

World 1931

Chapter 1931:

As Bing Yun Master spoke, Chen Mobai heard the sound of chains vibrating in the void.

A brilliant gleam shone in his eyes, faintly capturing traces of the Blue Luminous Ice Heart Jutsu.

At this moment, a bone-chilling cold current surged towards him, and Chen Mobai felt as if the space around him was frozen, his whole body starting to stiffen.

"A Fifth Rank Ice Attribute Magic Artifact!"

With Bing Yun Master's words, he instantly realized why she had quietly infiltrated the Eastern Wilderness alone.

It turns out there is such a divine object in this sealed place.

"Indeed, it's just a pity that I didn't have the mantra to refine this Legal Treasure at the time, letting you live an extra sixty years."

Bing Yun Master smiled coldly, surrounded by a mist of ice, with cold stars flashing in her eyes, clearly having mobilized her True Qi to unleash the power of the Blue Luminous Ice Heart Jutsu.

Chen Mobai remained expressionless, with a wave of his hand, the Pure Yang Immortal Robe emitted dazzling light, melting the cold current that bound him. Then, with a flick of his right hand's sword finger, a red light flew out of the gourd at his waist, like a brilliant thread colliding with the invisible chains in the void above, creating ear-piercing howls.

As the cold and hot forces of the Fifth Rank clashed, the nearby snow-capped mountains erupted with earth-shattering sounds, triggering an avalanche.

For these terrifying natural disasters that are unstoppable to mortals, they are merely a fine scene for the two Nascent Soul Cultivators.

"Fifth Rank Sword Sha! Condensing Sword into Thread! You've actually achieved such a Sword Dao Realm!"

Bing Yun Master, who initially thought she could easily take down Chen Mobai, now found her expression changed, relieved to have acquired the Blue Luminous Ice Heart Jutsu, otherwise she wouldn't be able to withstand even one move from this guy.

No wonder he is the first person in Eastern Wilderness for millennia, renowned as an unparalleled Sword Dao genius in East Continent.

Fifth Rank Sword Sha is understandable, after all, it can be achieved through resources. This guy before her, rumored to be Emperor Chen Qing of Yi Yuan Dao Palace, surely wouldn't lack Fifth Rank Evil Qi.

But the Condensing Sword into Thread realm represents a wholly different significance.

Even among Nascent Soul Sword Cultivators, few can attain this realm.

The Artifact Spirit of the Blue Luminous Ice Heart Jutsu emitted slight tremors. Facing the Condensing Sword into Thread's Fifth Rank Primordial Yang Sword Evil, even as a Fifth Rank Magic Artifact, with a material nearly approaching Sixth Rank, it felt like a small cut had been inflicted.

[Before this kid grows up, quickly slay him. Otherwise, with his talent, he will certainly eventually master One Sword Breaks All Laws!]

Bing Yun Master immediately thought of this point, and the Artifact Spirit of the Blue Luminous Ice Heart Jutsu agreed, root out such talent without hesitation.

"This Magic Artifact is quite decent."

Chen Mobai, still leisurely expressing his opinion, after exchanging a move with the Blue Luminous Ice Heart Jutsu, gained a rough understanding of his newly mastered Sword Dao technique, his attention instead shifted to the invisible ice crystal chains.

Among his women, he felt most regretful towards Yan Bingxuan. This Magic Artifact matches her attribute perfectly, and in the future, once he brings Immortal Gate under control, he could find a reason to gift it to her.

Chen Xiaohei could use it as well, but she already had so many good things, including the Mystic Finger Sword, so this Blue Luminous Ice Heart Jutsu would merely be icing on the cake for her.

Things should be given to those in need!

"This will be the divine artifact that buries you and the entire Five Elements Sect!"

At this time, Bing Yun Master hadn't yet realized the severity of the issue, coldly speaking as she moved her hands like dancing ice butterflies. Under her control, the Blue Luminous Ice Heart Jutsu suddenly condensed into shards of ice, like a savage hailstorm, storming towards Chen Mobai.

The Fifth Rank Sword Sha, Condensing Sword into Thread realm, symbolizes formidable offensive power.

But while the Sword Cultivator possesses this advantage, it also represents low defense, high consumption, slow recovery, among other shortcomings.

She firmly believed that by wielding the Blue Luminous Ice Heart Jutsu, she could bury the unparalleled Sword Dao genius before her.

Her eyes revealed determination, and the Fourth Rank Ice Spirit Vein beneath the earth, driven by her cultivation technique, erupted, reinforcing the ice storm and turning the surroundings into a cage of cold ice.

However, Chen Mobai's expression remained as calm as water, with his Pure Yang Immortal Robe gleaming under sunlight, akin to a great sun descending, brewing ninefold auras, blocking all icy air outside.

Yet, the Pure Yang Immortal Robe can only shield against attacks below Fifth Rank, so facing the real ice shards of the Blue Luminous Ice Heart Jutsu, Chen Mobai exhibited the Sword Dao he had painstakingly cultivated in recent years.

The Primordial Yang Sword Intent captured loaded onto the Guidance Book, Chen Mobai's understanding of the Primordial Yang Sword Secret, unless Yuan Yang Ancestor is reborn, would not be surpassed by anyone.

Witness the Fifth Rank Primordial Yang Sword Sha under his Divine Sense sword control, flashing from threads to light, then linking pieces together, forming a rainbow, dispersing into pervasive Sword Qi, each strand like substance, sharp unmatched, amidst Sword Sound, precisely flashing to each ice shard created by the Blue Luminous Ice Heart Jutsu, sword tip colliding with ice tip, instantly all snow and ice melted.

Under this sword, various Sword Dao realms had been mastered.

Accomplishing this was not only because of the Primordial Yang Sword Intent's leadership but also due to Chen Mobai's prior comprehension of White Light Ancestor's Mo Bao Sword Scar.

Chapter 1932:

At that time, he could only cultivate to the Realm of Sword Wipeout Thunder Sound, but now his cultivation level has greatly improved, and he has furthermore comprehended the Immortal Sect Sword Art, thus he has made breakthroughs in Sword Dao.

Although he still hasn't understood One Sword Breaks All Laws, he has reshaped all the foundational aspects of Sword Dao, and under this sword, he has almost replicated ninety percent of the essence of Sword Dao found ahead in the Mo Bao Sword Scar left by the White Light Ancestor.

At his current realm, the White Light Ancestor's Sword Dao would presumably be at this level!

Thinking of this, Chen Mobai couldn't help but smile proudly, facing Bing Yun Master who has mastered a Fifth Rank Artifact, he didn't even use his own Fifth Rank Artifact, wishing to simply take down this opponent with his Sword Dao Realm.

In the midst of thoughts, the Primordial Yang Sword Evil crushed against the ice swiftly gathered into a strand of glittering Sword Threads, falling instantaneously before Bing Yun Master's forehead amidst the Sword Sound, gently descending.

An ice wall condensed; this was Bing Yun Master's protective spell, capable of automatically triggering when encountering danger, but when it came into contact with the sword threads, it was silently and effortlessly cut open!

Bing Yun Master's divine sense exploded, using the time gained by the ice wall, she condensed seven more strands with Blue Luminous Ice Heart Jutsu.

However, the result was the same, the Realm of Condensing Sword into Thread, these Rank-4 accomplished defensive spells, couldn't withstand even a single breath!

With a crisp sound of ding!

An invisible chain blocked in front of the sword threads, the Blue Luminous Ice Heart Jutsu materialized a form, bravely receiving this Primordial Yang Sword Evil, avoiding instantly losing its newly acknowledged artifact owner's head.

Seeing this, Bing Yun Master was greatly shocked; she had never thought Chen Mobai's Sword Dao was so formidable, her Ice Heaven Cultivation was simply vulnerable before the sword threads.

She gritted her teeth, knowing a fierce struggle was imminent, took out a crystalline blue elixir and swallowed it, afterward, the chill around her body became even denser, as if intending to solidify all surrounding air.

