

World 1951

Chapter 1951: Bai Guang's Departure (Part 4)

“No wonder it's the Patching Heaven Celestial Light of Ancestor Illusion Color, truly formidable...”

Seeing this scene, Lin Daoming nodded slightly, knowing he had found the place.

This ancient battlefield was the closest stellar trajectory point to the Earth Element Star when the Three Eyed Tribe was first encountered by the Immortal Gate during its opening war.

During that opening war, the portal was opened here.

In the end, Ancestor Illusion Color of the Patching Heaven Lineage, using the Patching Heaven Seal, sacrificed themselves to send the star where the Three Eyed Tribe resided out of the Tianyang Star System and sealed the portal.

What Lin Daoming needs to do now is to bring the Three Eyed Tribe back!

As the former Sect Master of the Immortal Gate, Lin Daoming was very aware of the foundation of the Immortal Gate, and just the Lingxiao Palace alone was not something he could contend with.

So he needed stronger allies!

In the history of the Immortal Gate's opening wars, aside from the Three Eyed Tribe, there was another near-extinction crisis—the Ming Wang Star!

As long as he can summon back these two stars tainted by Demonic Thought, unless Bai Guang and Spiritual Venerable return, otherwise with just Qian Xing and the other two newly ascended Divinity Transformations, it would be impossible to stop them.

The Chaos Primal Energy Cannon at best could destroy one world!

Whether it is the Three Eyed Tribe or the Ming Wang Star, both have the terrifying foundation capable of contending with the Immortal Gate at its peak.

Most critically, the supreme beings of these two worlds, like Lin Daoming, are also heirs of the Demon Lord!

Thinking of this, Lin Daoming no longer hesitated. He began to arrange the formation to summon the Three Eyed Tribe in the starry sky of this ancient battlefield, based on the mysterious knowledge emerging from the black-gold talisman in his forehead.

On Earth Element Star, while playing a game, Qian Xing suddenly felt a heaviness in his heart, his actions slowed, and the protagonist in the screen was devoured by the final level boss.

“Strange...”

Qian Xing was very aware this was a sign his disaster was approaching.

As the current head of The Divine Machine Mansion, his divine calculation techniques were unparalleled, with no predecessors and unlikely to have successors as capable as he was.

The last time he had such a feeling was when facing Yu Baiguang’s Mystic Finger Sword.

Even other events like the opening war brought alerts, but not this kind of feeling.

Could it be, his attempt to seek emptiness through subtraction would fail?

Qian Xing frowned, recalling his recent arrangements.

After the opening war ended, with Spiritual Venerable and Bai Guang leaving, Qi Yuheng and Narcissus each guarding the sea territory of the Immortal Gate, and strong figures in The Three Great Halls, Qian

Xing believed he could safely start his reincarnation, so he was already choosing the place and the candidate for his subtraction-to-see-emptiness.

Previously, Yu Baiguang had given him a good example. Since body seizing was prohibited, one could only reincarnate, preferably into a stillborn with blood ties.

Qian Xing, having lived over a thousand years, didn't marry, but he had parents and relatives. However, since he needed to wait for a stillborn, he didn't proceed directly. He didn't want to incur karma, so he sent some puppet incarnations into the mundane world to watch and await the opportunity.

Unexpectedly, this waiting brought a forewarning of disaster!

This made the always fatalistic Qian Xing hesitant.

Yu Baiguang succeeded in subtraction to seek emptiness because she was simple-minded, reckless, and met Chen Mobai, the most talented person in Immortal Gate's history.

But what about him?

Comparing to Yu Baiguang, Qian Xing's nature was the complete opposite. Could her successful experience really apply to him?

With doubts in his heart, Qian Xing decided to think carefully.

However, he did not withdraw those puppet incarnations in the mortal world and continued to observe his relatives with blood ties.

After thousands of years of reproduction, even Qian Xing couldn't sort it out, but he kept an eye on the closest branch.

Namely, the lineage where his disciple Chen Chun's parents belonged.

...

“Through voting, Ye Yune was elected as the new Hall Master of Kaiyuan Hall, and Councilor Shi Miao was elected as the Vice Hall Master of Kaiyuan Hall...”

It was another year-end, during the Kaiyuan Hall council meeting, already a Divinity Transformation, Qi Yuheng voluntarily stepped down, and Ye Yune, then Vice Hall Master, was unanimously elected as the Hall Master of Kaiyuan Hall.

Aside from Kaiyuan Hall, the Hall of Orthodox Law also elected a new Vice Hall Master.

It was the former Enforcement Department Director, current Military Department Commander Wen Lianshan.

When Chen Mobai was elected as the Hall Master of Orthodox Law, due to the aftermath of the opening war, the position of Vice Hall Master was temporarily vacant.

After Nangong Xuanyu returned, he was very covetous of this position too.

But although Chen Mobai settled his grievances with him, he would never allow him to meddle in his own realm.

Because of White Light Ancestor's departure, the Patching Heaven Lineage was restless, aiming to take over the Hall of Orthodox Law.

Chen Mobai could only, after a friendly exchange with Ying Guanghua, offer his full support for Ye Yune's leadership of Kaiyuan Hall in exchange for the support of the Kunpeng Lineage, thus ousting Nangong Xuanyu from the Hall of Orthodox Law.

The justification was that the opening war consumed too many resources of the Immortal Gate, and to save spiritual energy and spirit stones, Chen Mobai planned to reduce military forces.

By demoting a Nascent Soul Superior, the resources saved could supply an army, so Nangong Xuanyu was demoted, sent back to Pure Yang Academy to teach and nurture talents.

Naturally, the Patching Heaven Lineage retaliated, but with Qian Xing remaining uninvolved, Ying Guanghua was powerless against the combined might of the three lineages, and had to agree reluctantly.

Without Nangong Xuanyu, Wen Lianshan effortlessly won, but his resume was indeed impressive, having served from the Patching Heaven Group, to the Enforcement Department, to the Military Department; he also earned merit alongside Narcissus on the Xuanwu Dao Palace and Dragon God Star.

But in the Military Department, there were several commanders with resumes similar to Wen Lianshan's.

The reason he was chosen was because Wen Lianshan was the most suitable person.

Wen Lianshan himself knew very well he mainly wanted a share of Infant Forming Spirit Medicine, and as soon as the Infant-Accumulating Elixir he desired was in hand, he'd resign voluntarily.

Wen Lianshan was paving the way for Zhongli Tianyu, for which the Zhongli Family also paid no small price.

Apart from Kaiyuan Hall and the Hall of Orthodox Law, the Xianwu Hall also went through a series of position adjustments.

Lan Haitian continued rising and wanted to compete for the current batch of Infant-Accumulating Elixirs. Originally, he wasn't in such a hurry, but with Chen Mobai's example ahead, he felt that if he waited another hundred years, he might miss more opportunities, so he didn't want to wait for a future batch of Infant-Transforming Elixirs and decided to compete now.

After the meeting, Chen Mobai also had a conversation with Lan Haitian before returning home.

After dining with Shi Wanyu and her daughter, he habitually went to his Cultivation Room, then clicked Turtle Treasure to arrive in the Eastern Wilderness.

Now, all three of the Immortal Gate's Divinity Transformations were in closed-door training, allowing him to travel between the two worlds at ease.

Chapter 1952:

After returning to the Yellow Dragon Cave Mansion, Chen Mobai first checked Turtle Treasure's pop-up.

[Void Essence discovered, do you want to refine it?]

[Taixu Gate discovered, do you want to absorb and refine it?]

[Detected that the host's realm is insufficient, unable to refine.]

...

These were contents he hadn't checked, constantly looping.

Chen Mobai had already learned from Ancestor Yun Ya's notes about the origin of the portal, understanding that it was an imitation infused with the Dao Rhythm of the Taixu Gate.

Turtle Treasure probably sensed this, mistakenly identifying the portal as the Taixu Gate.

Because of this, Chen Mobai also became more perplexed.

It should be known that the Taixu Gate is the Innate Supreme Treasure suppressing the Central Dojo of the Purple Cloud Galaxy, the highest-grade legal treasure in this universe, manifesting the substance of the Void Great Dao, and one of the foundational Dao treasures of the universe.

