

Worth 1101

Chapter 1101, first life!

The old voice seemed to have reached its limit. It was as if an extremely weak person had used the last of his strength to send it out. It passed through the endless universe, passed through the endless years, sank into the cycle of reincarnation, and reverberated in the pitch-black void, it filled Wang Baole's ears.

It seemed to have touched his soul, causing Wang Baole's consciousness to fluctuate. At first, the fluctuations were still weak, but as the aftersounds came in layers, the fluctuations in his consciousness gradually grew stronger. Eventually.., wang Baole's entire body trembled. His consciousness woke up, and his eyes..

Opened.

What he saw wasn't the fated star, nor was it the book of Heavenly Fate, nor was it the exalted Heavenly Dharma. It was... a starry sky!

The dazzling starlight, the countless stars, and the distant galaxy that seemed to stretch beyond the horizon, formed from the countless stars that had fallen into this place countless years ago... a vast galaxy.

There didn't seem to be anything out of the ordinary about it. Even though it was extremely beautiful, Wang Baole had seen a similar galaxy in the Weiyang Dao domain when he was speeding through the galaxy.

However... it seemed to be slightly different. The galaxy here might be more turbid, but it was also more vast. Everything was filled with an indescribable sense of vicissitudes. It was as if one could see the galaxy, one would naturally feel a sense of grandeur, as if time had passed in an instant. One would also feel as insignificant as dust.

Wang Baole looked at everything, his eyes filled with confusion. His consciousness had awakened as the voice reverberated in the air, but his memories had yet to fully emerge. He only remembered that with the help of the Exalted Heavenly Dharma Master.., he was immersed in his previous life's Epiphany. It was as if everything had happened in an instant. He had just been immersed in it a moment ago, and the next moment, when he opened his eyes, he saw the starry sky.

However, just as Wang Baole was in a daze, the memories of the past seventy-eight reincarnations appeared in his mind in an instant. The memories of each life were like a bolt of lightning, exploding in his mind, they turned into a large amount of information and images, filling his mind.

One after another, three after another... when the memories of the seventy-eight reincarnations appeared, Wang Baole's body trembled, and his expression was one of pain. The pain did not come from emotions, but from the fusion of all the memories in an instant, it made his mind feel like it was about to explode, and his mind felt like it was being torn apart.

"Sun de!"

"Sun de!"

“Sun de!” Wang Baole roared, repeating the name, repeating the only person who had appeared in all the seventy-eight lifetimes in his memories!

In all the seventy-eight lifetimes, other than Wang Baole himself, Sun de was the only person. He had evolved over and over again, experiencing sun de’s different lives. It was as if he was looking for a direction and an opportunity.

Instinctively, an opportunity to awaken the remnant soul... Wang Baole pressed between his brows. Blood vessels appeared in his eyes as a large number of memories surfaced. However, as he integrated all the memories, absorbed and digested them., his rationality slowly returned. His eyes gradually narrowed, and they shone brightly.

Everything seemed to be completely clear!

Sun De, who was an ancient remnant soul, had tried to wake himself up from his second life. Unfortunately, the ancient remnant soul did not appear until the 79th life. Although it waited for Wang Yiyi and her father, this remnant soul., did not wake up in the end. It dissipated in the world for eternity.

Sun De’s endless reincarnation also ended because of this.

The world that followed might have fallen into darkness. There wouldn’t be any life left, and it would have turned into a deathly stillness. However, all of that had changed because of Wang Yiyi’s injuries and the arrival of her father and daughter.

That was why in the eightieth life in the universe, Wang Baole had used Xu Yinling’s enlightenment to see bubble after bubble of dreams. He recalled that it might have been the earliest birth of life.

The words, pictures, butterflies, and so on that followed were the process of life growing on its own and becoming richer..

The last ten lives of this universe were created by Wang Yiyi and her father... Wang Baole murmured. He thought of a sentence. There was a God in heaven, and he understood it now.

Wang Baole knew what Wang Yiyi’s father’s goal was. It was to treat Wang Yiyi’s injuries. The reason why the father and daughter were able to create all living things in this universe must have something to do with what Sun De had said before his death in the seventy-ninth life, it’s about what he said.

He promised Wang Yiyi’s father to help him save his daughter.

As for Wang Baole himself, at that moment, he knew that he owed Sun de a favor in the end, as his memories from his second life to his eighty-ninth life were integrated.

Because if it wasn’t for Sun De’s inheritance in the 79th life, when his remnant soul dissipated, then perhaps he would still be a black plank floating in the starry sky, although he was born with an instinct, but he wouldn’t have been born with true life.

Wang Baole had also guessed the origins of the blood-colored centipede. He didn’t know which of the two answers was correct, but the truth... was one of them.

The first possibility is that when Luo and Gu were fighting for the immortal seat, in countless lives and within karma, they fought endlessly. In the end, Luo won, but Gu managed to escape from the remnant soul, leaving Luo's immortal seat incomplete and flawed. However, he didn't know that within the remnant soul... There was still a sliver of Luo's consciousness. This consciousness... for some unknown reason, eventually gave birth to sentience

"As for the second possibility..." Wang Baole was deep in thought. As he reorganized his thoughts, he thought of the roar that came from the blood-colored thread in his second life, which he had suppressed instinctively and disliked.

"You dare to suppress immortals..." Wang Baole murmured. That was the source of the second possibility that he had guessed.

"The second possibility is... that the blood-colored thread is not a wisp of Luo's consciousness. It is... Luo and Gu, who fought over the entire ring... the immortal seat. Perhaps the immortal seat itself has a spirit, or perhaps it doesn't have a spirit. But here, under a special environment and conditions, it has given birth to a spirit. As for the centipede that I saw, it wasn't its true appearance. It was just a symbol!" "!"

Wang Baole fell silent. Either of these two guesses could be correct, and it made sense logically. That was why Wang Baole had no way of knowing for himself. Just as he was thinking about the deeper details..., suddenly... he felt his heart palpitate. When he raised his head, he saw a sea of light in the distance in the murky starry sky.

The light encompassed an endless area, and it carried a strong sense of dominance. It spread out from the distant starry sky. If one looked closely, they would see that within the Sea of light was a universe!

The universe was infinitely large, containing countless stars. There were even shocking ripples that erupted within it. As it arrived and as Wang Baole turned his head, he saw a giant beast that was extremely pale in color in the starry sky behind him, it was howling as it materialized.

The giant beast was like a whale, and its size was similar to the sphere of light. Upon closer inspection, one could see that there was a continent within its body. Countless cultivators flew out from the continent, transforming into the flesh and blood of the giant beast, giving it the power to..., shake the gods.

In the blink of an eye, as the giant beast and the Sea of light collided, a great battle that affected the entire universe erupted before Wang Baole. At that moment, he immediately realized what he was seeing in his first life, what he was seeing!

It was... the Battle of annihilation between the first and second universes that had been born at the beginning of the second cycle. It was... the battle between the Endless Dao Domain and the vast dao domain that had occurred countless years ago!

Wang Baole, who was on the battlefield, watched the battle between the two vast universes with his own eyes. He saw countless deaths, saw madness, and tragedy. He saw the entire process of the battle.

Be it the vast dao domain or the Weiyang Dao Domain, the power they displayed was so strong that it shook Wang Baole's heart. He remembered the secret that Wang Yiyi's father had told the ancient remnant soul.

Weiyang wasn't the real Weiyang!

As those words reverberated in Wang Baole's mind, he saw all the cultivators on the continent, who were at a disadvantage within the pale giant beast's body, kneel down and worship it!

The object of their worship was a statue!

It was the statue of an elder!

That was... the first cultivator to be born in the vast expanse dao domain. It was also the highest will in the vast expanse dao domain. He didn't have a name, only a title.

The vast expanse patriarch!

Chapter 1102, three-foot-long Black Wood!

Wang Baole saw with his own eyes that on the continent within the body of the vast beast, as countless cultivators worshiped and worshiped, the statue of the elder standing in the middle of the continent transformed from a statue into flesh and blood, until it opened its eyes.

At the same time, an even stronger palpitation, accompanied by a resonance that made Wang Baole tremble, suddenly emerged from within the light ocean universe of the never-ending DAO domain!

"This feeling..." Wang Baole turned his head abruptly. In that instant, across the starry skies, across the light ocean universe, he saw countless cultivators in the never-ending DAO domain kneeling and worshipping!

What they worshipped... was a vortex!

It was a vortex that connected to an unknown place. As everyone worshipped it, and as the vast expanse patriarch, who was the statue inside the giant pale Beast's body, stared at it, a piece of wood appeared within the Vortex!

The appearance of this piece of wood caused all of the cultivators in the Weiyang Dao domain to be filled with excitement. Their eyes shone with fervor, and even the powerful experts and almighty experts felt the same way!

It was a black piece of wood, more like a black wooden coffin. From within the vortex was a foot and a half long... . Although it was only a foot and a half long, it caused the vast expanse continent to tremble, and the vast expanse beast to wail in pain, it was on the verge of collapse, and patriarch vast expanse was trembling, and blood sprayed out of his mouth.

Next... the coffin emerged from within the Vortex, a foot and a half long. This Time... The vast expanse beast collapsed, and miserable shrieks echoed out through the starry sky, revealing the vast expanse

continent within, as well as the land mass itself, all of the cultivators were screaming in madness as they charged out, seemingly ready to perish together.

The countless cultivators in the Weiyang dao domain who were worshipping the coffin were clearly not having an easy time either. Although they were still as fanatical as ever, most of their lives had already faded away. It was as if they had lost seventy percent of their life force, it was as if the power that supported the black wooden coffin was their life force.

At that moment, they were already at their limit, and could no longer support it. They could only allow the black wooden coffin to stretch three feet out from the vortex, and that was when they had no choice but to end the ritual.

As the ritual ended and the vortex disappeared, the black wood that was only three feet long and was clearly only a portion of the complete coffin fell down as if it had self-destructed.