Yet Chen Mobai's current Sword Dao Realm was beyond comparison, imitating the Mo Bao Sword Scar of the White Light Ancestor, executed the Primordial Yang Sword Secret. Under his control, the glittering sword threads appeared alive, agile and free, bypassing the Blue Luminous Ice Heart Jutsu blocking ahead, slicing through layers of ice wall defenses, landing upon Bing Yun Master's neck!

Amid flames, the glittering sword threads had already swept through.

"Huh!"

But after severing the opponent's head, Chen Mobai felt something was amiss.

It was like cutting through a huge block of ice, rather than flesh!

Upon closer inspection, he instantly discovered the reason.

Just at the severed neck wound of Bing Yun Master by the sword threads, no blood flowed out, but instead, a gush of clear water emerged, subsequently froze; the already severed neck just got connected like this.

"What kind of Body Refining Technique is this?"

Chen Mobai asked somewhat unexpectedly, listening with Echoes in the Void, discovering Bing Yun Master now seemed to have transformed into an ice-water compound, although his sword could cut, the wound quickly sealed again as icy water under the opponent's Ice Spiritual Power, seemingly unharmed!

Bing Yun Master remained silent, swiftly forming seals with her hands, Blue Luminous Ice Heart Jutsu emerged from the void, entwining her arms, continuously drawing Ice Spiritual Qi from the depths of the earth and infusing it into her body.

This is the ice absolute immortal body handed down secretly through ice and snow, requiring a vast amount of True Qi to perform, Bing Yun Master, too, only dared to maintain it for a long time with the blessing of Blue Luminous Ice Heart Jutsu, plus having taken the secret medicine.

In past times, when ice and snow used the ice absolute immortal body in battle, it was only revealed at critical moments to block fatal strikes.

Yet Chen Mobai's Sword Dao Realm was exceedingly terrifying, she obtained Blue Luminous Ice Heart Jutsu too short a time to command effortlessly, thus couldn't completely block the Condensing Sword into Thread's Primordial Yang Sword Evil.

In the blink of an eye, Chen Mobai already commanded the sword threads, severing Bing Yun Master's body three more times.

Unfortunately, each time after severing, she seemed as if pouring water between two blocks of ice in the snowy land, quickly freezing together intact once again.

Meanwhile, the surrounding temperature plummeted, a palace illusion formed of ice sculptures slowly emerged with Bing Yun Master at the center, this is the domain ice heavenly palace after Ice Heaven Cultivation is pushed to the extreme.

Within this ice heavenly palace domain, any power that doesn't belong to ice attributes gets suppressed, the originally elusive Primordial Yang Sword Evil instantly revealed its traces, and its speed started decelerating.

At this moment, Bing Yun Master could now wait to perform this ice absolute immortal body only when the Primordial Yang Sword Evil was about to reach her.

And Chen Mobai was also enveloped by this illusory cold ice palace, yet under the Pure Yang Immortal Robe, he still felt warm as spring.

This was also the first time Bing Yun Master manifested such a realistic ice heavenly palace, Blue Luminous Ice Heart Jutsu indeed worthy of being a Fifth Rank Artifact sharing origins with her, substantially augmenting her cultivation techniques performed.

Within this palace, Blue Luminous Ice Heart Jutsu also seemed alive, transforming into white flood dragons as snow, spiraling and dancing in the air, carrying a biting cold wind, compressing and extinguishing the nine circles of light surrounding the Pure Yang Immortal Robe one by one.

Indeed, Fourth Rank Weapon couldn't withstand Fifth Rank!

Seeing this scene, Chen Mobai just warmed his body with Pure Yang Immortal Robe, subsequently pushed the power of Primordial Yang Sword Evil to the utmost of his current realm's mastery!

Chapter 1933: Showdown with the Icecloud Master (Part 3)

However, to avoid any accidents, he still took out the Heavenly Bead from the domain and held it in his palm. Being of the fifth rank lower grade, the Blue Luminous Ice Heart Jutsu could not break through the defense of this magic artifact.

With no worries left, Chen Mobai also used Bing Yun Master, this rare opponent, to start honing his recently achieved Sword Dao Realm.

He now mainly followed the sword intent of the Yuan Yang Ancestor. His sword-wielding technique, however, mimicked that of the White Light Ancestor. Under the unique guidance book, he combined the strengths of both, gradually transforming them into something of his own.

Fortunately, both were of the realm of 'One Sword Breaks All Laws', so when he pieced them together, he was able to find some common ground.

[Luckily this kid is only at the Nascent Soul Realm, and there aren't many opponents here for him to hone with. If he progressed further, even with the Blue Luminous Ice Heart Jutsu, I wouldn't be able to be his opponent!]

At this time, Bing Yun Master also realized that although Chen Mobai's Sword Dao Realm was formidable, it was somewhat immature for magic duels, indicating he didn't use it frequently.

Grateful that the Five Elements Sect dominated the Eastern Continent frontier, Bing Yun Master also considered using Chen Mobai as an opponent to hone her own skills and improve her synergy with the Blue Luminous Ice Heart Jutsu.

As for victory, it was already within her grasp.

In the Ice Palace, she would only grow stronger, while the opponent would gradually weaken!

With this thought, Bing Yun Master acted first, and under her urging, the Blue Luminous Ice Heart Jutsu transformed into countless icy blades, shooting toward Chen Mobai. Chen Mobai, on the other hand, used Divine Sense for sword control; the Rainbow Sword Qi was precise, breaking each apart with ease.

One cold, one hot, with overwhelming momentum, the battle grew increasingly intense.

With a resounding boom, the seal in the underground cave was completely shattered by their clash, and the nearby snow mountain rumbled, as if ready to collapse at any moment.

Unknowingly, one of Chen Mobai's pupils had turned golden, and Bing Yun Master and her Ice Palace Domain began to sketch into form.

During the exchange, Bing Yun Master's aura also grew stronger, continuously absorbing the surrounding ice spiritual energy into her domain, turning it into her power source, even suppressing Chen Mobai's fifth rank Sword Sha.

Once a Taoist Saintess of ice and snow, she could even use this domain to defeat the strong while being weak.

Logically, by now the roles should have reversed, and Bing Yun Master could have easily crushed Chen Mobai.

Yet Bing Yun Master noticed that as her aura grew, her opponent's Sword Dao Realm also matured from its initial immaturity, constantly advancing.

A few times, he even managed to precisely strike her by finding gaps while the Blue Luminous Ice Heart Jutsu was operating.

If not for the timely use of the Ice Absolute Immortal Body, she would have been killed by the sword threads.

[This person's level in magic duel is truly terrifying!]

Bing Yun Master, witnessing Chen Mobai's rapid growth, had to frequently change her position within her Ice Palace Domain.

To avoid overusing the Ice Absolute Immortal Body and exhausting True Qi!

Meanwhile, in this moment, the opponent's phantom in Chen Mobai's pupil completely took shape.

After seeing through the opponent, his Primordial Yang Sword Secret had been fairly well honed.

In an instant, Chen Mobai's offensive surged like a tide; his form that had been continuously flickering and dodging the Blue Luminous Ice Heart Jutsu no longer retreated but advanced step by step towards Bing Yun Master, each step carrying the might of thunder, the dark red, crystal-like sword threads under his command scattered into a brilliant meteor shower, integrating into the Ice Palace's spiritual power nodes!

The sword threads were as fine as cow hair yet as strong as steel, penetrating all obstacles.

Bing Yun Master tried to fend off the Blue Luminous Ice Heart Jutsu, but every sword thread was incredibly agile, like spirit snakes that bypassed every obstruction, swiftly forming a sword array in the Ice Palace, which then erupted with blinding brilliance and fierce roaring!

As Bing Yun Master's face turned pale, the sword threads, like traveling beams of light, contacted the surrounding void's Ice Heaven True Qi and instantly shattered her illusory Ice Palace.

In mid-air, the illusion of the Ice Palace shattered into countless snowflakes, and Bing Yun Master spat out blood.