In terms of cultivation level, it is equivalent to the eighth rank Pure Yang and even to the Demon Lord.

If Turtle Treasure could refine the Taixu Gate, how high would its level be?

Or perhaps, Turtle Treasure is just targeting the portal, not the Taixu Gate itself.

Regarding this matter, Chen Mobai could only keep it in his mind, waiting to explore the portal further in the future when his cultivation advances.

After all, even Turtle Treasure said that his cultivation level was insufficient to refine.

As for the Void Essence, it should be the essence of higher-level void power burst out after the destruction of the Dragon God Star, probably useful to Turtle Treasure.

Chen Mobai also memorized it, then recalled the heritage of the Dan Ding Sect.

Dan Ding Taoist was skilled in both dan and artifact, but unfortunately, Ancestor Yun Ya, a Supreme Elder, focused solely on artifact refining, thus Weapon Dancing Sect on Earth Element Star became the Refiner's Ancestral Court. The alchemy aspect, apart from the Dao Fruit of Dan Cauldron Jade Tree, is considered lost.

However, the path of artifact refining retained the complete heritage of Dan Ding Taoist.

The limit of the Acquired Path of Artifact Refining is sixth rank artifacts, treasures at this level are also called Acquired Supreme Treasures.

And above the sixth rank, all belong to innate items, or are refined from innate spiritual materials, are embodiments of the Three Thousand Great Dao, most are born and nurtured by heaven, such as the Taixu Gate.

The seventh rank is called Innate Spiritual Treasure, and the eighth rank is called Innate Supreme Treasure.

Of course, acquired legal treasures can surpass limits becoming seventh or even eighth rank.

A cultivator's lifespan artifact will advance with the cultivator's cultivation level, if a cultivator harmonizes with the Dao or attains Pure Yang, then these lifespan artifacts become Treasures of Dao.

The most powerful Treasures of Dao are even comparable to Innate Supreme Treasures.

The Dan Ding Sect's artifact refining technique heritage comes from Purple Cloud Palace, recording all these things.

Chen Mobai took out Turtle Treasure's entity, observed it for a long time, knowing that the level of this thing is at least above sixth rank, meaning it is an innate item.

Realizing this, his heart was slightly excited.

Even the grandmaster of the Dan Ding Sect, Dan Ding Taoist, after leaving Purple Cloud Palace, only received a seventh rank cauldron, which unfortunately shattered while resisting the Demon Lord.

However, he, as a junior at a mere Nascent Soul Realm, possessed a Turtle Treasure that is at least seventh rank, possibly even eighth.

But according to the Dan Ding Sect's artifact refining technique heritage, Chen Mobai believed his Turtle Treasure should only be seventh rank, for it's clearly also a legal treasure of the Void Great Dao, and in this universe, the source of void-related legal treasures is the Taixu Gate.

Thus, no matter how miraculous Turtle Treasure is regarding void, it absolutely cannot surpass the level of Taixu Gate.

After all, the previous owner of the Taixu Gate is Purple Sky Daoist Venerable who attained the Creation.

Thinking this way, Chen Mobai wasn't regretful, respectfully placing Turtle Treasure into the domain for offering.

After coming out, the little Yellow Dragon Girl immediately came over: "Greetings to Master."

"Are you the only one here?"

Chen Mobai asked, and the little Yellow Dragon Girl nodded slightly, then took out a glass bottle from the storage bag and handed it to Chen Mobai.

"Mistress is in seclusion, she asked me to give this to you."

This bottle of elixir is naturally the new Pure Yang Condensation Pill.

Although Chen Mobai said not to hurry, it was evident that both the Five Elements Sect and Qing Nu prioritized his affairs.

They had long collected all materials, ready for refining.

Chen Mobai took the elixir, feeling grateful for having a good Daoist couple, he asked about the situation of the Five Elements Sect over the years.

But the little Yellow Dragon Girl knew nothing.

She is a house dragon, and being a True Spirit, she seldom leaves the Yellow Dragon Cave Mansion, which is a secluded place for Chen Mobai and his wife, with few visits from people of the Five Elements Sect.

Only disciples like Liu Wenbo and Zhuo Ming occasionally came to pay respects.

And they wouldn't talk about sect affairs with the little Yellow Dragon Girl.

Chen Mobai was slightly taken aback, realizing he asked the wrong dragon, took out the Heavenly Communication Device, initially intending to call E Yun and Zhuo Ming over, but decided against it considering Qing Nu was in seclusion, choosing to visit Northern Abyss City instead, along with inspecting the development of new cities in the Eastern Wilderness.

Thanks to Zhang Pankong's tremendous support, the entire Eastern Wilderness has been interconnected with various teleportation arrays of different sizes, so Chen Mobai quickly arrived at Northern Abyss City through the teleportation array outside the Stormy Immortal City.

"Greetings to Sect Leader!"

E Yun, having received the news, immediately came to pay respects.

Chen Mobai, while sipping tea, inquired about the sect's situation and received many good tidings.

Chapter 1953:

For example, the last batch of Golden Liquid Jade Pills allowed Yulian, Ban Zhaodan, and Yan Yuanhao in the sect to successfully form their core, adding three Golden Core cultivators to the Five Elements Sect.

However, alongside success, there is naturally failure. Chen Mobai's good friend Yuan Chiye did not succeed.

At this point, E Yun's expression also turned a bit gloomy.

Back when they were part of the Divine Wood Sect, their small circle centered around Chen Mobai, E Yun, and Yuan Chiye.

It was just that Yuan Chiye's aptitude was somewhat lacking. Even after so many years of diligently polishing his essence under Chen Mobai's guidance, he still couldn't pass this hurdle on his first attempt.

"How is his injury?"

Upon hearing this, Chen Mobai was visibly regretful and asked with concern.

"With the Core Formation Insights you left behind, Master Yuan did not forcibly push through to condense the pill when he sensed signs of failure. Plus, with the Golden Liquid Jade Pill, he only lost some of his essence and vital energy."

E Yun immediately replied, and Chen Mobai breathed a sigh of relief, then asked if there were any Golden Liquid Jade Pills left.

"There are currently two pills in stock."

"Reserve one for Yuan Chiye. Once he recovers, assign him some high-contribution sect tasks to expedite his exchange..."

Chen Mobai has always been very considerate to his people, and E Yun nodded in agreement, indicating that everything was arranged.

"Since my seclusion, who else has completed their Foundation Establishment and exchanged for Golden Liquid Jade Pills?"

Chen Mobai asked, recalling that from the batch of Golden Liquid Jade Pills previously refined by Qing Nu, he had taken one pill for his cousin, Wang Xinying. Benefitting from the synergy of two Golden Liquid Jade Pills, she luckily crossed this threshold and is currently stabilizing her realm.

Five of the remaining nine pills had been reserved before he went into seclusion.

"It was Uncle Master Ji Guanhai of the Water Vein and Uncle Master Green Pearl of the Earth Vein. Uncle Master Ji Guanhai failed once again, and no news has come from Uncle Master Green Pearl yet. It seems she will wait for Elder Zhou to exit seclusion before taking it."

E Yun is a disciple of Meng Hong, who is a disciple of Zhou Shengqing, making him of the fifth generation in the Five Elements Sect.

Faced with Ji Guanhai and Green Pearl, E Yun has to refer to them as uncle-masters, even though his realm is higher.

Ji Guanhai is a disciple from Nu Jiang, who had already failed once before, and failing this time again means he will likely never form his core.

Nominally, Green Pearl is a disciple of Zhou Ye, but everyone in the Five Elements Sect knows she is also Zhou Ye's maid. Green Pearl's aptitude is somewhat lacking, with only a four-spirit root. Even with Zhou Ye's guidance and the resources from the Earth Vein, she has only just barely completed her Foundation Establishment now.

According to the Five Elements Sect's rules, someone with Green Pearl's aptitude, even having completed Foundation Establishment, shouldn't be allowed to exchange for the Golden Elixir Spiritual Medicine. But Chen Mobai believes in leaving hope for everyone, so he didn't enforce this rule.