As it fell, all of its power seemed to disappear, leaving behind only a trace of reluctance to part with the unknown place in the vortex. Gradually, it became ordinary and unremarkable, just like ordinary wood.

At that moment, Wang Baole's body trembled as he stared fixedly at the three-foot-long black wood. Then, he slowly raised his head and looked at the spot where the vortex had disappeared. Countless bolts of lightning seemed to explode in his mind at the same time, and a loud boom rang out, a sense of reluctance that seemed to be buried deep within his soul also surfaced in his consciousness.

The war had reached its final stage as the countless cultivators in the vast expanse dao domain went crazy. The cultivators on both sides began to clash with their lives. The tragic battlefield was like a giant millstone of flesh and blood, rolling endlessly, it was constantly being crushed..

Eventually, everyone in the vast expanse dao domain was destroyed and turned into ruins. Patriarch Vast Expanse was transformed into a broken statue. After being destroyed several times, a portion of the ghost-like land mass floated out into the starry sky. The war.., was finally over.

Although the Weiyang Dao Domain won, it was equally bitter. The Sea of light had been torn to pieces, and the universe within had been shattered. However, given enough time, the Weiyang Dao Domain, which had absorbed all of the vast expanse dao domain's resources, would become even more powerful, it would definitely become even more powerful. However, just as the Weiyang Dao Domain was trying to chase after the last piece of land that the vast expanse dao domain had escaped from... something unexpected happened!

It was a streak of light. A streak of black and red surrounded it, forming a purple streak of light that was constantly dimming!

The streak of light flew over from the depths of the distant starry skies. It was so fast that it surpassed everything else. Wang Baole was still immersed in the Black Wood's reluctance to part with it, but he could still see a vague figure within the streak of light.

It was... Sun De!

In the blink of an eye, the moment Wang Baole saw it clearly, the ray of light charged straight into the Weiyang Dao Domain, which had suffered a crushing victory. It was almost in pieces. The Ray of light

seemed to have an accurate direction as it dissipated rapidly within itself, it was about to disappear completely. It charged straight towards... the three-foot-long black wooden coffin that had fallen!

It approached in the blink of an eye and disappeared into the black wood.

Wang Baole's heart trembled violently. Deep in the starry sky, where the purple light had appeared, the starry sky collapsed instantly. A gigantic figure emerged from the collapsed starry sky, step by step.

The figure was extremely tall. His appearance was blurry, and he couldn't be seen clearly. It was as if his face was the universe. Only his eyes could be seen. There was coldness in his eyes, as if there were no emotions in them.

Other than that, his two arms were the most eye-catching. Although he was in human form, his arms were much longer than the average person's. It was as if he could touch his knees when he stood up!

He stood there, staring coldly at the shattered Weiyang Dao Domain, as if he were looking at an ant nest. When his gaze fell on the three-foot-long black tree, his eyes, which seemed to have never changed since ancient times, suddenly shrank!

There was confusion, shock, and disbelief in his eyes. He stood there without moving for a moment. Finally, he raised his hand, as if he wanted to grab the black wood within the Wei Yang Dao Domain. However, when he raised his hand..., hesitation appeared in his eyes again, and he gradually put it down.

After a long silence, he raised his hand again. This time, he didn't grab it. Instead, he waved his finger and pointed at the entire Wei Yang Dao Domain. A deep voice rang out from his mouth.

"Seal!"

As soon as he spoke, Wang Baole immediately saw that ripples had appeared silently around the broken Weiyang Dao Domain. The ripples gathered and formed a bubble that enveloped the entire Weiyang Dao Domain, then, it gradually became blurry, as if it wanted to immerse itself in the passage of time and be sealed forever.

However, as the tall figure stared at the sealed bubble, he didn't seem to be at ease. He raised his left hand again and pointed towards it.

"With my left hand, seal!" The index finger on his left hand snapped, transforming into a gray light that shot toward the bubble. As it surged in, the entire bubble turned turbid, as if it had turned into a ball of dirt.

However, the tall figure didn't leave. He stood there thoughtfully for a moment, then spoke again.

"With my second finger..." the tall figure paused for a moment. After a moment of silence, determination appeared in his eyes, as if he had made up his mind. He lifted his left hand, and a deep voice that seemed to echo out over countless years rang out.

"With my left hand, seal!" As soon as he said that, his entire left arm disappeared in an instant. It turned into a gray light that seemed to cover the entire starry sky, enveloping the sealed Weiyang Dao domain, the shape of the earthen ball changed rapidly as the gray light merged with it. When all the gray light in the starry sky gathered together, the earthen ball turned into... a gigantic stone tablet!

Wang Baole's heart was in turmoil. He watched as the stone tablet exuded an earth-shattering pressure and slowly sank into the starry sky. It continued to sink and fall, as if it was buried in an endless abyss.

The tall figure, who had lost his left arm, stared at the stone tablet as it gradually disappeared and was buried. A deep loneliness appeared in his eyes. He slowly turned around and walked towards the starry sky. However, the moment his figure slowly disappeared into the starry sky., wang Baole suddenly heard his deep voice.

"I like the second-level universe. It's mine."

"Do you know... What it feels like to like it?"

The tall figure only said those two words before he slowly disappeared. Wang Baole was the only one left in the starry sky. He stood there, staring at the spot where the stone tablet had sunk, and then at the direction where Luo Yuan had gone. He was silent for a long time, he murmured.

"Where... Did I come from?"

As he murmured, the starry sky slowly blurred in his eyes. Eventually... it disappeared completely. The fated star, the fated book, and the tired figure of the heavenly dharma master replaced everything that had appeared before his eyes.

"I thought you wouldn't be able to come back."

Chapter 1103 left!

"How long has it been?" Wang Baole's eyes were a little dazed. After a long while, he looked at the exalted Heavenly Dharma.

"Seventy-nine days." It was difficult to hide the fatigue in the eyes of the exalted Heavenly Dharma. As blood vessels filled the air, the aura on his body also fluctuated. Coupled with his pale face, all of this revealed that Wang Baole had been enlightened about his previous life, it had been a huge drain on him.

The old exalted slave beside him was even weaker. He sat cross-legged and closed his eyes to recuperate. It was obvious that the exalted Heavenly Dharma Lord alone could not allow Wang Baole to fully immerse himself in his past life. The Enlightenment he had gained in his past life., it had been the combined effort of the two of them.

The Book of Heavenly Fate was also extremely dim. It no longer looked as bright as it had once been. It had become much more ordinary. It would take a long time for it to slowly recover.

Even though he had used the book of Destiny as a medium in his previous life and used his own strength as a catalyst, and it was mainly due to Wang Baole's own strength, he was still unable to hold on for much longer.

The second to seventy-ninth lives were fine, but the first life involved some unimaginable existences. It was already a miracle that he could hold on until Wang Baole woke up.

Wang Baole didn't know the details, but he could understand the general situation. In the next moment, gratitude appeared in his eyes. He took a deep breath and stood up. He faced the Heavenly Dharma Master and the old slave, who was meditating with his eyes closed, he faced the book of Destiny and cupped his fists and bowed three times!

These three bows couldn't express his gratitude completely. Wang Baole had gained too much from the insights he had gained in his previous life. He had integrated all his memories, learned about his past life, and learned about the present, he had also learned more than half of the truth.

This made his entire aura change. The moment Wang Baole stood up and bowed three times, the ripples of his cultivation erupted.

All the Epiphany he had gained in his previous life, the accumulation of all the years, spread through Wang Baole's body at that moment, pushing his cultivation to continue rising and breaking through the limits of the planet, he had reached... a unique realm that he had never reached before!

The reason why it was unique was that no planet cultivator had ever reached such a level before him. This level was reflected in Wang Baole's nine ancient planets, as well as his Dao Planet!

The resonance of the ancient planets returned with the insights he had gained in his previous life. The resonance of the nine ancient planets and the nine laws continued to rise, eventually stopping at ninety-nine percent!

It wasn't appropriate to describe it as an ancient star. They... should be called quasi-dao stars!

This change had given Wang Baole an unparalleled boost. It had increased his combat strength from its original peak. What had changed was his Dao Star!

The dao star shone brightly in his soul. The biggest change was the size of the dimension!

The original Dao Star had been a high-ranking planet, but now... It was still a planet, but its size had surpassed that of an ordinary star!

At the very least, all the stars that Wang Baole had seen so far were far inferior to his own dao star. The power contained within such a massive planet shocked Wang Baole when he sensed it.

If one were to compare the cultivation of a planet to a lake, after reaching the level of a star, there would be a qualitative change. The water in the lake would turn into ice, and Wang Baole's battle prowess would improve accordingly. Then, at that moment, Wang Baole.., he was still at the level of a planet. However, the water in his lake was not a lake, but... a vast ocean!

The ice in this ocean surpassed that of a star. Even though it was inferior in quality, the sheer amount of ice could make up for everything. The impact of the massive ocean might be strong, but the ice in the lake would be easily destroyed!

It wasn't easy for Wang Baole to judge just how strong he was. However, he knew... that cultivation wasn't his trump card. His trump card was his understanding of the world and... The Shadow of his previous life!

That was why he was said to be the most unique planet-grade cultivator in the entire world of the stone tablet!

All these gains were inseparable from the help of the exalted Heavenly Dharma. After three bows, Wang Baole looked up at the exhausted exalted heavenly dharma and said softly, "Thank you."

"Thank you!"

He didn't make any promises, but this heartfelt thank you was enough to express his feelings. The exalted heavenly dharma naturally understood, and a smile appeared on his face.

"Take care."

Wang baole nodded. He raised his head and looked around. He spread out his supernatural awareness and enveloped the heavenly fated star. He stared at it for a long while, and a look of anticipation for the future appeared in his eyes. He bowed once more to the exalted Heavenly Dharma, and Wang Baole's body swayed, he turned into a long rainbow and shot into the sky!

As he rose into the sky, nine laws from the quasi-dao stars appeared around him. As he rose into the sky, the power of the Dao stars lifted him up. His entire body shone brightly, the void formed auspicious unknown totems in front of him, making him look like the center of the sky as he flew into the sky.