The moment the Ice Palace was broken, she was backfired upon, her True Qi ran amok inside her, even disabling the Ice Absolute Immortal Body.

Chen Mobai, always attentive, immediately discovered this flaw.

A strand of shimmering sword thread flickered, slashing towards Bing Yun Master's head.

Bing Yun Master hastily circulated True Qi, with Divine Sense urging the Blue Luminous Ice Heart Jutsu to resist this fatal strike.

But it was all too late; the sword thread of the Primordial Yang Sword Evil dodged the Blue Luminous Ice Heart Jutsu and pierced her dantian Qi Sea, with immense power instantly reacting violently with her Ice Heaven True Qi, sending a massive shockwave throughout Bing Yun Master's body, her body flew back like a kite with a broken string, crashing heavily to the ground.

In that moment, the chilling wind had dissipated.

Supported by the Blue Luminous Ice Heart Jutsu, Bing Yun Master stood up with difficulty, but she seemed to have aged decades.

She looked up at the young man walking toward her step by step, the severe injury blurring her vision as she only saw the golden light surrounding him, particularly blinding.

Bing Yun Master's body was immobile, and with her dantian Qi Sea abolished, even if she survived today, when her Nascent Soul's True Qi was expended, it meant certain death.

Knowing she was utterly defeated, her gaze filled with unwillingness and regret, yet she still desired life.

If she kept living, perhaps she might find the opportunity to repair her dantian Qi Sea.

"Sect Master Chen, today was a misunderstanding, I am already gravely injured and dying, can you spare me a way out?"

She spoke pleadingly with an exceptionally weak voice, yet faced with even more brilliant and crystalline Primordial Yang Sword Evil!

"Sorry, although our contract is gone, the enmity still lingers; it's better to resolve it to avoid causing issues when I cultivate the void in the future!"

Chen Mobai spoke softly, yet cruelly to Bing Yun Master.

He was already considering cultivating the void! How arrogant!

Bing Yun Master, furious to the point of laughter, decided that if so, she would cause an irreparable catastrophic disaster for the Five Elements Sect and even the entire Eastern Wilderness with her last life.

Under her Divine Sense, the Blue Luminous Ice Heart Jutsu was manifesting.

The icy chains dropped from Bing Yun Master's wrists, plunging straight into the earth-deep ice spirit vein.

"Today, I shall detonate this underground Rank-4 ice spirit vein, freezing the entirety of the Eastern Wilderness Plateau's two nations into a land of ice and snow, annihilating all living beings!"

Bing Yun Master shouted with rage, her Nascent Soul already went out, merging into the Blue Luminous Ice Heart Jutsu.

However, what shocked her was that the underground ice spirit vein, already tamed by the Blue Luminous Ice Heart Jutsu, showed no reaction!

"It seems unfortunate, but I just set up the Sky Curtain Ground Network Formation, and this ice spirit vein happens to be within the range of the formation!"

With Chen Mobai's words, the Primordial Yang Sword Evil had already slain Bing Yun Master.

Chapter 1934: I Offer My Surrender

Sword threads flashed, and Bing Yun Master's body shattered, transforming into countless fragments that dispersed in the wind and snow.

Yet, her Nascent Soul had long vacated, amidst the Blue Luminous Ice Heart Jutsu, steering this Magic Artifact in a flight escape.

Chen Mobai's eyes gleamed, already using the Spirit Eye to calculate the flight trajectory of the Blue Luminous Ice Heart Jutsu. A cyan longsword flew out, piercing through the chain, nailing it against a snow mountain wall.

"Sect Leader Chen, spare my life, I can give you all the accumulations of the Ice Palace."

Bing Yun Master's face emerged from the Blue Luminous Ice Heart Jutsu, pleading with Chen Mobai not far away.

"These things are not as important to me as settling the score with you."

Chen Mobai knew that as a major sect of the East Land, the Ice Palace's foundation was undoubtedly immensely beneficial to him, but doing so would be akin to releasing a tiger back to the mountain.

After weighing the options, he made the most suitable choice.

Moreover, when Bing Yun Master's body dispersed, her Storage Bag was perfectly preserved by him, and with this, it was already enough.

With this thought, Chen Mobai executed Void Walk, arriving before the Blue Luminous Ice Heart Jutsu.

"Sect Leader Chen, this Fifth Rank Artifact is the supreme treasure of my icy world, with endless wonders. If you spare me, I can give you the Sacramental Refinement Mantra..."

Even at this moment, Bing Yun Master hadn't missed any opportunity to survive.

“Do I look like I lack Fifth Rank Artifacts?”

Chen Mobai chuckled, gripping the Qing Shuang Sword. Although the sword’s attributes did not align with him, after so many years of nurturing, it had already been elevated to the Fifth Rank level. Besides that, he also took out the Heavenly Bead in his palm.

[He actually hasn’t exerted all his strength!]

Seeing these two Fifth Rank Artifacts, Bing Yun Master was shocked.

Even within the East Land, Fifth Rank Artifacts are scarce; she felt herself very fortunate to possess the Blue Luminous Ice Heart Jutsu.

That Chen Mobai had two such artifacts was hard for her to accept, and still, she couldn’t make him use the Fifth Rank Artifacts.

“Sect Leader Chen, my Nascent Soul fused into the Blue Luminous Ice Heart Jutsu; its raw materials are almost Sixth Rank Ice Soul Cold Crystal and Invisible Spirit Crystal. You cannot refine them. Why not give me a chance? Spare my life and I’m willing to reveal all the secrets of the Ice and Snow Land to you, even help you find the Three Yin Dao Fruits left by the Extreme Yin Ancestor!”

Bing Yun Master hadn’t given up on survival, revealing her biggest trump card.

“Dao Fruit!?”

As expected, upon hearing this, Chen Mobai’s tone subtly changed, showing interest.

“Though I don’t currently have the Three Yin Dao Fruits, I have a way to find them by joining forces with the Blue Luminous Ice Heart Jutsu. Only cultivators practicing my sect’s Cultivation Technique can manage that, and Sect Leader Chen, if you vow to spare me this time, I can also vow that once the Three Yin Dao Fruits are found in the future, I will certainly offer them to you!”

Hearing Bing Yun Master's words, Chen Mobai looked at the Blue Luminous Ice Heart Jutsu with a different gaze.

Who would have thought that this seemingly ordinary Fifth Rank Artifact had such capabilities.

It shows the underlying strength of these Holy Lands was underestimated.

"Since the main part is the artifact, you are no longer needed!"

With "The Union of Differences," Chen Mobai had no fear of not being able to refine the artifact, so after retracting the Qing Shuang Sword, he urged the Heavenly Bead to transform into five-color light, suppressing the chain.

"A Fifth Rank Soul Fire is needed to refine my Nascent Soul hidden within the Blue Luminous Ice Heart Jutsu. Sect Leader Chen, there's no need for this, let's keep some cordiality..."

Bing Yun Master continued to plead, devoid of the aloof and indifferent demeanor from their initial meeting.

"I don't have Soul Fire, but I happen to have a Fifth Rank fire!"

Chen Mobai smiled, extracting his incomplete Douluo Eight Scenic Lantern, then placed a complete Douluo Fire on the wick. Though lacking lamp oil, the lamp base and wick could already sustain the burning of this Immortal Fire for a long time.

He held the lamp base cast from Purple-Gold Fire Copper, placing the Douluo Fire burning fiercely on the wick beneath the Blue Luminous Ice Heart Jutsu, causing this Fifth Rank Artifact to vigorously tremble and resonate.

If not for the Heavenly Bead's suppression, it was estimated the snow mountain where Chen Mobai stood would have collapsed.

Even so, the surrounding earth trembled violently; without Chen Mobai using the Sky Curtain Ground Network Formation, the area within a thousand miles would likely resemble an apocalyptic avalanche scene.

“What kind of flames are these!”

