

Y. Goddess 230

Chapter 230 - Planting Curse On River

The breakfast that Evelyn, Mio, and I had prepared was perfectly cooked.

In the morning that was starting to shine brightly like this, I enjoyed breakfast in the form of a hamburger steak made from fresh sharp-horned boar meat.

The scenery around me had also changed after the hard work of the stealth slime herd that had eaten all the rotting sharp-horned boar carcasses.

During all that hard work, I saw Aiko and Sirius joking with each other while enjoying the special sauce that Mio had made.

While enjoying a delicious breakfast like this, I was ready to continue the journey related to the sabotage of the river flow that led to the opposition's noble territory.

Suddenly, I got a tough question from Evelyn.

"Lily-sama, what are you going to do in Earl Timoti's territory?" Evelyn asked which immediately invited the other noble girls to be curious about what I was going to do in their territory.

"I'm just making preparations for the war that will occur within Marquess Rommel's territory," I replied while enjoying a delicious bite of a hamburger steak made from sharp-horned boar meat.

"War preparations? Is it related to the political situation of the hot zone that is currently happening around Marquess Rommel's territory? I have heard from my father that Lily-sama's territory is currently being shadowed by a noble family that has joined the opposition faction," Evelyn replied as if she wanted to get other information about the war preparations that I wanted to do.

"Yes, that's one of the things I'm preparing to face them. With a surprise attack that has occurred first. That will make post-war damage control more manageable," I only gave Evelyn an unclear and ambiguous answer.

Although the status of the Earl Timoti family is within the military faction that supports the noble family. It doesn't mean that they don't think of a way to survive in their territory, especially with their city borders filled with spy agents.

I don't want to interfere in the affairs of a noble family that has its method of managing its own territory.

With that great consideration, I just gave a safe answer that wouldn't make them too worried about my surprise attack plan on Earl Timoti's territory.

"I hope this one plan can make the opposition noble family easily controlled like the curse that has been planted in your body, Evelyn," by giving an answer that gave the keywords about what I was going to do, it made Evelyn confused.

Nom...

Nom...

With the keywords that I had given, I continued my breakfast to enjoy the bite of hamburger meat that was gently chopped in my mouth.

The mixture of seasonings and special sauce made directly by Mio made me moan a little when I felt the pleasure of this morning's breakfast.

"Hmm, this tastes delicious. I didn't expect that the sharp-horned boar meat had such high quality when hunted directly in the wild," I said while watching several noble girls enjoying this morning's breakfast.

I also placed my gaze on Mio who was silent and enjoying her breakfast with happy feeling.

Together with several groups of stealth slimes who joined us for breakfast, the atmosphere this morning felt very special like a family going on vacation.

The food on my wooden plate had been finished and now I was left with another task to clean the cutlery that I had used.

When I wanted to go and wash this wooden plate, a stealth slime suddenly jumped towards my wooden plate using its slime ball body.

Boiinngg...

Boiingg...

The movement of the slime ball's body that snatched my wooden plate and cutlery, made it look like a greedy stealth slime that cleaned my cutlery in one go.

Ploopp...

When the wooden cutlery was clean, one of the stealth slimes formed her human body again and gave a V-shaped gesture with her hands.

"Leave this cleaning task to me, Supreme Commander!" she said proudly and started looking for a dirty wooden plate to immediately clean using her slimeball body shape.

Booiinngg...

Booingg...

I just gave a surprised look after seeing the stealth slime left, who seemed to have become addicted to this morning's breakfast.

Seeing the level of this strange stealth slime's behavior, several stealth slimes did the same to clean the wooden cutlery of the other noble girls who were participating in the current military operation.

Booingg...

Booingg...

Thanks to the initiative given by the herd of stealth slimes who worked tirelessly, it cut down our free time to resume the military operation that had been delayed previously.

But before that happened, I returned to my tent and put on my military uniform to lead the military operation that was about to continue.

This action of mine had made several other noble girls more disciplined and made it a little difficult for Evelyn to organize the formation after breakfast was over.

Braakk!!

Braakk!!

Evelyn's group began to line up neatly to continue their military operation as well as their direct military training.

After returning from my tent and wearing my black military uniform. I was greeted by Mio and Evelyn who seemed ready for duty.

The remains of the breakfast preparations had disappeared and only the tent that was set up for rest was left.

"It seems like you're ready to continue your journey, let's continue our journey on foot after enjoying that delicious breakfast," I said while issuing an order to move immediately.