As he flew further and further away, the Heavenly Dharma Lord muttered to himself with a look of blessing in his eyes.

"Actually, I should be the one thanking you. You have also made me... understand the origins of this world."

Wang baole, who had flown into the sky, also heard those words. His body paused slightly, then sped up. As he flew into the starry sky, he was also pondering a question in his mind.

I, where did I come from... Wang Baole's memories of the whirlpool that led to the unknown place surfaced before his eyes. He wanted to know. He even had a vague feeling that within the whirlpool, in the unknown place., there seemed to be something calling to him.

After a long while, he flew into the starry skies and saw the battleship that was still there. Wang Baole suppressed his thoughts. His body swayed, and he headed straight for the battleship at the front.

He used his divine perception to cover the entire area. He ignored the protection of the battleship and saw Xie Haiyang, Chen Han, and the others inside. He also saw the stellar dao protectors from the raging flame galaxy, after he scanned the area with his divine perception for a few breaths, the expressions on their faces changed drastically.

"Who are you?" Shouts rang out from within the battleship. The Stellar Dao Protectors who were protecting Wang Baole and Xie Haiyang, as well as the dao protectors who were following Chen Han, rushed out of the battleship. They stood outside the battleship as if they were facing a great enemy, they looked at Wang Baole, who was approaching.

There were more than thirty stars in total. Other than two yellow-grade stars, the rest were mortal-grade stars. Even so, as these stars appeared, their auras and the ripples they emitted were still as powerful as ever.

Even though they were filled with powerful auras, their expressions changed as they stared at the terrifying shadow that had rushed out from the fated star.

They couldn't see Wang Baole's real body. It was as if there was some sort of cognitive barrier between the two parties that prevented them from seeing everything about Wang Baole clearly. It didn't matter if it was his presence or his figure.

They could only see... an illusory star that surpassed the stars. It had an extremely majestic presence. It had suddenly appeared outside the fated star and was approaching them with a loud bang.

It was clearly not a star, but a planet. However, the suppressive force emanating from it made the stellar cultivators shudder in fear and shock. That was especially so when they saw that outside the gigantic illusory planet..., there were nine planets orbiting around it. It was like a satellite, making its presence even more terrifying. This made the stars instinctively want to unleash their supernatural powers.

Xie Haiyang and Chen Han's eyes were solemn at that moment. Fortunately, Wang Baole immediately sensed his condition. It was as if these familiar people couldn't see him clearly. He paused for a moment before speaking.

"It's me."

As his words reverberated in the air, under Wang Baole's deliberate suppression, the dao stars and quasi-dao stars outside his body shrank rapidly. Eventually, they were all retracted into his body, and he used the origin illusory art, after allowing his appearance to be reflected in the eyes of others, his figure finally appeared in front of everyone's eyes.

"Young Lord?"

"Uncle-master Baole?"

"Dad?"

The stellar cultivators from the raging flame galaxy, Xie Haiyang, and Chen Han widened their eyes in disbelief as they stared blankly at Wang Baole.

They knew that Wang Baole had gained a lot during the heavenly fated star trial and had performed well during the birthday banquet. However, now that they had witnessed the vast expanse of stars and the strange state that seemed impossible to see with their own eyes, their hearts..., they couldn't help but stir up huge waves.

Chapter 1104, arrogance!

The storm outside the fated star quickly ended. Everyone was shocked, but they eventually accepted the fact. The way they looked at Wang Baole was no longer the same as before.

The dao protectors from the raging flame galaxy respected Wang Baole, but it was mostly because of the blazing flame ancestor. However, things were different now. Wang Baole had used his own combat strength and his own aura to make the stellar cultivators..., they were filled with awe and respect.

In their entire lives, they had never seen a planet that could exude such a terrifying aura like Wang Baole. Furthermore... that state of being invisible had also caused all the stars on the battleship to..., they had too many guesses in their hearts.

This was because normally, such a situation would only occur when there was a huge difference in levels between the two of them. For example, the gods could not be looked at directly. This was because all the rules around the gods had to be distorted. Those who were not at a high enough level, once they looked at them.., they would be strongly affected, and they would be unable to withstand the distorted rules. Their perception would be affected, and they would self-destruct.

Wang Baole was just like that just now. Although it was not that exaggerated, it had this characteristic. And this... was the source of the shock in the hearts of all the stars.

Xie Haiyang was equally shocked. However, he recovered very quickly. Beside Wang Baole, he was even more enthusiastic than on the way back. However, on the way back, he had an even more hardworking person by his side.

This person was Chen Han. He had recovered the fastest. He kept calling out for his father, not caring about the strange expressions on the dao protectors' faces or Xie Haiyang's frown.

Wang Baole didn't care about that. After stepping onto the warship, he was deep in thought.

Where was he going!

According to his original plan, after attending the birthday banquet, he would return to the raging flame galaxy to report for duty. At the same time, he planned to make a trip back to the Earth Federation to visit his parents and friends.

However, after experiencing the trials in his previous life and learning more than half of the truth, Wang Baole's thoughts changed. This was especially so after experiencing a crisis where he had almost been possessed.

Although he knew that his previous life was a black board with a mysterious origin, and that he had finally gained true intelligence thanks to Sun De's gift, Wang Baole did not believe that he could not be possessed.

At the same time, he had another guess.

I am the black board, but the black board... is not necessarily me

The black board can be reincarnated and indestructible, but I am not necessarily... in other words, I am the spirit that was born on it, and I can be erased, just like the artifact spirit on the Dharmic artifact

"Even though the artifact spirit has been erased and the Dharmic artifact has been damaged, it doesn't have much of an impact. A new artifact spirit can be slowly refined. Or if it isn't changed, as it is nurtured, the Dharmic artifact itself can give birth to a new artifact spirit under some special circumstances..

"The new artifact spirit that is Born is me, and not me." Wang Baole was silent. Perhaps it was because he had come into contact with artifact refinement from the start, but Wang Baole had his own logic and judgment regarding this point.

He knew very well that the blood-colored Centipede's greed and malice towards him was very strong. Perhaps it wouldn't be long before he was faced with the appearance and possession of the other party. It would be like a Dharmic artifact changing into a different artifact spirit.

If I treat the black wooden board as a Dharmic artifact and my previous life as an artifact spirit, then... There's a problem here. I should be able to display the divine might of the three-foot-long black wood

The arrival of the three-foot-long can suppress all living beings in the vast dao domain... Wang Baole narrowed his eyes. He understood this, but he also understood... that at this moment, he was still unable to control the black wooden board.

There were two reasons behind this. One was that only in this life could he truly fuse all the memories of his previous life. In his previous life, be it the zombies, the resentful soldiers, or the little white deer, none of them could do this.

Therefore, based on Wang Baole's analysis, he felt that this might be the opportunity to start controlling the black board.

The other reason was that even though it seemed like his intelligence had been born for a very long time and had gone through several lifetimes, compared to the countless years that had passed on the black board, he was merely a newborn on its body. He might not even be considered an infant.

Therefore, it was extremely difficult to control the black board.

That was why... the most important thing before him now was to control the black board and how to defend against the blood-colored Centipede's possession. After thinking about it, the only thing he could do was to increase his cultivation!

Only by becoming stronger could he resolve everything.

The star realm is no longer difficult for me. If I wanted to, I could advance immediately... However, even though this kind of advancement is powerful, it's still a little lacking. Wang Baole thought to himself, the star realm that he wanted was the reflection of thousands of stars, supporting his own star.

To achieve this, he needed even more stars!

Special Stars!

I still have to make a trip to... the land of the fallen stars! Wang Baole thought to himself. A look of determination appeared in his eyes. He immediately sent a telepathic thought to Xie Haiyang, informing him of the coordinates of a starry sky.

The coordinates were the entrance to the land of the fallen stars that he had visited previously.

Once there, he didn't need a token. Wang Baole believed that the paper figurine in the fallen star lands would be able to sense him. That was because the token had been left behind for Zhao Yameng when Wang Baole had left the federation, it was one of the foundations of the federation.

As the telepathic thought was sent out, Xie Haiyang immediately acknowledged the order. Soon, the fleet of warships that had stopped outside the fated star began to move with a loud bang. They headed toward the coordinates that Wang Baole had given them, whistling through the air. They were about to leave the fated star system.

At the same time, Wang Baole's thoughts continued. This time, what he was thinking about was... Luo!

"I like the world in the second ring. It's mine..." Wang Baole mumbled and repeated what Luo had said. It was hard for him to imagine that a mighty figure with cold and emotionless eyes... would say the word "Like".

However, in his memories, he could clearly feel that what Luo had said was true.

Wang Baole fell silent. He thought of the story that Wang Yiyi's father and Sun de had told him about demons, demons, and demigods and demiimmortals. The ending of that story was that they had cut off Luo's fingers one by one, then, they had gathered everyone's strength and killed Luo!

These stories had obviously happened after he had seen the time node in his first life.

There's also Luo's seal on the black wooden board. From the beginning, it was an ordinary seal, all the way until it was sealed with one finger. In the end, he didn't hesitate to use his entire left arm to seal it..

Why is he doing this? Is he afraid of the black wooden board, or... is he trying to protect the world that he likes? Wang Baole couldn't figure it out, but he thought of Luo's final question. Does he know what it feels like to like.

This made Wang Baole even more silent. At that moment, Little Missy's voice reverberated in Wang Baole's mind.

"Fatty, you've been influenced. Liking often means possessing

"If you like butterflies, do you think it's better to watch them fly freely, or to turn them into a specimen and place them in a book?"

Wang Baole was shocked. After carefully savoring little Missy's words, he whispered softly.

"It's not good. I don't like butterflies. I like you."

"Damn Fatty, I'm talking business with you!" Little Missy snorted.

"I'm also talking business!" Wang baole blinked and coughed. He realized that Little Missy was the best way to soothe his emotions. She could soothe his emotions to the greatest extent. However, just as he was about to change his mind.., just as he was about to continue to soothe his emotions, he left the fated star system with the fleet of warships he was on..