Hidden within the Blue Luminous Ice Heart Jutsu, Bing Yun Master sensed it too. Her Nascent Soul felt an unprecedented scorching heat, like a snowflake placed in a fire pile, slowly melting into snow water.

“No...”

With a cry of anguish, Bing Yun Master’s Nascent Soul turned into a wisp of blue smoke and vanished within the Blue Luminous Ice Heart Jutsu.

Upon Bing Yun Master’s demise, Chen Mobai also ceased the Douluo Fire’s roasting of the Blue Luminous Ice Heart Jutsu.

Gradually, the trembling of the surrounding snow mountains and earth began to calm down.

[Submit, or die!]

Looking at the Blue Luminous Ice Heart Jutsu restrained by the Heavenly Bead, Chen Mobai gently uttered.

“The Union of Differences” could completely refine the artifact only if the Artifact Spirit cooperated.

Clearly, the Artifact Spirits in the Tianhe Realm were not like those in the Immortal Gate, unable to be bribed with Spirit Stones and such, so he directly resorted to the simplest means.

Chapter 1935: I Surrender_2

Chen Mobai held the Douluo Eight Scenic Lantern, its wick enveloped in the fiercely burning Purple Green Divine Flame, swaying toward the invisible ice crystal chains.

The scorching sensation made the Blue Luminous Ice Heart Jutsu realize that if it were to be tempered by this Stat Fire for a long period, it might indeed melt into raw materials.

By then, as an Artifact Spirit, it would naturally be unable to survive!

The Artifact Spirit was utterly puzzled; why did a mere Nascent Soul Cultivator possess so many Rank-5 Artifacts, and a Rank-5 Immortal Fire specifically meant to restrain it.

Yet, even if clueless, it did not hinder its decision-making.

[Please spare my life, I am willing to submit!]

In the Tianhe Realm, all living beings possess an exceptional desire to survive.

[Very well, relax your heart and mind...]

Upon hearing the response, Chen Mobai immediately clutched the Blue Luminous Ice Heart Jutsu and proceeded with "The Union of Differences".

Despite being unaware of why, the Artifact Spirit obediently complied.

Before long, all its secrets unfolded before Chen Mobai's eyes.

...

A green Escaping Light flew over; it was precisely Zhou Shengqing.

The commotion from Chen Mobai's duel with Bing Yun Master was enormous. Added to that, once the Sky Curtain Ground Network Formation was completed, a central Array Plate was marked in Northern

Abyss City, leading Zhou Shengqing to swiftly receive the message regarding the Fourth Rank Ice Spirit Vein.

"Brother!"

Standing atop the snowy mountain, Chen Mobai saw Zhou Shengqing's Escaping Light and immediately waved at him; the latter promptly flew over.

"Junior Brother, what's the situation?"

"Bing Yun of Ice Palace stealthily infiltrated but was encountered by me, dealt with swiftly, and created a slight commotion!"

Chen Mobai casually recounted the incident, revealing the Blue Luminous Ice Heart Jutsu wrapped around his arm for Zhou Shengqing to inspect.

This Rank-5 Magic Artifact would typically remain hidden when not in use, invisible even to Divine Sense.

Yet it was perfectly restrained by the Echoes in the Void.

Had Bing Yun Master encountered anyone other than Chen Mobai, even a Nascent Soul Late Stage cultivator might not have met such a dire fate.

"Junior Brother, truly formidable!"

Listening, Zhou Shengqing could only give a thumbs-up in admiration.

With Bing Yun Master possessing a Rank-5 Magic Artifact, likely, even a combined effort with Mo Douguang might not have sufficed, yet Chen Mobai easily overcame him.

Such combat capability would likely render him invincible below the Nascent Soul.

"We alone need to know of this matter, as Bing Yun Master is part of a Holy Land lineage; apart from the Ice Palace branch, there are other heritages. Although I am not afraid, there is no need to create unnecessary trouble and impede our sect's development."

Chen Mobai spoke, and Zhou Shengqing nodded repeatedly, indicating no issue.

This aligns with local tradition: after defeating opponents, it is imperative to destroy the corpse with no trace left.

Chen Mobai then employed Void Walking, entering the sealed area buried under collapse. The interior remained intact due to the obstruction of Rank-5 ice walls.

This time, he listened carefully with Echoes in the Void, confirming there was nothing left but the massive Mother Locust carcass.

Finally inspecting the Locust's body, Chen Mobai did not let it go to waste, taking it directly.

The carcass serves as a fine material for Artifact Refining.

Upon returning to Northern Abyss City, Chen Mobai didn't linger, as the plans for the next decades are already set; it depends on execution now.

Before leaving, he summoned a few disciples.

After Liu Wenbo achieved Core Formation, he reclaimed control of the South Mountain Shop, leveraging the Five Elements Sect's influence to establish branches across various Immortal Cities in East Barbarians and East Wu.

Currently, the focus is on stabilizing the Borderland Three Regions market share while expanding towards East Land and East Yu, although these locations remain tenuous footholds.

In recent years, Liu Wenbo primarily concentrated on East Land, setting up the South Mountain Shop as a boutique based on Chen Mobai's instructions.

For this, Chen Mobai offered encouragement, urging his first disciple to strive harder.

Luo Yixuan had just returned; the Eastern Wilderness Wandering Mountain had been bathed in Spiritual Light, with the recent discovery of an uncharted realm within Fanhai Sect ruins. She had joined the commotion previously, only hurrying back upon hearing of Chen Mobai's emergence.

"Stay safe!"

To this, Chen Mobai advised with these words.

Lastly, Jiang Zongheng, who had integrated various Eastern Wilderness philosophies into a manuscript titled "Dao Law," aimed to deploy it as a standard across the entire Eastern Wilderness.

Chen Mobai thoroughly reviewed it, offering numerous amendments based on his experience.

This disciple shows a streak of idealism, yet parts of Dao Law are overly utopian; strictly adhering would render everyone a Saint!

"Take these statutes, initiate as a demonstration within a county in the name of the sect. Verify clarity, then roll out to the entire Eastern Wilderness."

"Yes, Master!"

Jiang Zongheng respectfully accepted the revised Dao Law from Chen Mobai.

"The 'Dao Law' is too grand a title for the current Five Elements Sect to bear; change it to 'Five Elements Law'."

Chen Mobai suggested another alteration; at least until Divinity Transformation is achieved before assigning it as Dao Law.

Jiang Zongheng nodded again.

"Ming'er, the responsibility of maintaining the Sky Curtain Ground Network Formation will be yours hereafter!"

Prior to departing, Chen Mobai entrusted Zhou Ming with this task; the latter, as a Rank-4 Array Master, possessed the highest Formation mastery in the Five Elements Sect aside from him.

Upon returning to the Yellow Dragon Cave Mansion.

Chen Mobai saw only the Little Yellow Dragon Girl come to greet him.

"Where's Qing Nu?"

"The mistress went to Wanhua Immortal City, intending to use the Poison Dragon Inner Pill to refine several furnaces of cultivation-enhancing elixirs."

The Little Yellow Dragon Girl conveyed Qing Nu's words to Chen Mobai, who expressed delight upon hearing them.

"Wonderful! It seems within a century, Qing Nu can attempt Nascent Soul Formation."

The Poison Dragon Inner Pill of Fourth Rank Peak contains immense Spiritual Power; if turned into elixirs, they can fully support Qing Nu through Nascent Soul Formation. Yet previously, Qing Nu adhered to her foundation, with Chen Mobai refraining from persuasion. Now, provoked by Yang Jing's body seizing and Kong Feichen's imminent plight, changes are finally being made.

"In such a case, I won't wait for her..."

Chen Mobai left a message for Qing Nu with the Little Yellow Dragon Girl, intending to enter "seclusion" and return to the Immortal Gate.

"Master, the mistress left this with me for you!"

The Little Yellow Dragon Girl retrieved a glass bottle from her Storage Bag, handing it to Chen Mobai; it was the Pure Yang Condensation Pill, freshly emanating its essence.