He even publicly stated that any disciple of the Five Elements Sect, regardless of spirit root aptitude, who can reach Foundation Establishment Completion and has sufficient sect contribution can exchange for the Golden Elixir Spiritual Medicine.

Moreover, with Zhou Ye's influence, even if Chen Mobai hadn't spoken, E Yun wouldn't block Green Pearl's access to the Golden Liquid Jade Pill.

"What about Wan Dengyong?"

Chen Mobai counted and realized there was someone outside of the Five Elements Sect.

"He was also lucky and succeeded in forming his core."

When E Yun mentioned this, he was also full of envy. The resources Wan Dengyong had for forming his core were so plentiful that even E Yun, as the head of the Five Elements Sect, felt it was a bit wasteful.

"That's good. Now we have a living signboard."

Hearing this, Chen Mobai smiled slightly.

Now, in the Eastern Wilderness, a Golden Core cultivator outside of the Five Elements Sect indicates that there are no issues with the Golden Elixir Spiritual Medicine of the Five Elements Sect.

Wan Dengyong's sect exchanged their heritage of thousands of years for core formation success, which would persuade other forces with good items hidden to trust in the integrity of the Five Elements Sect.

"Sect Leader, after Wan Dengyong's core formation, a Zhang family from East Wu also wishes to exchange their family heritage for a Golden Elixir Spiritual Medicine. They have a hidden Spiritual Island overseas, cultivating many thousand-year medicine herbs for refining Foundation Building Pills! And a Zhang Family, having discovered a Water Mansion ruin in Yun Meng Ze, converted it into a Rank-3 medicine field, and even have three families treasured Fourth Rank medicinal herbs..."

As expected, E Yun spoke of several cultivator families from East Wu who wanted to use their family resources to exchange for Golden Elixir Spiritual Medicine.

Upon hearing this, Chen Mobai immediately directed E Yun to make the negotiations.

The main ingredients for Foundation Building Pills are also a part of the Golden Liquid Jade Pill, such as the most critical Jade Marrow Golden Mushroom.

The value of Golden Elixir Spiritual Medicine in the East Continent has a generally accepted price range, as the Dao Morale Sect's Grass Hall occasionally sells it.

However, the elixirs of the Five Elements Sect are more effective, and their quantity is scarce, making it entirely a supplier's market. Therefore, Chen Mobai instructed E Yun to negotiate according to the standard set for Wan Dengyong of the Wang Hen Sect.

As they talked, Zhuo Ming, having heard the news, also arrived.

She reported on the operation of the Heavenly Curtain Earth Network over the years in the Eastern Wilderness. These matters require on-the-ground assessment to understand clearly, so Chen Mobai planned to lead Zhuo Ming on a tour of the various Immortal Cities in the Eastern Wilderness.

"Sect Leader, do you want to meet the three newly formed Golden Core brothers?"

Seeing that Chen Mobai was about to leave, E Yun promptly asked.

"Has Senior Brother Zhou met them?"

Chen Mobai asked.

"Yes, he has."

Chapter 1954:

"Then I shall take my leave."

Previously, if Chen Mobai still felt novelty and a sense of satisfaction with the new Golden Core cultivators of the Five Elements Sect, now he already harbored a very calm sentiment.

Including Zhou Ye, Qing Nu, and Yan Shaoyin, now the Five Elements Sect had twenty-two Golden Core cultivators, a number almost comparable to the three major Eastern Barbarian sects of the past.

Because of this, Old Ancestor Bai Wu hadn't stepped out of Golden Crow Immortal City for a long time, even refraining from venturing into the East Land, for fear that if he left, without anyone to oversee the Fifth Rank Great Formation, he would return to find the Five Elements Sect had destroyed their lair.

With Nascent Soul Ancestors overseeing the Sun Bathing Sea like this, there was no need to mention other forces.

Now the Five Elements Sect was undoubtedly the largest sect at the Eastern Continent Frontier!

Even the commerce association from the Eastern Earth Holy Land had to notify them in advance before conducting business.

After reaching the Golden Core, Five Elements Sect disciples would meet with the Nascent Soul Ancestor, not only to become familiar but also to obtain the ancestor's note, allowing them to view higher-level cultivation techniques and secret tomes.

Since Zhou Shengqing had already met them, Chen Mobai saw no need to do the same.

Moreover, having just formed their Golden Cores, they were likely busy consolidating their realm or enhancing their techniques, so he didn't want to disturb them.

When Chen Mobai and his disciple left Northern Abyss City, they called upon their disciple-grandson, Song Huangdae.

Song Huangdae, the third generation's highest in formation technique from Xiao Nanshan, traveled through the Eastern Wilderness via the teleportation arrays set up by the Five Elements Sect, visiting all the Immortal Cities.

Among them, Song Huangdae gained the most, with his formation technique merely at the brink of Rank-3 before, but now, even at the Immortal Gate, he was an authentic Rank-3 Array Master.

Upon reaching the last Liu Jia Immortal City on the Eastern Wilderness Plateau, Song Huangdae's cultivation realm even broke through to the Foundation Establishment Middle Stage.

Compared to Han Zhiling, his aptitude was a notch inferior, merely possessing a three-attribute True Spirit Root, and he practiced the Void Law Body as well, so his cultivation progress was always slow.

Han Zhiling was nearing the Foundation Establishment Late Stage, but he had only just broken through now.

“Thank you, Master Ancestor, and Uncle Master Zhuo for your guidance.”

Nonetheless, Song Huangdae was still very pleased, and after stabilizing his soaring spiritual power, he immediately got up to thank Chen Mobai and Zhuo Ming, who were guarding the side.

“It’s also because of your diligent and persistent cultivation, if in the future you can form a Golden Core with the Void Law Body, I’ll see if I can refer you to the Taixu Miaomiao Palace.”

Chen Mobai had watched Song Huangdae progress step by step in his cultivation. Although initially, his intentions weren’t pure, after joining Xiao Nanshan, he became the most diligent and earnest person, and with the one billion spirit stones he earned, Chen Mobai was willing to present him with a further opportunity.

“A disciple lives as a person of Xiao Nanshan, and dies as its soul!”

Yet, Song Huangdae spoke solemnly, with an impassioned tone.

It seemed that what was called the Holy Land Taixu Miaomiao Palace, in his eyes, was less important than his identity as a third-generation disciple of Xiao Nanshan.

“Hahaha, you surely know how to speak, if you don’t want to go, it’s up to you. This is the Sutra of Void I compiled, containing numerous insights related to the Dao of Void, take a look when you have time.”

Cherishing sweet words as always, Chen Mobai took out a jade slip containing the Sutra of Void, stripped of anything that could expose the Immortal Gate’s secrets, and handed it over to Song Huangdae, who respectfully received it with both hands.

“The Void Law Body of the sect was originally seized from Mountain Shaker Peak, it can at most be cultivated to the Golden Core Realm, lacking content for forming a Nascent Soul. However, you’re far from forming a Nascent Soul, and since you don’t want to go to Taixu Miaomiao Palace, practice it first, and by the time comes, maybe I can create the part on forming a Nascent Soul for the Void Law Body.”

Chen Mobai spoke nonchalantly, as if creating the heart technique for forming a Nascent Soul with the Void Law Body was a particularly simple matter for him.

If one could master the Cinnabar Phoenix Facing the Sun Laws with the Five Tones, then this would be achievable.

Otherwise, it would only be possible for him by personally cultivating it and gaining a deep understanding of this technique.

Just like how the “Red Flame Sword Jue” was upgraded to the “Red Flame Sword Scripture”!

With gratitude and thanks written all over his face, Song Huangdae saw a cyan spiritual light fly over from the distant peak of Liu Jia Mountain, materializing into an exceptionally beautiful female cultivator, Yin Qingmei.

“Oh, Qingmei, your cultivation realm is almost breaking through again.”

Seeing Yin Qingmei and sensing the increasingly intense spiritual power around her, Chen Mobai was slightly taken aback.

“Thanks to the Sect Master’s wife’s Water of Ten Thousand Transformations, my lifebound spirit plant recently upgraded to Third Rank Superior Grade, which accelerated the condensing of spiritual essence in my cultivation through the Qing Emperor’s Longevity Scripture.”