The moment he left, a sense of danger appeared in Wang Baole's mind. He raised his head and looked into the distance. He saw... in the distant starry sky.., a middle-aged man dressed in black sat cross-legged on a meteorite that seemed to have been suppressed to the point where it couldn't move. He was holding a longsword in his arms.

The man's body emitted a strong vibration. At that moment, he opened his eyes abruptly and looked at the group of battleships where Wang Baole was. However, he did not seem to be able to sense Wang Baole. Therefore, the corners of his mouth remained curled into a lofty smile, a calm and arrogant voice came from his mouth.

"Wang Baole, thank you for saving your head for me for so long. Now, you can hand it over to me."

Chapter 1105 came and went in a hurry!

The person who had spoken was the clone that Zhong Yizi had arranged for him. The clone had actually arrived a long time ago, but he didn't dare act rashly in the fated star system, so he had chosen to wait here.

After all, although the fated star system was large, due to some special reasons, there was only one entrance and exit. Therefore, if he waited here, he could naturally wait for Wang Baole to appear.

In his opinion, killing Wang Baole this time wouldn't require much effort. The only thing he needed to worry about was the blazing flame ancestor. However, he believed that the person who had asked him to kill Wang Baole would be able to block karma.

Therefore, what he needed to do now... was to silence everyone here.

He didn't care if there were other prodigies among them. As for the so-called dao protectors, in his opinion, they were all trash from the mortal path. If they could win in terms of numbers, what was the point of everyone cultivating.

That was why when he said those words, his arrogance was evident.

His words were indeed too arrogant!

At that moment, almost everyone in the battleship had similar thoughts when they heard those words. It caused all the dao protectors to be displeased.

They could already tell that the newcomer was also at the cultivation level of a star. They couldn't see through the details, but... There were more than thirty stars, and there was only one person on the other side. No matter what, they had the advantage in numbers.

Furthermore... There was Wang Baole, that terrifying existence. Therefore, most of the people present were displeased and didn't seem worried at all. Xie Haiyang was about to speak, but someone was one step ahead of him.

"Dad, this guy is too arrogant. Let me capture him for you!" After hearing the words of the person sitting cross-legged on the meteorite outside the warship, the first person to express his anger and displeasure wasn't Wang Baole himself, it was his son... Chen Han.

Chen Han was furious. He didn't wait for Wang Baole to speak and immediately waved his hand, shouting orders to his left and right.

"Please, dharma protectors, capture this person and bring him to my father for interrogation!"

As a dao child of the Seven Spirit Dao, the dharma protectors around Chen Han were at the mortal realm, but they also possessed mystic arts. They were extraordinary. As soon as he spoke, the Seven Stellar Dao protectors following him immediately obeyed his orders, they flew out into the starry sky outside of the battleship and shot toward the Coxcomb clone.

However, in the instant that the seven of them charged out, a vicious smile appeared on Chong Coxcomb's face. He lifted his head and looked up into the starry sky. Almost at the same time, a violet beam of light shot down from the starry sky with a supreme divine might, it turned into a purple screen

of light, enveloping the area where everyone was, as well as all the battleships and Chong Weizi's clones!

It was like a spell formation, but also like a seal, isolating all auras, isolating some karma, isolating all senses from the outside world. It was as if... This place had been separated from the starry sky.

Before any of the seven people could react, they saw that the area was covered by a violet shield of light. As for Chong Weizi, she sat there laughing, and killing intent exploded out in her eyes. She leaped into the air, and the meteors beneath her shattered into pieces, they transformed into countless pieces of rubble that shot toward the battleships with shocking power. She shot forward as fast as lightning.

In an instant, they collided with the seven incoming stars. The two parties merely crossed paths, and Chen Han's seven dao protectors coughed up blood. Their bodies were sent tumbling backward, as if they were so weak that they couldn't withstand a single blow!

"Too weak!" As he laughed maniacally, Chong Coix charged towards the battleship where Wang Baole was. The killing intent in his eyes was intense, and a murderous aura erupted from his body. To him, this was a simple attack. However, in case something unexpected happened.., it was better to kill Wang Baole to complete the mission first before silencing the others. That would be safer.

Wang Baole's expression remained the same as he stood within the warship and stared coldly at Chong Coix who was charging towards him. He didn't move, but the expressions on the faces of the Stellar Dao protectors beside him changed. They charged out instantly and charged towards Chong Coix.

Chong Coix's strength was fully demonstrated at this moment. Even though the cultivation of this clone was only at the early-stage of the star realm, when faced with the arrival of more than ten stars, all he did was raise the sword in his arms and slash down abruptly, a terrifying shockwave erupted from his body, causing the more than ten stars to tremble and retreat.

"What's the difference between a mortal star and a stray chicken or dog?" Chong Coix threw his head back and laughed loudly. The faces of the stars changed as they retreated and exclaimed in shock.

"An earth-grade star!"

Stars were divided into the heaven, earth, and profound Huang fan. The five levels were the weakest among the early-stage stars. The mortal level was the weakest, followed by the yellow level. The profound level was rare, and the earth level was even rarer. As for the heaven level... it could only be described as rare!

Therefore, the moment the earth level appeared, it could sweep across stars of the same level. At that moment, Chong Weizi was sweeping across the area. She laughed loudly as she strode towards the warship where Wang Baole was, laughing maniacally.

"Wang Baole, no one can save you. I really want to see what the Crushed Dao star looks like!" As Chong Weizi spoke, she was already a thousand feet away from the warship where Wang Baole was.

Inside the battleship, Xie Haiyang's expression changed slightly, but he returned to normal in an instant. As for Chen Han, he didn't seem to be worried at all. Instead, he crossed his arms over his chest, his eyes filled with contempt and disdain.

As for Wang Baole, there was a hint of curiosity in his eyes. He really wanted to know what level of combat strength he was currently at. If he were to test himself, he wouldn't be able to let go. Now that he saw that someone had taken the initiative to approach him., his interest had increased significantly.

Of course, the most important thing was that he saw the purple screen of light, as well as... the afterimage of the future that he had seen in the book of Heavenly Fate. There was a scene that wasn't exactly the same as the one before his eyes, but it wasn't much different.

"Purple Moon, huh..." Wang Baole narrowed his eyes and released his control over the dao star in his body. In the blink of an eye, his dao star appeared outside the warship from a young age!

At first, it was just a speck of light, but it rapidly expanded to the size of an ordinary planet. This made Chong Yizi, who was approaching rapidly and was already seventy feet away, laugh.

"That's it?" Chong Yizi seemed a little disappointed. He shook his head and approached again. When he was fifty feet away, his footsteps paused for the first time. The dao star in front of him was no longer the same size as before, it had expanded to the size of half a star.

"Interesting." Chong Yizi's eyes lit up. He laughed again, and his speed increased. He was three hundred feet away. However, in the next moment, his footsteps paused again. His eyes were filled with surprise, he looked at the Dao star that had expanded to the size of an ordinary star.

"Not bad, not bad. This is what makes it interesting!" Such a dao star did not deter Chong Yizi. Instead, after a pause, excitement and a strong desire to fight appeared on his face. His laughter grew louder, and he crossed another hundred feet, when he was only twenty feet away from where Wang Baole was, his footsteps... stopped for the third time.

Following that, he blinked rapidly, and the excitement in his eyes was shattered into confusion.

"What is this?" Chong Yizi muttered. He stared blankly at the terrifying star before him that was growing larger and larger. It was now three times the size of an ordinary star, and it was still expanding.

As he watched, the Dao Star continued to expand by five times, six times... until it reached a terrifying area that was ten times the size of an ordinary star.

It was like a small galaxy, and nine ancient, satellite-like planets appeared around the enormous dao star. They emanated shocking, earth-shattering power that shook the natural laws of the starry sky.

From a distance, the Majestic Dao Star looked like a cosmic eye that was staring at the incredibly tiny chong job son. His body trembled uncontrollably, and all of his excitement and fighting spirit instantly vanished.

Chong job son didn't want to tremble, but he couldn't control his body. The terrifying natural laws and power from the Dao star and its satellites affected and distorted his surroundings, causing all of his flesh and blood to tremble instinctively.

"This is... This is a planet?" As Chong Yizi muttered to himself, the confusion in his eyes finally turned into shock. He was silent for a few breaths..

Then, he suddenly turned around and retreated. He used almost all of his cultivation base to speed up, and fled frantically without looking back!

Chapter 1106 was a little numb!

"Your sister, your sister!"

"Who told me that this is a Planet?"

"I've never seen such a freakish planet!"

Chong Weizi's speed was so fast that it was like a ray of light. In an instant, she had retreated thousands of feet in front of Wang Baole. She did not stop, nor did she care about her reputation. Even when he had previously appeared, he had spoken arrogantly, even as he approached Wang Baole, he had done so in a disdainful manner.

However, there was nothing he could do. His clone was also a part of his original body. Once something happened to his clone, his original body would also be partially affected. The fear in his heart and the sense of danger that made his scalp tingle made Chong Weizi., he hated himself for being too slow.

He was going crazy. He felt that he was the most unlucky person in the entire universe. It was as if he had placed his hopes on a girl. He had rushed into her room and locked the door with excitement, making it difficult for her to escape from his devilish grasp, however, the moment he pounced on her, the young lady had turned into a burly man who was even scarier and stronger than him..

Something must have gone wrong. How could this be... Chong Lizi howled in his heart. He felt even more regretful. He felt that it would have been great if the main body had arrived. Killing Wang Baole would have been effortless, however, the clone that only had thirty percent of the combat power of the main body now had no way to kill this planet that he had never heard of..

This drove him crazy. He cursed the existence who had told him that Wang Baole was only a planet. His speed became faster and faster, and in an instant, he was far away.

The surrounding Stellar Dao protectors weren't surprised to see the reversal. In fact, when they saw the appearance of Chong Weizi, they had already predicted this scene.

