sea of Knowledge at the Purple Mansion, vanishing without a trace.

Chen Mobai's eyes remained closed as he entered the state of the Guidance Book, trying to comprehend and realize the knowledge he had consumed.

Initially, he thought this process would be quite difficult, after all, his realm in artifact refining relied entirely on "The Union of Differences," which was actually far inferior to Master Cheng Xuan's.

But contrary to Chen Mobai's expectations, after his Nascent Soul consumed the fruit, it was as if water had merged with milk, with not a hint of rejection. Dan Ding Taoist's understanding of the Magic Artifact shaped like a treasure bead streamed through his mind like flowing water, subsequently being fully absorbed.

Chen Mobai roughly had an explanation for this.

It should be that his foundation is exactly the same as that of Grandmaster Dan Ding Taoist.

Both involved the Pure Yang Scroll and the two celestial books, Purple Green and Phoenix Seal, making the refining of this fruit feel as if Dan Ding Taoist himself were consuming it, leading to perfect digestion.

Subsequently, Chen Mobai recalled from memory the blueprints for refining the Primordial Yang Treasure Bead. He found that the parts he had previously not understood now seemed as clear as looking at elementary school math problems, and he even felt capable of proposing further improvements given his skills.

Chen Mobai understood this very well.

After all, Dan Ding Taoist also cultivated the Pure Yang Scroll, and he too had the Primordial Yang Set, whose content in the Immortal Gate was left by the Yuan Yang Ancestor.

Although the Yuan Yang Ancestor was also a great figure, he was ultimately confined to the Earth Element Star. His vision and insight certainly could not compare with Dan Ding Taoist's. Now that Chen Mobai had obtained all of Dan Ding Taoist's understanding of the Primordial Yang Treasure Bead, he could completely surpass the Yuan Yang Ancestor's achievements in this aspect.

If Chen Mobai now had the realm of Divinity Transformation and possessed Rank-6 materials, he might even be able to directly refine a Rank-6 Primordial Yang Treasure Bead.

Sadly, he did not meet these two conditions.

However, a Rank-5 Primordial Yang Treasure Bead was more than enough for him!

After reminiscing about its content, Chen Mobai took out the Fire Attribute inner core of the Matriarch. The energy contained within this inner core completely exceeded the Nascent Soul level.

It was precisely for this reason that if he wished to refine it, he needed to be particularly cautious.

Moreover, refining a Rank-5 Primordial Yang Treasure Bead required Innate Pure Yang Qi.

Luckily, he had it!

With a thought, the Nascent Soul within the Sea of Knowledge at the Purple Mansion opened its mouth to emit that wisp of Innate Pure Yang Qi, which, under his control, slowly merged into the inner core of the Matriarch.

Regrettably, his Innate Pure Yang Qi was almost negligible compared to the inner core.

However, because the inner core contained the refined Innate Fire Origin of the Matriarch, Chen Mobai could use this as raw material to enhance his Innate Pure Yang Qi.

This wisp of Innate Pure Yang Qi was separated from the complete version by the Yuan Yang Ancestor.

Originally, he thought of using it as a foundation to transform all his Pure Yang True Qi into Innate Pure Yang. Sadly, the Acquired Qi needed to absorb Innate Spiritual Qi to reverse to Innate, which was why, over the years, this wisp of Innate Pure Yang Qi had remained stunted.

The Immortal Gate did have research on reversing Acquired to Innate, but due to a lack of corresponding Innate Qi, progress had been slow.

Chen Mobai had originally thought that when he transformed into Divinity and controlled the Immortal Gate, he would guide Yuan Xu and others to focus on this research. Little did he know that fate arrived and gifted him this inner core from the White Light Ancestor.

The countless years of cultivation by the Matriarch became resources for him.

Moreover, Chen Mobai discovered that the True Spirit which should have been inside the inner core of the Matriarch had been cleared out, presumably obliterated by White Light Ancestor.

Now there was only the purest Innate Fire Origin left within the inner core.

Knowing this, Chen Mobai felt even more grateful to White Light Ancestor.

He began to perform the Ignition Technique from the Pure Yang Scroll, and in a short while, the wisp of Innate Pure Yang Qi that had infiltrated the inner core started to ignite the vast Innate Fire Origin, converting it.

Perceiving the invigorated growth of the Innate Pure Yang Qi, Chen Mobai was relieved.

Once all the Innate Fire Origin is converted into Innate Pure Yang Qi, this inner core will become a Rank-5 Primordial Yang Treasure Bead.