Yin Qingmei spoke joyfully, due to her Heavenly Spiritual Root, and unless in dire necessity, the Five Elements Sect would not assign her to various chores, allowing her to focus solely on cultivation breakthrough at Liu Jia Mountain.

She herself was also diligent, spending her days sitting in cultivation under the Green Jade Wutong, except for occasional visits next door to see her friend Luo Yixuan.

After a hundred years of cultivation, she had almost completely explored the Qing Emperor's Longevity Scripture, and with the dual augmentation of her Heavenly Spiritual Root and lifebound spirit plant, her cultivation speed shot up, now reaching the threshold of the Core Formation Late Stage.

Chen Mobai calculated that Yin Qingmei had advanced to the Core Formation Middle Stage twenty-five years ago.

According to Immortal Gate's conversion, that means she advanced from Golden Core Fourth Layer to Golden Core Sixth Layer Peak.

Chapter 1955:

It takes an average of about eight years to break through a layer, almost catching up with those prodigies from the Immortal Gate.

However, at this speed in the Eastern Wilderness, it's second only to Chen Mobai anyway.

No wonder it's a Heavenly Spiritual Root!

"Alas, alas, alas, it's just a pity that Zhou Ye is currently in seclusion within the Yi Yuan Secret Realm. Otherwise, I could send you into the Secret Realm to comprehend Primordial Ancestral Master's Five Elements Great Dao, surely helping you break through to the late stage of Core Formation."

In the past, Qing Nu used the Altar of State left by Yi Yuan True Monarch in the Yi Yuan Secret Realm to reflect her understanding of the Black Emperor Abyssal Scripture, filling in gaps and reaping substantial benefits.

Chen Mobai thought about letting Yin Qingmei, who practiced the Qing Emperor's Longevity Scripture, to also enter and improve when there was a chance.

It's just a pity that there were so many things on the Immortal Gate's side that there only now came an opportunity.

“Thank you, Sect Leader!”

Yin Qingmei, upon hearing this, was also filled with gratitude.

Being a Golden Core Cultivator of the sect, she naturally knew about the Yi Yuan Secret Realm, understanding it as the foundational heritage holy land within the Five Elements Sect.

If someone with outstanding talent, like Primordial Ancestral Master and Chen Mobai, could directly receive the inheritance of the Primordial Dao Fruit.

Among the Five Elements Sect, aside from Zhou Shengqing, Mo Douguang, and those third-generation disciples, only Qing Nu, the sect master’s wife, had entered to contemplate it.

Now, Chen Mobai letting her in clearly regarded her as one of his most trusted people.

“Ming’er, you can go in with Qingmei when the time comes, and perhaps ask Wen Bo, Xuan’er, and Zongheng if they have time, they can accompany you.”

At this time, Chen Mobai’s words caused a slight stiffening of the smile on Yin Qingmei’s face.

But she quickly convinced herself.

This represented her status in Chen Mobai’s heart, on par with these direct disciples.

After wandering around the new city model, the Six Armor Immortal City, Chen Mobai contentedly took Zhuo Ming and Song Huangdae to visit the Endless Sand Sea.

Compared to the last visit, the green belt here had advanced a few sections against the boundless yellow sand.

Zhuo Ming now also devoted most of his time here; after all, the Sky Curtain Ground Network Formation would automatically operate once formed, rarely encountering issues.

On the return trip, they passed by Luo Yixuan's Cold Jade Lake, but unfortunately, she was not there, having instead gone to the Fanhai Sect ruins near the East Barbarians.

Chen Mobai then used a Teleportation Array to make a trip back to Giant Tree Ridge.

He gave ten fully charged Supreme Grade Spirit Stones to Fu Zongjue as preliminary resources for developing the Everlife Wooden Dragon, which greatly delighted the latter.

The two brothers chatted intimately throughout the night, with Fu Zongjue mainly sharing the various difficulties faced in making the Everlife Wooden Dragon.

Even though the Little Azure Dragon left by Primordial Ancestral Master had been repaired, having this complete sample, making a new one came with inevitably more challenges than repair.

After hands-on attempts by Fu Zongjue, with elite disciples from the Five Elements Sect's Puppet Division, he found his knowledge reserves somewhat lacking.

By chance, with Chen Mobai's arrival, whose proficiency in Puppetry Technique combined the essence of two realms and was in the Nascent Soul Realm, far above Fu Zongjue, he could come up with several solutions to many insurmountable difficulties experienced by Fu Zongjue.

After a night, Fu Zongjue pulled Chen Mobai for another day-long discussion, finally addressing all the challenges faced during the refining of the Everlife Wooden Dragon.

Afterward, Fu Zongjue, without rest, eagerly took the disciples of the Puppet Division to verify the solutions proposed by Chen Mobai.

Chen Mobai took this opportunity to visit the Divine Tree Secret Realm.

After routinely performing the Devour God Technique, he sighed slightly upon opening his eyes.

After his Divine Sense broke through to the late stages of the Nascent Soul Realm, the scattered spiritual sense of the Great Dao Tree had become negligible in effect.

However, even the smallest advantage is still valuable, at least improving faster than bitter cultivation, so Chen Mobai continued to absorb with the Devour God Technique.

Before leaving, he took out a Formless Puppet, entered the void inside the Great Dao Tree, and came before the Celestial Venerate Dao Fruits.

Having obtained Ancestor Yun Ya's notes, he was no longer at a loss about the realm beyond Divinity Transformation, mainly wanting to observe the realm of this Celestial Venerate.

Unfortunately, Chen Mobai's own realm was still too low to discern the level of the Celestial Venerate Dao Fruit, only sensing that it was no less significant than the Dan Cauldron Jade Tree inherited from Dance Tool Dao Academy.

Ultimately, whether one was superior or inferior might only be distinguished after fully refining both the Celestial Venerate Dao Fruits and the Dan Cauldron Jade Tree.

Thinking of this, Chen Mobai left the Formless Puppet there to guard the Celestial Venerate Dao Fruits, and then exited the Divine Tree Secret Realm himself.

"Junior Brother, news from Senior Brother Zhou, it seems Zhou Ye is about to succeed over at Primordial Immortal City!"

Just after leaving seclusion, Chen Mobai saw Fu Zongjue waiting in his Longevity Wood Dojo, passing on the news.

Zhou Ye is about to form his Nascent Soul!?

Upon hearing this, Chen Mobai did not delay, immediately heading to where the teleportation array was at Giant Tree Ridge.

Forming a Nascent Soul could be said to be the pinnacle of cultivation in the Eastern Wilderness, so Fu Zongjue also wanted to accompany and observe.

Naturally, Chen Mobai didn't forget to bring along Zhuo Ming and Song Huangdae.

In the flash of silver light, they had already arrived at Primordial Immortal City through the teleportation array.

Just as they appeared, they witnessed the sky filled with dark clouds, myriad colorful thunderbolts, flames, frost, whirlwinds, and other heavenly tribulation phenomena emerging successively, seemingly in gestation, not yet striking towards the spiritual vein core of the Immortal City.

Seeing this scene, Chen Mobai heaved a sigh of relief.

The appearance of a heavenly tribulation meant Zhou Ye had achieved Nascent Soul Emergence.

Yet, thinking again, if Zhou Ye couldn't succeed, Chen Mobai couldn't imagine anyone else on the East Continent managing to form a Nascent Soul successfully.

Zhou Ye possessed an Infant-Feeding Elixir, Coagulation Infant Pill, and was himself of a Heavenly Earth Spirit Root, further complemented by Primordial True Qi equivalent to an Infant-Transforming Elixir, holding resources almost on par with what Chen Mobai had during his own Nascent Soul Formation.

If he failed even with these conditions, really one would feel like running into a wall.

"Brother Chen, you're here too!"

Two grand Spiritual Lights flashed, landing in front of Chen Mobai, emerged the figures of Zhou Shengqing and Mo Douguang.

Mo Douguang had just overseen a batch of Five Elements Commerce Association's goods transported back to the Eastern Wilderness from East Land, encountering Zhou Ye's Nascent Soul tribulation and decided to join Zhou Shengqing for a look.