Chen Han, on the other hand, had an arrogant look in his eyes as he snorted coldly.

"He dares to fight with Daddy. This kid must have lost his mind. He doesn't know that Daddy will always be daddy!"

Xie Haiyang, who was standing at the side, heard those words. He felt uncomfortable no matter how he listened to them. His discomfort didn't come from Wang Baole, but from his disdain for Chen Han. In his eyes, Chen Han was extremely shameless, he didn't let go of any opportunity to flatter Wang baole. He had completely lost his dignity as a cultivator. This kind of person made him, who was full of righteousness and proud of the world, look down on others.

Therefore, after letting out a humph, Xie Haiyang's face revealed a respectful and fanatical smile. He bowed deeply to Wang Baole and shouted excitedly.

"Congratulations, uncle-master. You have succeeded in your divine art. From now on, you are unrivaled and unrivaled in the world. I, Xie Haiyang, am the luckiest person in my life. I hope that uncle-master will

allow me to follow uncle-master and listen to uncle-master's teachings for the rest of my life!"! "Uncle-master!"

Hearing Xie Haiyang's impassioned voice, Chen Han was instantly alarmed. He narrowed his eyes and swept Xie Haiyang a cold glance. He felt that this person was really detestable. He was of the same sex, but he was still trying to curry favor with his father. His intentions were definitely not pure, he snorted coldly and was about to continue running toward Wang Baole.

However, at that moment, a loud bang was heard from Chong Coix, who was about to escape from everyone's sight. It was as if he had crashed into an invisible wall.

The sound spread in all directions, turning into ripples in the starry sky. As the sound spread, Chong Coix stood there with tears in his eyes. His head was dizzy, and his gaze was a little dazed. He stared blankly at the void before him, there was nothing to be seen with the naked eye. However, if one used their divine perception to observe carefully, they would still be able to see... that there was a purple screen of light around them..

It was sealed in all directions, blocking out karma, making the place seem independent..

The seal, which was originally meant to prevent Wang Baole from escaping and prevent the blazing flame ancestor from discovering him, had now become a barrier to Chong Coix.

It was obvious that the removal of the seal would require time... even the purple figure who had set up the seal did not expect such a reversal to occur. Therefore, the seal remained in place for a short while.

This... made Chong Coix zi even more frantic. When he paused, Wang Baole, who had revealed all of his dao stars, looked at Chong Coix's figure, who had stopped in the distance, with interest, and said faintly, "You didn't open the door?"

"You closed the door yourself, but didn't have the key to open it?"

Chong Coix Zi shuddered. He turned to look at the giant planet. He couldn't see Wang Baole's figure clearly on the planet. He could only see a vague outline. He was silent for a few breaths. Then, in an instant, his eyes lit up, they shone brightly.

He seemed to be in contrast to the figure that had fled earlier. He looked like a sharp sword that was about to be unsheathed. Rumbling sounds reverberated throughout his body, and his fighting spirit rose in an instant, surging in all directions, the expressions of the surrounding stellar dao protectors changed.

It was clear that Chong job was completely different from before. He wasn't fleeing in a hurry, nor was he arrogant and arrogant. He was calm and composed, and at the same time, he exuded the aura of a powerful individual.

He stood there with his back facing the seal barrier. He stared at the planet where Wang Baole was and spoke calmly.

"I was indeed negligent in this matter. Wang Baole, I wish to leave and have nothing to do with you anymore. Do you agree with me?"

The change in his aura, coupled with his deep voice, caused Chong Coix to immediately give off the feeling that he shouldn't continue provoking him. The surrounding stars and Dao protectors were also fearful, they looked at the planet that Wang Baole had transformed into.

Wang Baole didn't say a word. He raised his right hand and pressed down on the spot where Job's tears was. With that, his planet vibrated slightly and emitted a ball of light, as if it had transformed into a gigantic illusory palm, the nine quasi-dao stars around the planet also emitted light. They spread outwards rapidly and fused into the illusory palm, causing five fingers to appear!

In the end, the palm seemed to be able to turn the sky upside down. It brought with it the power of laws and laws as it charged into job's tears!

Chong Job's eyebrows shot up, and his body instantly shifted to the side. His aura changed again. He was no longer as calm as before. Instead, he exuded a domineering air, and his eyes narrowed, he exuded a terrifying light as well as a fierce look.

"Interesting. It seems that I really shouldn't have only arranged for this 10% combat power clone to come. An opponent like you is worthy of my main body descending. As for you... Are You sure you want to fight to the death with me? !" As Chong Yizi spoke., he had already grabbed the hilt of his sword, and the desire to fight in his eyes surged to the heavens!

In the instant that the illusory palm pounced on him, Chong Yizi suddenly pulled out the sword from his bosom and slashed it down toward the incoming palm!

The slash caused his star to materialize and merge with the sword. With an extremely sharp aura, it collided with the palm in the blink of an eye!

However... There was no loud boom. The moment the shocking sword Qi touched the palm, it was as if it had pressed a block of ice into water. It instantly sank into the palm and disappeared..

"That's it?" Wang Baole was a little disappointed as he looked at Chong Weizi.

This scene changed Chong Coix's aura once again. He forced out a smile that was uglier than crying as he spoke awkwardly.

"Fellow Daoist Wang, I think there must be a misunderstanding between us..."

Before he could finish speaking, Wang Baole shook his head. The illusory palm that he had conjured approached with a loud bang, not giving Chong Coix's clone any chance. He didn't even care about the person's resistance or struggle, he enveloped the clone in an instant and grabbed the clone in his palm.

Without any hesitation, Wang Baole raised his right hand and clenched it slightly. Immediately, the illusory palm that he had conjured was the same. With a loud boom... he couldn't even let out a scream before the clone's body exploded.

As Wang Baole opened his palm once again, everything in the illusory palm was reduced to ashes.

"Too weak." Wang baole shook his head slightly. Everyone around him was shocked. They looked at Wang Baole in shock, not noticing the calm and disappointed Wang Baole, he retracted his palm and shook it gently..

It was a little numb and painful.

However, Wang Baole would never reveal any of it. After returning from the fated star, he realized that he had fallen in love with the attitude of a supreme being. He felt a little regretful at that moment. There were too few onlookers around him, but the attitude that he should have had.., he still had to integrate himself into his daily life. Therefore, Wang Baole maintained his calm and composed attitude. He retrieved the planet and returned to the battleship. A faint voice that seemed to have remained unchanged since ancient times rang out.

“Let’s set off.”

Chapter 1107, the main body descended!

Just as Wang Baole’s planet transformed into a giant hand and destroyed Chong Job’s clone, which was still useless despite its ever-changing aura, the first sect of the left Dao sacred region, within the mountain gate of the Nine Prefectures Dao.., chong Job’s main body, which was floating in the starry sky like a vast star, suddenly opened its eyes!

As it opened its eyes, a sea of fire instantly appeared in its eyes. The fire instantly spread out and covered the entire area, enveloping a large area in flames.

The Void was burned, and the starry sky distorted. Chong job-ee, who was sitting there, instantly withered his left arm. His face turned paler. He didn’t spit out any blood, but his aura was much weaker.

He opened his eyes in shock, and a sinister look appeared on his face. He frowned slowly.

His clone has fallen? Chong job-ee’s expression was ugly, but he didn’t know the exact process. The seal was able to interfere with karma and block out the mighty figures in the galaxy. He would be affected even if he was inside.

That was why the memories the clone sent back were limited to seeing Wang Baole’s battleship fly out and the seven or eight stellar dao protectors. Everything behind it was blank.

Could there be a powerful cultivator hiding inside Wang Baole’s battleship? or could there be an extraordinary person among his dao protectors... or could it be that exalted Heavenly Dharma is helping him? Chong Yizi couldn’t understand, however, he felt that the last possibility was the smallest, and the biggest possibility... was that there was someone among the dao protectors who was not weak.

The thought of Wang Baole personally killing his clone didn’t exist in Chong Coix Zi’s mind. What couldn’t have happened naturally didn’t appear in his mind.

The Blazing Flame Patriarch really loves this disciple... Chong Coix zi snorted coldly. He narrowed his eyes and lowered his head to look at his withered left arm. Killing intent flashed in his eyes.

“How dare he destroy my clone? How can this matter end like this? Patriarch Flame might be powerful, but it’s not like I don’t have a Master!” Having reached this point in his train of thought, he narrowed his eyes and slowly rose to his feet. As he did, the starry sky around him began to rumble, it was as if an enormous pressure were emanating out from him, causing the starry sky in all directions to be unable to withstand the pressure. Cracks began to appear on the surface of the starry sky.

In fact, numerous threads of natural law could be seen materializing out of thin air, twisting and distorting his surroundings. It was as if they were a foil to his surroundings, causing his aura to be shocking.

In truth, that was indeed the case. As a late-stage star, Chong Weizi was an earth-grade star, and therefore possessed incredible battle prowess. Even someone at the great circle of the Black Realm would not be a match for him, not to mention that he had been in closed-door cultivation for many years to break through to the great circle. Although he had not reached it yet, he was only a hair's breadth away.

And once he reached the great circle, what was placed in front of him would be a test like a fish leaping over the dragon's gate. If he succeeded... then the nine regions Dao would have one more mighty figure from the celestial domain!

At the same time, this was more related to the struggle for the orthodoxy within the nine Regions Dao. It was a competition between him and the first dao child who was not a zero. Whoever became the celestial domain first would be able to take over the nine Regions Dao's orthodoxy.

"At this critical moment, you destroyed my clone..." a cold light flickered in Chong Job's eyes. He was very frustrated. If he didn't owe him a favor, he wouldn't have attacked at this time. However, now that his clone was destroyed, if he didn't deal with it..., his Dao Heart wasn't perfect, and it would also affect his cultivation base.