"Splendid!"

Chen Mobai happily accepted it, leaving further gratitude for Qing Nu with the Little Yellow Dragon Girl before departing.

This venture in the Eastern Wilderness stretched longer than anticipated.

Almost the entire Spring Festival holiday had been consumed.

Though primarily due to the unforeseen Bing Yun Master, the outcome was highly rewarding.

Considering the Three Yin Dao Fruits revealed after alliance with Blue Luminous Ice Heart Jutsu, Chen Mobai's thoughts warmed.

Despite practicing the Pure Yang Scroll clashing with the Three Yin Dao Fruits, they perfectly align with his daughter.

Moreover, knowing the Pure Yang Scroll achieves Divinity Transformation at most, to progress beyond, as directed by Yuan Yang Ancestor, attempting Yang Extreme Yin Life is advised!

Seizing even one of the Three Yin Dao Fruits' Shaoyin Fruits would greatly assist in comprehending Yang Extreme Yin Life.

Essentially, from any perspective, the Ice inheritance's Three Yin Dao Fruits bear great significance to him.

Regrettably, the Three Yin Dao Fruits have vanished since the Ice split.

The Blue Luminous Ice Heart Jutsu can sense them if near enough but lacks ability should the fruits already be refined unless the Dao Fruit cultivator willingly offers them.

After deliberating the Three Yin Dao Fruits, Chen Mobai brought forth Bing Yun Master's Storage Bag.

Chapter 1936: Immortal Sect Sword Art

Chen Mobai flicked his finger lightly, and the Space Talisman he just crafted landed, opening the storage bag of Bing Yun Master.

The first thing that came out was a large pile of Spirit Stones, clattering as they fell.

Chen Mobai counted them, there were over five thousand Superior Grade stones, and two Supreme Grade pieces.

Not bad, about half the wealth of Jin Feng ancestor.

Chen Mobai looked around and then stored them in his bag, specially crafted to store Spirit Stones, which he had refined while organizing the Sutra of Void. The storage bag has four spaces: low, intermediate, superior, and supreme grade Spirit Stones.

Currently, it contains over ten thousand Superior Grade Spirit Stones, hundreds of thousands of intermediate grade Spirit Stones, over twenty million Low Grade Spirit Stones, and sixteen Supreme Grade Spirit Stones.

If these were converted to Sect's Good Deed Points, he would be a trillionaire.

This wastage is due to him spending Spirit Stones lavishly in the Tianhe Realm, whether it was purchasing materials to refine elixirs or collecting Five Elements Essence, it was always a big expense.

Yet, even then, his Spirit Stones remain somewhat inexhaustible.

Because recently, Qing Nu's Danxia Pavilion has grown, and expenses for purchasing materials to refine elixirs have been largely covered by her, such as this batch of Pure Yang Condensation Pills.

Besides what's on hand, the Five Elements Sect's account also stores a huge amount of Spirit Stones. In addition to the Spirit Stones salary he, as the Sect Leader, receives from the sect each year, there's also the income transferred annually from the South Mountain Shop.

Chen Mobai didn't manage it personally; previously, he just posted tasks in the Spirit Treasure Pavilion, letting the sect purchase herbs and Spirit Materials for him, all paid from this account.

Later, when Qing Nu found out, she felt that as his wife, it was necessary to help manage this, so she checked the accounts carefully. Upon seeing a balance of more than ten million Spirit Stones, she was immediately stunned.

When she told Chen Mobai afterwards, he was also a bit surprised at having so many Spirit Stones.

Qing Nu had already found the cause when checking the accounts; the majority was earned by Song Huangdae, who helped him in real estate speculation during the Five Elements Sect's war with the external forces, when Northern Abyss City property prices were at rock bottom.

Upon hearing this, Chen Mobai recalled the great war with Xuan Xiao Taoist Palace. The outside world didn't have faith in the Five Elements Sect; countless cultivation families and sect powers in Northern Abyss City sold off properties and shops to minimize losses, all taken over by Song Huangdae.

After the Five Elements Sect's victory, property prices soared multiple times, and Song Huangdae decisively resold, making a huge profit.

Recalling this matter, Song Huangdae often regrets deeply, feeling he missed out greatly.

Because now, property prices have risen tenfold compared to back then.

If he had held out for now to sell, he could likely have helped Chen Mobai earn another billion Spirit Stones.

So now, Chen Mobai feels somewhat numb towards Spirit Stones.

Next, he picked up the book volumes.

These are the Ice Palace's inheritance. For Chen Mobai, unless it involves Divinity Transformation, they're largely useless, mostly just additions to the Five Elements Sect's library.

Yet after reading them, he felt he gained much.

After the Ice split into parts, it formed three veins: Ice Palace, Snow Mountain Sect, Jade Shatter Hall.

These three veins represent Taiyin, Mysterious Yin, Shaoyin, the Three Great Dao Fruits. The inherited cultivation techniques theoretically could lead to achieving Divinity Transformation Stage.

However, if one does not refine the Dao Fruit, this theoretical success rate is minute, though it provides at least one path. In future, when Chen Mobai governs the Immortal Gate and Yan Bingxuan cultivates to the Nascent Soul Realm, he might consider passing this technique for her study.

Besides Ice Heaven Cultivation, Bing Yun Master possesses inheritance from the other two veins; however, they only allow cultivation up to Nascent Soul Formation, beyond that, methods for Nascent Soul to Divinity Transformation and refining the Dao Fruit Mantra are absent.

Yet, they are still highly useful for Chen Mobai.

The Snow Mountain Sect's inheritance, the Mysterious Yin Scripture, requires a person with Innate Yin Meridian to practice, ideally with Pure Yin Body. It is rumored that the Extreme Yin ancestor had this body.

Precisely because of this, based on the Ice inheritance, only the Pure Yin Body can refine and merge the Three Yin Dao Fruits, achieving the Void Refining Realm.

Isn't this left for his daughter!

Seeing this, Chen Mobai is highly interested in the three veins of Ice inheritance.

The final Jade Shatter Hall inheritance, however, doesn't just include the Shaoyin Dao Fruit; the cultivation techniques even incorporate content from the other two Dao Fruits.

This Jade Shatter Hall is also a major sect in the East Land; during the division, it inherited the most foundation from the Ice, with three Nascent Souls.

After finishing the technique portion, Chen Mobai opened several boxes, and waves of cold air with faint light entered his view. Besides Water Mist Ice Crystal and Ice Marrow Pure Jade, there were five or six ice attribute Spirit Materials, all at least Fourth Rank.

Among them was a Fifth Rank Ice Soul Cold Crystal; the raw material for Blue Luminous Ice Heart Jutsu comes from this.

Chen Mobai thought for a moment, then stored all these Spirit Materials, planning to custom-create a Lifespan Artifact for Yan Bingxuan someday.

Aside from these, there were many herbs, basically cold ice or water attribute, which Qing Nu could use as materials for her alchemy when combining the Poison Dragon Inner Pill.

Additionally, there was a Fourth Rank intermediate grade Ice Blue Flying Sword and Jade Pendant, both typically used by Bing Yun Master, but once she obtained the Blue Luminous Ice Heart Jutsu Fifth Rank Artifact, she found it very difficult to wield, so during her battle with Chen Mobai, she did not use them.

Chapter 1937: Immortal Sect Sword Art (Part 2)

These two magic artifacts do not have artifact spirits, so Chen Mobai used the Precious Golden Light to inspect them, obtained the sacramental refinement mantra, and then stored them in his domain.

There were some elixirs left, which Chen Mobai briefly examined; they were all specifically for cultivators of the ice or water attributes, which he planned to give to Qing Nu in the future to see if she could utilize them.

Finally, Chen Mobai picked up a ball like ice jade, resembling both an egg and a cocoon, adorned with exquisite silver patterns, exuding an ancient and mysterious aura. His Echoes in the Void could perceive the life force slumbering within, and by harnessing the Void Spirit Eye, he gradually saw through the outer layers.