Though they weren't so friendly with Zhou Ye before, now as elders of the Five Elements Sect, part of the same line of Senior Brothers, they wished to offer some protection.

"Zhou Ye's luck is really good, thinking back when I was forming my Nascent Soul, it was like wolves on all sides..."

Zhou Shengqing sighed while watching the calamity in the sky.

"This is also due to our collective efforts, the strength of our sect!"

Chen Mobai seized the opportunity to echo his sentiment, making Zhou Shengqing feel a sense of shared pride.

At this point, yet another Spiritual Light flew out from the teleportation array, it was Zhou Wangshen, who promptly came over to pay his respects upon seeing the three Nascent Soul cultivators gathering there.

Seeing him, Chen Mobai recalled the Five Elements Essence Qi matter he had entrusted him with.

Just as he intended to inquire, the power of void suddenly resonated!

A tall figure enveloped in multicolored radiance stepped out from the Yi Yuan Secret Realm, subsequently brandishing a heavy hammer towards the sky.

Boom!

Facing the descending heavenly calamities with a swing.

Amidst the resounding thunderous booms, Chen Mobai noticed Zhou Ye seemed to be using the power of the heavenly tribulation to temper his weapon, naturally setting his mind at ease.

Chapter 1956: One Sect, Four Nascent Souls

The tribulation clouds in the sky rolled, multicolored lightning swirled like dragons, crashing down amidst thunder, as if tearing the earth apart.

The terrifying might caused all the residents within Primordial Immortal City to be in shock.

They had never seen a Yuan Infant Heavenly Tribulation in their lifetime.

Yet while everyone was shocked, they were not afraid, because, in the sky above the Immortal City, the majestic figures of the three Nascent Souls of the Five Elements Sect stood tall, providing them with immense security.

They believed that even if Zhou Ye failed to overcome the tribulation, the aftermath of the Heavenly Tribulation could not possibly affect them.

This is the confidence given to them by settling in the Immortal City of the Five Elements Sect.

However, with Zhou Ye's ample foundation, it was clear that he would not be stopped by the tribulation. Every swing of the heavy hammer in his hand shattered a strike of tribulation thunder.

With each strike of lightning and the tempering of sky fire and black wind, the heavy hammer gradually became more translucent, and the brilliance of the magic artifact grew even more dazzling.

"Senior Brother Zhou Ye's accomplishments in artifact refining are quite extraordinary!"

Chen Mobai, watching, smiled and said to Zhou Shengqing and Mo Douguang beside him.

"It's alright, most of Master's later years were spent teaching him. Besides the Primordial Dao Fruit, artifact refining techniques, formations, alchemy, puppetry, talisman making were all imparted to him at once. It seems Zhou Ye, when secluded in Primordial Immortal City, honed not just his cultivation but also these Hundred Arts of Immortal Cultivation..."

As Zhou Shengqing spoke, his tone was somewhat sour, as the Primordial Grandmaster had never treated him so well.

"Human capability has its limits. With the backing of a sect, it's better to focus on one thing..."

Chen Mobai listened and immediately changed the topic.

Upon hearing this, Mo Douguang nodded in agreement.

The sword cultivators from the Metal Vein had a hard time learning the Hundred Arts of Immortal Cultivation, but due to the flourishing development of the Five Elements Sect, they could buy anything they needed in the Immortal City. Hence, the newly admitted disciples, apart from cultivating Sword Dao, weren't spending much time learning skills like nurturing, refining, honing, or appraising sword artifacts.

"After Zhou Ye completes his Nascent Soul Formation, Junior Brother Mo, you should be able to relax a bit. By the way, Junior Brother, the Star Heaven Dao Sect is about to hold another Beidou Conference, and invitations have been sent to me in advance. Would you like to visit?"

Bringing up another matter, Chen Mobai nodded slightly when he heard Zhou Shengqing.

"During my first visit, due to insufficient strength, I didn't dare to buy good things. To obtain a portion of Three Lights Divine Water, I needed help from the Nine Heavens Morality Sect. Now our Five Elements Sect, even in the East Land, is a first-tier power, and we can rightfully attend the Star Heaven Dao Sect."

For his first Beidou Conference experience, Chen Mobai felt quite regrettable, and he wished to secure Three Lights Divine Water for Qing Nu.

"Let's go together."

Mo Douguang spoke up after listening. Being a Nascent Soul himself, he'd naturally received an invitation.

The Star Extreme Great Elder of Star Heaven Dao Sect, beyond East Continent, gathered many exotic treasures and cultivation techniques. Mo Douguang, after his Nascent Soul Formation, found his Golden Crane Sword Art had reached its peak and needed a more supreme sword technique or higher realm to deduce.

Therefore, he wanted to attend this Beidou Conference to explore.

Chen Mobai was naturally delighted to nod. With Mo Douguang accompanying him, even if they encountered tribulation roads, he would have someone to protect the disciples.

As the three were chatting, the Heavenly Tribulation had evolved to its most powerful stage.

Zhou Ye at this moment, dared not temper his magic artifact with tribulation lightning. His entire being radiated multi-colored brilliance, with Five Elements True Qi condensed into Primordial, resisting and dissolving the sky thunder, sky fire, and sky wind that fell upon him.

Many tribulation waves also struck around, and Chen Mobai gently flicked his sleeve, activating the city's large formation, a giant earthy yellow light shield stopping all the tribulation lightning.

Within Primordial Immortal City, all the residents looked up at the sky, witnessing the awe-inspiring spectacle overhead, filled with excitement and reverence.

Decades ago, who would have dared think they could openly watch a cultivator undergo a Yuan Infant Heavenly Tribulation?

At this moment, their yearning for the Five Elements Sect reached its peak.

"Son, this year you must pass the Earth Stem Academy's entrance exam!"

"Daughter, next year the neighboring Dreamcatcher Academy is expanding enrollment; its entrance requirements are a bit lower..."

"Grandson, your talent is amazing, our family still has dozens of mu of Spirit Field; after selling them, we'll take you to Northern Abyss City for the Longevity Academy entrance exam..."

The city's discussions naturally fell upon the ears of Chen Mobai and his companions, and they exchanged smiles, feeling an indescribable sense of achievement.

At this moment, the Heavenly Tribulation had fully erupted, transforming into an endless sea of lightning in midair.

But Zhou Ye's figure shone even more brilliantly, facing this final terrifying wave of tribulation, an amber-colored Nascent Soul little figure flew out from his head, and his entire energy reached an unprecedented height in an instant.

"Hahaha!"

Zhou Ye's Nascent Soul suddenly laughed in the sea of lightning, then grabbed toward his chest, extracting a splendid multi-colored ray of lightning, then clasped his hands, resonating with the Five Elements Tribulation Thunder, unexpectedly borrowing the tribulation thunder for cultivation.

"This is..."

Seeing this scene, Chen Mobai couldn't help but show an amazed expression.

Zhou Shengqing and Mo Douguang naturally remembered the Primordial Five Elements Extinguishing Divine Thunder, and were extremely surprised by Zhou Ye's outstanding talent and boldness.

Chapter 1957: One Sect, Four Nascent Souls (Part 2)

“Junior Brother, can this succeed?”

Zhou Shengqing asked Chen Mobai, who was listening attentively with Echoes in the Void, and nodded lightly.

“He cultivates the Five Elements True Qi Nascent Soul Formation, and the Tribulation Thunder he faced also had Five Elements properties, originating from the Primordial Five Elements Extinguishing Divine Thunder. It seems he has been dealing with this Extinguishing Divine Thunder for over a hundred years, and has gained a lot from it...”

As Chen Mobai spoke, the Primordial Five Elements Extinguishing Divine Thunder left by the Primordial Patriarch inside Zhou Ye was already refined by his Nascent Soul, borrowing the power of the heavenly tribulation. A five-colored lightning symbol appeared on the forehead of the jade-yellow Nascent Soul.

Zhou Ye laughed again, raised his hand toward the heavenly tribulation, and the remaining Tribulation Thunder immediately gathered into his palm, being completely absorbed by the lightning on his forehead.