"That's fine. I'll bring back a dao star and see if it can be of any additional help to me." With that thought, Chong job rose to his feet, causing the starry sky in all directions to tremble. His body flickered, and in the blink of an eye, he left the nine Regions Dao's mountain galaxy, when he reappeared, he was already in the vast starry skies. He raised his right hand and did some calculations. He raised his head and took large strides, one step at a time, towards the spot where his clone had died!

At the same time, in the starry skies far away from Chong Weizi, the warship that Wang Baole was on was also moving at an astonishing speed. It kept moving forward, and its target was very clear. It was the entrance to the meteorite land.

Although there was a large area from here to the entrance of the Starfall, it was still much shorter than the distance between Chong Yizi and the Starfall. Therefore, even if the latter was faster, with the speed of the battleship, the battleship and the Starfall entrance..., still getting closer.

Half a month later, Wang Baole could vaguely see the empty white galaxy in the distance as the warship sped along.

From Afar, the white galaxy looked the same as what Wang Baole remembered. That Was... the paper galaxy, or rather, the paper galaxy.

At the edge, the warship stopped. As Xie Haiyang and Chen Han were curious, Wang Baole walked out of the warship and looked at the paper galaxy in front of him. After a moment of silence, he did not ride the warship to show his respect, instead, he left the battleship and the people in it outside. He walked forward and stepped into the paper galaxy.

The moment he stepped in, waves of ripples spread out from under his feet, causing the paper galaxy to ripple and rise and fall like a sea of paper.

Wang Baole's expression was the same as ever. He continued walking forward. A few days later, he arrived at the center of the paper galaxy, where the meteorite cruiser had stopped. He stood there and looked at the void around him. Wang Baole cupped his fists, he bowed forward.

"An old friend has come to visit. I wonder if senior meteorite emperor will allow me to enter."

He had been acting like an expert the entire journey, and he had gained the ability to look down on the entire world of the stone tablet due to the knowledge he had gained from his previous life. However, Wang Baole knew very well when it would be beneficial to him, when it would be disadvantageous to him.

For example, he had to put away his attitude now. Otherwise, it would backfire.

After bowing, Wang Baole didn't panic. Instead, he waited silently. After about ten breaths, an ancient voice reverberated throughout the paper starry sky.

"Please!"

As the voice rang out, the entire paper starry sky began to fluctuate violently. As the ripples spread, the paper starry sky began to fold in half, then in half, then in half, just like a piece of paper.

After the endless folding, the paper starry sky became smaller and smaller, but its height grew higher and higher. This didn't seem logical, but it was the truth. Xie Haiyang, Chen Han, and the others, who were outside the paper starry sky, saw this, this scene shocked them, but they also felt that Wang Baole was even more mysterious.

That was because they knew that other than a fixed invitation, the meteorite land didn't care about the outside world. Even if a mighty figure from the star domain arrived and wasn't allowed to enter, the mighty figure from the star domain would have no choice but to leave.

However, Wang Baole... had arrived here and successfully entered. This made Xie Haiyang even more determined towards Wang Baole, and it made Chen Han even more proud of his status as the son of man.

Amidst their determination and pride, their gazes met subconsciously.

"HMPH!"

"HMPH!"

They quickly moved away from each other..

Similarly, they saw the paper starry sky where Wang Baole was, and the scene of the paper being folded infinitely. There was also... Chong Yizi's true form, who was currently far away in the starry sky, walking out of thin air. He stood there, clearly very eye-catching, however, Xie Haiyang and the others didn't notice anything.

They stared at the paper starry sky that was being folded continuously. They watched as the height of the paper became more and more astonishing, until it turned into a streak of white light and disappeared into the starry sky. Chong Yizi's eyes narrowed solemnly.

That was because he had already seen Xie Haiyang and the others' battleships. He hadn't seen any cultivator in there who could threaten his clone. This caused many guesses to arise in his heart.

"The person who killed my clone has left?"

"Or is it that the other party came from the fallen star land?"

"Interesting..." while muttering, Chong Weizi glanced at Xie Haiyang and Chen Han's battleships. Then, he withdrew his gaze and did not bother with them anymore. He also did not have any thoughts of capturing them or searching their souls. He was too confident, he disdained to know the answer in advance.

He liked the unknown, because it would make a dull life more colorful. He smiled faintly and sat cross-legged in the starry skies.

He believed that Wang Baole, who had entered the fallen star lands, would eventually come out. The answer to everything would be revealed when he killed Wang Baole after he came out.

"I hope I won't be disappointed."

Chapter 1108!

In the starry sky, as the paper galaxy continued to fold in half, and when it completely disappeared from everyone's sight, in another void, the world before Wang Baole's eyes changed abruptly.

It was still the vast sea of paper, but it was no longer black, but white. As for the sky, the Sun, and even the flying birds and seagulls, they were all familiar paper-like existences.

A kindness that came from the will of the entire world emanated from heaven and earth and from all living things. It filled Wang Baole's surroundings, as if he was delighted and welcoming.

Waves rose from the Sea of paper around him, as if they were worshipping him. This feeling made Wang Baole feel comfortable inside and outside his body, and it was even more intimate.

"Welcome back to the land of the fallen stars." Wang Baole turned his head. He was no longer in nothingness. Instead, he was in a boat. The paper figure paddling in front of him was the one he was familiar with back then, the paper figurine turned its head and looked at Wang Baole.

"Senior, how have you been?" Wang Baole took a deep breath and cupped his fists in greeting.

The paper figurine grinned and cupped his fists at Wang Baole as well. Then, it paddled on the paper pulp and broke through the waves. A gust of wind blew against him, blowing up Wang Baole's hair. Then, it didn't leave. Instead, it stayed around him, it turned into gentleness, as if it was dancing.

Wang Baole smiled. After returning to the fallen star, he felt the kindness of the world. He felt an unrestrained freedom and safety. He decided to sit on the deck of the ship. He raised his right hand and

took out a bottle of ice spirit water, he looked at the world around him. In his comfort, he drank one mouthful after another, as if he was drinking alcohol.

“We have an important guest visiting. How can we let him drink alone?” Wang Baole had only taken a few gulps when a voice reverberated around him. The waves churned again, and a paper figurine rose from the surface of the sea. Step by step, it walked onto the ship, it stopped beside Wang Baole, and it raised its right hand and extended it towards Wang Baole.

Even though the paper figurine looked similar, Wang Baole could already tell at a glance that the paper figurine walking towards him was the first emperor of the Starfall Empire who had been in his storage bag back then.

When Wang Baole had obtained the Dao Star and left the Starfall Empire, the first emperor had chosen to stay behind. He had stayed deep within the sea of paper to guard the newly sealed mouth of the mirror vortex.

Looking at the first emperor’s outstretched hand, Wang Baole stood up with a smile and bowed. Then, he took out a bottle of ice spirit water and handed it over. Wang Baole wasn’t worried about whether the first emperor would be able to drink it. To a mighty figure like the first emperor.., the body was just like clothes. It wasn’t important.

That was indeed the case. After receiving the ice spirit water, the first emperor of the paper figurine raised his head and took a big gulp. Just as he was about to let out his usual sigh after drinking, his expression changed. He lowered his head and looked at the ice spirit water in his hand carefully, then, he looked at Wang Baole.

“What is this? It’s So Sweet.”

“Is it good? This is my favorite drink. In the entire universe, only the federation produces it. It’s called Ice Spirit Water.” Wang baole blinked and looked at the paper figurine.

The paper figurine remained silent for a few breaths as it silently tasted the ice spirit water in its hand. After a long while, it curled its lips and placed it aside, looking at Wang Baole.

“You’re early.”

“Senior, you don’t seem to be surprised by my arrival?” Wang Baole smiled upon hearing that.

“When you left that day, I had a premonition that one day, you would return to this place and search for the whirlpool beneath the Sea of paper.”

Wang Baole didn’t say anything immediately. Instead, he lowered his head and looked at the Sea of paper. The whirlpool at the bottom of the Sea of paper was one of his goals for coming here.

He wanted to verify whether the whirlpool was the same one he had seen in his first life, the one that had appeared in the three-foot-long black wood. However, he didn’t plan to go now. He wanted to break through on his own, he would explore it once he reached the star realm.

After some thought, Wang Baole turned to the emperor before him and cupped his fists slightly.

"I have come to seek permission from the Emperor and the Starfall Empire to summon a special planet and... upgrade to a star here!" Wang Baole's expression was solemn as he looked at the Emperor of the paper figurine generation.

"It's a small matter. How many do you need?" The Emperor of the paper figurine generation asked in a relaxed tone. On one hand, Wang Baole was a benefactor to the Starfall Empire. On the other hand, he had an impressive background. Naturally, he wouldn't reject such a request, after all, there were more than ten thousand unique planets in the Starfall Empire. It wasn't a big deal to give some away.

"This... is about ten thousand?" Wang Baole asked in a low voice, a little embarrassed.

"..." the first emperor of the paper figurine fell silent. He picked up the ice spirit water that he had placed aside and took a big gulp. He couldn't help but ask.

"Are you sure you only need to upgrade to a star?"

"I plan to use the tens of thousands of unique stars as embellishments. As I transform them into a starry sky, my dao star will be raised and my dao star will break through and evolve from a planet to a Star!" Wang Baole knew what he was asking for, basically, he had emptied out about ninety percent of the capital of the Starfall Empire. Therefore, after he finished speaking, he added another sentence.

"If there's anything that you need me to do, please tell me. Also... If you can't give me that much, I can give you less... that's fine too..."

"I can make the decision if it's less than a thousand, but if it's ten thousand... I'm no longer in charge of the current Starfall Empire... That's why even though I want to give it to you, I can't make a decision. The emperor is here. You can ask him yourself." The first emperor of the paper figurine cleared his throat, he looked into the distance as if he was trying to shift the blame. Naturally, Wang Baole realized that something was wrong. He felt a headache coming on. As he pondered how he could get the other party to agree, he raised his head and looked over. Soon, they saw more than a hundred paper figurine charging towards them from the distance.

The paper figure in front of them was the current emperor of the Starfall Empire. The ripples from the galaxy around him were extremely powerful. He landed on the ship as he took a step forward and smiled at Wang Baole.