Inside, a silkworm rested, its species unknown. However, being treasured by Bing Yun Master suggested it was not an ordinary specimen.

This egg was placed on a crystalline jade plate, which contained ice spiritual energy rivaling that of supreme grade spirit stones. The pure spiritual energy was continuously absorbed by the egg, nurturing the silkworm's growth within.

Chen Mobai recalled his tenure as head of Qing Sang Academy, a university most proficient in cultivating mulberry, raising silkworms, and weaving. There should be records on this subject.

With this in mind, he immediately made a call.

Shortly afterwards, Song Mutu, responsible for Qing Sang Academy, sent over electronic files related to various silkworms. After comparing them, Chen Mobai found that four types required the absorption of ice spiritual energy to grow.

The one most fitting the requirements was a "Cold Flames Ice Silkworm."

This ice silkworm was nurtured from the essence of ancient glaciers. Although not a true spirit, it was a nature sprite capable of condensing the frost essence of the world into cold flames. The silk it produced was exceptionally resilient, and robes woven from it were impervious to water and fire.

If Chen Mobai wanted to refine his pure yang spell robe into a rank-5, he would need silk from such a nature essence silkworm.

Theoretically, this ice silkworm could molt nine times, by which time its strength would rival that of a true spirit.

There was no knowing how many molts the silkworm within this egg had undergone.

Thinking of this, Chen Mobai placed it carefully into his domain, simultaneously taking out the water mist ice crystal and other spiritual materials he had just stored away, arranging them around the egg, in anticipation of its emergence.

Having sorted through the contents of Bing Yun Master's storage bag, Chen Mobai was satisfied with what he found.

At least his daughter's path to deity transformation was paved.

By the time Chen Xiaohei formed his Nascent Soul using Five Elements Cultivation, he should also approach divinity transformation. Then, trading with the Snow Mountain Sect, he could acquire the complete Mysterious Yin Scripture.

With these thoughts, Chen Mobai rose, performed a void walk, and returned to his home in Red Sandstone City.

The family spent the last vacation together before returning to Wangwu Cave Heaven.

...

In the cosmic starry sky, a light of fleeing speed controlled a golden flying sword, arriving over a vast yet lifeless planet, revealing the figure of Lin Daoming.

He nodded lightly, sword in hand, and descended onto the planet's surface, finding a thoroughly excavated vein, and entered the underground via a mine tunnel.

This was the black soil planet in the Tianyang Star System, where the Immortal Gate had once discovered useful mineral deposits, prompting a decades-long excavation. However, the valuable veins had mostly been depleted, leaving scattered, difficult-to-extract remnants, abandoned due to low cost-effectiveness.

Lin Daoming had been responsible for wrapping up this operation in the past.

He had personally visited this black soil planet before, which was why he chose the place as his spiritual land for divinity transformation.

Because the minerals here were primarily earth attribute, they could be extracted and absorbed by him while in the Spiritual Pivot of All Phenomena state.

Despite being highly variegated, the quantity of spiritual qi was not small. Combined with his centuries of accumulation and the earth element crystal stones excavated from the Dragon God Star, it was barely enough to meet his energy needs for Nascent Soul to Deity Transformation.

If he could surpass the critical bottleneck and cultivate a primordial spirit, the power of Spiritual Pivot of All Phenomena could enable him to become the star core, allowing him not only to command the entire black soil planet but also attempt to refine the essences of the sun and moon, the universe.

However, Lin Daoming knew very well that his success in divinity transformation hinged on the fetal transformation essence condensed from the Dragon God Star.

This was painstakingly condensed after he became the spiritual pivot, quite unlike the naturally occurring fetal transformation essence of the Earth Element Star, which required filtration through the Immortal Sprout before refinement.

He had made a deal with Yan Xinji to share half of the fetal transformation essence with the Ascension Sect if condensed.

However, at the moment he left the Dragon God Star, Lin Daoming suddenly remembered a warning left by Qian Xing.

[Remember, you only have one chance at divinity transformation; falter, and you face existential extinction!]

Despite his departure from the Immortal Gate, Lin Daoming held deep respect for Qian Xing, revering his words as sacred teachings.

After careful consideration, he decided to make one final attempt on the black soil planet.

Deep underground, Lin Daoming set up a rank-4 spirit gathering array before taking out a spirit sealing tube.

Inside was a golden stream entwined with black currents, the fetal transformation essence he had condensed.

Unlike the fetal transformation essence separated from the furnace of life shards before, this one contained black tinges. However, Lin Daoming deemed it a difference between innate and acquired condensation, compounded by the differences between the Dragon God Star and the Earth Element Star. The near double nature of this tube's contents, and their rich concentration, likely accounted for the black-gold hue as a normal occurrence.

Chapter 1938: Immortal Sect Sword Art_3

Most importantly, this was his only chance!

Thinking of this, Lin Daoming stopped hesitating, took a deep breath, and opened the spout.

...

Time flies, and soon another three years had passed.

After taking six Pure Yang Condensation Pills, Chen Mobai had raised his cultivation level to the fifth layer of the Nascent Soul.

Reaching the middle stage of the Nascent Soul, coupled with the resistance to the pills, the elixir's effect on him was slightly less than he had imagined.

It should be noted that he had been cultivating at the fourth layer of the Nascent Soul realm for ten years. Though he was delayed by the Earth Network Great Formation and various official duties, he had a fifth rank Spirit Vein from the Heavenly Bead with him, having already progressed over one-third of this level. It was precisely these ten years of hard work and solid foundation that allowed him to nearly feel no bottleneck when breaking through this realm. Once his True Qi overflowed, he naturally reached the fifth layer of the Nascent Soul.

However, the remaining five Pure Yang Condensation Pills could no longer possibly boost him to the sixth layer of the Nascent Soul.

He wasn't disappointed about this.

Because in the Tianhe Realm, with Mo Douguang overseeing the Five Elements Commerce Association, the development in the East Continent was rapid, and it was almost time to collect the medicinal materials for another batch of Pure Yang Condensation Pills.

However, according to Chen Mobai's estimation, once he reached the sixth layer of the Nascent Soul, the Pure Yang Condensation Pills would have almost no effect on him.

If he wanted to advance quickly again, he would need to refine other elixirs.

Although he wasn't lacking in alchemical recipes, Chen Mobai didn't plan to rely on elixirs to advance for now, as his cultivation progress was a bit too fast.

Even if he planned to advance again, he would wait until Bai Guang Ancestor and the Spiritual Venerable had left.

Moreover, these past years, Qing Nu had been busy concocting the Poison Dragon Inner Pill with the materials he had given her from Bing Yun Master to refine elixirs and advance her own cultivation level, and Chen Mobai didn't want to trouble her further.

However, for breaking through to the fifth layer of the Nascent Soul so quickly, he would need some excuse.

With this thought, he went to the Immortal Gate National Library to apply to view the Immortal Sect Sword Art again.

With Bai Guang Ancestor's note, Chen Mobai could view the complete Immortal Sect Sword Art at any time and had already viewed it three times before.

Soon, he arrived at a private reading room, with eight paintings hanging inside, depicting mountains, water, stars, fresh wind, clouds, seas... immersing oneself there felt like arriving at a secluded tranquil place, relaxing both mind and body.

While purifying his essence, spirit, and energy with the Flame Lighting Technique to conceal traces of a breakthrough achieved with elixirs, Chen Mobai focused on the Immortal Sect Sword Art, beginning to consolidate the essence of the Sword Dao he gained from it.

He first arrived before the first sword diagram, its pattern very simple, depicting a Bai He flying over a green mountain.

This was Sword One: The Green Mountain Contemplates, Bai He Forgets Machine!

Chen Mobai naturally couldn't comprehend the meaning contained within this sword diagram, but this didn't prevent him from directly extracting the understanding that the creator of this sword diagram had for this form!

Similar to when he initially extracted the Primordial Yang Sword Intent, he directly extracted the most fundamental Sword Intent from the sword diagram.