Through the order I gave, my hand took the small map given by Sebastian.

The distance between us and the large river should be visible.

Tapp...

Tapp...

With the swift movement of Aiko and Sirius, several stealth slimes returned to duty after taking turns patrolling. Those who had enjoyed a delicious breakfast looked more excited after their morale was fully charged.

Together with the movement carried out by Evelyn's group, we found a complicated path connected to five river intersections leading to Earl Timoti's territory and the territory of the opposition nobles.

By comparing the real situation on the small map given by Sebastian. I began to match the natural signs that occurred before my eyes.

"This seems like the right place. What do you think, Zoe?" I asked Zoe who was now crawling slowly from the back of my hair and start using her human form.

"Should I fly to confirm it from the air, Master?" With her body slowly becoming human, Zoe gave a smile that was intended to tease me.

"If you look closely, this is like a river flow that is difficult to hide a natural disaster that can stop the flow of the river," Zoe said while observing the flow of the river before our eyes.

The words uttered by Zoe were precise for the situation in front of me.

In addition to hide a natural disaster that can block the flow of the river, it would destroy the beautiful natural beauty like this.

The flow of the river in front of me was a fast-flowing river that was divided into five branches. In each branch, I could feel the depth of the water and the rapids that were difficult to stop even by natural disasters.

The only way that could be done to prevent the war between the nobles had been blocked.

"It would be useless if we don't do something about this, do you have any other ideas for this?" I asked this question to Zoe who seemed to be thinking about something along with a sly smile that was covered by a thin veil that covered her face.

"I thought about something else about this, my Master. It's just..." while giving an unfinished answer, Zoe began to pull down her thin veil until she revealed her entire face towards me.

Zoe's human body which was not much different from mine had made us look like twin girls. With the same light brown skin color and red pupils, she looked at me with a sensual lick on her lips.

"It's just... it requires a large supply of magic and I don't want to lose all my magic to cast a curse spell that works permanently on a river this big," Zoe said, attracting the attention of the noble girls and Mio.

"C-Curse spell? About what and for what?" I continued muttering while tilting my head to Zoe who seemed serious with her words.

"Master Lily, with a river this big. It would be better to plant a curse spell that can control people's behavior on a large scale," Zoe said, giving her opinion on alternative steps after the option of blocking the river flow with a natural disaster could not be done.

I didn't expect that in the end, this would be the casting of a curse spell that would control people who came into direct contact with the river flow connected through the curse spell planted by Zoe.

Even though I only agreed with the statement about planting the curse as a final solution, in the end, that is what I will use.

"It seems that is the only solution that can be done at this time, our time is limited and thinking of other solutions would be an unnecessary waste of time. Even at this time, we also have to carry out a military expedition to form allies with the Elf race who live in the deepest part of the forest," I said this with other things in mind.

The Limited time... and the Official war preparations between nobles.

All of this has made the time we spent at this moment very worthwhile.

I don't want to spoil the process that is going on behind the scenes at the moment.

"Zoe, can you cast a long-term curse that will activate according to my command?" I said in a cold tone after considering a quite heavy decision like this.

"I can set the curse spell to activate at your will, Master Lily," Zoe replied, making me feel relieved.

"Phew! That's quite a comforting answer. The innocent civilians will be fine if only they don't get involved in the trouble created by the opposition noble family."

"Yes, that's much better and safer than making them suffer slowly by drinking this river water," Zoe supported this decision by pushing her body to touch mine.

Zoe seemed to be hugging me from the front until our breasts touched each other.

Squuiisshh...

I could feel Zoe's breasts slowly pressing against my body and pressing tightly until our distance was getting closer.

"Master Lily, please give me a kiss that makes me a little excited to cast a troublesome and big curse spell while hug like this," Zoe whispered as she started to bring her lips closer to mine.

Chuupp...

When our lips touched each other, I felt a surge of great magic coming from Zoe.

Zoe's back suddenly emitted a magical energy aura in the form of butterfly magic along with a kiss that moved like sucking my mouth slowly.

In the kiss given by Zoe, I felt my magical energy being slowly sucked by Zoe until a large magic circle began to appear above the river that branched into five parts.

Swiiigghhh!!

The enlarged magic circle carved a curse poem given by Zoe until it was permanent in this large river flow.

Brrraasshhh!!

The large magic circle fell and activated the curse that began to take effect.