Wang Baole greeted him with a smile. He hesitated for a moment before saying the same words as before. The Emperor of the Starfall Empire hesitated as well. He exchanged glances with the first generation patriarch and fell silent for a moment, it was obvious that he was in a difficult position. He was about to decline politely.

However, at that moment... The Sky, which had been bright during the day, suddenly rumbled. Distorted ripples reverberated in the sky. It was as if a white curtain had been lifted by someone, revealing the Black Sky!

In the sky, the light of the stars rapidly materialized. When the stars of all levels were added together, the number exceeded a million. It spread across the entire starry sky. Faintly, the will of the entire meteorite land came from within, it seemed to have turned into a voice that reverberated in the minds of Wang Baole and the two emperor paper figurines.

“But!”

The reverberation of the will caused the two emperor paper figurines to look at each other again. The current emperor had an awkward expression on his face.

“Baole, Don’t blame me for hesitating earlier. It’s really...”

“What’s there to hesitate about? I’ve already said that there’s no problem with this matter. Wang Baole is the benefactor of the meteorite empire. His request is worth a hundred thousand, let alone ten thousand. We are all willing to repay his kindness as a person!” The first generation elder of the paper figurines was obviously thick-skinned, he was the same age as the first generation paper figurine ancestor. Therefore, after sensing that the entire world’s will had agreed, he immediately spoke with a solemn tone and reprimanded his junior at the same time.

“You’re right, ancestor.” The current emperor of the star Meteor Empire smiled bitterly when he heard that and bowed to the first generation emperor. The first generation emperor coughed and waved his hand.

“Baole, I’ll give you this starry sky. I don’t ask for anything else. I only hope that one day, when you have the strength and opportunity to truly enter the Vortex, you will bring me along!” His tone was rather magnanimous. Wang baole blinked his eyes, he suppressed his laughter and hurriedly thanked him. At the same time, he nodded his head seriously. After agreeing to the matter, he took a deep breath and didn’t wait any longer. He leaped into the air and headed straight for the starry sky!

In the eyes of the surrounding paper figures, Wang Baole was like a shooting star. As he flew continuously into the starry skies, his dao star appeared outside his body.

The dao star expanded rapidly. In an instant, it reached a terrifying level. The nine ancient stars around him materialized as well. They seemed to be cheering, but they also seemed to be yearning. They accompanied Wang Baole and merged into the starry skies.

In the starry sky, the countless starlight dimmed automatically. It seemed like they didn’t dare compete for Glory. They seemed to be paying their respects, but they also seemed to be suppressing their excitement. It was as if they possessed a certain level of intelligence. They could sense... this opportunity..., to them, it was an opportunity for the stars to transform!

When Wang Baole’s figure completely merged into the starry sky, his voice suddenly reverberated.

“Please bear witness that I, Wang Baole, will be promoted to a star here today!”

As soon as he said that, the millions of stars in the starry skies seemed to be excited, and they shone brightly!

—

They were halfway through writing, and the live broadcast lasted for a few minutes. Did anyone see that? hahahaha, they were a little shy

Chapter 1109, the return of the stars

Sigh, if only girls were like these stars. With just a word from me, they would all be excited. That would be great. Wang Baole stood in the starry sky, looking at the excitement and brilliance of the millions of stars around him. He didn't know why, but.., he had such a strange thought.

However, in order to maintain the status of an expert he had gained after comprehending his previous life, he could only put these thoughts to the bottom of his heart. On the surface, he was as calm as water. He was calm and unhurried, reflecting on the extraordinary feeling he had gained in his previous life, his performance was perfect.

However, he had forgotten that little Missy had a hobby of prying into his thoughts. Therefore, almost the moment Wang Baole's sigh appeared, he heard a cold laugh.

"Is this the reason why you dream of becoming the Federation President?"

Wang Baole's body trembled, and he nearly lost his status as an expert. He thought for a moment, sighed softly, and spoke in his mind with deep affection.

"The madness of a million girls may be good, but they are all to set off my dao star. Little Missy, you... are the Eternal Dao Star in my heart, causing my eyes to be filled with you!"

"Ptui!" Little Missy's angry voice responded to Wang Baole. However, from her voice, Wang Baole could still sense the change in her emotions. He coughed, and his expression became solemn. He sat down cross-legged, he was completely immersed in the circulation of his cultivation, and a strange glow appeared in his eyes.

Little Missy knew that this was the crucial moment for Wang Baole. She spat and didn't speak. Instead, she watched silently. As she watched, Wang Baole's cultivation circulated faster and faster.

From the beginning, it took four breaths of time for his cultivation to circulate through his entire body. Then, it accelerated to one breath of time. As his speed increased, Wang Baole's body became like a huge furnace, emitting a high temperature, it was absorbed by the Dao stars outside his body, causing the light from the dao stars to become brighter and brighter. Even the nine ancient stars around him absorbed a portion of it, causing the light to become brighter and brighter.

It's not enough... Wang Baole's eyes shone with a sharp light, and he was filled with anticipation. Before he went to the raging flame galaxy, he had some understanding of the stellar grade, but he didn't have a complete understanding of it. As the raging flame ancestor sat down and cultivated.., as he read through a large number of ancient texts, his understanding of the stellar grade increased greatly.

He knew very well that stars were divided into heaven, earth, and Huang fan. It was rare to see a person of these five levels reach the mystic grade, and it was usually due to a certain amount of luck. For example, among his dao protectors, there was one at the mystic grade, this person had an unusual status among the stars in the Raging Flame Galaxy.

Previously, when Chong Yizi attacked, this person seemed to have been defeated as well. However, in reality, his injuries were minimal. This was the strength of a black-grade star. As for the earth-grade star... it could only be described as rare, like Chong Yizi.., it was the earth-grade star!

However, he was the Second Dao child of the first sect of the left Dao sacred region. From this, one could see how rare the earth-grade star was. In the entire raging flame galaxy, there might have been earth-grade stars in the past. However, now..

There are no more. As Wang Baole muttered to himself, he retracted his thoughts from the raging flame galaxy. His understanding of heaven-grade stars surfaced in his mind.

Heaven-grade stars were extremely rare in the entire Weiyang Dao Domain. There seemed to be some secrets involved. That was why, from ancient times until now, only the royal family of the Weiyang clan had ever had a heaven-grade star!

Regardless of whether it was heaven-grade or mortal-grade, the method of advancing to a star was similar. They would find a star of sufficient level and fuse it into their bodies. After fusing with their bodies, they would make a breakthrough and form a galaxy within their bodies.

Therefore, the star grade also had another name, which was the galaxy grade!

As for the original planet, it would also become the first planet in the galaxy after the breakthrough.

However, at this time, regardless of whether it was the heaven or the mortal level, although there was a gap, it was not as big as the gap between heaven and earth. The strength between them was mainly reflected in the later cultivation and accommodation, just like a container... if the mortal level was just a cup, then the earth level would be a huge water tank, and the heaven level would be a pool!

The higher the grade, the more stars that could be contained in the subsequent cultivation. To a certain extent, the cultivation of a star-grade cultivator, in addition to their own cultivation techniques, was to devour and fuse with the stars to complete the transformation of their own body.

When they reached the pinnacle, their own galaxy would be infinitely vast and turn into a galaxy. At that time, it would be the moment when the star-grade cultivator broke through their own cultivation.

But what I Want... is not these five levels, but above them... even rarer than a phoenix feather or a qilin horn. The legendary... Dao-level Star! Wang baole's eyes shone brightly. Dao-level.., this was a level that could only be achieved after one possessed a dao star and had great opportunities!

It was to allow a dao star to advance to the Permanent Dao realm!

This was something that only the first generation patriarch of the never-ending clan had done before. After him, no one else had been able to do it. After all, there were too few Dao stars and even fewer opportunities to advance to the Permanent Dao realm. Therefore, no method of advancement had been spread, they had to rely on themselves to figure it out.

On the way here, Wang Baole had already figured out a few methods. For example, the reason why he had been constantly increasing the speed of his cultivation was one of the methods he had analyzed, it was the method that he had considered the most likely to achieve.

He increased the speed of his cultivation, causing his body to continuously emit high temperatures like a fireball. He allowed the fluctuations of his planet to reach its peak, allowing him to sense... the opportunity for a breakthrough.

As his thoughts spun, Wang Baole didn't hesitate at all. The cultivation in his body increased the speed of his cultivation. It gradually changed from one cycle of one breath to three cycles of one breath, five cycles of one day, and ten cycles of one day. He felt that he had reached his limit.

His Dao stars, under the crazy rotation of his cultivation, became extremely hot. The sky above the fallen stars seemed to be burning, and a fiery red glow appeared. The paper figures on the Sea of paper looked at it, their expressions changed.

As their expressions changed, Wang Baole grew anxious. He had already reached his limit of ten cycles of one breath. He couldn't hold on for too long in this state, however... he still didn't feel any signs of advancement.

My instincts tell me that as long as I burn my dao star and consume the power of my dao star, I'll be able to advance in one leap. However, I don't want to burn it and consume it! Wang Baole's eyes flashed. Immediately, the shadow of a zombie appeared outside his body, the illusion of a resentful weapon appeared, as did the illusions of other lives. The Little White Deer was among them. It spread out and merged with his Dao Star, causing the Dao Star to tremble violently. It was as if it had been given a boost of power. Light and heat.., it exploded.

The entire sky in the fallen star area lit up instantly. The dark night turned into a vast expanse of white. As it exploded, it merged with the Dao Star. Wang baole, who was indistinguishable from the rest.., he finally felt a faint barrier!

The barrier seemed to have some sort of restriction that prevented the dao star from advancing. It was as if there was a boundary in the universe. Only by leaping like a fish through the dragon's Gate, allowing the Dao Star to leap up and cross the boundary that had collapsed, could it advance successfully!