Before long, the dark clouds in the sky had completely dissipated.

This scene caused many young cultivators in the Primordial Immortal City below to show a look of longing. They also yearned for the day when they could achieve Yuan Ying Completion and disperse tribulations with a wave of their hands.

At this time, Zhou Ye had already retracted his Nascent Soul and flew towards Chen Mobai and the other two.

“Thank you to the two senior brothers and the sect leader junior brother for your protection!”

Zhou Ye spoke sincerely, and after forming his Nascent Soul, his sense of belonging to the Five Elements Sect reached its peak.

Although he had mastered the Primordial True Qi and Extinguishing Divine Thunder and considered himself the second strongest in the sect besides Chen Mobai, he was still very respectful when thanking Zhou Shengqing and Mo Douguang as a junior brother.

“Congratulations, Senior Brother, on forming your Nascent Soul and achieving the Great Tao!”

Chen Mobai was the first to speak with a smile, and then Zhou Shengqing also returned the courtesy on behalf of the senior brothers to Zhou Ye.

Subsequently, the four Nascent Souls landed in the Primordial Immortal City.

According to the ancient customs of the Tianhe Realm, Zhou Ye would explain his experience of forming his Nascent Soul, followed by additional commentary from Chen Mobai and the other two of the same rank.

The Five Elements Sect’s Golden Core cultivators in the Eastern Wilderness, upon receiving this news, all used the Teleportation Array to come over, fearing they would miss the grand event of the sect’s four Nascent Souls.

To display the generosity of the Five Elements Sect, Chen Mobai even invited Wan Dengyong, who was extremely grateful and hurried to the Primordial Immortal City at top speed.

With such fanfare, the news of the Five Elements Sect adding a fourth Nascent Soul cultivator quickly spread.

East Wu.

After reading the letter in his hand, Sun Huanglong told the junior who had run back from the Eastern Wilderness to rest, and then sat heavily in the study.

Fully aware of Zhou Ye’s identity, he knew that his Sun family was headed for a great disaster.

That was a deep blood feud.

If Sun Huanglong were in Zhou Ye's position, the first thing he would do after successfully forming his Nascent Soul would be to come to East Wu and annihilate the entire Sun family.

Fortunately, the elite of the Sun family had been sent overseas through the treasure ship over the years.

A few years ago, his sister Sun Huangling also gained an opportunity overseas in an Immortal Mansion, successfully forming a Golden Core after shattering the heterodox Golden Core.

However, this made Sun Huanglong realize he had no way out anymore.

Even before Zhou Ye had formed his Nascent Soul, he had been supporting the Lu family and suppressing the Sun family. Now that he's formed his Nascent Soul, even if the Five Elements Sect wanted to save face and might not take action immediately, the Sun family's situation would only become direr.

Maybe it's time to leave!

With this thought, Sun Huanglong glanced at this grand mansion.

Since East Wu was established, they had grown from an ordinary cultivation family in the East Land to the overlord here, enduring thousands of years, only to now have to leave their homeland!

But soon, his expression relaxed.

As long as there's life, there's hope.

"If the green hills remain, there'll be no lack of firewood."

With that thought, Sun Huanglong no longer hesitated and immediately got up to arrange the final matters for the Sun family's departure from East Wu.

"Oh, my brother can really endure!"

Upon hearing the news that Sun Huanglong was selling the Sun family's properties in East Wu, Sun Huangling overseas was a bit surprised.

"The family head lacks ambition. If he comes over, the one in charge here won't be Miss anymore!"

It was Zhong Zhengyun, an external Golden Core cultivator of the Sun family, who spoke. Under his and Sun Huangling's leadership over the years, the Sun family had occupied several Spiritual Islands overseas. Although life wasn't as good as in the East Continent, it gave this elder who was originally oppressed more power and benefits.

"Just don't let him come over then."

Sun Huangling said, and then a blood-colored figure emerged from her shadow, flying toward East Wu's direction.

Zhong Zhengyun watched this scene with awe.

...

Primordial Immortal City.

After the four Nascent Souls lectured on the Tao, Chen Mobai opened the Yi Yuan Secret Realm, giving all Golden Core cultivators of the Five Elements Sect an opportunity to enter.

The Yi Yuan Secret Realm offers greater benefits on the Altar of State to those with higher cultivation levels. You can go in now, or wait until you encounter a bottleneck in your cultivation before entering; it's your choice.

If you are able to perform great service for the sect, I may consider granting another entry into the secret realm.

Of course, if any of you forms a Nascent Soul, the Yi Yuan Secret Realm will be opened to you an unlimited number of times.

After discussing with Zhou Shengqing and the other two Nascent Souls, we have decided on the rules for opening the Yi Yuan Secret Realm.

From now on, if a Five Elements Sect cultivator successfully establishes their Foundation, they can go to the Altar of State to receive more benefits. You can go in now, or wait until you encounter a bottleneck after advancing.

This time, besides Yin Qingmei, Zhuo Ming, Zhou Wangshen, and E Yun also decided to enter.

Yin Qingmei wanted to compare her results with the Qing Emperor's Longevity Scripture in the Altar of State to see if there were any flaws. If she were at the later stage of Core Formation, she would be preparing for Nascent Soul Formation, and now was the right time to check for any oversights.

Zhou Wangshen and E Yun, on the other hand, sensed the limits of their spiritual root aptitude.

After breaking through to the Core Formation Middle Stage, even with ample resources and spirit veins, their progress was slowing down, sometimes improving only slightly even after months or a year.

This is the shackle of spirit root aptitude. Previous cultivators like Fu Zongjue, Sheng Zhaoxi, and Nu Jiang had the same issue.

However, Fu Zongjue and others managed to overcome bottlenecks using the Primordial Five Elements True Qi Nascent Soul Formation and purple jade porridge, but this left hidden perils of instability in their foundation, making it almost impossible for them to form a Nascent Soul.

Now, the other Five Elements Sect disciples, most of whom are at the Early Golden Core Stage and haven't yet sensed the limits of their aptitude, are all choosing to save their chances for a critical moment.

This time, two Golden Core cultivators are especially eager to enter.

Wan Dengyong of the Wang He Sect and Outer Sect Elder Yan Shaoyin.

But neither are our own people.

However, Chen Mobai hesitated regarding Yan Shaoyin.

Since leading the entire Back to Sky Valley to submit to the Five Elements Sect, this former major alchemy sect of the Eastern Wilderness had been utterly integrated into the Five Elements Sect.

For nearly sixty years, Yan Shaoyin, leading his sect defectors, had played a crucial role in the Five Elements Sect's expansion.

Half the staff in Qing Nu's Danxia Pavilion were from Back to Sky Valley.

Over these years, almost all of the original members had died, leaving only candidates at the Early Stage of Core Formation who had not yet felt their aptitude limits, saving their opportunity for a critical moment.

He no longer had any choice, as his lifespan was nearing its end within a few years.

If he couldn't complete the Cultivation Technique, he even promised to die directly inside the Yi Yuan Secret Realm if he did finish it.

On this matter, Chen Mobai consulted with the other three Nascent Souls and decided to give him a chance.

Chapter 1958: The Strongest Dharma Body

“Thank you, Sect Leader!”

After receiving Chen Mobai’s promise, Yan Shaoyin went down with gratitude.

At the entrance, Zhou Wangshen was already waiting. The two nodded at each other, serving as a greeting, and the former entered the hall.

“Sect Leader, this is the Five Elements Essence condensed by the disciples!”

Upon entering, Zhou Wangshen respectfully handed over a storage bag.

Chen Mobai used his Divine Sense to look inside and found hundreds of glass bottles filled with Five Elements Essence. The different essences shone with various colors, making them easy to distinguish.

Everyone in the Five Elements Sect, from top to bottom, regarded Chen Mobai’s matters as the utmost importance.

After Zhou Wangshen received this task, aside from his cultivation, he was busy with this.

Besides the disciples within the sect, he also sent people to recruit Loose Cultivators stuck at bottlenecks from the Spirit Treasure Pavilions of various Immortal Cities in the Eastern Wilderness, spending Spirit Stones to hire them to transform their stagnant Spiritual Power into Five Elements Essence through daily meditation.