Because his cultivation level was merely at the Nascent Soul Realm, this process was bound to take a considerable amount of time, akin to a snake swallowing an elephant.

Yet Chen Mobai was not in the least hurried.

After all, both the Immortal Gate and the Eastern Wilderness were now peaceful and stable. He had ample time to slowly cultivate and enhance himself.

After condensing ten strands of Innate Pure Yang Qi into a single force, Chen Mobai paused the refinement process of the Primordial Yang Treasure Bead.

He did not forget that his primary purpose this time was to refine the Rank-5 Fire Yang Evil.

After retracting the inner core into his domain, Chen Mobai took out a Spirit Sealing Tube, and looking at the crimson bright Fire Yang Evil inside, he pulled out the stopper of his Sword Gourd.

In the realm of Condensing Sword into Thread, the Rank-4 perfected Primordial Yang Sword Evil shimmered and flickered like a thread of light, roaming his palm.

Under the control of his Divine Sense, the Spirit Coagulation Talisman atop the Spirit Sealing Tube was peeled off.

Chapter 1920: Dan Cauldron Jade Tree, Primordial Yang Treasure Beads (Part 4)

Although it's merely a Rank-5 Fire Yang Evil, for Chen Mobai, it's still a power he needs to cautiously refine.

Any power, as long as it reaches the Rank-5 level, even without a cultivator controlling it, is not something an ordinary Nascent Soul cultivator can touch.

Under Chen Mobai's Listening with Empty Valley Echo, he sensed the exceptionally violent nature of this Rank-5 Fire Yang Evil. If mishandled during the refining process, it could very likely backfire disastrously.

Fortunately, he had never refined the Primordial Yang Sword Evil into his body, so even if he failed, at most it would just cause the Sword Gourd to explode.

But according to Chen Mobai's genius character in the Immortal Gate, he definitely cannot fail.

Thus, he was not in a hurry. He first used the Rank-4 accomplished Primordial Yang Sword Evil to sense and make contact with the Rank-5 Fire Yang Evil. Simultaneously, the Primordial Yang Sword Intent he

had captured with the Longevity Sword Intent of Heaven Cutting was also strengthened onto the sword thread in his palm.

Time slowly passed, and without realizing it, Chen Mobai entered a realm of meditative tranquility.

Within the Yuping Small Realm, dense Rank-5 fire spiritual energy, after being refined by the Jade Tree, spread throughout the small realm. And sitting in front of the Jade Tree, Chen Mobai continuously absorbed and refined this spiritual energy.

Chen Mobai's heart and mind, following the captured Primordial Yang Sword Intent, immersed into the sword threads. This Rank-4 accomplished Primordial Yang Sword Evil seemed like an extension of his limbs, manipulated with ease.

However, an indescribable intense heat surged as the sword threads made contact with the Rank-5 Fire Yang Evil, impacting his divine sense, causing even his Nascent Soul to feel an unspeakable heat sensation.

Luckily, he possessed an Innate Fire Spirit Body; otherwise, he couldn't have surpassed this trial.

Feeling that he could withstand the evil qi impact of the Rank-5 Fire Yang Evil, Chen Mobai carefully controlled the sword threads, refining little by little.

This process was similar to how he used Innate Pure Yang Qi to transform the Matriarch's inner core's Innate Fire Origin, although one is transforming from acquired to innate, while the other is advancing from Rank-4 to Rank-5.

The difference is that condensing Innate Pure Yang Qi primarily involves oneself, drawing power from the inner core to replenish oneself.

While condensing the Rank-5 Sword Evil requires gradually replacing oneself, fully completing the imperfect self and immature Sword Dao, bit by bit, until perfection!

As time passed, Chen Mobai felt his Primordial Yang Sword Evil seemed to leap past a boundary and bottleneck. The previously scorching evil qi, at this moment, felt like a hot spring, making the sword threads extending from his heart and mind even more active.

After sitting quietly for a few more days, Chen Mobai confirmed that the Primordial Yang Sword Evil had successfully advanced in rank, and he slowly opened his eyes.

The sword thread in his palm had changed from its original orange-red color to a deep red.

Chen Mobai felt that when he slashed out with this Rank-5 Primordial Yang Sword Evil, even the Qing Shuang Sword might suffer damage.

This was also Chen Mobai's first time relying solely on his cultivation to achieve a Rank-5 method!

At the moment when the Primordial Yang Sword Evil reached Rank-5, he felt a deeper understanding of fire-attributed powers and cultivation techniques.