And this Immortal Sect Sword Art was left by Zhang Daoshun.

According to Ancestor Yun Ya's notes, this individual, from the most powerful Immortal Sword Sect of the White Crane Dao Arena, was the youngest disciple under Wangji Daojun's lectures.

Unfortunately, when the Demon Lord emerged, the White Crane Dao Arena was destroyed, Wangji Daojun was also suppressed, and Zhang Daoshun along with Ancestor Yun Ya and others escaped and took on a mission from the Purple Cloud Palace, coming to the Earth Element Star.

The original Immortal Sect Sword Art consisted of nine forms, but unfortunately, Zhang Daoshun's Sword Dao Realm wasn't sufficient to depict the ninth sword diagram, hence only eight forms remained on the Immortal Gate side.

Since their Dan Ding Sect had a good relationship with the Immortal Sword Sect, Ancestor Yun Ya was aware that upon mastering the nine forms of the Immortal Sect Sword Art, integrating them would result in the Harmonization Sword of Wangji Daojun!

Chen Mobai was now recalling Zhang Daoshun's understanding of the Immortal Sect Sword Art.

Among these eight sword diagrams, Sword One served as the foundation.

The Green Mountain Contemplates, Bai He Forgets Machine.

This Bai He was the true body of Wangji Daojun.

When the Purple Cloud Palace spread the Tao teachings across the heavens, it descended atop a green mountain, and a Bai He happened to fly into the palace gate and settled on a meditation mat, enlightened by the Purple Sky Daoist Venerable, undergoing transformation and cultivation, ultimately achieving Harmonization with one sword and becoming the renowned Wangji Daojun.

As Chen Mobai extracted Zhang Daoshun's understanding, the sword diagram in his foresight gradually transformed.

On the once barren green mountain, a purple palace appeared faintly, with its grand door in the clouds, seemingly an Immortal Gate, directly aligning with the Bai He in flight.

The Bai He, unable to change its flight path in time, flew head-on into the door.

A towering and indistinct Daoist sat within the palace hall, and after the Bai He flew in and circled twice, it landed in front of the Daoist. The Daoist smiled slightly upon seeing it, then gestured towards a meditation mat on the left, and the Bai He seemed to commune spirit, standing on that mat while waiting.

Subsequently, Chen Mobai saw several Cultivators arrive from afar, entering this palace hall.

Once all the mats in the hall were filled, the grand door of the palace closed, and the Daoist began explaining the profound mysteries of the universe and the mysteries of the Great Tao.

Chen Mobai could only watch, unable to listen, which was quite a pity. If he guessed correctly, this Daoist was the Purple Sky Daoist Venerable.

Within the sword diagram, time passed swiftly, and soon the Daoist finished his lecture, coinciding with the conclusion of this sword technique form.

Chapter 1939: Immortal Sect Sword Art (Part 4)

The profound mystery of this sword technique lies within the Taoist's exposition.

However, ever since Wangji Daojun left behind this Sword One, every individual in the Immortal Sword Sect has comprehended it differently. Zhang Daoshun understood it as two kinds of sword intent: one serene and majestic like a great mountain, and the other agile and transcendent like a white crane.

Zhang Daoshun used these two sword intents as a foundation, comprehending the subsequent sword diagrams, and finally during his Divinity Transformation, he developed his unique 'Dao Destroying Sword,' becoming the youngest inner chamber disciple of Wangji Daojun.

After reading Sword One, Chen Mobai still only saw Zhang Daoshun's interpretation without any of his own insights.

However, he didn't mind, as long as it could be used, he continued to examine the nearby sword diagrams.

Sword Two: Follow the stars to light the candle, from the starlit winds.

Sword Three: The mountain leans against the broken sunset, the river swallows the sheer cliffs.

Sword Four: White dew warms the sky, the pure moon flows through the heavens.

Sword Five: Green peaks frost at dawn, looking up with hope at the dragon tower.

Sword Six: Brush away snow to search for spring, burn lamps to continue day.

Sword Seven: Half a stream of moonlight, a pillow of fresh wind.

Sword Eight: Heaven and earth are dustless, mountains and rivers have shadows.

After going through them, his understanding of 'Dao Destroying Sword' deepened further.

Additionally, Chen Mobai saw traces of the Primordial Yang Sword Secret in these eight sword diagrams.

Originally, when the Yuan Yang Ancestor created this sword secret, it was also in reference to the Pure Yang Scroll and the Immortal Sect Sword Art, two major Deity Transformation techniques. This

Primordial Yang Sword Secret is the Yuan Yang Ancestor's understanding of the Immortal Sect Sword Art.

Because of this, Chen Mobai has also deepened his comprehension of the Primordial Yang Sword Intent he originally intercepted. That's why he could slay Bing Yun Master without using a Rank-5 sword artifact, solely using the Primordial Yang Sword Secret.

The complete Immortal Sect Sword Art, according to Zhang Daoshun's understanding, includes three thousand types of sword intents, each able to break all laws with one sword and also birth all laws with one sword.

Of course, since these sword diagrams are not the original versions, but mere imitations from Zhang Daoshun's memory, they contain only twenty-four types of sword intents. Still, they essentially encompass all the sword intents a sword cultivator could comprehend.

Therefore, within the Immortal Sect, sword cultivators never lack methods for Divinity Transformation, but unfortunately, very few can successfully tread this path.

Chen Mobai, after reviewing all eight sword diagrams, thus stabilized his understanding of the 'Dao Destroying Sword' and the Primordial Yang Sword Secret and then revealed his breakthrough's aura.

Soon after, news that the Orthodox Law Hall Master had comprehended the Immortal Sect Sword Art and achieved a realm breakthrough spread throughout the Earth Element Star and Dragon God Star.

"Your family's swordsmanship talent is truly terrifying!"

Upon hearing this, Qian Xing in the Lingxiao Palace couldn't help but comment to Yu Baiguang beside him.

"Oh, not at all. In terms of swordsmanship, he is slightly less skilled than I am; after all, when I was at his level, I was already close to mastering 'One Sword Breaks All Laws!' and had even advanced far beyond 'One Sword Births All Laws!'"

Despite his words, the corners of Yu Baiguang's mouth turned up slightly, eyes overflowing with joy.

"That's good too. Qi Yuheng has taken the last step, and Narcissus has refined the Divine Domain. In the future, if Pure Yang transforms into Divinity, I can leave with peace of mind."

Qian Xing remarked with a sigh as he observed the Dragon God Star below, where the Spiritual Light was gradually dimming.

Ultimately, he decided to stay and not leave with Bai Guang and the Spiritual Venerable, believing in his consistent success experience.

"That must be quite tough for you! But are you staying because you're worried that after leaving, there will be no successors in the Patching Heaven Lineage, and they might be suppressed?"

Yu Baiguang teased with a playful face, and the Qian Xing Ancestor could only laugh silently in response.

"At our level, there's no longer any sect bias. If I valued that, I wouldn't have let Lin Daoming go. With his qualifications, combined with the Spiritual Pivot of All Phenomena, gifting him the Earth Dragon God's essence and Earth Dragon God's divine nature of this Dragon God Star, he'd easily transform into Divinity."

Listening to Qian Xing's words, Yu Baiguang appeared curious.

"I can't quite understand that. If our Weapon Dancing Sect had such promising juniors, I'd certainly do my best to assist them in transforming into Divinity. Isn't Lin Daoming quite capable, diligently serving the Immortal Sect for hundreds of years?"

Qian Xing smiled slightly, regrettably shaking his head, and mentioned the Immortal Sprout cultivation plan.

Coincidentally, the time when Qing Nu and others were deployed was the same as when Yu Baiguang reincarnated.

Though Qian Xing had been leisurely gaming up the mountains, he was mostly aware of all the Immortal Sect's actions. However, Lin Daoming's collaboration with Yan Xinji was discovered by Ying Guanghua, who reported it to Qian Xing and received his authorization to lead the Department of Law Enforcement and the Patching Heaven Group to seal off the experiment in Yu Wood City.