This was much easier than farming or soil reclamation, making it a coveted task for many Loose Cultivators.

Regarding this matter, many external forces in the Eastern Wilderness were puzzled, as this practice of hiring people for cultivation was unprecedented in the East Continent. Previously, such situations were only seen among the Demon Path on the East Li’s side.

Upon learning of this, some displeased neighbors reported it to the Nine Heavens Morality Sect.

Out of duty, the Nine Heavens Morality Sect also sent people to investigate.

But every cultivator condensing the Five Elements Essence did so voluntarily and had to compete for the task.

After all, many Loose Cultivators had impure Spiritual Power, and the Essence they condensed was even more impure, filled with impurities.

Therefore, Zhou Wangshen required assessments and screening for Loose Cultivators who wanted to condense Five Elements Essence.

However, once passing the evaluation, they essentially secured stable employment.

As long as the Spiritual Power was qualified, there was no limit to how much Five Elements Essence they could condense, with the newly established Spirit Vault of the Five Elements Sect collecting all of it.

A bottle of Five Elements Essence contained ten strands and could be exchanged for 100 Low Grade Spirit Stones.

Cultivators in the late stage of Qi Cultivation could condense one strand in about three to four days, while those stuck at bottlenecks could condense a bottle in a month with nightly meditation.

Of course, since condensing the Five Elements Essence required dissipating the hard-earned Spiritual Power, it also took a toll on the cultivator's essence, energy, and spirit. If one fully committed to this task, they typically couldn't take on another job.

Nevertheless, the reward was higher than the average salary for major infrastructure projects within the Five Elements Sect.

Naturally, it was fiercely competitive.

After learning about this, the Nine Heavens Morality Sect also found out the “truth” deliberately leaked by Zhou Wangshen, that the Five Elements Sect had found a dead Five Elements Spirit Tree within their Secret Realm and was trying to revive it using this method left by the Longevity Sect.

Many people felt that the Five Elements Sect was wasting their efforts.

After all, the Five Elements Spirit Tree had strict requirements for its growth environment, ranking among the top three precious Spirit Plants in the Tianhe Realm. Once dead, it’s nearly impossible to revive it.

Since no one was harmed due to the Five Elements Essence, the people sent by the Nine Heavens Morality Sect visited the Eastern Wilderness and left after a quick tour.

Before leaving, E Yun also found out who reported it.

It was a Foundation Establishment sect in the territory of the Sun Bathing Sea, on the East Barbarians’ side.

Needless to say, it must have been instigated by Ancestor Bai Wu.

Another grudge was added.

“Not bad, with these Five Elements Essences, my External Incarnation Heavenly Viscera Realm can be condensed by nearly one-tenth.”

Chen Mobai looked at the storage bag containing over six hundred bottles of Five Elements Essence, nodding in satisfaction.

“Sect Leader, these are the Five Elements Essences condensed by our Five Elements Sect disciples this year. In the Spirit Vaults of other Immortal Cities, we can still purchase the same quantity from Loose

Cultivators, but according to strict standards, probably only one or two hundred bottles meet the requirements.”

Zhou Wangshen immediately explained, fearing Chen Mobai would misunderstand his capability, and clarified that this storage bag was not the entire year’s harvest.

“This year? Isn’t this twenty years of stock?”

Unexpectedly, Chen Mobai caught a different keyword and was taken aback.

“Every year, the purchased Five Elements Essence is stored in the Golden Light Immortal City. Since the number of cultivators practicing Five Elements property cultivation techniques varies, following the complete set of five bottles of Five Elements, there are probably about twelve hundred sets.”

“The quantity is indeed a bit low, mainly because in the early years, when the Spirit Vault was just established, many were skeptical, so there wasn’t much Essence collected. Now, it’s on track, and the disciple is confident that starting next year, we can collect a thousand bottles annually, equivalent to two hundred sets of Five Elements Essence.”

“Now, forces across the Eastern Wilderness, and even those in East Barbarians and East Wu, know of this business and seek this method, wanting their own disciples to help us condense the Five Elements Essence and earn a commission. Considering the quality of the Essence, the disciple hasn’t agreed.”

“Moreover, the disciple feels that the previously set price of one hundred Spirit Stones per bottle to open the market is now a bit high. Starting next year, it can be reduced to eighty Spirit Stones to save some costs for the Sect Leader.”

Chapter 1959: The Strongest Dharma Body (Part 2)

Zhou Wangshen narrated the development of the Spirit Vault over the years, detailing the reserves of the Five Elements Essence Qi to Chen Mobai, who couldn’t help but be overjoyed upon hearing it.

With so much of the Five Elements Essence Qi, he not only could achieve the Great Perfection in the external incarnation’s Five Qi towards the Origin, but also synthesize seventy-two types of Terrestrial Evil Qi artificially or directly use it to enhance Primordial True Qi.

"There's no need to lower the price or expand beyond the Eastern Wilderness to avoid anyone using our Five Elements Sect's name to oppress the lower-level Loose Cultivators who condense Five Elements Essence Qi."

Chen Mobai considered it and agreed with Zhou Wangshen's viewpoint, feeling that the business of Five Elements Essence Qi should remain within the Eastern Wilderness. Because each cultivator who passes the Spirit Vault assessment and condenses the Five Elements Essence Qi must swear an oath before receiving the Method, this business can still be controlled for now.

However, over time, there will always be those who stop at nothing.

But the Five Elements Sect must nip this dangerous trend in the bud in advance.

The cultivators on the Eastern Continent are capable of doing anything for Spirit Stones.

"You've done well in this matter. Is there any reward you would like?"

Chen Mobai asked Zhou Wangshen amiably. It felt easy having capable subordinates like him. The Five Elements Essence Qi was originally just a casual command, accompanied by a bit of seed funding, but Zhou Wangshen accomplished something beyond his expectations.

Achievements deserve rewards. He hoped Zhou Wangshen could work for him for a lifetime.

"To work for the Sect Leader is only right; this disciple does not dare to ask for a reward."

Zhou Wangshen, however, shook his head earnestly, making Chen Mobai even more delighted.

"This is a great merit. I'll grant you an opportunity to enter the Yi Yuan Secret Realm. After you emerge and feel you've digested the gains from the Altar of State, you may ask me to take you back in."

Upon hearing this, Zhou Wangshen was filled with joy and immediately expressed his gratitude.

In the Primordial Immortal City, after the four Nascent Souls finished their lectures, Zhou Shengqing and Mo Douguang left together, and Zhou Ye consolidated his realm.

Meanwhile, Chen Mobai opened the Yi Yuan Secret Realm.

The Void Gate opened, and with a wave of his sleeve, the Tai Yi Wu Yan Luo led the five people behind him inside.

The secret realm was almost unchanged from when he had visited before. However, since he had taken the core Heavenly Bead, the concentration of the Five Element Spiritual Energy had slightly decreased, though for cultivators below Nascent Soul, it made no difference.

After sending Yin Qingmei and the others to the Altar of State one by one and informing them of the usage and taboos of the secret realm, Chen Mobai finally took Zhuo Ming to the Earth Altar of State.

"Although there are five Altars of State corresponding to the Five Elements in the secret realm, the most critical one is indeed the Earth Attribute, within which even the supreme technique of our sect, the cultivation method of the Primordial Dao Fruit, can be comprehended."

After reaching the Earth Altar of State, Chen Mobai informed Zhuo Ming about its mysteries.

"Disciple is dull and dim, afraid I cannot comprehend the Primordial."

Zhuo Ming was visibly excited after listening; after all, the fame of the Primordial Dao Fruit was immense.

"It's alright. Give it a try first. If you can't comprehend it, once your cultivation reaches the level, I, your Master, will directly teach it to you."

Chen Mobai waved his hand indifferently. Looking across the entire Five Elements Sect, among the next generation, only Zhuo Ming was qualified to cultivate the Primordial Dao Fruit. She was also his heir, so if he didn't pass the Primordial Dao Fruit to her, then to whom?

"Thank you, Master!"

Zhuo Ming expressed her gratitude joyfully.