In his mind, the Red Flame Sword Jue passed down by the Five Elements Sect, which was previously only capable of being cultivated to the Golden Core Perfection realm, now seemed to him not impossible to extend to include Nascent Soul Formation content.

Sitting before the Jade Tree, the Crown of Heaven and Earth appeared above his head, seemingly merging with the Jade Tree behind him.

In the Heavenly Calculation Bead, numerous downloaded fire-attributed cultivation techniques from the Immortal Gate and the Longevity Sect's Red Emperor Illumination Scripture, at this moment, he extracted all content that could be integrated with the Red Flame Sword Jue. Subsequently, through inner observation assisted by the Guidance Book, the Chapters regarding the Red Flame Sword Jue and Nascent Soul Formation automatically completed themselves.

No one knows how much time passed before the golden light in Chen Mobai's eyes dissipated, and the Crown of Heaven and Earth slowly vanished, hidden in the void.

And in his mind, a brand-new Red Flame Sword Jue had already been perfected.

Although it could only be cultivated to the Nascent Soul Early Stage, it allowed him to condense thirty-six strands of Red Flame True Qi. Moreover, Chen Mobai revised the sections on Qi Cultivation, Foundation Establishment, and Core Formation, making this sword technique superior compared to the rest of the Five Elements Sect's techniques.

Chen Mobai took out a blank jade slip, and after inscribing the contents and text of this sword technique, he gave it a new name.

Because he was not good with names, he changed just one character.

"Red Flame Sword Scripture!"

This surprise was something Chen Mobai had not anticipated.

Having mastered the Rank-5 Primordial Yang Sword Evil, his understanding of fire-attributed cultivation techniques, especially sword techniques, had reached an unequivocal master realm.

Unfortunately, all of this was along the path of One Sword Breaks All Laws.

Even a strong figure like Yuan Yang Ancestor had not achieved entrusting the primordial spirit within the Sword Dao.

As for Chen Mobai, having merged the captured sword intent of Yuan Yang Ancestor with the Rank-5 Primordial Yang Sword Evil, reaching such a realm was even more noteworthy.

But regardless, his Sword Dao mastery had made a qualitative leap.

Originally just entering the realm of Condensing Sword into Thread, by now he had truly grasped this Sword Dao Realm.

From achieving to mastering, it took only nine years, which, when spread around, would further solidify his genius persona in Sword Cultivation!

Thinking like this, Chen Mobai calmed his mind, sat quietly in meditation for half a day, confirmed that his essence, qi, and spirit had recovered to their peak, and then rose to look at the Jade Tree before him.

This supreme treasure of the Dan Ding Sect even had the function to aid cultivators' enlightenment.

No wonder Master Chengxuan loved retreating in the Yuping Small Realm.

In the state brought by the Guidance Book, Chen Mobai could grasp all within and outside himself, naturally also observing the merging and mutual enhancement of his Crown of Heaven and Earth with the Jade Tree's aura.

According to the saying in the Tianhe Realm, his cultivation foundation shared roots with the Dan Ding Taoist lineage. If he could refine this Dao fruit of the Jade Tree, wouldn't advancing to Divinity Transformation be without any obstacles?

Thinking of this, Chen Mobai's gaze toward the Jade Tree also turned slightly heated.

In that case, he would have a guaranteed path to success for realm advancement.

It was just that he didn't know whether the other members of the Weapon Dancing Sect would agree if he wished to refine the Jade Tree in the future.

Chen Mobai speculated that, based on the customary norms of the Immortal Gate here, it would probably not be allowed unless it was a critical moment of life and death for the Earth Element Star, necessitating his realm advancement to Divinity Transformation.

With a slight sense of regret, Chen Mobai performed the ancient rites of the Weapon Dancing Sect toward the Jade Tree, then maneuvered the Tai Yi Wu Yan Luo to fly toward the entrance of the Yuping Small Realm.

"Greetings, Pure Yang Master!"

After leaving the small realm, Chen Mobai found himself above the black island at the deepest part of the Treasure Trove, standing atop the Fifth Rank Vermillion Fruit Tree, while True Person Shaoyang, Qin Beichen, saluted him from below.

After exchanging a few words with Qin Beichen, a silver light flickered in the void, and Master Chengxuan appeared before them out of nowhere.

"Pure Yang, your teacher's lifespan is almost exhausted. Do you want to see him one last time?"

Upon hearing this, Chen Mobai was instantly stunned, then immediately followed Master Chengxuan to leave that place.