But considering Lin Daoming was, after all, the Head of Immortal Affairs, and part of their Patching Heaven Lineage, Qian Xing minimized the issue, suppressing it.

Qian Xing did not pursue it, and with Yu Baiguang in seclusion, the other three lineages, even if aware, didn't dare speak much of it.

However, the event diminished all of Lin Daoming's positive impressions in Qian Xing's heart.

Since then, most of the power from the Patching Heaven Lineage began to shift into the hands of Ying Guanghua, making Lin Daoming an ostensibly titular Sect Master, laying the groundwork for his later allegiance to the Ascension Sect.

Knowing that he made such an error, even if the Immortal Sect had Divinity Transformation opportunities, Qian Xing would definitely consider him last.

"I can't believe this happened!"

Yu Baiguang squinted her eyes upon hearing about the Immortal Sprout cultivation plan, a flash of cold light in her gaze. If she hadn't been in retreat at the time, knowing this, she surely wouldn't have been as lenient as Qian Xing, at the very least demoting Lin Daoming from his position as the Head of Immortal Affairs, rather than waiting for another assembly.

"One can only say it's the difference between becoming an immortal or a demon, but when I first saw Lin Daoming, the divinations already indicated this."

"But I still gave him the chance, making him the Sect Master of the Immortal Sect. Unfortunately, at the crucial moment, he couldn't hold to his core."

“Yet, considering his five hundred years of diligent service as the leader of the Immortal Sect, I spared his life, allowing him to leave the Earth Element Star.”

“It’s also a matter of timing and fate. After Lin Daoming’s actions were exposed, the portal began to fluctuate. Had it happened decades earlier, he surely wouldn’t have taken this path...”

Upon hearing Qian Xing Ancestor’s explanation, Yu Baiguang decided not to delve further. However, she felt that Lin Daoming’s luck was too unfortunate, for once the portal fluctuated, it signified an impending world-class war. As Sect Master of the Immortal Sect, he would have been the first to receive Divinity Transformation resources.

At that moment, a golden light streaked across the heavens, spanning a vast distance in the blink of an eye, arriving before the two of them.

“Greetings to the Spiritual Venerable!”

Both Qian Xing and Bai Guang were there today specifically to await the Spiritual Venerable.

As the time was about right, the Immortal Sect had already exhausted most resources from the Dragon God Star, leaving only the most precious, the Star Core.

Chapter 1940: Spiritual Venerable’s True Body

After Chen Mobai exited seclusion, due to his realm breakthrough, many people called to congratulate him.

They were all his friends, such as Wenren Xuwei, Ming Yuhua, and others.

On this day, he had Zhuang Jialan take Wang Xinying to Xianwu Hall to collect the Golden Liquid Jade Pill, while he went to welcome the military cultivators returning from Dragon God Star.

This was the last batch, consisting of those cultivators from Xuanwu Dao Palace.

Because Narcissus was in seclusion, and Chen Mobai was busy, he requisitioned Nangong Xuanyu, who was still registered at the Hall of Orthodox Law as a Nascent Soul cultivator, to pilot Xuanwu Dao Palace through the cosmic void back from Dragon God Star.

“Greetings to the Orthodox Law Hall Master.”

After receiving Xuanwu Dao Palace outside the Earth Element Star, Nangong Xuanyu voluntarily flew out and saluted him.

“You’ve had a hard journey!”

Chen Mobai had long resolved any grievances with him, and now treats him as a regular subordinate.

After a couple of exchanges, the two became silent. Chen Mobai had a group of artifact refining experts alongside him inspect Xuanwu Dao Palace and its accompanying North Heavenly Gate, Star Space Battleship, and ensured there were no issues before bringing the group of returning immortal sect disciples to the surface.

The place they landed was a vast city prepared in advance, equipped with all necessary facilities.

To prevent infections from outer planets or undetectable creatures like Gnawing Gold Fire Ants from being brought back, they needed to stay here for a period, undergoing thorough checks before they could each return home.

After arranging the military cultivators, Chen Mobai transformed into a silver light and arrived before the portal, through which he transmitted to Dragon God Star.

Once he arrived, he sensed an environment different from before.

The radiation from the universe, the explosive solar energy from the stars, forced even a Nascent Soul cultivator like him to unfold a True Qi defense.

Upon lifting his gaze, he understood the reason.

The Heaven and Earth Placenta that initially enveloped Dragon God Star was now reduced to a final corner, Qi Yuheng had transformed into the world, refining the last piece of the shapeless membrane and also extracted the Sky Curtain Ground Network Formation from the planet, integrating it into his Law Body, and Chen Mobai happened to arrive at this opportune moment.

Seeing Qi Yuheng already wrapping up his cultivation, and with Beiming Master and Yunhai Master at his side, he greeted them.

Qi Yuheng's current aura was entirely different from before, sitting in a void, Chen Mobai seemed to hear an entire world clamoring within him.

His body subtly surrounded by six strands of immortal aura, a result of Qi Yuheng just breaking through Six Imperial Scripture and unable to fully control his Primordial Spirit.

Seeing this scene, Chen Mobai's eyes filled with envy.

With Six Imperial Scripture as the foundation for Divinity Transformation, Qi Yuheng's future achievements are certainly not low.

Soon, Qi Yuheng finished his cultivation and nodding lightly, greeted Chen Mobai before a few of them headed to Lingxiao Palace together.

In the starry sky, besides the Double Saints of the Immortal Gate, there was also a blonde female cultivator whom Chen Mobai hadn't met before but could easily guess was the Spiritual Venerable.

Chen Mobai and others saluted the three Divinity Transformed individuals and stood at the back, while Qi Yuheng stood beside Qian Xing.

After Divinity Transformation, he became the third saint of the Immortal Gate!

A majority of the Nascent Soul cultivators from the Immortal Gate were present here, besides the Three Hall Masters, including principals from various Daoist Academy and Scholarly Mansion.

However, some were absent, such as Nangong Xuanyu who had just returned, Narcissus who was consolidating her realm in seclusion in the Sea Territory, Yuxiao Master, and others.

After greeting the crowd, Chen Mobai went to Master Chengxuan's side.

While the Nascent Soul cultivators were exchanging dialogues, Qian Xing gestured towards Dragon God Star below, and soon two invisible small realms manifested in the void, shrinking from the vast sky-covering expanse to fist-sized, landing in his palm.

These were the remaining two Divine Domains, the Sea Dragon God's had already been refined by Narcissus, and due to the involvement of a chance for Divinity Transformation, it was kept by Qian Xing.

Without the concealment of the Heaven and Earth Placenta, Dragon God Star was entirely exposed to the universe, the entire planet following its trajectory, moving at a rapid pace, various gases burning on the planet's surface, transforming into diverse flames.

If left unchecked, this star would soon become cosmic debris.

"I'm going to retrieve the Star Core, lend me your support."

At this point, the golden-haired Spiritual Venerable spoke, and the three saints of the Immortal Gate immediately nodded.

Qi Yuheng stepped forward, his right hand spreading five fingers, the Divinity Transformed Six Imperial Scripture unfolded, and he controlled the six great primordial energies of the Dragon God Star – Yin, Yang, Wind, Rain, Dusk, and Light, subsequently in his Primordial Spirit's control, forming a new Heaven and Earth Placenta around the entire star.

Having refined the Heaven and Earth Placenta of Dragon God Star, Qi Yuheng was already familiar with its structural rules so was able to effortlessly fashion a new one from the star's various elemental gases.

Nonetheless, as this was not a creation by Heaven and Earth, his True Qi was required for its maintenance.

Chen Mobai noticed that after Qi Yuheng exhibited this, his entire energy diminished significantly, clearly indicating this was indeed an amazing great divine power.

At the same time, the Spiritual Venerable transformed into a ray of golden light and vanished from the spot, causing the already cleaved Dragon God Star to be pierced by another golden beam once more.