He had instinctively felt that as long as he allowed the Dao Star to burn and consume more energy, it would be the same. That was because burning would give him more motivation to leap up. That was because the consumption would reduce the amount of energy that the dao star would consume, allowing it to leap up more easily!

However, he wasn't willing!

At that moment, Wang Baole raised his head abruptly. His voice was solemn and solemn, and it reverberated throughout the entire sky.

"Among the stars that fill the sky... who is willing to accompany me? To walk the galaxy and see the real starry sky!"

As soon as he spoke, the millions of stars that were already shining with excitement went crazy. The light erupted with an unprecedented intensity, causing the starlight in the sky to be countless and vast.

There were tens of thousands of stars within. The light was the strongest. Those were... special stars. As they shone intensely, Wang Baole raised his right hand. His eyes were filled with determination as he spoke softly.

"Return to your positions!"

As his words reverberated, the millions of stars roared and rushed towards Wang Baole. However, the tens of thousands of special stars within were the fastest. In the blink of an eye, they surpassed the other stars, they arrived directly around Wang Baole and surrounded him. They seemed to have formed a stance with each other. As they excluded the other non-special stars, they gathered their strength and released the Starlight, merging into Wang Baole's Dao Star!

The moment the light from the tens of thousands of special stars merged into it, Wang Baole's Dao Star's aura instantly surged. Its range expanded once again, and its aura reached a level that caused the expressions of most of the paper figurines to change drastically.

Wang Baole seemed to be able to hold on all of a sudden. His breathing quickened, and he formed a seal with both hands. He stood up straight from his cross-legged position and let out a low roar.

"Star-sealing rise!"

— Fu —

Tonight, at 6 p.m. , I was broadcasting live in Douyu. My room number was 9199288. Cough, cough. I heard that five girls had transformed into characters from my book and invited me to eat chicken... Don't get me wrong. It's a spirit tail chicken... ..

Chapter 1110 godlike!

The moment Wang Baole spoke..

The tens of thousands of unique stars returned to their original positions and merged all the Starlight into the Dao Stars!

The moment Wang Baole stood up and extended his arms, a huge star chart appeared behind him!

The star chart was the shape of a cow. It was small at first, but it expanded instantly and grew larger. Everyone who saw it was shocked. Eventually, amidst the rumbling sounds, the star chart covered more than half of the starry sky, other than the tens of thousands of unique stars that had fused into the star chart, the other stars had no choice but to retreat and make space for it. When everyone looked up, they even felt as if the star chart had replaced the starry sky.

Only Wang Baole's Dao Star was at the core of the star chart. It was like a huge furnace that was burning fiercely!

The star chart also encompassed the tens of thousands of unique stars. At that moment, the tens of thousands of unique stars seemed to return to their original positions within the star chart. They were arranged according to certain rules. In the blink of an eye, the cow., it shone with boundless light, as if it had transcended the mortal realm and become a divine cow. However, it was not clear, but rather a little blurry!

One could see that the divine cow had its eyes closed and did not open. It seemed to be in a deep sleep, but even so, its body still emitted an aura that caused the entire fallen star region to be shaken!

It was mighty, it was divine courage, and it was a domineering aura that could shake the heavens and shake the heavens once it opened its eyes!

"This is..." the first emperor of the Starfall Empire's pupils constricted. Beside him, the current emperor of the Starfall Empire's expression changed when he saw the Divine ox star chart.

Such a domineering aura... is this the projection of the Starfield? The two exchanged glances and saw the shock in each other's eyes.

However, their shock wasn't over yet. A new change appeared once again. Wang Baole's eyes shone with intense anticipation. The star sealing art in his body started operating abruptly. He flew from the first level to the third level, then to the fourth level., after a brief pause, he broke through and reached the fifth level!

With each breakthrough, the Divine Ox's glow grew stronger by a third!

During this process, the giant divine ox star chart quickly turned from blurry to clear. When Wang Baole's star sealing art reached its peak, the tens of thousands of unique stars., they immediately replaced the meteorites that were originally stored in the Divine ox star chart. They replaced all the ordinary stars within, covering all the immortal stars within. This caused the divine ox star chart to emit a blinding glow.

The light made the starry sky lose its color, made all things dim, and made all eyes seem as if they were about to turn into eternity. It even covered up the light of the Dao stars that were like a furnace!

It enveloped the entire meteorite land in its light!

Wang Baole's body trembled. It wasn't easy for him to push the star sealing technique divine ox, which was formed from tens of thousands of special stars, alone. He had taken the opportunity to successfully break through to the fifth level of the star sealing technique.

However, after sensing it, Wang Baole still felt that that wasn't enough to lift his even heavier dao star. If he wanted to advance... he needed to go one step further!

In my deduction, the star-sealing art exists on the sixth level! Wang Baole's eyes shone with a strange light, he took a deep breath in the starry sky and immediately activated the DAO star that had been formed at the core of the star map. The dao star spun with a loud rumble. The power of law spread from it, and the surrounding satellites erupted, gathering the laws.

All of this caused the dao star's light to shine brightly once again. It was so bright that it surpassed the divine ox star map. It was as if a new source of light had been injected into the star map, causing the light of the star map to be enhanced and strengthened.

This indirectly pushed the star sealing incantation to rotate once again!

The originally dazzling and shocking state rose once again. With the help of more than ten thousand special stars, as well as the power of his own dao star, the light of the Divine ox star map reached an extreme level of brightness. Finally, it exploded with a bang!

It broke through the limit and reached an unprecedented level... the sixth level!

Booming sounds were like heavenly thunder. They continued to explode, as if they could cause the galaxy to explode. They continued to reverberate in the hearts and minds of all the living beings in the fallen star area, becoming the only one.

Almost at the instant the star sealing incantation reached the sixth level, the divine ox trembled. Its eyes also opened under the attack, revealing two rays of extreme light that were formed from countless starlight.

When the light entered the eyes of all living beings in the fallen star land, it caused all the paper men to tremble. At the same time that they trembled, the divine ox that had opened its eyes threw its head back and let out a roar that shook the world!

Moo! !

It was as if... It was alive!

At the same time, outside the fallen star land, in the left Dao holy region, in the Raging Flame Galaxy, the Divine Ox's true body, which was sleeping in the starry sky outside the main star, also trembled the instant the divine ox roared, he opened his eyes and looked into the starry skies. A strange glow appeared in his eyes at that moment. Beside him, the blazing flame ancestor's body also materialized and looked into the distance.

"I didn't expect my disciple to begin his advancement so quickly!" An ancient voice came from either the blazing flame ancestor or the divine bull. As it reverberated in all directions, Wang Baole's senior brothers on the raging flame main star..., also have raised their heads, staring at the starry sky, as if the vision can penetrate the void, see the falling stars outside the land, at this moment gathered to the majestic vortex.

The whirlpool was attracted by Wang Baole's promotion. It condensed from nothingness and silently circled the starry sky, causing Xie Haiyang and the others to be shocked. They didn't know why, but they could guess what was happening, perhaps it had something to do with Wang Baole.

"It's just the advancement to a star. There's no need to be so grand..." Xie Haiyang took a deep breath and mumbled.

"Shut up. How can you mortals know about Daddy's prowess? HMPH, mortal, you don't even know where Daddy came from. If you say it out loud, it'll scare the hell out of you. My Daddy... is the father of all living beings!" Chen Han was shocked as well, however, when he heard Xie Haiyang's words, he immediately gave up and spoke proudly. The dao protectors behind him all lowered their heads, as if they felt that the young master seemed to have become a different person after returning from the fated star, words always made people feel ashamed..

"Your father isn't here. What's the point of trying so hard to flatter him!" Xie Haiyang glared at Chen Han unhappily.

"Mortal!" Chen Han crossed his arms over his chest and snorted, as if he didn't care to explain further.

Chong Weizi, who had been waiting here without anyone knowing, was also shocked from afar. He quickly turned his head to look at the vortex that was slowly spreading around him, then at the entrance

to the fallen star that Wang Baole had disappeared into earlier, his expression was one of shock, and he had a vague feeling that something bad was about to happen.

This is the aura of the tribulation... What's going on

As the outside world shook, the same thing happened in the fallen star. The world changed, and the wind and clouds swirled. Amidst the rumbles, the first emperor of the fallen star held his breath.

"Breaking through to a planet can actually attract the aura of the tribulation... quick, set up the Array Formation!"

As he spoke, the emperor of the fallen star, as well as all the officials, immediately spread out their cultivation, their hearts palpitating. The array formation of the Empire also began to operate abruptly, causing layers of white light to rise across the entire fallen star, they covered the skies.

As for Wang Baole, his aura had reached its limits. He had made ample preparations. After a few breaths of silence, Wang Baole suddenly raised his head and spoke in a deep voice.

"Lift my dao star... break through the void and ascend to the star of the Eternal Dao!"

As soon as he spoke, Wang Baole waved his hands. Immediately, his dao star and the nine satellites rose from the Divine Ox's body and floated above the Divine Ox's head!

As the divine ox raised its head, its eyes lit up. It raised its head to the sky and once again emitted an overwhelming aura. It roared in all directions, and its domineering aura was extremely violent. It shook its body and pushed against the Dao Star, it carried Wang Baole and headed toward the starry sky, toward the invisible boundary. It was like a fish leaping over the dragon's gate... It charged forward!

From Afar, this scene was reflected in the eyes of everyone in the fallen star. They would never forget it for the rest of their lives!

In that scene... The Divine Bull was mighty, Majestic, and domineering. It charged crazily towards the end of the sky with the Heavenly Dao star that looked like it was about to turn into a scarlet sun!

On its back, Wang Baole, dressed in white and with his long hair fluttering in the wind, had a calm expression on his face. His gaze was calm, and his hands were clasped behind his back. He looked like... a God!

—

I'll go and make some preparations before starting the live broadcast. I heard that there will be a game segment (covering my face) . I'm a rookie... .. And I'm nervous, and I'm going live for the first time in my life, so I'm Gonna need you to come and support me and give me some courage... .. Douyu, search for "Ear Root,"and you're good to go, 6:00