"There's another matter. The center of the secret realm is the Five Elements Spirit Tree. The Rank-4 Water of Ten Thousand Transformations can hasten the birth of the Five Elements Spiritual Fruit. If I am busy in the future, you can come over to water and care for it."

Chen Mobai then took Zhuo Ming to the center of the secret realm. Sixty years ago, he and Zhou Ye picked the Five Elements Spiritual Fruit; according to the pattern, it needed another sixty years to mature again.

However, the Water of Ten Thousand Transformations could greatly expedite this process. After the Thunder Pool was constructed on the Wanhua Immortal City side, Chen Mobai and Qing Nu together condensed a lot of Water of Ten Thousand Transformations to water valuable Spiritual Plants throughout the sect, resulting in Yin Qingmei's jade phoenix tree growing rapidly.

Naturally, Chen Mobai did not forget about the Five Elements Spirit Tree. Besides this one, there was also the one at the center of his domain.

Originally just a Rank-1 seedling, through sixty years of nourishing with Rank-5 Spiritual Energy and continuous watering with the Water of Ten Thousand Transformations, it had advanced to Rank-3.

When it reaches Rank-4, Chen Mobai plans to replace the tree at the center of the secret realm with this one from his domain, and then use the Technique of Forced Growth to refine it, achieving the Great Perfection of the Primordial Dao Fruit with a Rank-5 Five Elements Spirit Tree.

At that time, he could even claim to be the Yi Yuan Orthodoxy.

After assigning everything, Zhuo Ming went to the Earth Altar of State to receive the legacy.

Meanwhile, Chen Mobai sat down under the Five Elements Spirit Tree at the center of the secret realm, planning to enhance his external incarnation since he needed to open the door for their exit.

This Grand Spell from the Longevity Sect, he had already mastered to Rank-4 Great Success through Empowerment, but due to a lack of corresponding resources and without dedicating effort to cultivate, it became somewhat obscure after reaching the Nascent Soul stage unless he absorbed the Power of Five Elements Path Soldiers.

Back in the day, the Ancient Patriarch cultivated the All Laws Persona to dominate the Eastern Continent Frontier. Had he gone further, Chen Mobai thought it would not be inferior to a Second Primeval Spirit transformed from a Primordial Yang Treasure Bead.

Chapter 1960: Strongest Dharma Body (Part 3)

Sixty years have passed, and the Five Elements Spirit Tree's branches, originally full of multicolored Spirit Flowers, have become sparse.

In their place are five thumb-sized green fruits.

When all the multicolored Spirit Flowers disappear, it will be the time when these five Spirit Fruits mature.

Chen Mobai took out a tube of Water of Ten Thousand Transformations, using Echoes in the Void to sense the fruit's endurance limit, dripping it into the fruits one drop at a time.

With the continuous source of Water of Ten Thousand Transformations, according to his estimation, these Five Elements Spiritual Fruits will take about another twenty years to mature.

By then, Zhuo Ming should be able to break through to the Core Formation Late Stage and can attempt to cultivate Primordial True Qi.

With the Five Elements Spiritual Fruit, she can quickly achieve mastery of Primordial True Qi, ensuring Nascent Soul Formation.

Thinking of this, Chen Mobai sensed the five fruits once again, then took out the Heavenly Bead and held it in his palm.

The pure and dense Rank-5 Spiritual Energy can not only help him cultivate his External Incarnation but also allow the Five Elements Spiritual Fruits to absorb and refine the Water of Ten Thousand Transformations more quickly.

Chen Mobai sat peacefully under the Five Elements Spirit Tree, his Divine Sense leaving his body to communicate with the Tai Yi Wu Yan Luo, which replaced the Heavenly Bead here.

This Magic Artifact has significantly grown in spirituality over the past sixty-plus years, taking advantage of the unique environment, now not inferior to the one refined by Ancestor Yun Ya in his hand, also at Fourth Rank Peak.

The Tai Yi Wu Yan Luo is also one of the Magic Artifacts ranked above the Dan Cauldron Jade Tree.

This is the Magic Artifact that every disciple of the Dan Ding Sect needs to refine when learning Artifact Refining Technique.

Although the Tai Yi Wu Yan Luo appears simple, it encompasses all the techniques of Magic Artifact Refining, requiring gaseous, liquid, and even solid materials, as well as Five Elements Transformation, cyclical evolution, and integration with Large Formation knowledge.

According to the standards of the Dan Ding Sect, refining the Tai Yi Wu Yan Luo is the entry into the Artifact Refining Technique.

Chen Mobai had naturally long since entered this doorstep.

After playing with the Tai Yi Wu Yan Luo he had personally refined for a while, he withdrew his Divine Sense and took out the Storage Bag given by Zhou Wangshen.

With a thought, hundreds of bottles of Five Elements Essence Qi landed around him.

Chen Mobai arranged them in sets of five according to the Five Elements, then stacked them into one hundred thirteen sets of Five Elements Essence Qi.

Under the control of his vast and boundless Divine Sense, the front five bottles were opened, and fifty streams of Five Elements Essence Qi poured out, falling into his eyes.

Although in Zhou Wangshen's opinion, these Five Elements Essence Qi had already been carefully selected and were pure enough, how could the Spiritual Power purity of cultivators in the Eastern Wilderness compare with that of the Immortal Gate?

Chen Mobai found that there were still traces of impurities within these Five Elements Essence Qi.

For others, this would be a troublesome matter, but for him, it was a mere trifle.

His Nascent Soul left his body, hovering above his head.

Soon, a vast External Incarnation appeared in the void behind, wearing the Crown of Heaven and Earth, and the lustrous Five Elements Spirit Tree, before him, was like a roadside weed. The fifty streams of Five Elements Essence Qi, under his Divine Sense's control, transformed into five streams of multicolored light aimed at the External Incarnation's five viscera and six bowels.

As the Five Elements Essence Qi entered the body, the previously empty External Incarnation began to manifest substantial organs, linking with the Heavenly marrow and Heavenly Vessel formed by the Power of Void, creating a human's Five Elements cycle.

However, fifty streams of Five Elements Essence Qi were still insufficient.

They were quickly absorbed and refined by this External Incarnation, with the major organs forming little more than an outline.

Chen Mobai's Nascent Soul gently exhaled, and soon, wisps of impure Qi seeped out from the External Incarnation, dispersing into the world around.

This is the ability of the Vermilion Phoenix Facing the Sun Diagram, “Drink has ceremony”, only absorbing and refining the Spiritual Energy and energy needed.

After experimenting, Chen Mobai roughly estimated the efficiency of his Five Elements Essence Qi refining, his Divine Sense surged forth, and soon, fifty bottles were opened.

A total of five hundred streams of Five Elements Essence Qi surged out, and Chen Mobai even sensed the Five Elements Spirit Tree behind him and the Tai Yi Wu Yan Luo underground, both expressing a craving desire.

Apparently, these Five Elements Essence Qi are also very useful to them.

It seems that in the future, it will be necessary to vigorously develop this industry, providing more job opportunities for sect disciples and the various Loose Cultivators in the Eastern Wilderness.

Thinking this way, Chen Mobai lifted the restrictions, allowing the External Incarnation to absorb the five hundred streams of Five Elements Essence Qi to its heart’s content.

As time passed, all six hundred plus bottles had been opened, and the vast Five Elements Essence Qi turned into five magnificent dragons, roaming within his External Incarnation, constructing a complete inner world.

After refining and absorbing all the Five Elements Essence Qi, the primary five viscera and six bowels had condensed into reality, and Chen Mobai could even sense these organs pulsating.

The vast Divine Sense of Chen Mobai at the Nascent Soul Late Stage surged forth, like a creator, precisely constructing the bone marrow, blood vessels and meridians, Five Elements organs, and so on, of the External Incarnation, according to the mantra.

Under the blessing of the Crown of Heaven and Earth, his Guidance Book associated with Yan Xinji and Che Yucheng’s left human puppet, also incorporating this part of the content into the External Incarnation.

The puppet he intended to construct would naturally be perfectly compatible with himself, able to bring forth the full combat power of this External Incarnation to its greatest Realm.
